Data Integrity Monitoring Program

The *Data Integrity Monitoring Program* is a compliance program that promotes data quality and processing efficiency on the Mastercard Network.

Overview

The *Data Integrity Monitoring Program* guide provides comprehensive compliance guidelines and systematic validation procedures to promote data quality and processing efficiency on the Mastercard Network. It details the structure, scope, and operational processes of the program, including how edits are applied to ensure adherence to Mastercard technical standards and product mandates.

Audience

Mastercard intends this guide for customers who are responsible for transaction processing, compliance, and data quality management. This audience includes:

- Acquirers
- Issuers
- Processors
- Branded Processors
- Network Enablement Partners

Product

The *Data Integrity Monitoring Program* is a compliance solution that enforces data quality and processing standards across the Mastercard Network. Through systematic validations, it monitors transaction data, identifies noncompliance, and provides tools and processes to help customers test, resolve, and report on data integrity issues.

Table 2: Summary of changes

Description of Change	Where to look
Created the guide overview page to align with current content standards.	Data Integrity Monitoring Program
Grammatical edits.	Throughout
Updated Turkey to Türkiye.	
Updated Swaziland to Eswatini (formerly Swaziland).	
Updated references to the Customer Interface Specification manual to <i>Mastercard Network Processing Dual Message Authorization System Guide</i> .	
Updated references to the IPM Formats Manual and IPM Clearing Formats to <i>Mastercard Network Processing Dual Message Clearing System Guide</i> .	
Updated references to Single Message System Specifications with <i>Mastercard Network Processing Single Message System Guide</i> .	
Chapter 1: Data Integrity Monitoring	
Clarified the <i>What is an edit</i> section.	Data Integrity Monitoring Program
Added the additional paragraph "Can customers get help with their compliance?" before Data Integrity programs list overview.	
Created the <i>Request Mastercard Simulator Suite</i> section.	Request Mastercard Simulator Suite
Removed the section <i>Local laws or regulations</i> .	Data Integrity extensions
Modified three paragraphs after View your institution's data procedure number 5.	View your institution's data
Replaced the <i>View by All Edits</i> figure and renamed it to "Edits by program and View by All edits".	
Created the section.	Understanding periods and compliance calculations
Added the ABU Expired Credentials Report.	Data Integrity edit reports

Description of Change	Where to look
Updated the <i>Manuals and guides</i> figure.	Data Integrity Help center
Added contact information for Global Collection Only team and Mastercard Simulator Suite team.	Contact us

Data Integrity Monitoring Program

The Data Integrity Monitoring Program is a compliance program that promotes data quality and processing efficiency on the Mastercard Network.

The program accomplishes this through systematic validations, or edits, which help ensure that customers:

- Process data according to Mastercard requirements, technical specifications, and other Standards.
- Adhere to product and service mandates as applicable.

What is an edit? An edit is a set of criteria that focuses on a specific component of a transaction, authentication message, or a program requirement. Data Integrity edits examine data elements, data values, and mandated products to ensure that required information is present, properly formatted, or implemented.

Data Integrity edits do not block, decline, or downgrade transactions. Transactions flow through the network, and Mastercard evaluates the data after the fact against the edit criteria.

Mastercard evaluates most Data Integrity edits over the period of one month to avoid penalizing customers for marginal errors or exceptions. Data Integrity does have some quarterly edits, mostly tied to Quarterly Mastercard Reporting (QMR). Mastercard evaluates the quarterly edits over a period of three months, often referred to as the 'activity period.'

Data Integrity data is static throughout the monthly or quarterly activity period. Mastercard updates the data for each activity period at the start of the month following the activity. Data Integrity will display the previous month's data on the Dashboard after the update process completes. For example, April 2025 data will appear on the Dashboard within the first week of May 2025 for monthly edits.

Quarterly edits utilize consistent data across all three months within the quarter. Unlike other programs that update monthly, the Data Integrity dashboard reflects updates to quarterly edits based on their association with the QMR. Data Integrity updates edits linked to the QMR in the month following the QMR's closure, which typically occurs around the 15th day of the month after the quarter ends, for example January, April, July, and October. Data Integrity updates quarterly edits not associated with the QMR in the month immediately following the close of the quarter.

Most edits have a baseline and a threshold.

The baseline is the number or type of transactions that a customer needs to be in the edit each activity period.

The threshold indicates the percentage or number of transactions that a customer must meet to determine compliance status for the edit each activity period.

Mastercard will monitor customers for an edit, even if they have less than the baseline criteria, but Data Integrity will not flag customers as noncompliant. Data Integrity will assess customers

only when a customer's transaction volume exceeds the baseline and falls below the established compliance threshold for the designated monitoring period.

What is the scope of Data Integrity? The range of our compliance program evolves with the industry. Currently, data in single and dual message systems, cardholder authentication messages, QMR, the Fraud and Loss Database (FLD), and customer configurations are examined for Mastercard products.

However, Data Integrity continues to expand its scope accordingly as new payment channels, industry regulations, and network requirements arise.

Data Integrity does not monitor domestic (on-soil) transactions that are not switched on the Mastercard Network. Currently, this includes domestic transactions for Ghana, India, and Türkiye. Additionally, Mexico domestic transactions are excluded from Data Integrity edits.

From AN 4349: Mastercard defines Mexico domestic transactions as transactions between customers in Mexico that are connected to Mastercard switching services and customers in Mexico that are connected to domestic (non-Mastercard) switching services. Any other transactions received are considered as non-Mexico domestic transactions. Transactions between Mexico issuers and Mexico acquirers, both using Mastercard switching services, are considered non-Mexico Domestic since they are using Mastercard global standards, even for domestic transactions.

NOTE: Mastercard products include Mastercard[®], Debit Mastercard, Maestro[®], or Cirrus[®]. Private Label (PVL) products are excluded from monitoring in all Data Integrity edits and programs.

What happens if a customer is noncompliant with an edit? When an ICA number or processor ID is determined to be noncompliant with an edit, all registered users of Data Integrity (for that ICA number or processor ID) receive an email notification.

Customers are directed to log in to the Data Integrity application in My Company Performance (MCP) on Mastercard Connect[®] to view their complete status, access reports, and learn more about how to meet the edit requirement. Data Integrity provides a grace period and establishes a 'Comply by' date by which the customer is expected to meet the edit requirements.

Acquirers, issuers, and processors must correct errors by the date provided on the edit. To avoid Data Integrity assessments, customers must remain at or above the threshold for two consecutive reporting months (unless otherwise noted in the edit description) after corrections have been made.

After the Comply by date, ICA numbers and processor IDs that remain noncompliant are subject to assessments. For additional information, refer to the *Data Integrity assessment structure* section of this program guide for additional information.

Can customers get help with their compliance? Customers can always reach out to the Data Integrity team for assistance with their edit noncompliance. Additionally, Mastercard Simulator Suite provides Mastercard customers with the necessary tools to perform offline testing of their host application. The simulators offer testing for most Data Integrity dual message authorization, single message system, and clearing edits that are transactional in nature.

Customers who have already subscribed to the Mastercard Simulator Suite may be able to utilize the simulators to test and resolve noncompliance for specific Data Integrity edits.

