Notice on Confidentiality, Intellectual Property Rights and Disclaimers (“Notice”)

Confidentiality. This document and any information, data, representations, materials, recommendations, exhibits, appendices or glossaries contained herein or attached hereto (collectively, the “Material”) is proprietary and confidential to Visa. The Material is furnished to you solely in your capacity as a client and/or potential client of Visa and/or a participant in the Visa payments system. You agree to keep the Material confidential and not to use or disclose the Material for any purpose other than in such capacity. By accepting the Material, you agree that the Material is intended for use by you solely subject to the confidentiality restrictions in (i) the Visa Charter Documents (as applicable), (ii) the Visa Core Rules and Visa Product and Service Rules, the Visa Payment System Operating Regulations – Russia, Visa International Travelers Cheque Operating Regulations, V PAY Core Rules and V PAY Product and Service Rules and Visa Supplemental Requirements (collectively, the “Visa Rules”) (as applicable), (iii) for VisaNet Processors, an executed and valid VisaNet Letter of Agreement on file with Visa, and (iv) for other third parties, a current participation agreement that includes applicable confidentiality provisions, other non-disclosure agreement with Visa that covers disclosure and use of the Material, and/or other confidentiality agreements that limit your use and disclosure of the Material. The Material may only be disseminated within your organization on a need-to-know basis to enable your participation in the product, service and/or program described herein and/or in the Visa payments system.

Please be advised that the Material may constitute material non-public information under U.S. federal securities laws and that purchasing or selling securities of Visa Inc. while being aware of material non-public information would constitute a violation of applicable U.S. federal securities laws.

Intellectual Property Rights. The Material is protected by copyright. The Material and/or any part of the Material must not be duplicated, reproduced, published, distributed or disclosed, in whole or in part, in any form by any means without Visa’s prior written authorization, including to any third party. Visa owns the trademarks, logos, trade names and service marks, whether registered or unregistered, contained in the Material. Third-party trademarks not attributed to Visa are the property of their respective owners, are used for identification purposes only, and do not necessarily imply product endorsement or affiliation with Visa.

Disclaimers. THE MATERIAL HEREIN IS PROVIDED ON AN “AS IS,” “WHERE IS,” BASIS, “WITH ALL FAULTS” KNOWN AND UNKNOWN. THE MATERIAL HEREIN IS INTENDED FOR INFORMATIONAL PURPOSES ONLY AND SHOULD NOT BE RELIED UPON FOR OPERATIONAL, MARKETING, LEGAL, REGULATORY, TECHNICAL, TAX, FINANCIAL OR OTHER ADVICE. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, VISA EXPLICITLY DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, REGARDING THE MATERIAL HEREIN, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT (INCLUDING, BUT NOT LIMITED TO, NON-INFRINGEMENT OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS). VISA DOES NOT MAKE ANY WARRANTIES, REPRESENTATIONS, GUARANTEES OR INDEMNITIES AS TO THE COMPLETENESS, ACCURACY AUTHENTICITY, USEFULNESS, TIMELINESS, RELIABILITY OR APPROPRIATENESS OF THE MATERIAL HEREIN OR OF THE INFORMATION OR MATERIALS REFERENCED HEREIN. VISA IS NOT LIABLE OR RESPONSIBLE FOR YOUR USE OR DISCLOSURE OF OR RELIANCE ON THE MATERIAL HEREIN, INCLUDING ERRORS OF ANY KIND, CONTAINED IN THE MATERIAL. NOTHING IN THIS NOTICE OR THE MATERIAL HEREIN SHALL BE DEEMED TO EXCLUDE OR LIMIT LIABILITY THAT CANNOT BE EXCLUDED OR LIMITED AS A MATTER OF LAW.

USE OF THE MATERIAL HEREIN IS AT YOUR OWN RISK. THE MATERIAL HEREIN SHOULD BE INDEPENDENTLY EVALUATED IN LIGHT OF YOUR SPECIFIC BUSINESS NEEDS AND ANY APPLICABLE LAWS AND REGULATIONS. THE

MATERIAL HEREIN IS NOT INTENDED AS INVESTMENT OR LEGAL ADVICE, AND READERS AND RECIPIENTS OF THE MATERIAL ARE ENCOURAGED TO SEEK THE ADVICE OF A COMPETENT PROFESSIONAL WHERE SUCH ADVICE IS REQUIRED.

THE MATERIAL HEREIN MAY CONTAIN DEPICTIONS AND DESCRIPTIONS OF A PRODUCT, SERVICE AND/OR PROGRAM CURRENTLY IN THE PROCESS OF DEVELOPMENT AND DEPLOYMENT, AND SHOULD BE UNDERSTOOD AS A REPRESENTATION OF THE POTENTIAL FEATURES OF THE FULLY-DEPLOYED PRODUCT, SERVICE AND/OR PROGRAM. ANY FINAL VERSION OF SUCH PRODUCT, SERVICE AND/OR PROGRAM MAY NOT CONTAIN ALL OF THE FEATURES DESCRIBED IN THE MATERIAL. WHERE POTENTIAL FUTURE FUNCTIONALITY IS HIGHLIGHTED, VISA DOES NOT PROVIDE ANY WARRANTY ON WHETHER SUCH FUNCTIONALITY WILL BE AVAILABLE OR IF IT WILL BE DELIVERED IN ANY PARTICULAR MANNER OR MARKET. PARTICIPATION IN PRODUCTS, SERVICES AND/OR PROGRAMS, IF AND WHEN OFFERED, MAY BE SUBJECT TO VISA'S TERMS AND CONDITIONS.

THE MATERIAL HEREIN COULD INCLUDE TECHNICAL INACCURACIES OR TYPOGRAPHICAL ERRORS. CHANGES MAY BE PERIODICALLY MADE TO THE MATERIAL. SUCH CHANGES WILL BE INCORPORATED IN NEW EDITIONS OF THE MATERIAL. VISA MAY MAKE IMPROVEMENTS AND/OR CHANGES IN OR TO THE PRODUCT(S), SERVICE(S) AND/OR PROGRAM(S) DESCRIBED IN THE MATERIAL HEREIN AT ANY TIME AT VISA'S SOLE DISCRETION. VISA MAY MODIFY, REPLACE OR RECALL THE MATERIAL HEREIN AT ANY TIME WITHOUT NOTICE TO ANY PARTY AND AT VISA'S SOLE DISCRETION.

Forward-Looking Statements. The Material contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 that relate to, among other things, Visa's future operations, prospects, developments, strategies, business growth and financial outlook. Forward-looking statements generally are identified by words such as "believes," "estimates," "expects," "intends," "may," "projects," "could," "should," "will," "continue" and other similar expressions. All statements other than statements of historical fact could be forward-looking statements, which speak only as of the date they are made, are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, many of which are beyond our control and are difficult to predict. Visa describes risks and uncertainties that could cause actual results to differ materially from those expressed in, or implied by, any of these forward-looking statements in Visa's filings with the SEC. Except as required by law, Visa does not intend to update or revise any forward-looking statements as a result of new information, future events or otherwise.

Reservation of Rights. Any Visa features, functionality(ies), implementation(s), and/or branding, may be amended, updated or canceled at Visa's discretion. The timing of availability of programs and functionality described herein is subject to a number of factors outside Visa's control, including but not limited to overall levels of anticipated participation and deployment of necessary infrastructure by issuers, acquirers, and other system participants. Participation in programs and services, if and when offered, will be subject to Visa's terms and conditions.

Additional disclaimers and/or notifications may be found in the "Additional Notices" section of this document and/or in the Material herein.

Relationship to the Visa Rules. The Material is a supplement to the Visa Rules. In the event of any conflict between the Material, any document referenced herein or any communications concerning the Material, and any content in the Visa Rules, the Visa Rules shall govern and control.

Definitions. Capitalized terms not otherwise defined herein have the meanings given to them in the Visa Core Rules and Visa Product and Service Rules.

As used in this Notice, the terms "you" or "your" refer to (i) the person using the Material in any way, (ii) your organization and/or (iii) your or your organization's Sponsor.

"Visa" refers to the relevant Visa entity that has entered into an agreement with you governing the subject matter of the Material, being only *one* of the following Visa entities, and any of its current and former affiliates, employees, successors or assigns:

- Visa Canada Corporation;
- Visa do Brasil Empreendimentos Ltda.;
- Visa Europe Limited;
- Visa International Service Association;
- Visa International Servicios de Pagos Espana, S.R.L.U.;
- Visa U.S.A. Inc.;
- Visa Worldwide Pte Limited; OR
- Another Visa entity that is an affiliate of any of the foregoing entities.

Glossary

Chapter 1

BASE II Clearing Data Codes

The BASE II System uses a number of codes to facilitate the electronic exchange of data.

These codes:

- Explain the reason for a BASE II processing action.
- Instruct the BASE II System to perform specific processing.
- Provide information about the type of customer transaction.
- Provide fee information.

BASE II Clearing System Documentation

These documents are available.

- *BASE II Clearing Data Codes*
- *BASE II Clearing Edit Package Operations Guide Release 4*
- *BASE II Clearing Edit Package Reports Reference Guide Release 4*
- *BASE II Clearing Interchange Formats, TC 01 to TC 49*

- *BASE II Clearing Interchange Formats, TC 50 to TC 92*
- *BASE II Clearing PC Edit Package for Windows User Guide Release 4*
- *BASE II Clearing Edit Package Messages Reference Guide Release 4*
- *Visa Core Rules and Visa Product and Service Rules*
- *Visa Merchant Data Standards Manual*

Note: VML is no longer being supported.

Account Funding Source

This field indicates the account funding source used in the transaction.

It is used in Draft Data: TCR 5, Position 167.

Valid Account Funding Source Values

Value	Account Type
Space	
C	Credit
D	Debit
H	Charge
P	Prepaid
R	Deferred Debit

Account Type Identification

The Account Type Identification indicates the type of account used in the transaction.

It is used in Draft Data: TCR 5, Positions 145-148.

Valid Account Type Identification Values

Value	Account Type
VAG	Visa Agro
VAE	Visa Agro Electron
VCUS	Visa Agro Custeio
VINV	Visa Agro Investimento

Valid Account Type Identification Values

Value	Account Type
VVA	Alimentacao Visa Vale
VVR	Refeicao Visa Vale
VVF	Flex Visa Vale

Ancillary Service Category Codes

Ancillary Service Category code for the sole, or primary, type of service that has been provided.

Initial Ancillary Service Category Codes

Ancillary Service Category Code	Ancillary Service Category Name
BF	Bundled Service
BG	Baggage Fee
CF	Change Fee
CG	Cargo
CO	Carbon Offset
FF	Frequent Flyer
GF	Gift Card
GT	Ground Transport
IE	In-Flight Entertainment
LG	Lounge
MD	Medical
ML	Meal/Beverage
OT	Other
PA	Passenger Assist Fee
PT	Pets
SA	Seat Fees
SB	Standby
SF	Service Fee
ST	Store

Initial Ancillary Service Category Codes

Ancillary Service Category Code	Ancillary Service Category Name
TS	Travel Service
UN	Unaccompanied Travel
UP	Upgrades
WI	WiFi

In order to support future enhancements by the transportation industry, endpoints must be able to support ancillary service category codes and ancillary service sub-category codes with any alphanumeric value up to (4) characters.

Authorization Characteristics Indicator

The Authorizations Characteristics Indicator code is used by the acquirer to request CPS qualification.

It is used in these interchange formats:

- Draft Data: TCR 0, Position 151
- TC 48, BASE I Advice—ISO-Enriched: TCR 2, Position 60
- TC 57, Data Capture Advice: TCR 0, Position 151

(See *Requested Payment Service/Authorization Characteristics Indicator: Valid Combination* for information on valid combinations of the individual Custom Payment Services program.)

Authorization Characteristics Indicators

Code	Definition
A	Card Present.
C	Card Present with merchant name and location data (cardholder-activated, self-service terminal).
D	EDQP transaction (Not CPS)
E	Card Present with merchant name and location data.
F	Card Not Present—Account Funding.
K	Card Present with key-entry.
J	Card Not Present—Recurring Bill Payment.

Authorization Characteristics Indicators

Code	Definition
N	Not a payment service transaction.
P	Card Not Present (Preferred Customer participation requested).
R	Card Not Present (Address Verification Service not required).
S	Electronic Commerce 3-D Secure Attempts
T	A CPS Program was not available when authorized.
U	Card Not Present—3-D Secure Electronic Commerce.
V	Card Not Present (Address Verification Service requested).
W	Card Not Present—Non-3-D Secure Electronic Commerce.
X	Disqualified custom payment service transaction (inserted by BASE II).

Authorization Source Code

The Authorization Source Code indicates whether authorization was obtained and the source of the authorization.

It is used in these interchange formats:

- Draft Data: TCR 1, Position 128
- TC 38, VCRFS/VDAS message transactions: TCR 3—Chargeback Documentation Data, Position 92 (Visa Use Only)
- TC 57, Data Capture Advice: TCR 0—Transaction Detail, Position 87

Note: Authorization Source Codes are required in Transaction Incentive Interchange Fee 2 (TIIF2), Custom Payment Service (CPS), Express Payment Service (EPS), and Supermarket transactions. Space though deprecated and will not signify anything Visa would still allow to be submitted in the field.

Authorization Source Codes

Code	Definition
V	Authorization obtained via VisaNet (Issuer or STIP response)
5	Response provided by issuer.
6	Offline approval: POS-device generated.
7	Acquirer approval: V.I.P. unavailable.
8	Authorization not performed by VisaNet.

Authorization Source Codes

Code	Definition
9	No authorization source code; non-authorized transactions.
B	Response provided by STIP: transaction met Visa Transaction Advisor Service criteria.
E	Offline approval: authorization code manually entered.
F	CAFIS-generated response; post-authorization (Japan only).
G	Issuer approval; post-authorization (Japan only).
N	No authorization required: Below floor limit Note: This is optional value and it is not required at the time of the October 2020 release.
L	Late clearing - authorization previously obtained (clearing beyond 30 days). Note: This is optional value and it is not required at the time of the October 2020 release.

AVS Response Code

The AVS Response Code contains the response to an Address Verification Service (AVS) request, indicating matches or discrepancies between addresses and ZIP codes.

It is used in these interchange formats:

- Draft Data: TCR 1 - Additional Data, Position 127
- TC 57, Data Capture Advice: TCR 0, Position 148

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML, the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

AVS Response Codes

Code	Definition
Y	AVS full match.
A	AVS street address only (partial match).
Z	AVS postal/zip code only (partial match).
N	AVS non-match.

AVS Response Codes

Code	Definition
R	AVS indeterminate outcome (retry). V.I.P. converts all invalid values in field 44.2 to R .
U	AVS unable to verify. V.I.P. converts any blank spaces in field 44.2 to U .

Batch Reject Reason Code

The Batch Reject Reason Code is a response to a transaction request indicating that the receiving endpoint cannot accept the message because it contains an error.

It is used in TC 44, Collection Batch Acknowledgment: TCR 0—Batch Disposition Code R, Positions 37-39.

Batch Reject Reason Codes

Code	Definition
01	An incorrect hash total was given for Transaction Code 91.
02	The batch is out of sequence.
03	The transaction count is out of balance.
04	A monetary transaction is out of balance.
05	The TCR count is out of balance.
06	The destination amount is out of balance.
07	The source amount is out of balance.
44	The Source Identifier in transaction code 91 does not exist or does not belong to the processing center.
60	A Transaction Code is invalid. If data is from a local (mailed) tape, there is a problem in the Edit Package or Edit Package tables; the wrong version may be in use. If data is from a VAP, "noise" on the communication line may have modified the Transaction Code, or the VAP is not using the same Data Structure Table version that the VIC is using.
61	A Transaction Code Qualifier or Sequence Number is invalid for the transaction code of at least one transaction in the batch.
B1	There is a VIC expand error. Contact Visa for support.
B6	The amount field in a transaction is non-numeric; the batch was rejected because it could not be balanced to the trailer.
BD	The Edit Package release number does not match any of the VIC Data Structure tables.

Batch Reject Reason Codes

Code	Definition
BE	The Source Currency Code in a transaction is not a valid ISO numeric code. The batch was rejected because it cannot be properly accounted for.
BF	VML Syntax Error

Business Application ID

Provides additional information regarding the usage and application of the transaction. The Business Application ID is used in draft data TCx5, TCx6, TCR 3 Industry Specific Data:

- Business Application Data, Positions 19-20
- Passenger Itinerary Data, Passenger Transport Ancillary Data, Lodging, Car Rental, and Fleet Service, Positions 15-16

The Business Application ID value of **WT** is also valid in TC 05 Draft Data - Industry-Specific Data - Passenger Itinerary Data, Passenger Transport Ancillary Data, Lodging, Car Rental, and Fleet Service, Positions 15-16.

Business Application IDs

Code	Description
AA	Account to Account
BB	Business to Business
BI	Bank Initiated Money Transfer
BP	Bill Payment
CB	Consumer Bill Payment
CD	Cash Deposit
CP	Card Bill Payment
FD	Funds Disbursement (General)
FT	Fund Transfer
GD	Government Disbursement (General)
GP	Gambling Payout (Other than online gambling)
LA	Liquid Assets
LO	Loyalty and Offers
MD	Merchant Disbursement

Business Application IDs

Code	Description
MI	Merchant Initiated Faster Refund
OG	Online Gambling Payout
PD	Payroll/Pension Disbursement
PG	Payment to Government
PP	Person to Person
PS	Payment for Goods and Services (General)
RP	Request to Pay
TU	Prepaid Load - Top-Up
VA	Visa Accept
WT	Wallet Transfer

Bonus Month Sign

The Bonus Month Sign value specifies the month(s) the bonus payment will be made. It is used in Draft Data: TCR 2—Japan, Position 6.