The Mastercard Simulator Suite includes access to:

- Mastercard Authorization Simulator (MAS)
- Mastercard Debit Financial Simulator (MDFS)
- Mastercard Clearing Presentment Simulator (MCPS)

The Authorization and Debit Financial simulators provide dual and single message customers with a simulation, on their own site, of the Mastercard real-time network.

The Clearing Presentment Simulator will provide faster performance and enhanced offline clearing testing experience to Dual Message customers.

The Mastercard Simulator Suite is available on Mastercard Connect for a fee.

Request Mastercard Simulator Suite

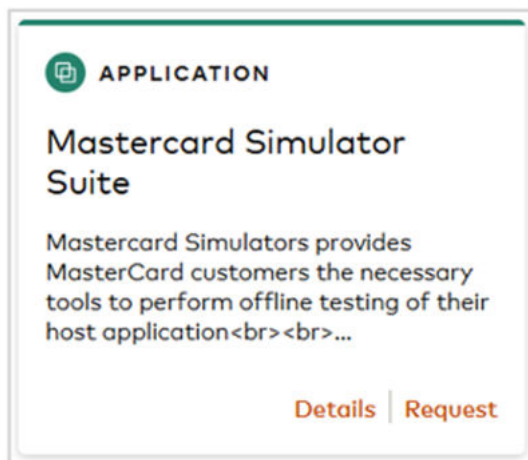

About this task

Customers with questions about the Mastercard Simulator Suite should contact the Simulator team at simulators@mastercard.com.

Procedure

1. Navigate to [Mastercard Connect®](#).
2. Log in using your User ID and security information.
3. Select **Store**.
4. Select the **Mastercard Simulator Suite** application.
5. Click **Request**.

Figure 1: Mastercard Simulator Suite Application request

6. Go to checkout to learn more about pricing and subscription details.

Data Integrity programs list overview

This document provides detailed information on each edit monitored by Data Integrity. Edits are grouped into programs based primarily on the type of transaction or data being evaluated.

The table *Edit table legend* details how to read and interpret each edit.

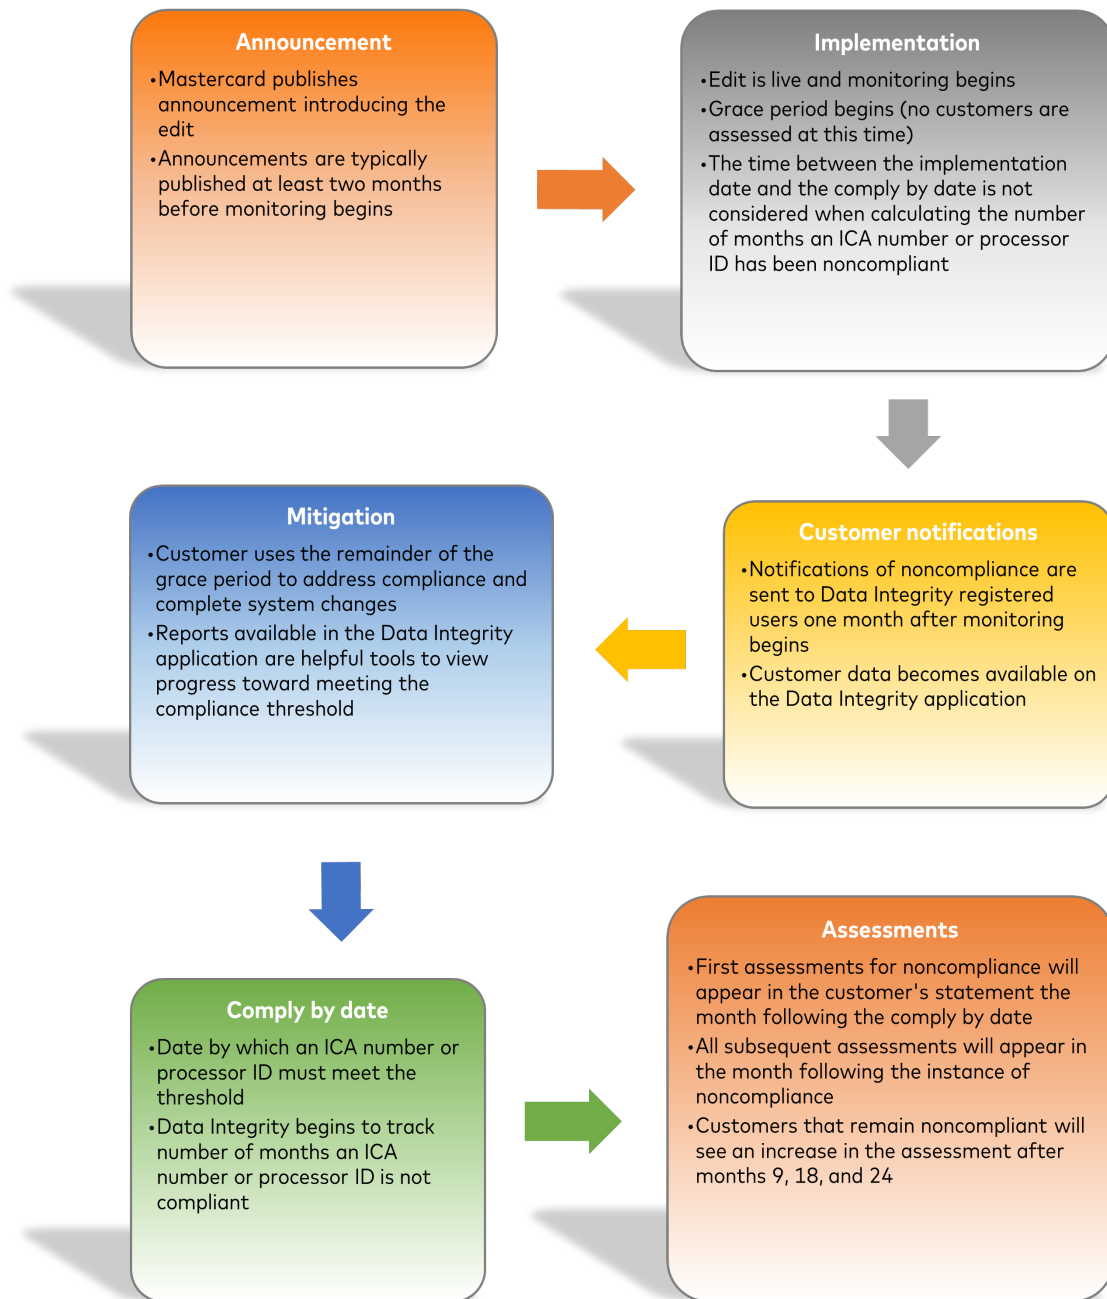

Table 3: Edit table legend

Term	Description
Edit Number	Numerical identifier within a program
Edit Title	Unabbreviated title of edit
Name	Name, as displayed on the Data Integrity application
Billing Code	Identifier shown on billing statement. The same code may be used for many edits within the Data Integrity Monitoring Program. Billing is monthly, unless otherwise specified on the edit. Refer to the comments on the billing statement for specific edit information.
Region(s)	Geographical region or regions where this edit applies.
Description	Brief explanation of what is being monitored. For example, this edit monitors DE 43 (Acceptor Name and Location) to ensure that all necessary values are present and properly formatted.
Edit Criteria	This section provides the detailed criteria that makes a transaction eligible for monitoring (when applicable) as well as the criteria that causes a transaction to be noncompliant.
Baseline/ Threshold	Baseline: Number or type of transactions required in a given period to be included in the edit. Threshold: Percentage or number of transactions required to determine compliance status for the edit.
Reference	Documentation where additional information supporting this edit can be found.