Bonus Month Sign

Bonus Month Sign Valid Values	Number of Bonus Payments = 1 (Payment Mode = 23, 24, 33, 34) Month That Bonus Will Be Paid	Number of Bonus Payments = 2 to 6 (Payment Modes = 24, 33, and 34) Months That Bonuses Will Be Paid
1	January	June and December
2	February	June and January
3	March	July and December
4	April	July and January
5	May	August and December
6	June	August and January
7	July	September and December
8	August	September and January
9	September	June and February
A	October	July and February

Bonus Month Sign

Bonus Month Sign Valid Values	Number of Bonus Payments = 1 (Payment Mode = 23, 24, 33, 34) Month That Bonus Will Be Paid	Number of Bonus Payments = 2 to 6 (Payment Modes = 24, 33, and 34) Months That Bonuses Will Be Paid
B	November	August and February
C	December	September and February

Car Rental Extra Charges

The Car Rental Extra Charges are used to indicate the type of additional charges added to the customer's bill after check-out, such as gas, late return, etc. Each position in the field can be used to indicate a type of charge.

It is used in these interchange formats:

- Draft Data: TCR 3, Positions 28-33
- TC 57, Data Capture Advice: TCR 4 - Industry-Specific Data—Car Rental, Positions 28-33

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Car Rental Extra Charges

Code	Definition
Space	No extra charges
0	No extra charges
1	Gas
2	Extra mileage
3	Late return
4	One-way service fee
5	Parking violation

Car Rental No-Show Indicator

The Cardholder No-Show Indicator is used to show when a cardholder is being billed for a reserved vehicle that was not actually rented (a 'no-show' charge).

It is used in these interchange formats:

- Draft Data: TCR 3, Position 27
- TC 57, Data Capture Advice: TCR 4, Position 27

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Car Rental No-Show Indicators

Code	Definition
0	n/a
1	No-show for a specialized vehicle

Cardholder-Activated Terminal Indicator

For transactions that occur at an unattended terminal, the Cardholder-Activated Terminal Indicator identifies the type of terminal, such as a gas pump.

(See *Acceptance Terminal Indicator*.)

Cardholder ID Method

The Cardholder ID Method indicates the type of ID used to identify the cardholder.

It is used in these interchange formats:

- Draft Data: TCR 0, Position 160
- TC 57, Data Capture Transaction Advice: TCR 0, Position 80
- TC 59, Interface Transaction Advice: TCR 1 - Additional Data, Position 77; TCR 1 - American Express, Position 77

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Cardholder ID Methods

Code	Definition
Space	Not specified
1	Signature
2	PIN
3	Unattended terminal; no PIN pad
4	Mail/Telephone or Electronic Commerce

Dispute Reason Code

The Dispute Reason Code indicates the reason for the dispute financial (for example, fraud).

It is used in Draft Data TCR 0, Positions 148-149.

International rules apply to all jurisdictions unless otherwise specified.

(See *Visa Core Rules and Visa Product and Service Rules*.)

Dispute Reason Codes

Reason Code	Dispute Reason Rules
10	Fraud
11	Authorization
12	Processing Error
13	Consumer Dispute

Chargeback Reason Codes - Retired

These reason codes are no longer valid for original chargebacks.

Retired Chargeback Reason Codes

Reason Code	Applicable Operating Regulations	Chargeback Reason Rules
30	All	Services Not Provided or Merchandise Not Received All Regions: • ATM is prohibited. International: • For T&E transactions the minimum amount must be equal to or greater than \$25.00 USD. • No non-T&E minimum amount. U.K. Domestic: • T&E and non-T&E, no minimum amount. Canada Region: • For T&E transactions, the minimum amount must be equal to or greater than \$25.00 CAD. • For non-T&E transactions, the minimum amount must be equal to or greater than \$10.00 CAD. Japan Domestic: • T&E and non-T&E, no minimum amount.

Computerized Reservation System Code

The Computerized Reservation System Code indicates the computerized reservation system used to make the reservation and purchase the ticket for National-Germany.

It is used in Draft Data: TCR 3, Passenger Itinerary Data, Positions 142-145.

Computerized Reservation System Codes

Code	Definition
STRT	Start
PARS	TWA
DATS	Delta
SABR	Sabre
DALA	Covia-Apollo
BLAN	Dr. Blank
DERD	DER
TUID	TUI

CRB/Exception File Indicator

The CRB/Exception File Indicator shows that the account number used in the transaction was listed in the Card Recovery Bulletin.

It is used in these interchange formats:

- Draft Data: TCR 0, Position 25
- TC 33, RDMS and CRS: TCR 0 - CRS Issuer Advice, Position 161

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

CRB/Exception File Indicators

Code	Definition
Space	Card Bulletin validation not performed.
I	Insufficient information for validation.
N	Account number was not listed in merchant's CRB region on purchase date.
Y	Account number was listed in merchant's CRB region on purchase date.

CVV2 Result Code

The CVV2 Result Code contains verification result for card-not-present transactions and for card-present CVV2 verification-only requests.

It is used in these interchange formats:

- Draft Data: TCR 5, Position 168
- TC48, BASE 1 Advice: TCR1, ISO-Enriched, Position 11

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

CVV2 Result Code

Code	Definition
Space	No result
M	CVV2 match
N	CVV2 does not match
P	Not processed
S	CVV2 should be on the card, but the merchant indicates that it is not
U	Issuer is not certified or has not provided Visa with encryption keys, or both.

Dispute Request Reason Code - Copy Request and Fulfillment Service

Code indicating the reason why copy request not fulfilled: no draft available, invalid reference number, acquirer will not fulfill, etc.

The Dispute Request Reason Code is used in TC 38, TCR 1 - Dispute Request and Ruling, Positions 17-18.

Dispute Request Reason Codes - Copy Request and Fulfillment Service

Code	Definition
01	Wrong Item—The fulfillment does not match the data sent in the copy request (such as the account number or the transaction amount). The invalid Data Flags specify which data items are incorrect.
02	Illegible Item—The fulfillment is not legible enough for the cardholder to read or for the issuer to identify the account number or the transaction amount. The Invalid Data Flags specify which data items are illegible.
03	Missing Values—The fulfillment of a Substitute Transaction Receipt does not contain all of the required data elements. The Invalid Data flags specify which values are missing.
04	Invalid Fulfillment—The fulfillment is not a “wrong item” or an allowable Substitute Transaction Receipt and is not evidence of a transaction.

Dispute Return Reason Code - Copy Request and Fulfillment Service

Code indicating the reason why copy request not fulfilled: no draft available, invalid reference number, acquirer will not fulfill, etc.

The Dispute Return Reason Code is used in TC 38, TCR 1 - Dispute Request and Ruling, Positions 31-32 (Return Reason Code).

Dispute Return Reason Codes - Copy Request and Fulfillment Service

Code	Definition
1	Request ID not found.
3	Dispute pending.
4	Dispute resolved.

Dispute Return Reason Codes - Copy Request and Fulfillment Service

Code	Definition
5	The Account Number in the dispute request does not match the Account Number in the request for copy associated with the Retrieval Request ID.
6	The Transaction Identifier in the dispute request does not match the Transaction Identifier in the retrieval request associated with the Retrieval Request ID.
7	No fulfillment found for Retrieval Request ID.

Dispute Ruling Reason Code - Copy Request and Fulfillment Service

Code indicating the reason why copy request not fulfilled: no draft available, invalid reference number, acquirer will not fulfill, etc.

The Dispute Ruling Reason Code is used in TC 38, TCR 1 - Dispute Request and Ruling, Positions 33-34.

Dispute Ruling Reason Codes - Copy Request and Fulfillment Service

Code	Definition
1	Dispute ruled in favor of acquirer.
2	Dispute ruled in favor of issuer.

Dispute Status Code

The Dispute Status Code indicates the status of the Visa Resolve Online (VROL) dispute.

Dispute Status Code

Dispute Status Code	Definition
F1	Dispute Financial
R1	Dispute Financial Reversal—Recall
R2	Dispute Financial Reversal—Pre-arbitration Acceptance
R3	Dispute Financial Reversal—Arbitration Decision
P1	Dispute Response Financial

Dispute Status Code

Dispute Status Code	Definition
L1	Dispute Response Financial Reversal—Recall
L2	Dispute Response Financial Reversal—Pre-arbitration Acceptance
L3	Dispute Response Financial Reversal—Arbitration Decision

Fee Collection/Funds Disbursement Reason Code

The Fee Collection Funds Disbursement Reason Code tells the receiving client the reason for the fee collection or the funds disbursement.

It is used in these interchange formats:

- TC 10, Fee Collection: TCR 0, Positions 17-20
- TC 20, Funds Disbursement: TCR 0, Positions 17-20

Note: Maximum Amount listed is in U.S. dollars. If the Source Currency Code is not 840 (U.S. Dollar), the Source Amount cannot exceed the equivalent U.S. maximum. The transaction amount limit for a Fee Collection/Funds Disbursement transaction when collected from a client bank is 500000.00 USD and when collected from a Visa internal identifier is 10000000.00 USD.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Note: In the fields below, instructions are frequently given to for secondary fields in the Code Definition. If the instruction states that the field must contain spaces or zeroes, then the field should not be present in the transaction in VML.

Fee Collection/Funds Disbursement Reason Codes

Code	Maximum Amount	Definition
0100	\$499.00	Telex, Telephone and Cable Charges - May not be used by U.S. clients to collect from other U.S. clients. - A Country Code is required. - The Account Number field must contain a valid account number.
0110	\$499.00	Auto-Telex Charges - May not be used by U.S. clients to collect from other U.S. clients. - The Account Number field must contain a valid account number.
0130	\$499.00	Lost/Stolen Card Report Fees The Account Number field must contain a valid account number.
0140	\$9,999.00	Merchant Service Fees - May not be used by U.S. clients to collect from other U.S. clients. - The Account Number field must contain zeros.
0150	\$499.00	Recovered Card Handling Fees/Rewards The Account Number field must contain a valid account number. ATM Balance Inquiry acquiring direct fee returns ATM Balance Inquiry is available for ATM Balance Inquiry acquiring direct fee participants in AP region only.
0160	\$99.00	Invalid Card Dispute Financial Handling Fee The Account Number field must contain a valid account number.
0170	\$99.00	Recovery of Microfilm Copy/Original Fees (In the U.S., Recovery of Copy/Original or Substitute Draft Fees) The Account Number field must contain a valid account number.
0190	None	Premium Card Guaranty Check The Account Number field must contain a valid account number.
0200	None	Emergency Replacement Card Distribution Fee The Account Number field must contain a valid account number.
0210	None	Emergency Cash Disbursement Handling Fee The Account Number field must contain a valid account number.
0220	None	Arbitration Case Decision and/or Request Fee (In the U.S., Arbitration/Compliance Case Decision and/or Request Fee) The Account Number field must contain a valid account number.

Fee Collection/Funds Disbursement Reason Codes

Code	Maximum Amount	Definition
0230	\$99.99	Incorrect Merchant Identification/Transaction Date Handling Fee - May be used only by U.S. clients to collect from other U.S. clients. - The Account Number field must contain a valid account number.
0240	None	Funds Disbursement Transactions - The Account Number field must contain a valid account number. - A Country Code field must contain spaces.
0250	\$25.00	Invalid Dispute Financial Handling Fee May be used only by U.S. clients to collect from other U.S. clients.
0300	None	Bill Payment Service (Canada and Brazil only) - A Country Code is required. - The Account Number field must contain a valid account number.
0350	None	Pre-arbitration Settlement Funds Disbursement The Account Number field must contain a valid account number.
0390	None	Visa TravelMoney Fees - The Account Number field must contain zeros. - The transaction is initiated by Visa. - The Country Code is required.
0401	None	Prepaid Revenue Allocation
0402	None	Prepaid Funds Collection - May not be used by U.S. clients. - Account Number field not required but may be present
5000	None	Card Recovery Bulletin - Incoming only (transaction initiated by Visa). - The Account Number field must contain zeros. - The Country Code must be spaces.
5010	None	Visa Integrated Billing Statement - Incoming only (transaction initiated by Visa). - The Account Number field must contain zeros. - The Country Code must be spaces.

Fee Collection/Funds Disbursement Reason Codes

Code	Maximum Amount	Definition
5015	None	Supermarket Incentive Program Fee • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5020	None	Arbitration Request/Review • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5030	None	BASE II Access Fee • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5040	None	Miscellaneous Fees or Charges • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5050	None	Issuers' Clearinghouse Service Fee • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5060	None	Risk Identification Service Merchant Fees • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.
5080	None	Late Settlement Fee • May not be used by U.S. clients to collect from other U.S. clients. • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.

Fee Collection/Funds Disbursement Reason Codes

Code	Maximum Amount	Definition
5090	None	Visa Account Tracking Service • Incoming only (transaction initiated by Visa). • The Account Number field must contain zeros. • The Country Code must be spaces.

6200	None	Visa Purchasing VAT Remedy
6210	None	Visa Purchasing VAT Remedy (Reversal)

Fee Program Indicator

The Fee Program Indicator indicates the fee program for which the transaction qualifies.

It is used in these interchange formats:

- Draft Data: TCR 1 - Fee Program Indicator, Positions 76-78
- TC 04, Reclassification Advice: TCR 9, Positions 113-115 and 116-118

Refer to the Interregional, Intraregional or Domestic IRF Guides for the applicable FPIs.

Floor Limit Indicator

The Floor Limit Indicator shows whether the transaction was above or below the merchant's floor limit for the purchase date.

It is used in Draft Data: TCR 0, Position 24.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Floor Limit Indicators

Code	Definition
Space	Floor limit validation not performed.
A	Above floor limit by more than 20%.
B	Below floor limit by more than 20%.
C	Above floor limit by 20% or less.
D	Below floor limit by 20% or less, or at floor limit.
I	Insufficient information to determine floor limit.
Z	Zero floor limit.

Lodging Extra Charges

The Lodging Extra Charges Code is used to indicate the type of additional charges added to a customer's bill after check-out.

It is used in these interchange formats:

- Draft Data: TCR 3 - Lodging, Positions 28-33
- TC 57, Data Capture Advice: TCR 4 - Industry-Specific Data—Lodging, Positions 28-33

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Lodging Extra Charges

Code	Definition
Space	No extra charges
0	No extra charges
2	Restaurant
3	Gift Shop
4	Mini Bar
5	Telephone
6	Other
7	Laundry

Lodging No-Show Indicator

The Lodging No-Show Indicator Code indicates the cardholder being billed for a reserved room that was not actually rented or cancelled.

It is used in these interchange formats:

- Draft Data: TCR 3 - Lodging, Position 27
- TC 57, Data Capture Advice: TCR 4 - Industry-Specific Data—Lodging, Position 27

Lodging No-Show Indicator

Code	Definition
0	Not applicable
1	No-show

Mail/Phone/Electronic Commerce and Payment Indicator

The Mail/Phone/Electronic Commerce and Payment Indicator code shows transactions performed by mail order, telephone, or electronic commerce.

It is used in these interchange formats:

- Draft Data: TCR 1 - Additional Data, Position 116
- TC 57, Data Capture Advice: TCR 0 - Transaction Detail, Position 111

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Mail/Phone/Electronic Commerce and Payment Indicator

Code	Definition	Usage
Space	Field not applicable or acquirer did not specify.	Use to indicate that the mail order, telephone order, electronic commerce indicator is not relevant for the transaction.
1	Mail/Phone Order (MO/TO)	Use to indicate that the transaction is a mail/phone order purchase, not a recurring transaction or installment payment. For domestic transactions in the U.S.A. Region, this value may also indicate a single bill payment transaction in either the Card Present or card absent environments.
2	Recurring transaction (valid only for U.S. acquired transactions).	Use to identify a recurring transaction originating at a U.S.A. acquirer. Transactions that originate from acquirers in all other regions must use POS Environment value 'R' Recurring payment indicator, to identify a recurring transaction.
3	Installment payment.	Use to indicate a single purchase of goods or services that is billed to the account in multiple charges over a period of time agreed upon by the cardholder and merchant.
4	Unknown classification/other mail order.	Use to indicate that the type of mail/phone order is unknown.
5	Secure Electronic Commerce Transaction.	Use to indicate that the electronic commerce transaction has been authenticated using a Visa-approved protocol, such as 3-D Secure.
6	Non-Authenticated Security Transaction at a 3-D-Secure-capable merchant, and merchant attempted to authenticate the cardholder using 3-D secure.	Use to identify an electronic commerce transaction where the merchant attempted to authenticate the cardholder using 3-D secure, but was unable to complete the authentication because the cardholder or Issuer does not participate in the 3-D Secure program.
7	Non-Authenticated Security Transaction	Use to identify an electronic commerce transaction that uses data encryption for security, however, cardholder authentication is not performed using a Visa-approved protocol, such as 3-D Secure.

Mail/Phone/Electronic Commerce and Payment Indicator

Code	Definition	Usage
8	Non-secure transaction.	Use to identify an electronic commerce transaction that has no data protection. Use to identify a Mail Order Telephone Order transaction that uses Dynamic Passcode Authentication (DPA) technology, however, cardholder authentication is not performed because the cardholder or Issuer does not support DPA (applicable in Europe region only).
9	For optional regional use only.	Reserved - VI region Use to identify a Mail Order Telephone Order transaction that uses Dynamic Passcode Authentication (DPA) technology and is fully authenticated (applicable in Europe region only).