Edit life cycle

The figure *Edit Life cycle* details the Data Integrity compliance process from a customer's perspective from the time a monthly edit is first announced to the time that assessments are applied.

Figure 2: Edit Life cycle

Data Integrity extensions

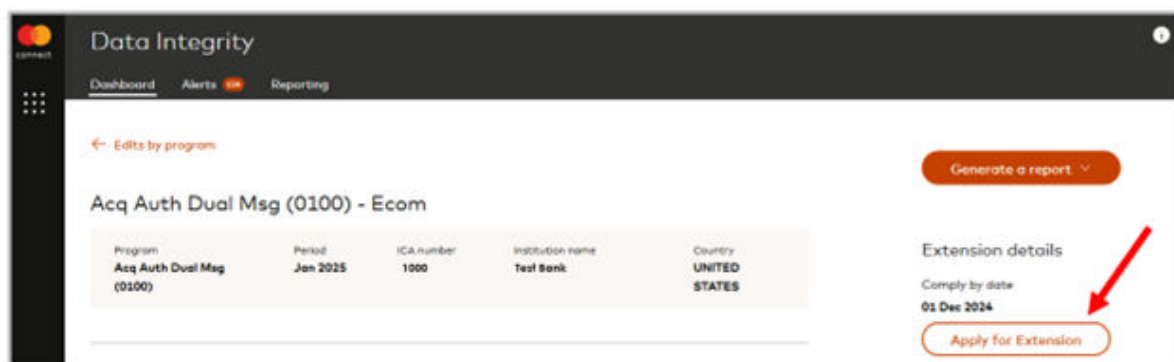

Mastercard Data Integrity may grant short-term extensions to noncompliant ICA numbers or processor IDs on a case-by-case basis.

Many edits are eligible for an extension of up to six months with a valid business justification. If an edit is not eligible for an extension, this is noted in the edit in the Data Integrity application.

In order to apply for an extension, customers must log in to the Data Integrity application. Once there, customers must navigate to the figure *Edit, Apply for Extension* for which the extension is being requested and choose **Apply for Extension**. Extension history is also available through a link on the edit.

NOTE: Some edits do not become eligible for an extension until 2 months before the Comply by date. In this case, no option appears on the edit to request an extension.

Figure 3: Edit, Apply for Extension

When Apply for Extension is selected, a prepopulated extension request form opens. Customers must verify the information and fill in the **Target resolution date** and **Detailed business plan**. Once complete, click **Apply** to send the extension request to the Data Integrity team for review. A confirmation email is sent to the requestor with an Extension ID for reference.

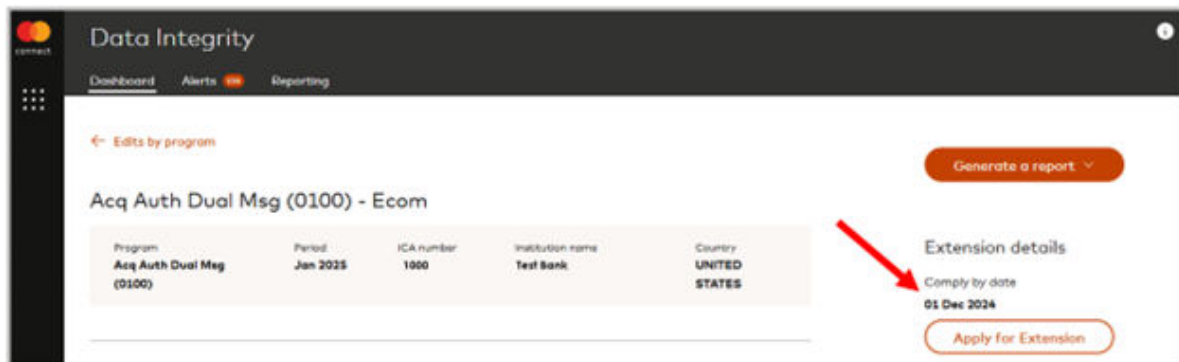

A response to the extension request is provided within five business days. Data Integrity staff can approve an extension request for up to 6 months. After the 6-month extension expires, no further extension is granted, and assessments may be applicable for future noncompliance. With any extensions granted, Mastercard applies back billing should the customer remain below the threshold at the conclusion of the extension. Customers can email Data Integrity with any questions or concerns at data.integrity@mastercard.com.

NOTE: For back billing, if an ICA number or processor ID is granted an extension, and at the conclusion of the extension period that ICA number or processor ID remains noncompliant, Mastercard will back bill that ICA number or processor ID to collect an amount equal to the total number of months that they were noncompliant during the extension period multiplied by each of the individual month's then current incremental monthly assessment rate.

Submission deadline

Extension requests submitted after the **Comply by date** are not effective until the first day of the following month.

Figure 4: Edit, Comply by date

For example, if the Comply by date is 1 May, an extension request must be submitted on or before 30 April. An approved request submitted in May on or after 1 May would not become effective until 1 June, and the ICA number or processor ID is subject to a Data Integrity fee for the month of May.

Data Integrity assessment structure

Mastercard assesses acquirers, issuers, and processors that fall below the threshold for any relevant edit, as indicated in the table *Data Integrity assessment structure (by edit/by month)*.

Customers are assessed for each noncompliant edit at the ICA number or processor ID level. The billing event appears on the customer's statement the month after an ICA number or processor ID is deemed noncompliant for a given edit.

Assessments increase incrementally when the customer remains noncompliant for an extended period past the comply by date.

IMPORTANT: When an extension is granted, assessments are deferred, but Mastercard continues to count the number of months a customer is noncompliant. When the extension expires, customers that have not met the threshold are assessed based on the number of months that have passed since the original comply by date.

Table 4: Data Integrity assessment structure (by edit/by month)

Months noncompliant after comply by date	USD/EUR	Reals	Rupiah
1 - 9 months	2,500	9,255.65	33355000
10 - 18 months	5,000	18,511.30	66710000
19 - 24 months	10,000	37,022.60	133420000
2+ years	20,000	74,045.20	266840000

Billing event codes

Each edit lists the actual billing event code used when assessing Data Integrity fees.

The billing event codes for the Data Integrity assessment structure are:

Table 5: Data Integrity assessment structure billing event codes

Billing event code	Billing event name	Service code	Service name
2DC0100	Data Integrity Monitoring Program	DC	Non-Compliance Fees
2DC0200	GCO Program - Data Quality Assessment	DC	Non-Compliance Fees

The Data Integrity assessment structure does not apply to any of the GCO quarterly reporting edits, Issuer Do Not Honor edits, Acquirer Chargeback Monitoring Program edits, Issuer Chargeback Program edits, Digital Standards Program edits, or the QMR Late Reporting edit.