Market-Specific Authorization Data Indicator

The Market-Specific Authorization Data Indicator identifies the industry for which market-specific authorization data was included in the transaction.

It is used in these interchange formats:

- Draft Data: TCR 5 - Payment Service Data, Position 49
- TC 48, BASE I Advice: TCR 2 - ISO-Enriched, Position 61
- TC 57, Data Capture Advice: TCR 3 - Transaction Detail, Payment Service Data, Position 42

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML, the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction, (for example, a space may indicate eligibility for a particular fee type).

Market-Specific Authorization Data Indicator

Code	Description
Space	No market-specific authorization data supplied.
A	Valid Auto Rental market-specific authorization data received.
B	Valid Bill Payment market-specific authorization data received

Market-Specific Authorization Data Indicator

Code	Description
E	Valid Electronic Commerce Transaction Aggregation data received.
H	Valid Hotel market-specific authorization data received.
J	Valid - B2B Invoice Payment Received
M	Valid Healthcare market-specific authorization data received.
N	Invalid or not applicable market-specific authorization data received.
T	Valid Transit market-specific authorization data received.
X	Valid Extended Authorization data received.

Member Settlement Data Codes

The Member Settlement Data Codes define the type of information within a transaction, the summary level of the information, the usage code level of the data, and the reporting level of the data.

It is used in TC 46, Member Settlement Data: TCR 0 - Report Group = Space, Positions 25-30, 64-78, 81-95.

Member Settlement Data-Record Type Codes

Code	Definition
REPORT GROUP = SPACES	
01	Gross Value Interchange
02	Interchange Fees
03	International Outgoing Interchange (IOI) Fees

Merchant Mailing CRB Region Code

The Merchant Mailing CRB Region Code determines which regional bulletin is sent to the merchant outlet.

It is used in TC 42, 43 Merchant File Updates: TCR 0 - Record 1, Positions 109-110.

Merchant Mailing CRB Region Codes

Region Code	Geographic Area
0	Do not list in any Card Recovery Bulletin
1	Reserved
2	Reserved
3	Reserved
4	Reserved
5	Reserved
6	Reserved
7	Reserved
8	Reserved
9	Reserved

Merchant Mailing CRB Region Codes

Region Code	Geographic Area
A	Includes all countries in the Asia-Pacific region
B	CEMEA—Africa and part of the Middle East (includes countries that are part of Visa subregions 3 and 5 of the Europe, Middle East, Africa region).
C	All Canadian CRB regions (regions 1 through 3)
C1	Quebec and the Maritimes
C2	Ontario—excluding area west of Thunder Bay
C3	Alberta, British Columbia, Manitoba, Ontario including area west of Thunder Bay, and Saskatchewan
D	National CRB indicator
E	EU—Europe and part of the Middle East (includes countries in the Europe, Middle East, Africa region not classified as part of CRB region B above).
F	Includes all countries in the Latin America and Caribbean region.
X	All U.S. CRB regions (regions 1 through 9)
X1	U.S. region 1
X2	U.S. region 2
X3	U.S. region 3
X4	U.S. region 4
X5	U.S. region 5
X6	U.S. region 6
X7	U.S. region 7
X8	U.S. region 8
X9	U.S. region 9
Y	All regions except U.S.
Z	All CRB regions

Note: CRB is not used in the U.S.; BASE II will treat codes 1-9 and X-X9 as if they were code 0 and will not list in any bulletin.

Note: Codes C1-C3 and X1-X9 are applicable only for the Canada region.

Merchant Mailing Transaction Type

Specifies the action to be taken (add a merchant outlet, suspend bulletin delivery, reinstate bulletin delivery, etc.) and gives related Merchant Mailing File information, such as merchant outlet number, distribution frequency, and distribution method.

The Merchant Mailing Transaction Type is used in TC 43, Merchant File Update: TCR 0 - Record 2, Position 17.

Merchant Mailing Transaction Types

Code	TC 42	TC 43
1	Delete—delete the outlet from the Merchant Mailing File.	Reserved by Visa U.S.A. for future use.
2	Add—add the merchant outlet to the Merchant Mailing File.	Same as TC 42.
3	Reserved—reserved by Visa U.S.A. for future use.	Suspend—change the status of the merchant outlet to suspended and input the reason in the Reason for Suspension field.
4	Change—change the record on the Merchant Mailing File to include the data contained in this transaction.	Same as TC 42.
5	Reinstate—change the status of the merchant outlet on the Merchant Mailing File from suspended to active, and change the merchant outlet record to include the data contained in this transaction.	Same as TC 42.
9	List—list the contents of the merchant outlet record on the Merchant Master File report.	Same as TC 42.

Miscellaneous Airline Charge Data Code

For EU Intraregional and Domestic EU for miscellaneous airline charges.

For EU Intraregional and Domestic EU.

The Miscellaneous Airline Charge Data Code is used in Draft Data: TCR 3, Positions 60-62 (Format Code AI).

Miscellaneous Charge Data Codes

Code	Definition
XUP	Upgrade
XAF	Club Fee
XCA	Cargo
XOT	Tour Order
XDF	Duty Free
XAE	Baggage Charge
XAO	MCO
XAA	Miscellaneous Charge
XTD	Ticket Delivery
XPC	Pet Carrier
XPE	Ticket Reissue Fee

Nonfulfillment Reason Code - Copy Request and Fulfillment Service

The Nonfulfillment Reason Code indicates the reason why a copy requests is not fulfilled.

It is used in TC 38, TCR 1 - Nonfulfillment, Positions 17-18.

Nonfulfillment Reason Codes - Copy Request and Fulfillment Service

Code	Definition
1	Invalid request. Reference number is not within the acquirer's reference number range.
2	Invalid request. Reference number is within the acquirer's reference number range, but is not a valid reference number.
3	Item could not be located.
4	Acquirer will not fulfill. Issuer may dispute the transaction.
5	No draft available. For example, an Express Payment Service (EPS) or ATM transaction.
6	Fulfillment by mail notification (no longer allowed as of October 1, 2004).

Payment Method

The Payment Method Code identifies the method of payment for the transaction.

It is used in Draft Data: TCR 2 - South Korea, Positions 122-123.

Payment Method Codes

Code	Definition
11	One-time Payment
21	Installment Payment
22	Installment Payment without Interest
31	March - bonus (one-time) payment
32	June - bonus (one-time) payment
33	September - bonus (one-time) payment
34	December - bonus (one-time) payment
41	Integrated (bonus + installment) payment
42	Integrated (bonus + installment) payment
43	Integrated (bonus + installment) payment
44	Integrated (bonus + installment) payment
51	Reserved
52	Reserved
53	Reserved
54	Reserved

Payment Mode

The Payment Mode Code indicates the type of installment payments.

It is used in Draft Data: TCR 2 - Japan, Positions 23-24.

Payment Mode Codes

Code	Definition
10	No Deferment
21	Semi-Annual Payment (deferred settlement)

Payment Mode Codes

Code	Definition
22	Bonus Payment with Number of Bonus Payments
23	Bonus Payment with Bonus Month Sign
24	Bonus Payment with Number of Bonus Payments and Bonus Month Sign
31	Integrated Payment with Number of Installment Payments
32	Integrated Payment with Number of Installment Payments and Bonus Amount
33	Integrated Payment with Number of Installment Payments, Number of Bonus Payments, and Bonus Month Sign.
34	Integrated Payment with Number of Installment Payments, Number of Bonus Payments, Bonus Month Sign, and Bonus Amount.
61	Twice Payment or Installment Payment with Number of Installment Payments - Twice Payment: number of installment payments = 0 or 2. Settlement between the acquirer and issuer is deferred for Twice Payment. - Installment Payment: number of installment payments is greater than or equal to 3. Settlement between the acquirer and issuer is not deferred for Installment Payment.
71	Cash Transactions
80	Revolving—No Deferment

POS Entry Mode

The POS Entry Mode Code is a V.I.P. System field that indicates which method a point-of-sale terminal obtains and transmits the cardholder information necessary to complete a transaction.

It is used in these interchange formats:

- Draft Data: TCR 0, Positions 162-163
- TC 57, Data Capture Advice: TCR 0 - Transaction Detail, Positions 152-153
- TC 59, Interface Transaction Advice: TCR 0 - Additional Data, Positions 158-159

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

POS Entry Mode Codes

Code	Definition	Usage
Space	Not specified.	Use when the method used to capture the account number and expiration date is not known.
00	Terminal not used.	Use when a terminal was not used to obtain the account number and expiration date, for example, when the transaction is paper-based.
01	Manual key entry.	Use to indicate that the card data was not obtained via the chip or magnetic stripe on the card, for example, when the transaction is mail/ phone order, electronic commerce, recurring, voice authorized, or when the chip or magnetic stripe on the card cannot be read.
02	Magnetic stripe read; CVV checking may not be possible Note: Plus: Exact Track 2 contents read but transaction is not eligible for CVV checking	Used by Visa to indicate that the magnetic stripe data may be unreliable and that accurate CVV processing may not be possible. For Plus transactions, '02' means that the full, unaltered contents of the magnetic stripe were not transmitted to the issuer, and that the transaction is not eligible for CVV checking.
03	Optical code.	Used to indicate that the user account data was captured at a POS terminal from a QR Code or Bar Code image which could have been generated on a smart device for payment. QR Code images are Token based.
04	Optical Character Recognition (OCR) read.	Not used - reserved for future use.
05	Integrated circuit card read; CVV or iCVV data reliable.	Use to indicate that the account information was obtained from the chip on the card, and that CVV or iCVV checking is possible.
06	Track 1 read.	Reserved for future use.
07	Proximity Payment using VSDC chip data rules.	Use to indicate that the card data was obtained from a proximity chip on the card and that the transaction was processed in accordance with chip data rules. CVV or iCVV checking is possible.
10	Credential on File	A PAN or Token (Credential) stored by the merchant with a consumers account, for the purposes of performing repeat transactions.
84	Reserved	
90	Magnetic stripe read and exact content of Track 1 or Track 2 included (CVV check is possible).	Use to indicate that the full, unaltered content of the magnetic stripe are transmitted to the Issuer and that CVV checking is possible.

POS Entry Mode Codes

Code	Definition	Usage
91	Proximity payment using magnetic stripe data rules.	Use to indicate that the card data was obtained from a proximity chip on the card and that the transaction was processed in accordance with magnetic stripe data rules. CVV checking is possible.
95	Integrated circuit card; CVV or iCVV checking may not be possible.	Used by Visa to indicate that the chip data on the card may be unreliable and that accurate CVV or iCVV processing may not be possible.

POS Environment

The POS Environment Code indicates that the cardholder and merchant have agreed to periodic billing for goods and services, such as utility bills, internet connection, and magazine subscriptions.

The POS Environment code is used in Draft Data: TCR 1, Position 168.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

POS Environment Codes

Code	Definitions	Usage
Space	Default	Used to indicate that the field is not populated.
C	Credential on File	Identifies transactions where a credential has been put on file for the first time.

POS Environment Codes

Code	Definitions	Usage
R	Recurring Transaction	Use to identify multiple transactions that: • Occur at predetermined intervals that do not exceed 1 year between transactions • Represent an agreement between a cardholder and a merchant to purchase goods or services over a period of time. Examples of a recurring transaction include periodic membership fees, subscriptions, etc.
I	Installment Payment	Used to identify a transaction which is a single purchase of goods and services billed to an account in multiple segments over a period of time agreed between a cardholder and merchant.

POS Terminal Capability

The POS Terminal Capability Code indicates the capability of the point-of-sale (POS) terminal to obtain an authorization and process transaction data.

It is used in these interchange formats:

- Draft Data: TCR Message Matching, Position 158
- TC 59, Interface Transaction Advice: TCR 1 - Additional Data, Position 75; TCR 1 - American Express, Position 76

If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

POS Terminal Capabilities

Code	Definition	Usage
Space	Not specified	Use to indicate that the capability of the terminal was not specified.
0	Unknown	Use to indicate that the terminal type cannot be determined.
1	Terminal not used	Use to indicate that a terminal was not used to capture the card data

POS Terminal Capabilities

Code	Definition	Usage
2	Magnetic stripe read capability	Use to indicate that the terminal can read the magnetic stripe on the card.
3	Optical Code	Used to indicate that the user account data was captured at a POS terminal from a QR Code or Bar Code image which could have been generated on a smart device for payment. QR Code images are Token based.
4	OCR read capability	Not used for Visa and Visa Electron cards.
5	Chip-capable terminal	Use to indicate that the terminal can read the chip and the magnetic stripe on the card.
6	Reserved	
7	Reserved	
8	Proximity read capability Terminal	This value is used to indicate that the terminal can read a proximity chip (using a Visa contactless specification) but cannot read a contact chip on a card.
9	Terminal does not have the capability to read card data	Use to indicate that the terminal does not have the capability to read the chip or magnetic stripe on the card.

Prepaid Card Indicator

The Prepaid Card Indicator identifies the type of prepaid card.

It is used in Draft Data: TCR 1 - Additional Data, Position 125.

If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Prepaid Card Indicator (PCI) Codes

Product ID	Description
space	Field not applicable
P	Prepaid Card
L	Prepaid Load

Product ID Values

This code identifies the product used in the transaction.

The Product ID Values appear in Draft Data: TCR 5 - Payment Service Data, Positions 136 -137.

Product ID Values

Product ID Values and Maximum POS Amount Limits

This code identifies the product used in the transaction. It also lists the maximum amount limits for Card types Credit/Debit, Prepaid POS and Account Funding POS.

Only the Product ID Values appear in Draft Data: TCR 5 - Payment Service Data, Positions 136-137.

The product IDs associated with maximum limits are subject to the rules of individual jurisdictions. Maximum limits may vary by Issuer and market transaction processing

requirements. To verify the IDs and limits for a given jurisdiction, please check with your Visa representative.

For Turkey issued card Credit and Debit POS Transaction maximum amounts, please check with your Visa representative.

Note: For G3 CEMEA region this amount also applies to Visa Platinum Business.

Note: F2, F3, and X1 does not apply to Interlink.

Purchase Identifier Format

The Purchase Identifier Format Code indicates the format for additional identifying information for purchases, such as order number or invoice number, etc. Format can include free text or type of number.

It is used in these interchange formats:

- Draft Data: TCR 1 - Additional Data, Position 129
- TC 57, Data Capture Advice: TCR 5—Limited-Use Data, Position 15

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Purchase Identifier Formats

Code	Definition
Space	Free Text item description or field not used
0	Free Text item description or field not used
1	Order Number
3	Rental Agreement Number
4	Hotel Folio Number
5	Invoice Number
6	Pay ID

Reimbursement Attribute

The Reimbursement Attribute indicates the interchange reimbursement fees applicable to the specific transaction; it is the last character of the record.

The Reimbursement Attribute is located in Position 168 (CTF format) of the TCR 0 in these interchange formats:

- Draft Data; TC 40, TC 52
- TC 10, TC 42, TC 54
 - For TC 54, the Reimbursement Attribute appears in TCR 0, Position 170 (ITF format)
- TC 20, TC 43, TC 55

- TC 30, TC 44, TC 56
- TC 31, TC 45, TC 57
- TC 32, TC 46, TC 58
- TC 33, TC 47, TC 59
- TC 38, TC 48
- TC 39, TC 50

Reimbursement Attributes

Code	Definition
0	Standard Issuer/Interchange Reimbursement Fee or Cash Disbursement Reimbursement Fee

Z	Interlink, Prepaid Load or PIN-Authenticated Visa Debit

Request for Copy Reason Code

This code indicates the reason an issuer requested a copy of an original transaction.

The Request for Copy Reason Code is used in TC 52, Retrieval Request: TCR 0, Positions 136-137.

Request for Copy Reason Codes-Copy/Microfilm of Original (TC 52)

Requests	Reason
27	IIAS (Healthcare Auto-substantiation) Request -U.S. Domestic Only.
28	Request for copy bearing signature.
30	Cardholder request due to dispute

Request for Copy Reason Codes-Copy/Microfilm of Original (TC 52)

Requests	Reason
33	- Legal process or fraud analysis request—U.S. Domestic only - Fraud analysis request—Non-U.S. Domestic
34	- Repeat request for copy—U.S. Domestic only - Legal process request—Non-U.S. Domestic

Requested Payment Service

The Requested Payment Service (RPS) Code indicates the acquirer's choice of custom payment service.

It is used in Draft Data: TCR 0, Position 145.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Requested Payment Services

Code	Definition
Space	Not a payment service transaction.
1	CPS/Passenger Transport - Card Not Present
2	CPS/Passenger Transport - Card Present
3	CPS/Hotel (Card Not Present)
4	CPS/Hotel (Card Present)
5	CPS/Auto Rental (Card Not Present)
6	CPS/Auto Rental (Card Present)
7	CPS/Direct Marketing and CPS/Card Not Present
8	CPS/Automated Fuel Dispenser
9	CPS/ATM
A	CPS/Retail (Debit or Credit) - U.S. National CPS/Supermarket (Debit or Credit) - U.S. National
B	CPS/Restaurant—Brazil and U.S. National
C	CPS/Retail Credit Card—U.S. National (no longer valid as of April 2005)

Requested Payment Services

Code	Definition
E	CPS/Retail Key Entry (Debit or Credit) - U.S. National
F	CPS/Small- Ticket—U.S. National
G	CPS/Electronic Commerce—Basic (U.S. National)
H	CPS/Account Funding
I	CPS/Retail—Incremental Authorizations
J	CPS/Electronic Commerce - Preferred
K	CPS/Electronic Commerce Preferred - Passenger Transport
L	CPS/Electronic Commerce Preferred - Hotel
M	CPS/Electronic Commerce Preferred - Car Rental
N	CPS/Retail Service Station
P	CPS/Recurring Bill Payment

Requested Payment Service/ Authorization Characteristics Indicator: Valid Combinations

These codes are used in conjunction to indicate the acquirer's choice of custom payment service (CPS) and to request CPS qualification. Only certain combinations of these two fields are valid.