The billing event codes listed in the table *Billing event codes*, are for the GCO quarterly reporting edits, the Issuer Do Not Honor edits, the Acquirer Chargeback Monitoring Program edits, the Issuer Chargeback Program edits, the Digital Standards Program edits, and the QMR Late Reporting edit. Go to <https://www.mastercardconnect.com/> > Pricing Billing and Resource Center¹ for the assessment structures associated with these program edits.

¹ For new Pricing and Billing Resource Center users, sign in to Mastercard Connect with your user ID and password or passcode. Select Store from the upper ribbon on the home page, look up the Pricing and Billing Resource Center application by searching for keyword Pricing and click Request at the bottom right corner of the Pricing and Billing Resource Center application tile. For existing Pricing and Billing Resource Center application users sign in to Mastercard Connect with your user ID and password or passcode. Select My Items from the upper ribbon on the home page. Under All Items, look up the Pricing and Billing Resource Center application.

Table 6: Billing event codes

Billing event code	Billing event name	Service code	Service name
2DC0101	Do Not Honor 05 Declines 0110	DC	Non-Compliance Fees
2DC0201	GCO Data Collection and Compliance	DC	Non-Compliance Fees
2DC0202	GCO Data Collection and Compliance	DC	Non-Compliance Fees
2DC0203	GCO POS Volume Compliance Fixed Fee	DC	Non-Compliance Fees
2DC0204	GCO POS Volume Compliance Variable Fee	DC	Non-Compliance Fees
2DC0205	GCO POS Transaction Compliance Fixed Fee	DC	Non-Compliance Fees
2DC0206	GCO POS Transaction Compliance Variable Fee	DC	Non-Compliance Fees
2DC0207	GCO ATM Volume Compliance Fixed Fee	DC	Non-Compliance Fees
2DC0209	GCO ATM Transaction Compliance Fixed Fee	DC	Non-Compliance Fees
2DC0300	Issuer Monitoring Program Noncompliance	DC	Non-Compliance Fees
2DC0400	Excessive Fraud Merchant Violation Assessment	DC	Non-Compliance Fees
2DC0401	Excessive Chargeback Merchant Violation Assessment	DC	Non-Compliance Fees
2DC0402	High Excessive Chargeback Merchant Violation Assessment	DC	Non-Compliance Fees
2DC0403 ²	Excessive Chargeback Merchant Issuer Recovery Assessment	DC	Non-Compliance Fees
2DC0404	Excessive Chargeback Merchant Issuer Recovery	DC	Non-Compliance Fees
2DC0500	Digital Standards Program	DC	Non-Compliance Fees

² MID's identified in High Excessive Chargeback Merchant (HECM) month 4 or greater are assessed an additional issuer recovery fee at USD/EUR 5 for each chargeback for all chargebacks over 300 during the violation month. The issuer recovery fee is credited to the impacted issuers, on a prorated basis.

Billing event code	Billing event name	Service code	Service name
2DC0600	QMR Late Reporting Fee	DC	Non-Compliance Fees

Data Integrity and My Company Performance

Data Integrity is a user-friendly application where customers can view their comprehensive compliance status, access our suite of reports, manage extension requests, and more.

My Company Performance is an application platform on Mastercard Connect designed to consolidate Franchise compliance programs and Franchise tools into a single platform for streamlined customer experience.

The Data Integrity application is in My Company Performance. You will go through My Company Performance to open Data Integrity.

The Data Integrity and My Company Performance applications are available free of charge on Mastercard Connect. While there is no limit to the number of users a customer can register for the applications, it is mandatory that at least one user is registered for each ICA number or processor ID operating on the Mastercard Network. Registered users receive important Data Integrity communications, including notifications of noncompliance.

Register for Data Integrity and My Company Performance

Procedure

1. Navigate to www.mastercardconnect.com.
2. Log in using your user ID and security information.
3. Select **Store**.
4. Select the **My Company Performance** application.
5. Select the check boxes next to **My Company Performance** and **Data Integrity**.
6. For the data access options, select **Edit**, and then check the boxes next to your ICA numbers and processor IDs.
7. Select **Done**.

After you have selected the ICA numbers and processor IDs for both data access options, select **Change access**.

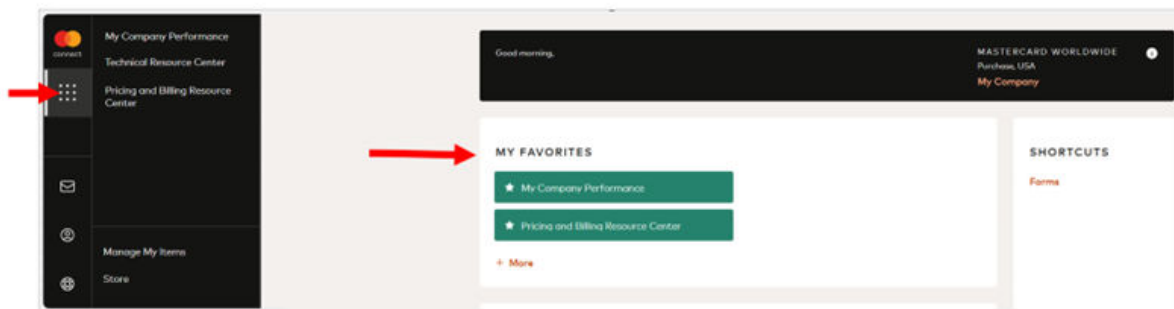

Users may be required to contact the access manager for the ICA number or processor ID for approval prior to obtaining final approval by Mastercard.

NOTE: Notifications are sent to the access manager for ICA numbers and processor IDs that do not have a registered user in Data Integrity.

Access the application

Once your access has been approved, My Company Performance appears on the Mastercard Connect home screen under My Items or My Favorites.