The Requested Payment Service (RPS) field and the Authorization Characteristics Indicator (ACI) field are used in these interchange formats:

- Draft Data: TCR 0, Position 145: Requested Payment Service
- Draft Data: TCR 0, Position 151: Authorization Characteristics Indicator

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Requested Payment Service/Authorization Characteristics Indicator: Valid Combinations

CPS Program	RPS Code	ACI Code
CPS/Account Funding	H	F
CPS/ATM	9	E
CPS/Automated Fuel Dispenser	8	C
CPS/Car Rental (Card Not Present)	5	P
CPS/Electronic Commerce Preferred - Car Rental	M	U, S
CPS/Car Rental (Card Present)	6	A, E
CPS/Card Not Present—U.S. National	7	V, R
CPS/Electronic Commerce—Basic	G	W
CPS/Electronic Commerce—Preferred	J	S, U
CPS/Hotel (Card Not Present)	3	P
CPS/Electronic Commerce Preferred - Hotel	L	U, S
CPS/Hotel (Card Present)	4	A, E
CPS/Passenger Transport - Card Not Present	1	V, P, W
CPS/Passenger Transport - Card Present	2	A, E
CPS/Electronic Commerce Preferred - Passenger Transport	K	U, S
CPS/Restaurant—Brazil and U.S. National	B	A, E
CPS/Retail—Brazil and U.S. National	A	A, E
CPS/Retail Debit Card—U.S. National	A	E
CPS/Retail Debit Card - Incremental Authorizations	I	E
CPS/Retail Credit Card - Incremental Authorizations	I	A, E
CPS/Retail Credit Card—U.S. National (no longer valid as of April 2005)	C	E
CPS/Retail Petrol—Brazil and U.S. National	A	A, E
CPS/Retail Key-Entry	E	K
CPS/Small-Ticket—U.S. National	F	E
CPS/Retail Service Station—U.S. National	N	A, E
CPS/Recurring Bill Payment	P	J
Not a payment service transaction	Space	N

Restricted Ticket Indicator

The Restricted Ticket Indicator identifies if a ticket is non-refundable.

It is used in these interchange formats:

- Draft Data: TCR 3 - Passenger Itinerary Data, Position 117
- TC 57, Data Capture Advice: TCR 4 - Industry-Specific Data—Passenger Itinerary Data, Position 117

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Restricted Ticket Indicators

Code	Definition
Space	No restriction
0	No restriction
1	Restricted (non-refundable) ticket

Return/Reclassification Reason Code

BASE II sends this code to indicate the error condition resulting in the return or reclassification of a transaction.

The Return/Reclassification Reason Code is used in these interchange formats:

- TC 01, 02, 03, Returned Item Transactions: TCR 9, Positions 36-38, 56-58, 59-61, 62-64, and 65-67.
- TC 04, Reclassification Advice Transaction: TCR 9, Positions 104-106, 107-109, 110-112, 119-121, 122-124, 141-143, and 144-146.

Return/Reclassification Reason Codes

Code	Error Condition
01	The Hash Total is invalid. If data is from a local tape, a problem occurred in the Edit Package. The VAP checks the Hash Total while loading the file, so if the data is from one of these devices or is inter-VIC, an invalid Hash Total indicates one of these issues - Noise on the communication line has modified the data. - The sending VAP or VIC is not using the same Data Structure Table that the receiving VIC is using, which caused the receiving VIC to incorrectly expand the transaction. - The file was modified after the Edit Package was executed.
02	The transaction type for the Source Identifier or center is invalid.
03	The Interface Trace Number is invalid. An original, dispute response financial, or reversal with an Acquirer Reference Number Format Code of 3 has a trace number with one of these characteristics: - Non-numeric. - Not a valid acquiring or issuing identifier. - Not the originating processing CIB.
04	Non-zero TCRs do not pass basic edits. Either their source or destination identifier do not match the TCR 0, or they exceed the maximum sequence number defined for the transaction code.
05	A National Bilateral interchange transaction where the source and destination identifier pair is not part of the National Bilateral Interchange table set up in the BASE II software at a VIC.
06	An EIRF, EPS, CPS, or Supermarket original draft does not contain a TCR 1 or the Card Acceptor ID is all spaces or all zeros.
07	The Chargeback Reference Number in a draft data format transaction is invalid. It is nonnumeric or is nonzero on an original.
08	The Documentation Indicator in a draft data format transaction is invalid. It is not a valid code or is not spaces on an original.
09	The National Reimbursement Fee field is invalid. The contents are invalid, or no update to BASE II software has been requested to permit this function for the country.
10	One or both of the identifier in a transaction are not numeric.
11	A Bill Payment transaction is between clients of different countries.
12	The Acquirer Reference Number in a draft has one or more of these characteristics: - It is in 23 digit-format and is not numeric or does not have a check-digit. - It contains an invalid date. - It has a Film Locator Subfield that must not contain zeros.

Return/Reclassification Reason Codes

Code	Error Condition
13	The Reference Number acquirer identifier in the reference number in a draft has one or more of these characteristics: • It is non-numeric. • It starts with a 9 but is not a Visa transaction. • It has a standard Reimbursement Attribute of 0 and does not start with 4 or 5. • It is a TIRF transaction with an 18-digit Reference Number and does not begin with 9.
14	The Purchase Date in a draft has these characteristics: • It is non-numeric. • It is not a valid date. • It is in the future relative to the Edit Package processing date.
15	The Destination Amount in a draft data-type transaction is not zero.
16	The Account Number is not numeric.
17	The Authorization Code is invalid.
18	The Reason Code is not valid for the transaction type.
19	The Merchant Name (or Bank Name in a Bill Payment transaction) field is blank or not left-justified.
1A	Invalid Member Message Text.
1B	Invalid or inconsistent Business Format Code.
1C	Invalid Passenger Name.
1D	Invalid Departure Date.
1E	Invalid Origination City/Airport Code.
1F	The Carrier Code in the first Trip Leg group is missing or invalid.
1G	The Service Class in the first Trip Leg group is missing or invalid.
1H	The Stopover Code in one of the Trip Leg groups is invalid.
1I	The Destination City/Airport Code in the first Trip Leg group is missing or invalid.
1J	Invalid Acquirer's Business ID.
1K	Invalid Collection-Only Flag.
1L	Invalid Account Selection Field.
1M	Invalid Network Identification Code.
1N	The transaction type is invalid for the destination. For example, any non-ATM transaction destined for Plus or National Mastercard must have a Transaction Code of 07, 17, 27, or 37. Otherwise, it will be rejected with a return reason code of 1N.

Return/Reclassification Reason Codes

Code	Error Condition
1O	Recipient Name field is not valid for the transaction type.
1P	Insufficient Ancillary Data.
1R	A transaction does not meet the timeliness criteria established for the requested interchange reimbursement fee.
1S	Invalid installment payment count.
1T	Invalid deferred settlement type.
1U	The account range funding source is invalid.
1V	The identifier associated with the account number in a TC 10 (Fee Collection Transaction) or TC 20 (Funds Disbursement Transaction) is not equal to the source identifier or the destination identifier.
1W	Invalid Merchant Discount Rate.
1X	Invalid local authorization number.
1Y	National Net Settlement specified, but the source or the destination identifier has been specifically excluded.
1Z	Invalid IRF Category Code.
20	The Merchant City (or Bank City in a Bill Payment transaction) field is blank or not left-justified.
21	The Merchant Country Code is missing or invalid.
22	The Merchant Category Code is: • Zeros. • Non-numeric. • Nonexistent code.
23	The Merchant Category Code is invalid for the transaction type.
24	Invalid State/Province Code on a draft data, request for copy/original, or fraud advice transaction.
26	The destination of a monetary transaction is defined as nonmonetary.
28	The source of a monetary transaction is defined as non-monetary.
29	The Mail/Phone/Electronic and Indicator Commerce Indicator is invalid.
2A	Second Dispute Financial Not Allowed
30	The Card Product is not supported for electronic commerce transactions.
32	The Usage Code on a draft data transaction is invalid.
33	The Issuer Control Number on a request for copy/original transaction is invalid.

Return/Reclassification Reason Codes

Code	Error Condition
34	The Event Date field in Transaction Code 10 is nonnumeric or not a valid date.
35	The Source Amount in a Transaction Code 10 or 20 is greater than the maximum allowed for the Reason Code.
36	The Reimbursement Attribute code is not valid for the transaction type.
37	An international request for copy/original contains insufficient information. The merchant must be fully identified (Merchant Name and State/Country Code) or the Transaction Amount and Currency must be supplied.
38	UK Cat Dispute Financial with reason 23 or 83, and the account is not listed on Account Screen Authorization File (ASAF).
39	UK CAT CHB W/RSN 96-AMT < MIN
3C	Invalid Merchant Volume Indicator. The content of the Merchant Volume Indicator field is not valid.
3E	Payment Guarantee Option Indicator is not valid.
3F	Member-Supplied Fee must be numeric.
3G	Member-Supplied Fee currency code invalid.
3H	Member-Supplied Fee greater than Source Amount.
3I	Member-Supplied Fee is missing.
42	The Record Type in a Transaction Code 57 is not 1, 2, or 3, or the Record Subtype in a Transaction Code 58 is not 01, 02, 03, or 04.
43	The Destination Identifier does not exist.
44	The Source Identifier does not exist.
45	The destination of a monetary transaction is a acquirer identifier only, but the transaction can be routed only to an issuing identifier.
46	The source of a monetary transaction is a acquirer identifier only, but the transaction can come only from an issuing identifier.
47	The Source or Destination identifier in a National Net or Bilateral Interchange transaction is a U.S. client or the Merchant Country Code is U.S.
48	The Source identifier, Destination identifier, and merchant in a National Net or Bilateral Interchange transaction are not all in the same country or the Source Currency is not the local currency.
49	The counts or amounts in a Transaction Code 58 are not numeric.
4A	Merchant country differs from issuer country for a card range defined as domestic only.
4B	Active mark not valid for settlement service.
4C	Invalid Enabler Verification Value.

Return/Reclassification Reason Codes

Code	Error Condition
4D	Reserved.
4E	Invalid MVV.
50	The Card Expiration Date in a fraud advice transaction is invalid.
51	The Settlement Flag field is invalid.
52	No NNS defined for country.
53	The Source Amount is zero when it should be greater than zero or the decimal amount is greater than zero when the source currency code indicates a nonfractional currency (for example, Japanese Yen).
54	The Destination identifier in a fraud advice transaction is invalid.
55	Account Range/Transaction not allowed for Clearing Only Service.
56	The Currency Code in a request for copy/original, data capture advice, or interface transaction advice is invalid.
57	The Transaction Amount field in a request for copy/original or Source Amount field in a data capture advice or interface transaction advice is invalid.
58	No relationship is defined between the data capture processor and the acquirer for Transaction Code 57.
59	The source of a monetary transaction is an issuing identifier, but the transaction can be sent only by an acquiring identifier.
5A	Currency Code no longer supported for first presentments.
5B	Source/Destination is not a Bankcard identifier.
5C	Invalid Merchant Country for Bankcard.
60	A Transaction Code 57 has an invalid Draft Submitted Flag.
61	A Transaction Code 57 has an invalid data capture processor/CIB.
62	The Destination identifier of a monetary transaction is an issuing identifier only, but the transaction can be sent only to an acquiring identifier.
67	The State/Country Code in Transaction Code 10 or 20 is invalid.
68	The Account Number in Transaction Code 10 or 20 is invalid. The account number must be zero for certain reason codes and nonzero for others.
69	The Text Message area of Transaction Code 10 or 20 is all spaces.
6A	Invalid Record Type.
6B	Event Date not present or valid.
6C	Account number must point to a Destination identifier.

Return/Reclassification Reason Codes

Code	Error Condition
70	Issuer cannot receive additional Sender Data.
71	Additional required data missing.
76	The destination identifier could not be found in the SMS Globals. Contact Visa Member Services.
80	Product Reclassification has occurred. Note: Product Reclassification occurs in these conditions: • The product ID submitted by the acquirer does not match the product ID used to process the transaction. • No product ID was submitted by the acquirer, and the product ID used to process the transaction does not match the product ID associated with the Account Range in the Edit Package ARDEF table.
81	Spend Qualified Indicator Reclassification has occurred. Note: Spend Qualified Indicator Reclassification occurs when the acquirer submitted non-space Spend Qualified Indicator (SQI) value in the Draft Data TCR5 (position 149) that does not match the SQI used to process the transaction.
82	Account Funding Source reclassification has occurred.
90	The Settlement Reporting Entity (SRE) for the acquirer could not be found. For TC 10 Fee collections and TC 20 Funds Disbursements, the source identifier could not be found. Contact Visa Member Services.
91	The Settlement Reporting Entity (SRE) for the issuer could not be found. For TC 10 Fee Collections and TC 20 Funds Disbursements, the destination identifier could not be found. Contact Visa Member Services.
97	In an International Bilateral transaction (currently valid only in the Latin America and Caribbean Region), the Merchant Country, Source identifier, or Destination identifier is in different regions.
98	In an International Bilateral transaction, the Source identifier and Destination identifier are in the same country.
99	An International Bilateral transaction has the acquiring identifier in a different country than the merchant or has the Source Currency Code in a different currency from the merchant's currency.
9A	Invalid TCR 2 or invalid/missing data in a required NNSS field.
9B	Settlement Flag must be a 3 for clearing only.
9C	Invalid Transaction Code for clearing-only transactions.
9D	Request for Copy Dispute Mediation not allowed.
9E	Token to PAN relationship cannot be located.
9F	ECI reclassification has occurred on a Token transaction.

Return/Reclassification Reason Codes

Code	Error Condition
A1	The acquiring identifier in the Acquirer Reference Number (ARN) in a Bill Payment transaction is invalid. The field must contain a valid identifier and must be the same as the Source or Destination identifier.
A2	The Transfer Type is not numeric in a Bill Payment transaction.
A3	The Special Chargeback Indicator is invalid.
A4	The value of the dispute financial is less than the minimum amount allowed.
A5	In a Chargeback Reduction Service (CRS) return, a dispute financial is not above the floor limit as required.
A6	In a CRS return, the CRB/dispute financial (Chargeback Reason Code 70) contains an Authorization Code or 0000Y in the Authorization Code field.
A7	In a CRS return, a CRB/dispute financial is above the floor limit when it is required to be at or below the floor limit.
A8	In a CRS return, the CRB/dispute financial has an Account Number not listed in the merchant's bulletin or on the Exception File on the date of purchase.
A9	A required TCR is missing.
A10	Installment Payment Total Amount is missing or invalid.
A11	Installment Payment Risk Fee Amount is missing or invalid.
A12	VAT for Installment Payment Risk Fee Amount is missing or invalid.
A13	Installment Payment Interest National Net Impact in IRF Calculation - IRF Indicator is missing or invalid.
A14	Installment Payment Interest National Net Impact - Settlement Indicator is missing or invalid.
A15	Deferred Date is missing or invalid.
A16	IRF or VAT on IRF must be zeros or is invalid.
A17	Amount used for IRF calculation is negative.
A18	Deferred Settlement Date of the Originals (DSDO) missing or invalid.
A19	Installment Payment Amount is missing or invalid, or greater than the source amount.
A20	Surcharge amount is greater than or equal to the Source amount.
A21	Deferred Settlement not allowed for this transaction.
A22	Invalid Recurring Payment Type.
A23	Invalid Payment Amount Indicator Per Transaction.
A24	Invalid Number of Recurring Payment.

Return/Reclassification Reason Codes

Code	Error Condition
A25	Invalid Frequency of Recurring Payment.
A26	Invalid Registration Reference Number.
A27	Invalid Maximum Recurring Payment Amount.
A28	Invalid Validation Indicator.
A29	Reserved.
A30	BAI is invalid for Argentina Domestic Transactions.
A31	Cashback IRF or Tax on Cashback IRF must be zeros.
AA	An unauthorized transaction was received that was either above floor limit or where floor limit could not be determined, and the account was listed on ASCF or CRB on the purchase date.
AB	An unauthorized transaction was received that was below the floor limit and the account was listed on ASCF or CRB on the purchase date.
AR	Generated Transaction failed in Settlement Service Processing.
B1	A Transaction Code 57 has an invalid Account Number.
B2	The Transaction Code Qualifier is invalid.
B3	The Cashback field is invalid.
B4	The Format Code in the Acquirer Reference Number field is invalid.
B5	Prepaid Load not permitted.
B7	The Destination Currency Code is not space-filled.
B8	The Special Condition Indicators are invalid.
B9	The Account Number check digit is invalid.
B10	The Cardholder Deferred Period is missing or invalid.
B11	The Tax Benefit Law is missing or invalid.
B12	The Fiscal Benefits Retention Agent is missing or invalid.
B13	The Floor Limit applied by Tax Benefits Law is missing or invalid.
B14	The Basis Points Applied By Law is missing or invalid.
B15	The Tax Benefits Total Amount is missing or invalid.
B16	The Annual Effective Rate plus VAT is missing or invalid.
B17	The Base Amount for Tax Benefits Calculation is missing or invalid.
BA1	The transaction did not qualify for the Submitted Fee Program.

Return/Reclassification Reason Codes

Code	Error Condition
BA2	The Submitted Fee Program Indicator is invalid.
BA3	Ineligible transaction from a Limited Acceptance merchant.
BA4	Transaction Integrity failure
BA5	U.S. acquiring identifier should be used
BE	The Currency Code is invalid.
BH	The higher of CPS/Retail debit or credit card rate applies.
C0	Stop This Payment.
C1	Stop All Future Payments.
C2	Stop All Merchants.
C3	The Source Currency Code is not valid for the transaction type.
C5	The Central Processing Date is invalid.
C6	The Merchant ZIP Code is invalid.
C7	The Chargeback Reason Code is invalid for automated fuel dispenser transactions if the account is not Account Screen Authorization file (ASAF).
C8	Issuer Promo Flag is missing or invalid.
C9	Deferred Flag is missing or invalid.
C10	Deferred Period is missing or invalid.
C11	Grace Period Flag is missing or invalid.
CA	The Authorization Source Code is invalid.
CB	The POS Terminal Capability field is invalid.
CC	The POS Entry Mode field is invalid.
CD	The Cardholder ID Method field is invalid.
CE	The Online Authorization Reason Code in a draft data transaction is invalid.
CF1	The Card Sequence Number is invalid.
CF2	The Terminal Transaction Date is invalid.
CF3	The Terminal Capability Profile field is invalid.
CF4	The Unpredictable Number field is invalid.
CF5	The Application Transaction Counter field is invalid.
CF6	The Application Interchange Profile field is invalid.
CF7	The Cryptogram field is invalid.

Return/Reclassification Reason Codes

Code	Error Condition
CF8	Invalid Issuer Application Data.
CG1	The Terminal Verification Results field is invalid.
CG3	Script 1 Identifier subfield is invalid.
CG4	Script 1 Result subfield is invalid.
CG5	Source or Destination or Merchant Country is invalid for Chip Debit/Credit transactions.
CG6	Terminal Country Code is invalid.
CG7	Terminal Serial Number is invalid.
CG8	Source Currency is invalid.
CG9	Card Acceptor ID is invalid.
CH1	Terminal ID is invalid.
CH2	Destination currency is not zeros.
CH3	Source amount is not numeric.
CH4	Acquirer is not eligible for requested fee rates.
CH5	Chip card fees were requested for a non-chip-card transaction.
CJ	The Cardholder ID Method is not valid for the POS Entry Mode.
CR	Invalid, cannot process crypto transaction.
D1	A transaction that requires currency conversion could not be converted because the necessary conversion rate was not available.
D2	A transaction amount conversion resulted in zero when converting from a Source Amount to U.S. dollars or from U.S. dollars to a Destination Amount.
D3	The U.S. dollar value of a transaction exceeds the maximum amount allowable.
D4	A transaction's Destination Amount is too large for the Destination Amount field.
D5	The transaction was rejected because the merchant issuer or acquirer country code has been embargoed.
D6	Transaction Code 30 was returned because of an invalid Destination Identifier.
D7	Transaction Code 31 was returned because of an invalid Source Identifier.
D8	An Issuers' Clearinghouse System transaction (TC 30 or 31) was rejected because a non-U.S. identifier is involved.
D9	Local Regulated transaction received at a Global VIC.
DA	The Reversal Flag field in a data capture advice or an interface transaction advice is invalid.

Return/Reclassification Reason Codes

Code	Error Condition
DC	The Capture Date field in a data capture advice or an interface transaction advice is invalid.
DF	The Agent field in a data capture advice or an interface transaction advice is invalid.
DG	The Chain field in a data capture advice or an interface transaction advice is invalid.
DH	The Merchant Number field in a data capture advice or an interface transaction advice is invalid.
DI	The Merchant Store field in a data capture advice or an interface transaction advice is invalid.
DJ	The Terminal Number field in a data capture advice or an interface transaction advice is invalid.
DK	The Merchant Batch Number field in a data capture advice or an interface transaction advice is invalid.
DL	The Merchant Batch Date field in a data capture advice or an interface transaction advice is invalid.
DM	The Discover Merchant ID field in a data capture advice or an interface transaction advice is invalid.
DN	The Transaction Time field in a data capture advice is invalid.
DO	The Transaction Type field in a data capture advice or an interface transaction advice is invalid.
DP	The Transaction Void Indicator field in a data capture advice is invalid.
DQ	The Card Entry Method field in a data capture advice is invalid.
DR	The Film Locator field in a data capture advice or an interface transaction advice is invalid.
DS	The Tip field in a data capture advice or an interface transaction advice is invalid.
DT	The Batch Transaction Count field in a data capture advice is invalid.
DU	The Batch Net Amount field in a data capture advice is invalid.
DV	The Batch Net Amount Sign field in a data capture advice is invalid.
DW	The Batch Record Count field in a data capture advice is invalid.
DX	The Batch Gross Amount field in a data capture advice is invalid.
DY	The Destination identifier field in an interface transaction advice is invalid.
DZ	The Acquirer Bank ID field in an interface transaction advice is invalid.
E1	The Format Code in Transaction Code 57 or 59 is not 02, 03, 05, 10, 11, or 12.
E2	The Service Establishment Number in Transaction Code 57 or 59 is not numeric or has an invalid check digit.

Return/Reclassification Reason Codes

Code	Error Condition
E3	The Invoice Batch Code in Transaction Code 57 or 59 is not greater than zero.
E4	The Invoice Subcode in Transaction Code 57 or 59 is not numeric.
E5	The Process Control ID in Transaction Code 57 or 59 is not greater than zero.
E6	The File Sequence Number in Transaction Code 57 is not numeric.
E7	The Chain Affiliated Property (CAP) Number in Transaction Code 57 or 59 is not numeric or has an invalid check digit.
E8	The Approval Code in Transaction Code 57 or 59 is invalid.
E9	The Charge Description in Transaction Code 57 or 59 is blank or the field is not left-justified.
EA	The Record of Charge (ROC) Number in Transaction Code 57 or 59 is not numeric or the field is not right-justified.
EB	The Expiration Date in Transaction Code 57 or 59 is invalid.
EC	The Tax Amount is not numeric.
ED	The Item Quantity in Transaction Code 57 or 59 is not numeric or is zero where the Item Unit Price or Item Total Price is greater than zero.
EE	The Item Descriptor in Transaction Code 57 or 59 contains all blanks where the Item Quantity is greater than zero.
EF	The Item Unit Price in Transaction Code 57 or 59 is zero where the Item Quantity is greater than zero or not numeric.
EG	The Item Total Price in Transaction Code 57 or 59 is zero where the Item Quantity is greater than zero.
EH	The Rental Agreement Number in Transaction Code 57 or 59 is blank or is not left-justified.
EI	The Audit Adjustment in Transaction Code 57 or 59 is not numeric.
EJ	The Audit Adjustment Indicator in Transaction Code 57 or 59 is invalid.
EK	The Auto Reference Number in Transaction Code 57 or 59 is invalid.
EL	The Rental City Transaction Code 57 or 59 is blank or is not left-justified.
EM	The Rental State in Transaction Code 57 or 59 is an invalid U.S. State Code.
EN	The Rental Date in Transaction Code 57 or 59 is invalid.
EO	The Rental Time in Transaction Code 57 or 59 is invalid.
EP	The Return City in Transaction Code 57 or 59 is blank or is not left-justified.
EQ	The Return State in Transaction Code 57 or 59 is an invalid U.S. State Code.

Return/Reclassification Reason Codes

Code	Error Condition
ER	The Return Date in Transaction Code 57 or 59 is invalid.
ES	The Return Time in Transaction Code 57 or 59 is invalid.
ET	The Renter Name in Transaction Code 57 or 59 is blank or is not left-justified.
EU	The Charge Type in Transaction Code 57 or 59 is not 1, 2, or 3.
EV	The Arrival Date in Transaction Code 57 or 59 is invalid.
EW	The Departure Date in Transaction Code 57 or 59 is invalid.
EX	The Duration of Stay in Transaction Code 57 or 59 is invalid.
EY	The Special Program in Transaction Code 57 or 59 is invalid.
EZ	The Room Rate in Transaction Code 57 or 59 is invalid.
F1	The Account Number in Transaction Code 57 or 59 does not begin with 34 or 37.
F2	The Food ID in Transaction Code 57 or 59 is not FOOD^^^, FOOD-BEV, or B-MY-GST. Note: (^ = space)
F3	The Food Amount in Transaction Code 57 or 59 is invalid.
F4	The Beverage Amount in Transaction Code 57 or 59 is invalid.
F5	The Beverage ID in Transaction Code 57 or 59 is invalid.
F6	Tip Amount 1 in Transaction Code 57 or 59 is invalid/Invalid Tip Amount for Argentina National Net Data.
F7	Tip Recipient Literal 1 in Transaction Code 57 or 59 is invalid.
F8	Tip Amount 2 in Transaction Code 57 or 59 is invalid.
F9	Tip Recipient Literal 2 in Transaction Code 57 or 59 is invalid.
FA	Invalid Merchant Batch Key.
FB	Invalid Original Ticket Number.
FC	Invalid Transaction Based on Record Format Code in TC 57.
FD	Invalid Multiple Clearing Sequence Number in TC 57.
FE	Invalid Multiple Clearing Sequence Count in TC 57.
FF	Invalid Market-specific Authorization Data Indicator in TC 57.
FG	Invalid Total Authorized Amount in TC 57.
FH	Invalid Submitted Authorization Data Indicator in TC 57.
G0	Invalid Requested Fulfillment or Nonfulfillment Method.
G1	Invalid Issuer RFC routing identifier.

Return/Reclassification Reason Codes

Code	Error Condition
G3	Invalid End Flag.
G4	Invalid Last TCR Data Length.
G5	Invalid Retrieval Request ID.
G6	Invalid Data Type Flag.
G7	Invalid Transaction Type.
G8	Invalid Source Routing Flag.
G9	Invalid Destination Routing Flag.
GA	Invalid Message Transaction Number.
GB	Invalid Destination Subaddress.
GC	Invalid Source Subaddress.
GD	Invalid Error Return Flag.
GE	Invalid Retrieval Request Reason Code in an RFC Message Transaction.
GF	Invalid Data Flags.
GG	Invalid Error Reason Code.
GH	Invalid Ruling Reason Code.
GI	Invalid Dispute Request Date.
GJ	Invalid Request Type.
GK	Invalid Request Processing Date.
GL	Invalid Pick-list ID.
GM	Invalid Pick-list Item Number.
GN	Invalid Purchase Year.
GP	Invalid Statement Date.
GQ	Transaction not allowed - Transaction is blocked for source or destination.
GT	TC 51 or TC 53 transaction no longer valid in jurisdiction.
GU	TC52 is not valid for this transaction.
GV	Invalid TC 52: beyond the allowed time limit. Note: Normal time limit for request for copy is 12 months (1 year) from the original transaction date. For Healthcare Auto-Sub Data Retrieval Requests (Request for Copy Reason Code 27), the time limit is 60 months (5 years) from the original transaction date.

Return/Reclassification Reason Codes

Code	Error Condition
GW	Legacy chargeback cannot be submitted by a VCR eligible country. Note: This new return reason code is only used in BASE II returned items.
GX	Dispute financial cannot be submitted for a non-VCR jurisdiction. Note: This new return reason code is only used in BASE II returned items.
GY	VROL case number is missing. Note: This new return reason code is only used in BASE II returned items.
H0	The recalculation of the validation code at the VIC showed that one of the fields listed below did not match the value in the authorization message. CPS—U.S.: • Account Number • Authorized Amount • Authorization Characteristics Indicator • Authorization Code • Authorization Currency Code • Authorization Response Code • Cashback • Market-Specific Authorization Indicator • Merchant Category Code • POS Entry Mode • Transaction Identifier • Product ID CPS/ATM: • Account Number • Authorization Characteristics Indicator • Transaction Identifier • Authorized Amount • Authorization Currency Code • Merchant Country Code • ATM Account Selection • Acquiring Identifier • Surcharge Amount

Return/Reclassification Reason Codes

Code	Error Condition
H0 (continued)	Electronic Data Quality Program (EDQP): • Account Funding Source • Account Number • Authorized Amount • Authorization Characteristics Indicator • Authorization Code • Authorization Currency Code • Authorization Response Code • Cashback • Market-Specific Authorization Indicator • Merchant Category Code • POS Entry Mode • Transaction Identifier • Product ID
H1	For a CPS transaction, the purchase date and authorization date timeliness requirements were not met.
H2	Authorization Characteristics Indicator is invalid. Note: In the U.S. region, this could mean that the Authorization Characteristics Indicator is invalid for the Transaction Code Qualifier submitted.
H3	Acceptance Terminal Indicator is invalid.
H4	Prepaid Card Indicator is not a space or a P.
H5	Transaction Identifier is non-numeric.
H6	Transaction Identifier must be zeros.
H7	Transaction Identifier must not be zeros.
H8	Authorized Amount is non-numeric.
H9	Authorized Amount must be zeros.
HA	Authorized Amount must not be zeros.
HB	Authorization Currency Code is invalid.
HC	Authorization Currency Code must not be spaces.
HD	Authorization Currency Code must be spaces.
HE	Authorization Response Code is invalid.
HF	Authorization Response Code must be spaces.

Return/Reclassification Reason Codes

Code	Error Condition
HG	Validation Code must not be spaces.
HH	Validation Code must be spaces.
HI	Payment Service Indicator is invalid for the transaction type.
HJ	Authorization Currency Code must be the same as the Source Currency Code.
HK	Chargeback Reason Code is not valid for a CPS transaction.
HL	Transaction Identifier is invalid. An example is when Visa does not have the Transaction Identifier on file.
HM	Excluded Transaction Identifier Reason must be spaces.
HN	Excluded Transaction Identifier Reason is invalid.
HP	Invalid Requested Payment Service field. Note: In the U.S. region, this could mean that the Requested Payment Service is invalid for the Transaction Code Qualifier submitted.
HQ1	Market-specific data requirement not met—Invalid Original Ticket Number or Ancillary Service Description.
HQ2	Market-specific data requirement not met—Invalid Lodging Check-in Date.
HQ3	Market-specific data requirement not met—Invalid Purchase Identifier format.
HQ4	Market-specific data requirement not met—Total Authorization Amount must be greater than zero.
HQ5	Market-specific data requirement not met—Invalid Market-Specific Authorization Data Indicator.
HQ6	Market-specific data requirement not met—Invalid Car Rental Check-Out Date.
HQ7	Market-specific data requirement not met—invalid Merchant Telephone Number or URL or Email.
HR1	Multiple Clearing Sequence Number must be numeric.
HR2	Multiple Clearing Sequence Number must be greater than zero.
HS	Multiple Clearing Sequence Count must be numeric.
HT	Transaction does not meet authorization timeliness criteria.
HT1	Total Authorized Amount must be numeric.
HT2	Total Authorized Amount must be zero.
HU	Invalid Authorization Characteristics Indicator and Requested Payment Service field combination.
HU2	Invalid Reimbursement Attribute, Requested Payment Service, and Authorization Characteristics Indicator combination for the market segment and Transaction Code.

Return/Reclassification Reason Codes

Code	Error Condition
HV1	Failed amount tolerance edit—Source Amount is greater than allowed.
HV2	Failed amount tolerance edit—Source Amount and Authorization Amount tolerance requirements not met.
HW	Transaction not eligible for CPS processing.
HX	Invalid Market-Specific Authorization Data Indicator.
HY	Failed amount tolerance edit. Source Amount and Authorization Amount tolerance requirements not met. Please resubmit.
HY1	Failed amount tolerance edit. Authorization amount and source amount must match. Adjust source amount to match authorization and resubmit clearing transaction.
HZ	The recalculation of the validation code at the VIC showed that one of the fields listed below did not match the value in the authorization message. Please resubmit. • Account Number • Authorized Amount • Authorization Characteristics Indicator • Authorization Code • Authorization Currency Code • Authorization Response Code • Cashback • Market-Specific Authorization Indicator • Merchant Category Code • POS Entry Mode • Transaction Identifier • Product ID CPS/ATM: • Account Number • Authorization Characteristics Indicator • Transaction Identifier • Authorized Amount • Authorization Currency Code • Merchant Country Code • ATM Account Selection • Acquiring Identifier • Surcharge Amount
J1	The Payment Mode in a Japanese National Data transaction is invalid.

Return/Reclassification Reason Codes

Code	Error Condition
J2	The Net Sales Amount in a Japanese National Data transaction is not numeric.
J3	The Tax and Mailing Charge in a Japanese National Data transaction is not numeric.