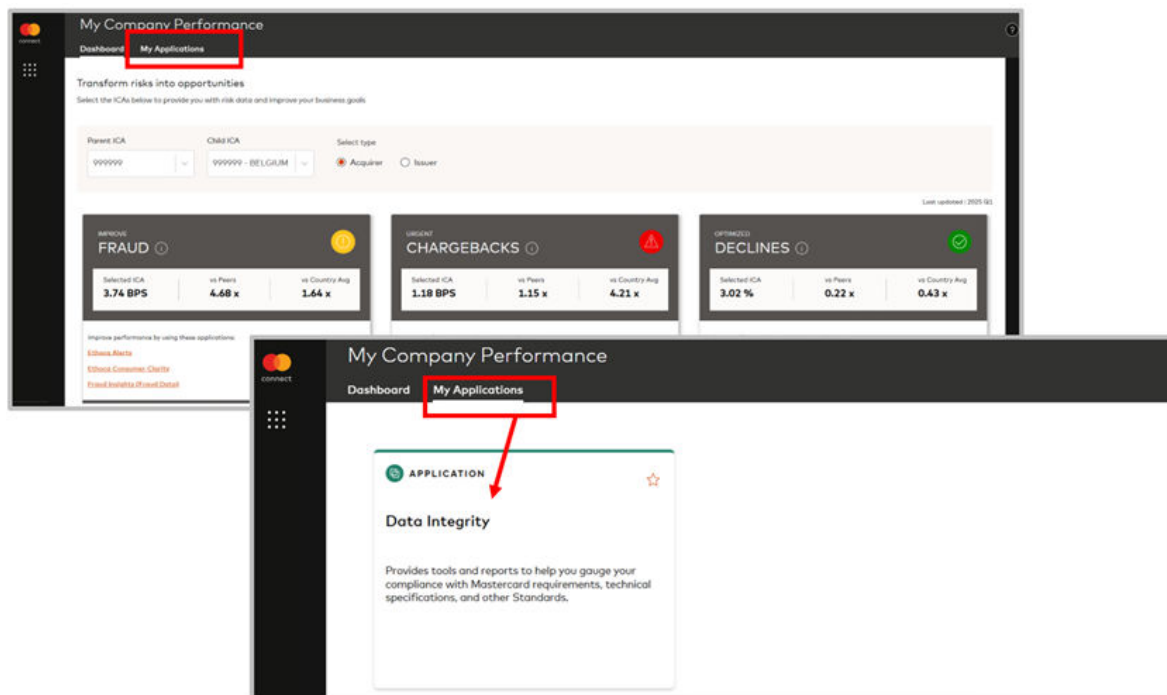

Figure 5: My Items

My Company Performance will open to a Dashboard designed to provide fraud, chargeback, and decline metrics for your provisioned ICA numbers or processor IDs. This information is unrelated to Data Integrity. All My Company Performance users must request access to Performance Data Metrics in the Mastercard Connect Store to view the My Company Performance Dashboard.

Click **My Applications** tab in the horizontal banner along the top of the screen. You open **Data Integrity** in this tab.

Figure 6: My Applications

View your institution's data

About this task

The Dashboard will be prepopulated with your provisioned ICA(s)/processor(s) in the current month.

You can clear the prepopulated ICA(s)/processor(s) by clicking the X in the Select ICA(S)/processor(s) dropdown.

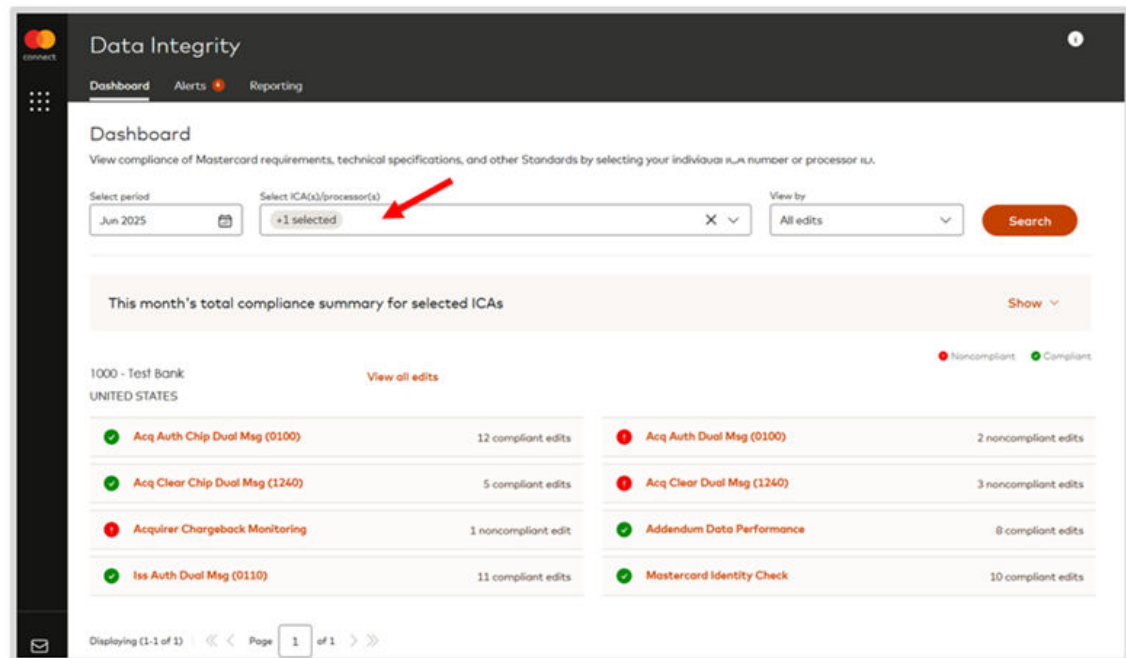

To search for individual ICA(s)/processor(s) follow the procedure below.

Procedure

1. Click in the **Search for Select the ICA(s)/processor(s)** box to enter the numbers of the ICA(s)/processor(s).
2. When the ICA(s)/processor(s) appear in the list, select **check box** next to the ICA(s)/processor(s) number and name.
3. Repeat the above steps until you have selected all your required ICA(s)/processor(s).
4. Click **Search**.

A green check mark indicates that the ICA number or the processor ID is at or above the threshold with all edits under the program. A red exclamation point indicates at least one instance of noncompliance. Click the program to view the details for each edit.

Figure 7: Dashboard

By default, all of your programs appear on your dashboard.

5. Click **View all edits** for a complete view of your programs and edits.

On the **Edits by program page**, each edit is displayed with basic information about the edit, such as the Edit type, Compliance rating, Compliance threshold, Comply by (date), Noncompliant duration (if below the threshold), Extension start date and Extension end date (if the edit has an active extension), Errors, Edited transactions, Monthly transactions, Baseline and Status. Scroll down and scroll over to see all the columns.

The edit's current status is determined by the color of the Compliance rating and status; green indicates the edit is compliant, red indicates the edit is noncompliant.

You can generate reports for any edit by clicking on the radio button to activate the **Generate a report** button, or by clicking on the edit name to go to the edit details. Additionally, you can click on any noncompliant edit to easily manage extension requests. For more information on requesting an extension, see the "Data Integrity extensions" section.

Understanding periods and compliance calculations

The Data Integrity **Dashboard** will always open in the current period. The current period is one month behind. For example, when it is the month of October, the **Select period** will be September, refer to the note below for more information.