Return/Reclassification Reason Codes

Code	Error Condition
P4	Incorrect Miscellaneous Fuel Tax Exemption Status for the transaction type.
P5	Invalid Merchant or Account Product ID for the program.
P6	Business Application ID (BAI) is invalid.
R01	Chargeback or Re[presentment Reason Code is not valid for a CPS transaction.
R02	Chargeback Reason Code is not valid for a PS2000 card-present/T&E transaction.
R03	Chargeback Reason Code is not valid for a PS2000 card-present/non-T&E transaction.
R04	Chargeback Reason Code is not valid for a PS2000 card-not-present and AVS/T&E transaction.
R05	Chargeback Reason Code is not valid for a PS2000 card-not-present and AVS/non-T&E transaction.
R06	Chargeback Reason Code is not valid for a PS2000 card-not-present and Preferred Customer/T&E transaction.
R07	Chargeback Reason Code is not valid for a PS2000 card-present and no verifiable cardholder identification/non-T&E transaction.
R08	Chargeback Reason Code is not valid for a PS2000 card-not-present/T&E transaction.
R09	Chargeback Reason Code is not valid for a PS2000 card-not-present/non-T&E transaction.
R10	Chargeback or Re-presentment Reason Code is not valid for a non-CPS transaction.
R21	Partial dispute financial amount exceeds difference between authorization and source amounts.
S01	Transaction Identifier is invalid, for example, when Visa does not have the Transaction Identifier on file.
S02	Reimbursement Attribute does not match original presentment or is invalid for this transaction.
S03	Transaction Code is not applicable for the given Reason Code.
S04	Transaction Code does not properly correspond to the Transaction Code on the presentment or dispute financial. For example, when presentment is TC 05, dispute financial must be TC 15.
S05	Usage Code field is invalid for the transaction life cycle sequence of events or is not allowed for the transaction.
S06	Usage Code is not allowed for the given Reason Code of the transaction.
S07	A dispute financial with the given Usage Code has already been processed for this Transaction Identifier.
S08	Invalid Account Number for the given Transaction Identifier.
S09	First dispute financial must be done prior to second presentment.

Return/Reclassification Reason Codes

Code	Error Condition
S10	Second presentment must be done prior to second dispute financial.
S13	A reversal has already been processed. This transaction is invalid at this time.
S14	A subsequent transaction has been processed prior to the receipt of the reversal.
S15	Account Number does not match original presentment or is invalid for this transaction.
S16	Acquirer Business ID does not match original presentment or is invalid for this transaction.
S17	Special Condition Indicator does not match original presentment or is invalid for this transaction.
S18	Card Acceptor ID does not match original presentment or is invalid for this transaction.
S19	Fee Program Indicator does not match previous transaction or the submitted Fee Program Indicator is invalid.
S20	Acquirer Reference Number does not match original presentment or is invalid for this transaction.
S21	Merchant State/Province does not match original presentment or is invalid for this transaction.
S22	Multiple Clearing Sequence Number does not match Original Presentment or is invalid for this transaction.
S23	Requested Payment Service does not match original presentment or is invalid for this transaction.
S25	Duplicate transaction. Transaction has already been processed.
S27	Either a corresponding transaction for the reversal has not been processed, or one or more fields in the reversal, such as the CPD date field, does not correspond to the item being reversed.
S30	Transaction Amount does not match original presentment or is invalid for this transaction.
S35	Transaction Currency Code does not match original presentment or is invalid for this transaction.
S40	Merchant Country Code does not match original presentment or is invalid for this transaction.
S45	Purchase Date does not match original presentment or is invalid for this transaction.
S50	Special Chargeback Indicator must be a P if the source amount of the dispute financial is less than the original presentment amount, or the source amount of the dispute response financial is less than the dispute financial amount.
S55	Duplicate Request for Copy or Original on the same Transaction Identifier. Valid Reason Codes for Duplicate Request are 34 and 39.

Return/Reclassification Reason Codes

Code	Error Condition
S60	Retrieval Request ID must equal Request for Copy or Original.
S70	Merchant Verification Value does not match original presentment or is invalid for this transaction.
T01	Transaction was not received within the time period.
T02	Dispute financial submitted sooner than the Visa Core Rules and Visa Product and Service Rules allow.
T03	Chargeback Reason Code is invalid for domestic transactions.
T04	Member Message Text is invalid for the Chargeback Reason Code.
T05	Documentation Indicator is invalid for the Reason Code or for the Merchant Category Code associated with the Reason Code.
T07	Acceptance Terminal Indicator does not match original presentment or is invalid for this transaction.
T08	Chargeback Reference Number does not match previous dispute financial or is invalid for this transaction.
T10	CRB/Exception File Indicator field does not match original presentment or is invalid for this transaction.
T15	Merchant Category Code does not match original presentment or is invalid for this transaction.
T20	Mail/Phone/Electronic Commerce and Payment Indicator field does not match original presentment or is invalid for this transaction.
T25	Prepaid Card Indicator does not match with original presentment or is invalid for this transaction.
T30	Source Amount does not match prior presentment.
T31	Source Amount must be greater than or equal to the minimum amount allowed for the Reason Code.
T32	Source Amount exceeds the maximum amount allowed for this transaction.
T33	Source Amount must be less than or equal to the prior chargeback amount.
T34	Source Amount must be less than or equal to the prior presentment.
T35	Source Amount must be less than or equal to two times the original presentment amount.
T36	Source Amount must be less than the prior presentment.
T38	Terminal ID does not match original presentment or is invalid for this transaction.
T40	Request for Copy must be done prior to this transaction.
T41	Retrieval Request was submitted prior to this dispute financial. Request Reason Code is not allowed for the Chargeback Reason Code.

Return/Reclassification Reason Codes

Code	Error Condition
T42	Retrieval Request was submitted prior to this transaction. Request Reason Code was not 29 or 79 and is not allowed for the Chargeback Reason Code.
T45	Issuer Control Number does not match Retrieval Request or is invalid for this transaction.
T50	Request Reason Code does not match Retrieval Request or is invalid for this transaction.
T51	Additional Retrieval Request is not allowed when Nonfulfillment exists for Reason Code 3 or 4.
T60	Dispute was ruled in favor of the acquirer. Chargeback Reason Code is invalid for the Mediation Ruling.
T61	Chargeback Reason Code is inconsistent with Dispute Reason.
T62	Chargeback Reason Code is not allowed when a nonfulfillment exists or there is no fulfillment on file.
T63	Chargeback Reason Code is not allowed when a fulfillment exists.
T64	Transaction type is not allowed when a fulfillment or a nonfulfillment was submitted past the allowed timeframe.
T65	A Nonfulfillment message exists. Dispute response financial is invalid.
T70	A Retrieval Request with the same Transaction Code must be submitted before making a repeat request.
U1	Invalid National Net Country Code
U2	Invalid Account Type
U3	Invalid IRF Type
U4	Member-Supplied Tax for IRF is missing
U5	Installment Payment Type is missing or invalid.
U6	Invalid Payment Indicator
U7	Number of Installment Payments is missing or invalid.
U8	Grace Period is missing or invalid.
U9	Invalid Frequency of Payment
U10	Installment Payment Interest is missing or invalid.
U11	VAT for Installment Payment Interest is missing or invalid.
U12	Installment Payment Number is missing or invalid.
U13	Installment Payment Plan Owner is missing or invalid.
V01	Case number not found in VROL.
V02	Duplication message; this dispute message was previously processed.

Return/Reclassification Reason Codes

Code	Error Condition
V03	Primary account number (PAN) does not match the original.
V04	Dispute amount does not match the dispute amount in VROL.
V05	Dispute amount currency does not match the dispute amount currency in VROL.
V06	Reason code does not match the reason code in VROL.
V07	VROL bundle case number does not match the VROL bundle case number in VROL.
V08	Transaction identifier does not match the transaction identifier on the original.
V09	Acquirer reference number does not match the acquirer reference number on the original.
V10	Card acceptor identification code does not match the card acceptor identification code on the original.
V11	Merchant category code (MCC) does not match the MCC on the original.
V12	Merchant city does not match the merchant city on the original.
V13	Merchant country code does not match the merchant country code on the original.
V14	Purchase date does not match the purchase date on the original.
V15	Reimbursement attribute does not match the reimbursement attribute on the original.
V16	VCR Financial Initiator Identifier is missing
V17	VCR Financial Status Identifier is missing
V18	Dispute Status missing
V19	Previous IRF data missing
V20	VROL Financial ID is missing
V21	Dispute Condition is missing
V22	Condition Codes field is missing
V23	Token does not match the original
V24	Acquiring institution ID code does not match the acquiring institution ID code on the original.
V25	Full dispute identified as a partial dispute via the special Chargeback Indicator field.
V26	Original transaction amount/currency is missing
V27	Missing/Invalid VisaNet processed original transaction
V29	Previous VAT on IRF data missing.
V30	Previous Installment Interest data missing.

Return/Reclassification Reason Codes

Code	Error Condition
V31	Previous VAT on installment interest data missing.
V32	Previous Installment Risk Fee data missing.
V33	Previous VAT on Installment Fee Risk data missing.
V1	Source Settlement Reporting Entity (SRE) not found.
V2	Destination Settlement Reporting Entity (SRE) not found.
V3	Unmatched FCS (Format Conversion Service) ATM Transaction.
V4	Money Transfer Data Requirement not met - Missing AML Data.
X1	Duplicate VML Array Index
X2	VML Element out of the Group Element.
X3	Invalid or missing VML Array Index.
X4	Invalid character in a text field.
X5	Invalid length in a VML transaction.

Note: Codes C0, C1, C2 are related to the Visa Stop Payment Service (VSPS). See V.I.P. System Overview and Services for more information about this service.

Service Type

The Service Type Code identifies the type of service at the fuel station.

It is used in Draft Data: TC 05-TCR 3 EMV Fleet Service, Position 24.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Service Type Codes

Code	Definition
Space	Non-Fuel Transaction
F	Full Service
H	High Speed Dispense
S	Self-Service

Settlement Flag

The Settlement Flag Code indicates the service used for settlement.

It is used in these interchange formats:

- Draft Data: TCR 0, Position 150
- TC 10, Fee Collection: TCR 0, Position 147
- TC 20, Funds Disbursement: TCR 0, Position 147
- TC 38, Copy Request and Fulfillment: TCR 0, Position 38
- TC 39, Copy Fulfillment Service: TCR 0, Position 38
- TC 44, Collection Batch Acknowledgment: TCR 0 - Batch Disposition Code A, Position 41
- TC 51, 52, 53, Retrieval Request/Confirmation: TCR 0, Position 138

Settlement Flags

Code	Definition
0	International settlement service.
3	Clearing only international settlement
4	Clearing only national net settlement
8	National Net settlement service.
9	BASE II selects the appropriate settlement service based on routing and country default. Note: A code 9 may be used only if the client's country has registered a "default" settlement service with Visa for domestic interchange.

Settlement Type

The Settlement Type Code indicates if settlement is deferred and by how many days.

It is used in Draft Data TCR 2 - Brazil, Positions 23-25.

Settlement Type Codes

Code	Definition
000	No deferment
001	1-day deferment
002	2-day deferment

Settlement Type Codes

Code	Definition
003	3-day deferment
004	4-day deferment
005	5-day deferment
006	6-day deferment
007	7-day deferment
008	8-day deferment
009	9-day deferment
010	10-day deferment
011	11-day deferment
012	12-day deferment
013	13-day deferment
014	14-day deferment
015	15-day deferment
016	16-day deferment
017	17-day deferment
018	18-day deferment
019	19-day deferment
020	20-day deferment
021	21-day deferment
022	22-day deferment
023	23-day deferment
024	24-day deferment
025	25-day deferment
026	26-day deferment
027	27-day deferment
028	28-day deferment

Special Chargeback Indicator

The Special Chargeback Indicator supplies extra information regarding disputes (validation requests and advices).

It is used in Draft Data: TCR 1 - Additional Data, Position 117.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Special Chargeback Indicators

Code	Definition
Space	Field not applicable.
P	Partial amount.

Special Condition Indicators

The Special Condition Indicator supplies extra information regarding dispute financials (validation requests and advices).

It is used in Draft Data: TCR 1 - Additional Data, Positions 74-75.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

FIRST POSITION (RISK IDENTIFICATION INDICATOR)

Code	Description
Space	RIS indicator not required for this merchant
1	Zero floor limit required.
2	Terminal capable of reading and transmitting the full unaltered contents of the magnetic stripe.
3	Zero floor limit and terminal capable of reading and transmitting the full unaltered contents of the magnetic stripe.

SECOND POSITION (MERCHANT TRANSACTION INDICATOR)

Code	Description
Space	None of the specified conditions is present.
F	Facsimile Draft provided.
H	Visa Lodging Services—Hotel qualifies for the special floor limit (international only).
L	Visa Lodging Services Merchant.
1	Purchase of Central Bank Digital Currency (CBDC) or Tokenized Deposits.
2	Purchase of Stablecoin (fiat-backed).
3	Purchase of Blockchain Native Token/Coin.
4	Purchase of non-fungible token (NFT).
7	Purchase of cryptocurrency Note: For OCT/AFT also includes sale or conversion of crypto currency to fiat.
8	Quasi-cash/Online gambling. (See Visa Core Rules and Visa Product and Service Rules for a list of quasi-cash items.)
9	Existing Debt Indicator

Transaction Code Qualifier

This field must contain one of these values:

The Transaction Code Qualifier is used in these interchange formats:

- Draft Data: TCR 0, Position 3
- Draft Data: TCR 1, Position 3
- Draft Data: TCR 2, Position 3
- Draft Data: TCR 3, Position 3
- Draft Data: TCR 4, Position 3
- Draft Data: TCR 5, Position 3
- Draft Data: TCR 6, Position 3
- Draft Data: TCR 7, Position 3

Transaction Code Qualifiers

Code	Definition
0	Default
1	Account Funding Transaction
2	Original Credit Transaction

Type of Purchase Code

This code indicates whether the purchase was a fuel purchase, a non-fuel purchase, or both. The Type of Purchase code is used in Draft Data: TCR 3 (Fleet Service), Position 27.

Type of Purchase Codes

Code	Definition
1	Fuel Purchase (single fuel code)
2	Non-Fuel Purchase
3	Fuel and Non-Fuel Purchase Value of 3 indicates that the transaction includes single or multiple fuel type codes in addition to any non-fuel items. Refer to the <i>Visa Fleet Card 2.0 Data and Platform Guide</i> for more information regarding Multiple Fuel Codes.
4	Fuel Purchase (multiple fuel codes)

Acceptance Terminal Indicator

The Acceptance Terminal Indicator shows the type of acceptance terminal used for a transaction.

It is used in Draft Data: TCR 1 - Additional Data, Position 124.

Note: If the format is VML and the code is a space or zero, special attention must be paid because the code could have two different meanings: 1) in VML the space or zero can mean not applicable, in which case the field should not be present in the transaction, or 2) if the space or zero has a business meaning, the field should be present in the transaction (for example, a space may indicate eligibility for a particular fee type).

Acceptance Terminal Indicator

Value	Acceptance Terminal Type	Usage
Space	Not applicable to this transaction	Use to indicate that the transaction does not originate at an unattended terminal.
1	Unattended cardholder-activated, no authorization, below floor-limit transaction.	Use to indicate that the transaction: • Is less than US\$40, or local currency equivalent. • Is not authorized. • Has no cardholder verification performed. Examples of a Type A UAT transaction are: • Parking garage fee • Road toll • Motion picture theater admission • Magnetic stripe telephone call
2	Unattended chip and PIN transactions (VE use only)	Use to indicate that the transaction: • Is authorized. • Has PIN verification performed. Examples of a Type C UAT transaction are: • ATM • Fuel purchase with PIN
3	Unattended cardholder-activated, authorized transaction	Use to indicate that the transaction: • Is less than US\$100, or local currency equivalent. • Is authorized. • Has no cardholder verification performed. Examples of a Type B UAT transaction are: • Fuel purchase without PIN • Prepaid card purchase • Video rental
4	Remote Indicator	Use to indicate that the transaction occurred from a remote terminal or off premise ATM.
9	Mobile Acceptance Solution	Use to indicate that a transaction occurred with a Merchant Mobile Device.

Unit of Measure Code

The Unit of Measure Code indicates the unit of measure.

It is used in Draft Data: TC 05-TCR 3 EMV Fleet Service, Position 25.

Unit of Measure Code

Code	Definition
C	(CM) Charging Minutes
G	U.S. Gallon
I	Imperial Gallon
K	Kilo
L	Liter
P	Pound
W	(kWh) Kilowatt Per Hour

Chapter 2

Country and Currency Codes

Country and Currency Code Fields

Country and Currency Codes are used in these interchange formats:

- Draft Data: TCR 0, Positions 89-91 and 130-132; TCR 2, Positions 17-19
- TC 10, Fee Collection: TCR 0, Positions 21-23, 59-61, and 74-76; TCR 2-Brazil, Positions 17-19
- TC 20, Funds Disbursement: TCR 0, Positions 21-23, 59-61, and 74-76
- TC 33, RDMS/CRS: TCR 0-CRS Issuer Advice, Positions 68-70, 83-85, and 131-133
- TC 38, Copy Request/Fulfillment: TCR 1-RFC Advice, Positions 82-84; TCR 1-Nonfulfillment, Positions 31-33
- TC 40, Fraud Advice: TCR 0, Positions 115-117 and 137-139
- TC 42, Merchant File Update: TCR 0-Record 1, Positions 98-99
- TC 44, Collection Batch Acknowledgment: TCR 0-Batch Disposition A, Positions 38-40
- TC 46, Member Settlement Data: TCR 0, Positions 22-24

- TC 48, BASE I Advice: TCR 0-Format 1 (ISO-enriched), Positions 78-80 and 81-83
- TC 51, 52, 53, Retrieval Request/Confirmation: TCR 0, Positions 71-73 and 112-114; TCR 1, Positions 54-56
- TC 56, Currency Conversion Rate Update: TCR 0, Positions 18-20, 33-35, 48-50, 63-65, 78-80, 93-95, and 108-110
- TC 59, Interface Transaction Advice: TCR 0, Positions 117-119

Note: Not all ISO 3166-1 codes are supported by Visa.