Figure 9: Dashboard/ICA search results

View by: All edits

Search

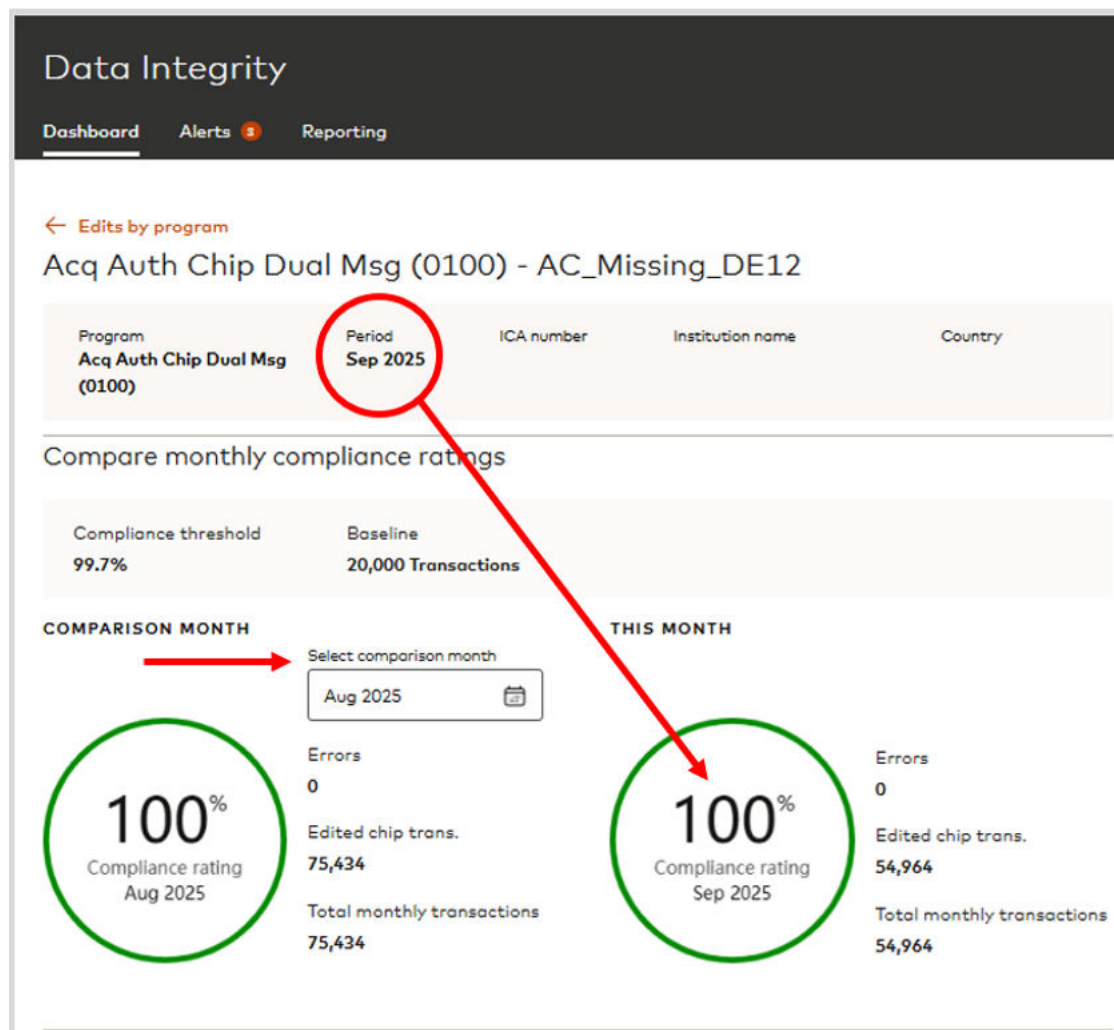

NOTE: Each month during the first week of the new month Data Integrity performs month end processing to move to the new month, so for the first few days of a new month the **Select period** could be more than one month behind. Each subsequent Data Integrity page will show the **Period** monitored. The **Edits by program** page displays the **Period** in the upper right section of the page.

Figure 10: Edits by program

The **Edit details** page also displays the **Period** in the upper right part of the page but also allows customers the option to compare their edit's compliance performance to a prior month of their choice.

Figure 11: Edit details

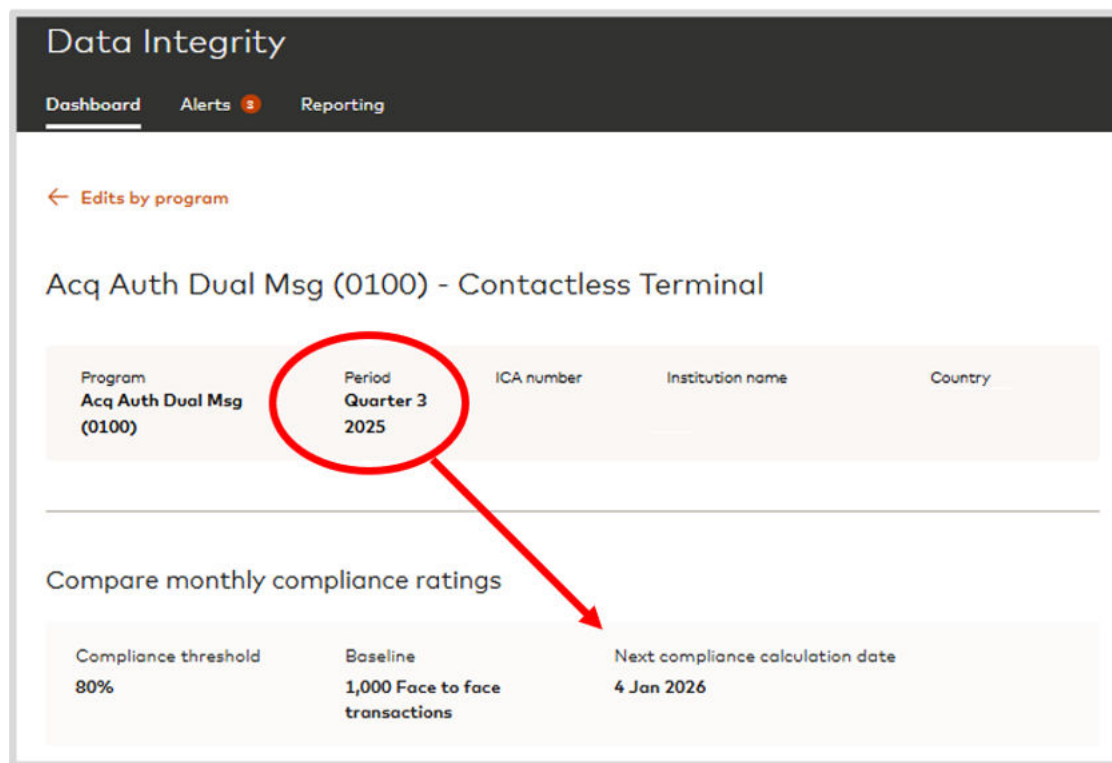

Quarterly edits operate on a different schedule depending on whether or not they use QMR data.

The Acquirer Auth Dual Message Edit 24 Contactless Terminal is a quarterly edit that does not use QMR data. The edit will monitor compliance over a period of three months. Mastercard will assess noncompliant customers the standard Data Integrity assessment applied quarterly in the months January, April, July, and October for last full quarter monitored.

Data Integrity monitors the quarterly edits one quarter in arrears. The Contactless Terminal edit will display Period Q3 starting in October and will indicate the next compliance period on the Edit details page. For non-QMR quarterly edits the next compliance period is the first week of the new month following the end of a quarter.

Figure 12: Contactless Issuer Edit details

The Issuer Auth Dual Message Edit 28 Contactless Issuer is a quarterly edit that does use QMR data. The edit will monitor compliance over a period of three months. Mastercard will assess noncompliant customers the standard Data Integrity assessment applied quarterly in the months February, May, August, and November for last full quarter monitored.