ISO Numeric Currency Codes

This table contains the ISO Numeric currency code for each country.

Numeric Currency Code to Country Name Cross-Reference

ISO Numeric Currency Code	Country/Territory Name
008	Albania
012	Algeria
032	Argentina
036	Australia, Christmas Island, Cocos (Keeling) Islands (the), Heard Island and McDonald Islands, Kiribati, Nauru, Norfolk Island, Tuvalu
044	Bahamas (the)
048	Bahrain
050	Bangladesh
052	Barbados
060	Bermuda
064	Bhutan
068	Bolivia (Plurinational State of)
072	Botswana
084	Belize
090	Solomon Islands
096	Brunei Darussalam
104	Myanmar
108	Burundi

Numeric Currency Code to Country Name Cross-Reference

ISO Numeric Currency Code	Country/Territory Name
116	Cambodia
124	Canada
132	Cabo Verde
136	Cayman Islands (the)
144	Sri Lanka
152	Chile
156	Mainland China
170	Colombia
174	Comoros (the)
188	Costa Rica
191/978	Croatia
192	Cuba
203	Czechia
208	Denmark
214	Dominican Republic (the)
230	Ethiopia
232	Eritrea
233	Estonia
238	Falkland Islands (the) (Malvinas)
242	Fiji
262	Djibouti
270	Gambia (the)

941	Serbia
943	Mozambique
944	Azerbaijan
946	Romania
949	Turkey
950	Cameroon, Central African Republic (the), Chad, Congo (the), Equatorial Guinea, Gabon
951	Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and The Grenadines
952	Benin, Burkina Faso, Guinea-Bissau, Cote d'Ivoire, Mali, Niger (the), Senegal, Togo
953	French Polynesia, New Caledonia, Wallis and Futuna
967	Zambia
968	Suriname
969	Madagascar
971	Afghanistan
972	Tajikistan
973	Angola
974	Belarus (Valid for exceptions only)
975	Bulgaria
976	Congo (the Democratic Republic of the)
977	Bosnia and Herzegovina
978	Croatia
978	Lithuania

Numeric Currency Code to Country Name Cross-Reference

ISO Numeric Currency Code	Country/Territory Name
978	Andorra, Austria, Belgium, Croatia, Cyprus, Estonia, Finland, France, France Metropolitan, French Guiana, French Southern Territory (the), Germany, Greece, Guadeloupe, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Martinique, Mayotte, Monaco, Netherlands (the), Portugal, Reunion, Spain, Saint Pierre and Miquelon, San Marino, Slovakia, Slovenia, United Nations Interim Administration Mission in Kosovo (UNMIK), Holy See (the), Montenegro.
980	Ukraine
981	Georgia
985	Poland
986	Brazil

ISO Country and Currency Codes

This table lists the ISO Alpha currency code, ISO Numeric currency code, ISO Alpha country code, and ISO Numeric country code by country name.

A superscript ^s following the currency name indicates that it is a settlement currency.

Country and Currency Codes

Country/ Territory/ Region Name	ISO Alpha Country / Region (2- Character) Code	ISO Numeric Country/ Region Code	ISO Currency Name	ISO Alpha Currency Code	ISO Numeric Currency Code

Canadian Province Codes

This table lists the valid values for provinces and territories listed under the ISO Alpha country code CAN.

Canadian Province Codes are used in these interchange formats:

- Draft Data: TCR 0, Positions 142-144
- TC 33, CRS Issuer Advice: TCR 0, Positions 128-130

- TC 38, RFC Advice: TCR 1-RFC Advice, Positions 94-96
- TC 40, Fraud Advice: TCR 0, Positions 122-124; TCR 1, Positions 118-119
- TC 42, Merchant File Update: TCR 0-Record 1, Positions 120-121
- TC 51, 52, 53, Retrieval Request/Confirmation: TCR 0, Positions 124-126
- TC 57, Data Capture Advice: TCR 1, Positions 72-74
- TC 59, Interface Transaction Advice: TCR 0, Positions 114-116

Canadian Province Codes

The values in this table are only used if the C218 Country Code field contains CAN.

Canadian Province Codes

Province	Code
Alberta	AB
British Columbia	BC
Manitoba	MB
New Brunswick	NB
Newfoundland and Labrador	NL

Chapter 3

Retained and Returned Data Elements

Retained and Returned Data Elements - International

This table lists the fields important to the processing of dispute financials, retrievals, and fraud advices for international transactions. It also identifies fields that must be retained from an incoming original transaction for possible return in a secondary processing transaction.

These notations indicate whether the data element must be included in the transaction type:

X = Data element is required.

Y = Optional if all fields marked Z are present.

Z = Optional if all fields marked Y are present.

Retained and Returned Data Elements - International

Field Name	Dispute Financials	Dispute Response Financials	Retrieval Requests	Fraud Advices
Account Number	X	X	X	X
Acquirer Reference Number	X	X	X	X
Authorization Code	X	X		
Card Acceptor ID	X	X		
Destination Amount	X	X		X
Destination Currency Code	X			X

Merchant City	X	X	X	X
Merchant Country Code	X	X	Z	X
Merchant Name	X		Z	X
Merchant State/Province Code	X	X	X	X
National Reimbursement Fee (Required only if applicable to the country)	X			
Purchase Date	X	X	X	X
Reimbursement Attribute	X	X		
Requested Payment Service	X	X		
Settlement Flag	X		X	
Source Amount			Y	
Source Currency Code			Y	
Special Condition Indicators	X	X		
Transaction Identifier	X	X	X	X

Note: Mail/Phone/Electronic Commerce and Payment Indicator is required only if present in original presentment.

Note: Merchant Country Code and Requested Payment Service is required for CPS participating countries.

Note: Merchant State/Province Code is required if Merchant Country Code is US or CA.

Note: Source Amount and Source Currency Code are optional for Transaction Amount/
Transaction Currency Code on the Retrieval Request.

Retained and Returned Data Elements - U.S. National

This table lists the fields important to the processing of dispute financials, retrievals, and fraud advices for U.S. transactions. It identifies which fields must be retained from an incoming original transaction for possible return in a secondary processing transaction.

These notations indicate whether the data element must be included in the transaction type:

P = Data element is only required in Plus transactions

X = Data element is required

Retained and Returned Data Elements - U.S. National

Field Name	Dispute Financial	Dispute Response Financial	Retrieval Requests	Fraud Advices

Transaction Currency Code on the Retrieval Request.

Glossary

account funding source	Identifies the source of the funds associated with the primary account for the card. For example, Charge, Credit, Debit, Deferred Debit, and Prepaid.
account number	An issuer-assigned payment credential that identifies an account in order to post a transaction.
account number extension	A three-position extension of the account number that allows account numbers up to 19 digits in length.
account prefix	The first nine digits of a cardholder account number.
account prefix range	The set of a low-account prefix and a high-account prefix that defines the range of cardholder account numbers used by an issuer. (A single issuer may use more than one range.) All ranges are maintained on the ARDEF Table for cardholder account number and issuing identifier validation purposes.
account restricted use	Identifies whether any processing restriction exists for the account range.
Account Screen Authorization File (ASAF)	The <i>Account Screen Authorization File (ASAF)</i> is an online file that contains data for an issuer's cardholder accounts that require nonstandard responses to authorization requests. It is an issuer-maintained file that includes both positive and negative action codes and special instructions for listed accounts, and allows Visa to respond to an authorization request on behalf of an issuer. V.I.P. has the ability to access the file during both Stand-In (STIP) processing as well as when the issuer is available, depending on issuer configuration.
Account Screen Clearing File (ASCF)	The <i>Account Screen Clearing File (ASCF)</i> provides global clearing transaction protection for listed accounts, including below-floor-limit transactions, force-posted transactions and card-not-present transactions. The file is an extract of negatively listed accounts from the ASAF that Visa references in clearing when the issuer participates in Account Screen All Respond and Clearing Return functionality.

acquirer	A client financial institution that has agreements with merchants to accept Visa card transactions or offers cash disbursement services to account holders, or both. The acquirer is responsible for: • Accepting card transaction data from merchants and its own ATMs and bank branches • Providing authorization decisions to those card-accepting locations • Conveying transaction information to Visa as interchange transactions
Acquirer center	A BASE II processing center supporting one or more Visa acquirers. The processing center receives transaction information from merchants and cash dispensing locations on behalf of acquirers; processes local transactions and sends interchange transactions to a VIC for distribution to the issuer processing centers; and settles the value of transactions with merchants and agents and, for interchange transactions, with other clients through the BASE II system.
Acquirer Reference Number (ARN)	A 23-digit identification number associated with every draft and voucher. It consists of a Format Code, Acquiring Identifier, Capture Date, Film Locator, and Check Digit.
acquiring identifier	The acquirer from which a BASE II transaction is sent.
administrative messages	All transactions that pass information between processing centers but do not result in debits or credits in the settlement process.
Advice File	The V.I.P. file containing records of authorization and verification responses generated at the VIC.
ARDEF File	The permanent file for the ARDEF (Account Range Definition) Table, which is used to control the accuracy of Edit Package processing. The table contains all valid ARDEF entries, namely: the account prefix range, its associated issuing identifier, card-number length indicator, check-digit indicator, product ID, and account funding source.
balancing and reconciliation	The process of accounting for the number and amount of transactions and the currency of each transaction in a BASE II cycle.
BASE I System	See V.I.P. System.
Bank Identification Number (BIN)	A 6-digit identifier licensed by Visa to an issuer before 22 April 2022 that comprises of the first 6 digits of an account number. An 8-digit identifier assigned by the ISO to Visa and then licensed by Visa to an issuer that comprises of the first 8 digits of an account number.
BASE II Center Information Block (CIB)	Numeric value used to define the processor/settlement entity for BASE II endpoints.
BASE II CIB	See BASE II Center Information Block (CIB).

BASE II processing center	See processing center.
BASE II System	An electronic batch transmission system primarily used for the exchange of Visa interchange transaction data and for settlement of the value of those transactions between acquirers and issuers. This system is also used by centers to retrieve records from the Advice File and by Visa to settle various fees with clients.
batch	A set of transaction records, terminating with a batch trailer, sent through BASE II.
Batch Acknowledgment Transaction	A receipt confirmation generated at a VIC of each batch of outgoing transactions. These transactions are received in the center's incoming Interchange Transaction File.
batch reject	See rejected batch.
batch trailer record	A record designating the end of a batch of BASE II transactions. It contains count and monetary totals used to control the integrity of the batch's transaction data. See also merchant batch trailer record.
Bill Payment Service	A service allowing a client to accept payment from a Visa cardholder whose account belongs to another client and to credit the issuer through BASE II. The issuer and the client receiving the payment must both be in the same country. Used in Canada and Brazil.
billing currency	The currency in which the issuer bills the cardholder for transactions.
BIN	See <i>Bank Identification Number (BIN)</i> .
BIN File	The permanent file for a BIN Table, which is used to control the accuracy of Edit Package processing. The table contains all valid BINs and their BASE II processing status codes. This is a deprecated term. See current, VID Table File.
card	A payment card, digital application, or other device or solution that provides access to a payment credential and that is capable of conducting a transaction, is issued by an issuer, and may bear one of the Visa-owned marks.
card issuer processing center	See issuer center.
Card Recovery Bulletin (CRB)	A paper listing, published and distributed by Visa, that contains Visa account numbers for which card pickup is required.
cardholder processing center	See issuer center.
cash advance	The disbursement of cash from an ATM, bank teller, or authorized merchant based on use of a Visa or Plus card.

cashback field	A nine-digit field that specifies the currency amount that is paid out when a purchase transaction occurs.
Center Transaction File (CTF)	The outgoing Center Transaction File contains interchange transactions generated by a processing center's pre-edit program. If the format is acceptable to the Edit Package, it is converted to an ITF and is submitted to the VIC. The incoming Center Transaction File contains ITF data transmitted from the VIC through the VAP to the Edit Package for processing. If there are no errors, the ITF is converted to a CTF and used as input to the post-edit program.
Central Processing Date (CPD)	The date (based on GMT) when the ITF or report in question was generated at a VIC.
dispute	A sales draft or other item that has been examined by the issuer center, found to be improper, and sent back to the acquirer center with other outgoing interchange.
Chargeback Reduction Service (CRS)	A worldwide service that provides acquirers and issuers with information available from other VisaNet systems to reduce the number of unnecessary Visa retrieval copy requests and fulfillment requests.
check digit	A digit added to the end of an account number or Acquirer Reference Number that is derived from a computation using a predetermined formula and the preceding digits of the account number. It is used during editing processes to validate account numbers and Acquirer Reference Numbers.
Chip Card	See <i>Integrated Circuit Card</i> .
Chip Debit/Credit	See Visa Smart Debit/Visa Smart Credit (VSDC).
clearing	All of the functions required to collect a transaction from an acquirer in the merchant's currency and deliver it to the issuer in the cardholder's currency.
collection-only transaction	An intraprocessor transaction submitted to BASE II for collection only (not settlement or delivery). Normal BASE II processing charges and interchange reimbursement fees do not apply to collection-only transactions.
copy/original	A copy of a transaction requested from the acquirer center by the issuer center. (Synonymous with original/photocopy.)
CPD	See central processing date (CPD).
CPS	See <i>Custom Payment Service (CPS)</i> or <i>Card Personalization Specification (CPS)</i> .
CRB	See Card Recovery Bulletin (CRB).

credit card	A physical or digital card with an account number assigned by an issuer to a cardholder. This card, which has a credit limit, can be used to purchase goods and services and to get cash. The issuing institution bills the cardholder every month for repayment of the credit extended. The cardholder repays the issuer in full every month or on an installment basis, with a minimum amount due.
credit voucher	Sometimes referred to as credit return, it is the record of a return or price adjustment of a purchase.
CRS	See Chargeback Reduction Service (CRS).
CTF	See Center Transaction File (CTF).
currency conversion rate	This rate is applied by Visa International to certain transactions (original sales drafts, dispute response financials, travel vouchers, credit vouchers, and cash disbursements) and the reversal of such transactions.
currency of purchase	See transaction currency.
currency trading cutoff	The time at which currency conversion rates expire.
Custom Merchant Service	A service that tailors interchange reimbursement fees to specific merchant categories.
Custom Payment Service (CPS)	A Visa payment service that minimizes dispute financials and facilitates transaction clearing and settlement by assigning a unique identifier that stays with the transaction throughout its life cycle.
Data Capture Advice	A batch transaction that delivers data for transactions captured at merchant locations to the acquirer center for subsequent submission to BASE II.
Data Capture Service	Merchants' use of electronic terminals at points-of-sale (POS) to capture sales transaction data. Clients can receive reports on transactions that have occurred at each merchant location.
DBA	The "doing business as" name of the merchant. (The DBA name is required in all BASE II records that include merchant ID to ensure cardholder recognition.)
debit card	A card linked to a demand deposit account, checking account, current account, negotiable order of withdrawal account, or savings account held at a financial institution, or a debit account or equivalent, as defined under applicable laws or regulations.

descriptive billing	A billing method in which the cardholder receives a statement containing a descriptive section of information identifying the card acceptor (merchant, bank branch , or business location) and the nature of each charge or credit for each transaction posted to the account. Copies of the original paper are not returned to the cardholder.
designated currency	One of the currencies that may be chosen by a client for settlement and funds transfer.
destination BIN	The BIN to which a BASE II transaction message is sent. DEPRECATED TERM: See <i>destination identifier</i> .
destination currency	The currency type presented to the client on incoming transactions. For most transactions (that is, drafts), it is the billing currency. For other transactions (for example, fee collection, dispute financials), it is the settlement currency of the destination.
destination identifier	See acquiring identifier and/or issuing identifier.
dispute financial	A dispute financial provides an issuer with a way to return a disputed transaction, i.e. to reverse a sales transaction or similar item, and assign financial liability to the acquirer.
dispute financial reversal	The cancellation of a dispute financial sent in error to the acquirer center.
dispute response financial	If the acquirer determines that a dispute is invalid, or if the required supporting information/documentation is missing or incomplete, the acquirer may reject the dispute and send it back to the issuer through a dispute response financial or pre-arbitration (depending on the dispute condition). The dispute response financial assigns the financial liability to the issuer.
documentation request	See Request for Copy of transaction.
draft data transaction	A BASE II financial transaction that contains data for a cardholder transaction and results in a debit or a credit to clearing clients during the settlement process.
EAS	See Visa Extended Access Server.
Early Delivery Service	Option by which transaction data is delivered to the processing center before settlement is completed.
Edit Package	The BASE II software Visa supplies to processors to validate interchange data, produce the file containing interchange data to be sent from the processor to Visa, and process incoming transactions received from Visa. The Edit Package is the interface between a processing center's internal processing systems and its Extended Access Server (EAS).

Edit Package processing date	The date used by the Edit Package during a specific run. This can be the computer's system date or a date specified on the RUNDATE run control option.
electronic terminal	A point-of-sale terminal, an automated teller machine, or a cash dispensing machine used at the point of transaction to generate electronic impulses that are captured in computer-readable form.
Extended Access Server	See Visa Extended Access Server.
fee collection transaction	A BASE II transaction representing a miscellaneous financial charge assessed by one client or by Visa against another client.
File Distribution Service	The receipt of files through BASE II based on an arrangement that best meets the client's needs and processing schedules. It can distinguish and simultaneously process interchange, nonfinancial, and settlement data. It can separate report delivery from interchange processing.
file header record	A record designating the beginning of a CTF or ITF. It contains the processing center ID, security code, and relevant control information.
file trailer record	A record designating the end of a CTF or ITF. It contains count and monetary totals used to control the integrity of file content. A CTF is terminated with one file trailer record regardless of the number of volumes used to contain the data; an ITF on tape is terminated with a file trailer record at the end of each volume, if multiple volumes are needed.
file transfer	Electronic transfer of an ITF between the PC Edit Package and the VAP.
financial controls	Those controls surrounding general ledger activities and procedures relating to bank card accounting.
floor limit	The maximum dollar amount for a transaction without having to obtain authorization.
fraud advice transaction	A BASE II transaction sent by a center to notify Visa of the possible fraudulent use of a card. Sent only with outgoing interchange transactions from the issuer center.
freeform text message	See text message.
funds disbursement transaction	A BASE II transaction used to transfer monetary credit from one BASE II entity to another or to reverse a fee collection transaction.
History File	The Edit Package file used to store the history of outgoing and incoming processing runs, and to control reruns and assign batch numbers for multiple daily runs.

host computer(s)	The computer system used at the processing center to process BASE II interchange or V.I.P. inquiries, or both, and other authorization-related messages.
IAF	See International Acquiring Fee.
ICC	See Integrated Circuit Card.
ICS	See Issuers' Clearinghouse Service (ICS).
ICS input/response transaction	A BASE II transaction sent (input) or received (response) by a center participating in the Issuers' Clearinghouse Service.
incoming interchange	All BASE II transactions transmitted from a VIC to a processing center, or the entire process of receiving incoming interchange transaction data from a VIC.
integrated circuit card (ICC)	A plastic card embedded with a silicon chip that has greater storage capabilities than a magnetic stripe. This allows for more robust functionality and multiple accounts to reside on one physical card.
interchange processing	The electronic movement of transaction data between acquirers and issuers.
Interchange Reimbursement Fee	A fee paid by issuers and acquirers to each other for transactions entered into interchange (and their reversals) to balance the cost of doing business.
interchange transaction	Any transaction where the client that signed the cardholder submits transactions through a different processing center than the client that signed the merchant.
Interchange Transaction File (ITF)	The <i>outgoing</i> Interchange Transaction File contains transactions sent to VisaNet by an endpoint. This file may be created by the outgoing Edit Package after the endpoint's pre-edit processing, or it may be sent directly to VisaNet. The <i>incoming</i> Interchange Transaction File contains transactions delivered to an endpoint by VisaNet. This file may be read by the Edit Package prior to the transaction being processed by the endpoint's post-edit processing, or it may be directly processed by the endpoint.
interface transaction advice	A notice to certain non-Visa card issuers of transactions captured by Visa terminals at merchant locations. These notices are created by the terminal provider and are transmitted through the BASE II system to non-Visa card issuers.
International Acquiring Fee (IAF)	An optional regional fee paid by the acquirer when a transaction occurs outside the issuer's country. It may be assessed for Sales Draft (TC 05) original and dispute response financial, Cash Disbursement (TC 07) original and dispute response financial, TC 05 and TC 07 reversals and their V.I.P. full financial Visa or Plus Network equivalent transactions.

International Airline Program	A program that permits acquirers of merchants designated by Visa as international airlines to deposit transactions outside the country where the transactions occurred.
international airline transactions	International Airline Program transactions in which the issuer and merchant are not in the same country.
International Outgoing Interchange (IOI) fee	See International Acquiring Fees (IAF).
International Service Assessment (ISA)	The International Service Assessment (ISA) fee applies to international BASE II and V.I.P. full financial clearing transactions in which the issuer country is different from the merchant country.
interregional transaction	A transaction where the merchant and issuer are not in the same Visa region.
intraprocessor transaction	A transaction where the acquirer and the issuer are two different clients but both are serviced by the same processor.
intraregional transaction	A transaction where the merchant and issuer are in the same Visa region but are not in the same country.
IOI fee	See International Acquiring Fees (IAF).
IRF	See Interchange Reimbursement Fee (IRF).
ISA	See International Service Assessment (ISA).
issuer	A client financial institution that issues Visa cards. For a given transaction, the issuer is the institution that issued the card used for that transaction to the account holder. The issuer is responsible for maintaining the accounts of its account holders, for providing authorization decisions, for account holder billing, and for settlement of transactions its account holders have with merchants and cash dispensing locations of other clients. Each issuer operates or designates an issuer center to perform the functions related to clearing and settlement of interchange transactions.
issuer center	A BASE II processing center acting in support of one or more issuers. The processing center processes completed account holder transactions (local and interchange) for account holder account posting and billing. For completed interchange transactions, the center is also responsible for receiving and processing incoming transactions for the account holders of the issuer or issuers.
Issuers' Clearinghouse Service (ICS)	A service developed to curtail the fraudulent or excessive use of credit card applications, and the fraudulent use of credit cards. Issuers may access or update the ICS database through BASE II.
issuing BIN	Numeric value used to identify the issuing institution.

issuing identifier	A numeric value used to define issuing processing. Multiple Issuing BINs can be linked to the same Issuing Identifier in Visa's systems.
ITF	See Interchange Transaction File (ITF).
julian date	A date expressed as the day's position in a year rather than in a particular month. The format is YDDD or YYDDD.
local airline transaction	International Airline Program transactions in which the issuer and merchant are in the same country.
mark	A word, name, design, symbol, distinctive sign, animation, sound, haptic, other designation, or any combination thereof, that Visa or any entity adopts to identify its goods or services.
media request	See Request for Copy transaction.
member settlement data transaction	An incoming transaction used to transmit settlement report data in machine-readable format.
merchant batch header record	The header record in a data capture advice that carries merchant batch data.
merchant batch trailer record	The trailer record in a data capture advice that carries merchant batch data.
Merchant Mailing File (MMF)	A file at the VIC containing the names, addresses, and other pertinent information for merchants who receive the Card Recovery Bulletin.
Merchant Mailing File transaction	The BASE II transaction used by processing centers to update the Merchant Master File. It is transmitted from acquirer centers to a VIC.
Merchant Master File	A computer record of information on all merchants serviced by a center. This file is maintained at the processing center.
merchant processing center	See acquirer center.
multicurrency clearing	The clearing of transactions where clients enter financial transactions into BASE II in the currency as signed by the cardholder, and receive cleared transactions converted to the issuer's billing currency. This results in uniform conversion rates for all issuers for the processing day.
National Net interchange	Transactions that are exchanged between processing centers whose issuers and acquirers are located in the same country where settlement is accomplished through a central agent bank for each country using the service. BASE II clears the transactions and records transaction totals on National Net interchange reports.
national settlement transaction	A National Net transaction.

National Transaction	A transaction in which the merchant, issuer, and acquirer are all in the same country.
net settlement amount	The currency amount representing the difference between a settlement entity's outgoing and incoming interchange for a given day, plus or minus fees and charges. May be a debit or credit.
nonfinancial transaction	A nonmonetary transaction that supports the bankcard business. For example, a request or confirmation of a photocopy, freeform message, BASE I Advice record, Merchant Mailing File update, data capture advice, and Issuers' Clearing Service inquiry or response.
on-us transactions	Drafts, vouchers and other items where the client that signed the merchant also signed the cardholder, or where the client that signed the merchant and the client that issued the card have both designated the same processing center.
Optional Issuer Fee	See Visa Issuer FX Calculator
original transaction	In the BASE II System, the first presentation of a purchase, credit, or cash advance submitted into interchange.
original/photocopy	See copy/original.
outgoing interchange	All BASE II transactions transmitted from a client's processing center to a VIC. Both acquirer and issuer centers send outgoing interchange.
payment credential	A number or other credential that identifies an account of a cardholder for use in a transaction.
Plus	An automatic teller machine (ATM) network to which Visa clients have access.
Plus Identifier File	A file containing Plus table update records that is created through incoming Edit Package processing for all clients subscribing to the Plus ATM system. The Plus Table contains identifier numbers of Plus card issuers.
post-edit program	Software written and maintained by a processing center to restructure an incoming Center Transaction File into a format acceptable for the local posting and billing process and to apply client-unique edit criteria against the transactions. This program is executed following the incoming Edit Package run.
pre-edit program	Software written and maintained by a processing center to separate on-us items from interchange items and to apply client-unique edit criteria against the transactions. This program also formats outgoing interchange into the outgoing Center Transaction File for processing by the Edit Package according to BASE II specifications. This program is executed before the outgoing Edit Package run.

prepaid card	A card linked to a reloadable or nonreloadable prefunded account, or a prepaid account or equivalent as defined under applicable laws or regulations.
presentation	See presentment.
presentment	Paper (or a transaction) submitted for the first time by an acquirer to an issuer and processed through VisaNet interchange.
processing center	The entity, operated or designated by a clearing client of Visa, responsible for processing of interchange transactions. It executes the Edit Package and the pre- or post-edit programs, or both, and sends and receives interchange transactions to and from a VIC. A single processing center may function as an acquirer center, an issuer center, or both. It performs interchange transaction services for one client or a multiple number of clients. Most BASE II processing centers are operated by Visa clients; nonmember processing centers may be authorized to process Visa transactions.
processing date	See central processing date (CPD) or Edit Package processing date.
proof and capture	The process of determining that each deposit or group of deposits balances, and the process of recording standard information from each draft, voucher, and transaction in a form acceptable for editing and processing.
PSIRF	See Payment Service Interchange Reimbursement Fee (PSIRF).
RCRF	See Regional Card Recovery File (RCRF).
Regional Card Recovery File (RCRF)	A file of cardholder account records, created by Visa every week for international users, that contains all V.I.P. Exception File pickup accounts coded for a given CRB region, plus specified "Region 0" accounts listed by issuers in that CRB region. Users receive an RCRF as part of the incoming BASE II interchange transaction file.
reimbursement attribute	A one-digit alphanumeric code designating reimbursement fees applicable to a specific transaction.
Interchange Transaction File	The standard input/output data medium for the BASE II Interchange Control System (ICS). All output from BASE II is delivered to the Visa client on an incoming ITF. All input to BASE II is sent from the member to the ICS on an outgoing ITF.
rejected batch	An interchange batch that is not accepted by the VIC due to an error in the audit integrity of that batch.

rejected transaction	An outgoing BASE II transaction record in which the Edit Package detected an error that affects the financial integrity of the batch. The Edit Package excludes such transactions from outgoing interchange, that is, the transaction is not included in the outgoing Interchange Transaction File forwarded to a VIC. (The batch is not rejected; all valid transactions in the batch are included in the outgoing Interchange Transaction File.) Unless the transaction is a batch or file trailer record, the run aborts.
re-presentment	Paper (or a transaction) submitted by an acquirer to an issuer for a second time, following receipt of a chargeback. This is a deprecated term. See current, dispute response financial.
Request for Copy transaction	A transaction generated when an issuer requests for a copy of the original transaction, followed by a confirmation that records the sending of the copy. Also known as a documentation or media request.
returned transaction	A cardholder transaction record in which the VIC edit function detected an error that does not violate the financial integrity of the batch. When such an error is detected, the transaction is included in the outgoing batch interchange totals (in a separate category), but it is not forwarded to the issuer center. The transaction is placed in a new BASE II transaction, with a new transaction code, and returned to the originating center with incoming interchange. (On the incoming reports for an originating center, the transactions appear in both outgoing and incoming totals.)
reversal	A BASE II transaction used to negate or cancel a transaction that has been sent through interchange in error.
Settlement	The actual transfer of funds from the issuing bank to the acquiring bank through a wire transfer to a settlement account, and the total amount owed by one Visa client to another. See also net settlement amount.
settlement currency	The currency used by the BASE II System to calculate a settlement entity's daily net settlement position.
Single Message System (SMS)	See V.I.P. System.
source BIN	The BIN from which a BASE II transaction message is sent. This is a deprecated term. See current, source identifier.
source currency	The currency type associated with the amount of a transaction entered into interchange.
source identifier	See acquiring identifier and/or issuing identifier.
special airline fee	A fee charged on transactions from International Airlines when the issuer, acquirer, and transaction countries are different entities. This fee is collected instead of the IAF fee, and is paid to the transaction region.

Stand-In Processor (STIP)	<i>For V.I.P. processing.</i> The function operating at all VICs that provides authorization decisions on behalf of card issuers. It acts for transactions in amounts below the issuer limit, when the issuer center is unavailable, when a request sent to the issuer center times out, or when a local switch request STIP processing.
STIP	See Stand-In Processor (STIP) and Stand-In Processing (STIP).
stored credential	Information (including, but not limited to, a payment credential) stored by a merchant or its agent, a payment facilitator, or a staged digital wallet operator to process future transactions.
substitute draft or substitute transaction receipt	A computer-generated version of a sales draft, including items such as account number, merchant name and location, purchase date, transaction amount, authorization code, and a description of the goods and services.
suspense	A series of general ledger accounts containing drafts and vouchers and other items that have been rejected by either the processing center's editing programs or the Edit Package.
system log	A VAP disk file that contains messages recording significant events related to BASE II operations, including net settlement information and all operator actions and their acknowledgments. (All valid dial terminal inquiries and responses and the error messages generated by all VAP subsystems are also included.) When BASE II transmission to or from the VIC completes, the log can be archived to the center's host computer and center-designed reports may be generated.
TCR	See Transaction Component Record (TCR).
text message	An unformatted message exchanged between processing centers, or sent by Visa, through the BASE II System.
third-party processor	See processing center.
token	A type of payment credential issued in accordance with the <i>EMV Payment Tokenization Specification</i> .
transaction	<i>BASE II transaction.</i> The record or records that make up a single financial, administrative, or text message, as required for transmission between a processing center and a VIC. BASE II transactions are identified by transaction codes. <i>Cardholder transaction.</i> The use of a payment credential to make a payment or otherwise exchange value between a cardholder (or an issuer) and a merchant (or an acquirer).
Transaction Charges	Charges paid by clients to Visa for processing services. Transaction charges vary depending on transaction type and volume.

Transaction Code (TC)	A two-digit code that identifies a specific type of BASE II transaction.
Transaction Component Record (TCR)	A fixed-length record used to contain a component portion of a BASE II transaction. A single BASE II transaction may consist of multiple TCRs.
transaction component sequence number	A single digit placed in each TCR so multiple records (TCRs) can be combined into a single BASE II transaction.
transaction currency	The currency of the purchase, as agreed to by the cardholder and the merchant.
V.I.P. System	An electronic data transmission system for the real-time delivery and processing of messages related to authorization of bank, T&E, private label, and proprietary card and check acceptance transactions. It accepts authorization requests from acquirer and merchant authorization centers and either provides authorization decisions or secures authorization decisions from the issuer authorization centers.
VAP	See VisaNet Access Point (VAP).
VIC	See VisaNet Interchange Center (VIC).
VIC processing date	See central processing date (CPD).
VID Table	See Visa Identifier (VID) Table.
VID Table File	The permanent file for a VID table, which is used to control the accuracy of Edit Package processing. The table contains all valid Acquiring/Issuing identifiers and their BASE II processing status codes.
Visa card	A card that bears the Visa brand mark.
Visa Extended Access Server	The Visa Extended Access Server is the next-generation gateway to Visa products and services, replacing legacy VisaNet Access Points. The EA Server offers improved security and a flexible platform for future updates.
Visa Identifier (VID) Table	Visa Identifier (VID) table, formally known as BIN table.
Visa Issuer FX Calculator (formerly known as OIF):	Visa calculates an optional issuer-determined amount for multicurrency and/or cross-border transactions if requested by the issuer. This value is calculated based on the percentage rate specified by the issuer and added to the billing amount. The value is informational only and not included in the settlement amount.

Visa Resolve Online (VROL)	Visa Resolve Online provides dispute management services, including transaction research, for example, for cardholder queries, dispute questionnaires to collect relevant customer information and documentation, financial transaction processing (both BASE II and V.I.P. full-financial) for disputes, fraud reporting, Account Screen Authorization file (ASAF), stop payments, and case filing (arbitration and compliance) capabilities. Visa Resolve Online identifies associated transactions, for example, credits, adjustments, and consolidates the dispute history in case folders. To access Visa Resolve Online a client may use either the VROL user interface accessed through Visa Access or a web-service-API system interface (Real Time System Interface - RTSI).
Visa Smart Debit/Visa Smart Credit (VSDC)	A payment service involving the use of chip cards and chip capable card acceptance devices providing a variety of features to support offline authorization, protect against fraud, enhance cardholder verification, and provide a platform for multifunction programs.
VisaNet Access Point (VAP)	An IBM personal computer supplied by Visa, at which the VisaNet network is accessed electronically by a processing center. A VAP is in direct communication with a VIC. BASE II data are generally transmitted or received through a VAP.
VisaNet Copy Request and Fulfillment Service (VCRFS)	An automated service that facilitates the exchange of copy requests and their fulfillments through VisaNet.
VisaNet Interchange Center (VIC)	The computers and all associated peripheral devices and telecommunications support facilities needed for the V.I.P. System, the BASE II System, related systems, and backup for these systems.
warehoused transactions	Transactions received at the VIC after the settlement window closes. These transactions are held over for next-day settlement at the new rates.