Data Integrity monitors the QMR quarterly edits one quarter plus one month in arrears. For QMR quarterly edits the next compliance period is after the 15th day of the month following the end of a quarter. The Contactless Issuer edit will display the monitoring period starting two months after the end of the quarter and will indicate the next compliance period on the Edit details page. For example, if the actual month is October, QMR data is not available until the 15th of October, therefore the period displayed is Q2 and the next compliance date will be two months after the end of the most recent quarter.

Add new customers to your Data Integrity profile

Procedure

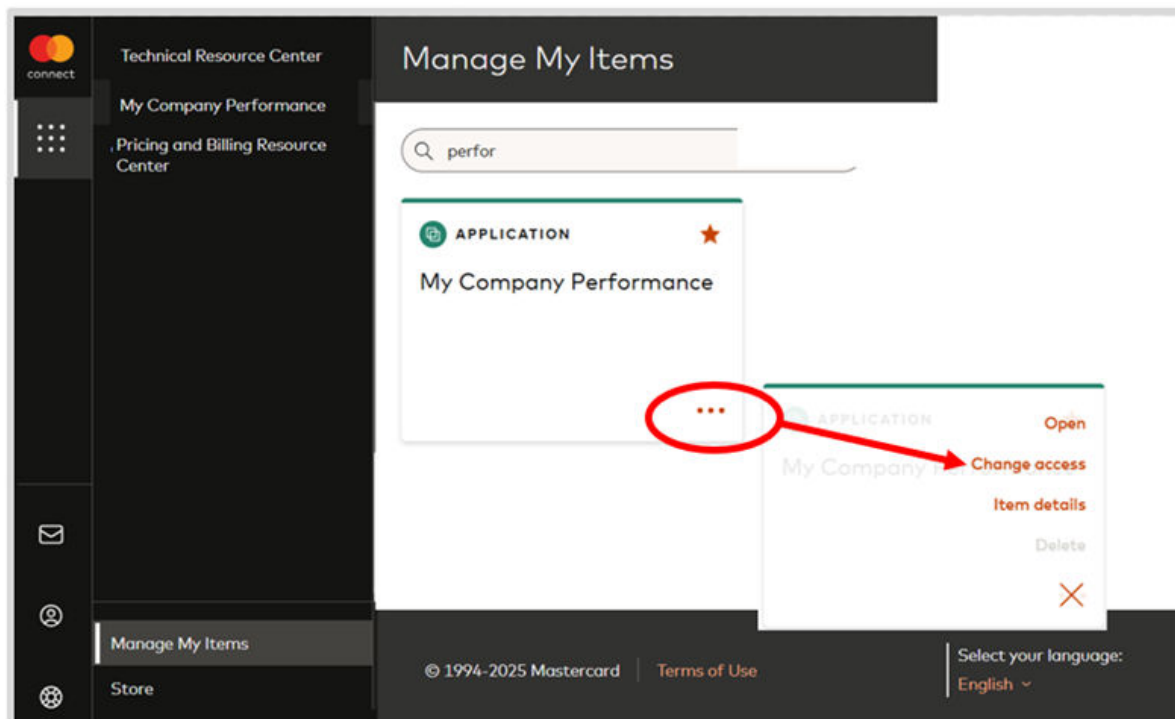

1. Navigate to www.mastercardconnect.com.
2. Log in using your user ID and security information.
3. Click **Manage My Items**.
4. Locate **My Company Performance**.
5. Click on the three dots in the lower right corner of the tile.
6. Click **Change access**.
7. Select **Data Integrity** data access.
8. Click **edit**.
9. Select the check boxes next to the additional ICA numbers or processor IDs that you want to add.
10. Select **Done**.
11. After you have selected the ICA numbers and processor IDs for the Data Integrity access options, select **Change access**.

Results

You will receive an order confirmation message in My Items. The message provides an option that enables you to track the status of your order.

NOTE: Contact the access manager at the ICA number or processor ID for approval prior to receiving final approval from Mastercard.

Figure 14: Add new customers

Data Integrity edit reports

Select an edit from the View all edits page or go to an edit's detail page to generate an edit-specific report. Click **Generate a report** and select a report from the list of the available reports for the edit. Some reports will generate in the background. Reports will prompt you when ready to view. Some reports are available to View in App and others are available as a Download file.

ABU Expired Credentials Report: This report provides an ICA number with a list of failed Account Numbers and the corresponding Expiry Date month and year that are in the Automatic Billing Updater (ABU) database.

Daily Compliance Report: This report provides the daily compliance for a given edit up to 36 days. Using this report, customers see near immediate impact to any changes or adjustments they make. Data includes these categories during a given:

- ICA, Program, Edit number, and name
- Processing date and day
- Transaction Count
- Error Count
- Daily Compliance % (Compliance Rate)

Click **View transaction sample** from the Daily Compliance Report to see transaction samples for a particular day or period without having to return to the edit to choose a new report.

Edit Summary Report: This report provides a snapshot view of an ICA number's or processor ID's status for all edits within a given program. Data is displayed for the most recent month and includes these categories:

- ICA, Institution name, Program, Period
- Monthly volume
- Total errors
- Edited Count (number of edited transactions)
- DI rate % (Compliance Rate)
- Billing event number
- Compliance issues (Yes or No)
- Comply by date
- Extension end date

History Report: This report provides a complete history of how an ICA number or processor ID has performed within a given Data Integrity program (for example, Acquiring Authorization Dual Message). Data is provided for each edit in the program over the past 3 years.

Top Error Report: This report is exclusive to acquirers and provides a list of top merchants where the most errors occurred during a given month.

Transaction Samples Report: This report provides customers access to the data element, subelement, and subfield levels to better understand where errors are occurring in a transaction. The report provides samples for a period of up to five days and as many as 4,000 transactions. If a customer has more than 4,000 errors in the selected period, this report provides a sampling of the data. It is important to note that this report does not display real-time information. Typically, there is a 3 to 5 day delay from when a transaction is on the Mastercard Network before it is available on the Transaction Samples Report.

Data Integrity Reporting

From the dashboard, select Reporting in the horizontal banner. Edit non-specific reports and application tools can be accessed from this section.

Click **Generate a report** and select a report from the list of the available reports.

Figure 15: Reporting

Accepted City Names: This report provides the acceptable names for a particular postal code, by country and state, when a postal code is entered into the Accepted City Names table. You must provide City or Postal code to return search results.

ECM Compliance Report: This report provides compliance ratings, comply by dates and the ability to request an extension for a select month for an Excessive Chargeback Merchant (ECM) edit by merchant ID for the ECM Program.

EFM Compliance Report: This report provides compliance ratings, comply by dates and the ability to request an extension for a select month for an Excessive Fraud Merchant (EFM) edit by merchant ID for the EFM Program.

GCO Monthly Scorecard: This report provides an information only detailed monthly report on all acquirers monitored in Asia Pacific, Latin America and the Caribbean, and Middle East/Africa regions for Global Collection Only (GCO) reporting compliance under Edit 9. The data is generated using the previous quarter's Quarterly Mastercard Report (QMR) and Mastercard processed transactions to derive the estimated compliance status of the month.

GCO Quarterly Scorecard Edit 9: This report provides a detailed quarterly report on all acquirers monitored globally, excluding Europe, for GCO reporting compliance under Edit 9, which includes QMR acquiring domestic transactions, Mastercard processed data, and GCO data.

GCO Quarterly Scorecard Edits 10-13: This report provides a detailed quarterly report on all acquirers monitored in the Europe region for GCO Reporting compliance under Edits 10 through 13, which includes QMR acquiring domestic transactions, Mastercard processed data, and GCO data.

Issuer TC28 Suspected XB Force Post Report: This report provides issuers with a list of cleared cross-border payment transactions that were not authorized. Customers can opt-in to receive weekly report notifications.

Monthly Compliance Report: This report provides compliance ratings, comply by dates and extensions for a select month for all edits and all ICA numbers and processor IDs a user is registered for.

Terminal ID Top Error Report: This report is exclusive to acquirers and provides a list of top terminals where the most errors occurred during a given month.

Top Error Report: This report is exclusive to acquirers and provides a list of top merchants where the most errors occurred during a given month. Once selected, the Top Error Report offers parameters for data selection. For best results, select only one ICA number, one program, and one edit to decrease the report creation time.

Data Integrity Alerts

Data Integrity Alerts provide customers with information pertinent to Data Integrity edits and programs. Customers should always check for Alerts when opening the Data Integrity application

Unread Alerts appear with a number in a red circle in the horizontal banner along the top of the screen.

Unread alerts have an exclamation mark next to the alert Subject. Select the alert to read the details of the alert.

Once you have read the alert the exclamation mark will go away, the alert will go to the end of the list (in order of creation date) and the number of unread alerts will change in the horizontal banner.

Figure 16: Alerts

The screenshot shows the 'Data Integrity' application interface. At the top, there is a navigation bar with 'Dashboard', 'Alerts' (highlighted with a red box and a red circle containing the number 1), and 'Reporting'. Below the navigation bar, the 'Alerts' section is displayed. It includes a 'Filter' dropdown and a table of alerts. The table has columns for 'Subject', 'Alert', 'Priority', 'Creation date', and 'Expiration date'. The first row of the table is highlighted in orange and has an exclamation mark next to the subject 'EUR 10052.3 published 8 July 2025'. A red arrow points from this row to a detailed view of the alert. The detailed view shows the alert's title, priority, creation date, expiration date, and a description of the edit. At the bottom of the interface, there is a pagination bar showing 'Displaying (1-10 of 179)' and a 'Page 1 of 18' indicator. A 'Rows per page' dropdown is set to 10.

Edit 2 AFD

Table 8: Edit 2 AFD information

Edit Number	2
Edit Title	Automated Fuel Dispenser
Name	AFD
Billing Code	2DC0100
Region(s)	Global (Some subedits apply to select countries.)
Description	This edit monitors various standards associated with Automated Fuel Dispenser (AFD) transactions.

Edit Number	2
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. Data Element (DE) 18 (Merchant Type [MCC]) is 5542 (AFD) and DE 61 (Point-of-Service [POS] Data), subfield 10 (Cardholder-Activated Terminal Level) is not any of these: • 1 (Automated dispensing machine with PIN) • 2 (Self-service terminal) • 6 (Authorized Level 6 CAT: Electronic Commerce) • 7 (Authorized Level 7 CAT: Transponder transaction), as described in Appendix D of the <i>Transaction Processing Rules</i> b. In the U.S. and Europe regions only, when DE 18 is 5542 and no corresponding Authorization Advice/0120 or Reversal Request/0400 is found on the same Primary Account Number (PAN). Data used to match the Authorization Request/0100 with the Authorization Advice/0120 includes: • DE 2 (Primary Account Number [PAN]) • DE 7 (Transmission Date and Time) • DE 11 (Systems Trace Audit Number [STAN]) • DE 32 (Acquiring Institution ID Code) • DE 33 (Forwarding Institution ID Code) Data used to match the Authorization Request/0100 with the Reversal Request/0400 includes: • DE 2 • DE 32 • DE 33 • DE 48 (Additional Data: Private Use), subelement 63 (Trace ID) c. In the U.S. only, when both of these are true: • DE 18 is 5542 in the Authorization Request/0100 • DE 60 (Advice Reason Code), subfield 1 (Advice Reason Code) is not 191 (Acquirer Processing System [APS] Completed Authorization Transaction) in the Authorization Advice/0120 d. In the U.S. only, when the time submitted in DE 48 (Additional Data: Private Use), subelement 15 (Authorization System Advice Date and Time) minus the time submitted in DE 7 (0100 Authorization Transmission Date and Time) is greater than 60 minutes in the Authorization/Advice/0120. e. In the U.S. only, when the time submitted in DE 7 of the Reversal Request/0400 minus the time submitted in DE 7 of the Authorization Request/0100 is greater than 24 hours. Exclusions: • All subedits exclude DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]).

Edit Number	2
	Monitoring start date: Prior to 1 December 2006
Baseline/ Threshold	Europe and United States Baseline: 1,000 AFD transactions Asia/Pacific, Canada, Latin America and the Caribbean, Middle East/Africa Baseline: 100 AFD transactions Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 3 Magstripe

Table 9: Edit 3 Magstripe information

Edit Number	3
Edit Title	Magnetic Stripe Track Data (0100)
Name	MAG_STRIPE
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors magnetic stripe data in Data Element (DE) 35 (Track 2 Data) and DE 45 (Track 1 Data) to validate that it corresponds appropriately to the Point of Service (POS) Entry Mode and the Transaction Category Code (TCC).

Edit Number	3
Edit Criteria	Mastercard identifies magnetic stripe transactions by one of these values in DE 22 (POS Entry Mode), subfield 1 (POS Terminal PAN Entry Mode): • 80 (Chip card at chip-capable terminal was unable to process transaction using data on the chip; therefore, the terminal defaulted to the magnetic stripe-read PAN) • 90 (PAN auto-entry using magnetic stripe) • 91 (PAN auto-entry using contactless magnetic stripe) Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 22 is 80, 90, or 91 and neither DE 35 nor DE 45 is present b. DE 22 is 80, 90, or 91 and DE 35 and DE 45 are both present d. All of these are true: • DE 22 is 80, 90, or 91 • Either DE 35 or DE 45 is present • DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is not 0 (Cardholder present) e. All of these are true: • DE 22 is 80, 90, or 91 • Either DE 35 or DE 45 is present • DE 61, subfield 5 (POS Card Presence) is 1 (Card not present) f. All of these are true: • DE 22 is 80, 90, or 91 • Either DE 35 or DE 45 is present • DE 48 (Additional Data: Private Use), character 1 (TCC) is T NOTE: Subedit c has been removed from this edit. Monitoring start date: Prior to 1 December 2006
Baseline/ Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i>

Edit 4 Date_Time

Table 10: Edit 4 Date_Time information

Edit Number	4
Edit Title	Network Date and Time
Name	Date_Time
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the presence and accuracy of values in Data Element (DE) 7 (Transmission Date and Time), which mark the date and time an authorization request is sent to Mastercard.
Edit Criteria	Mastercard considers transactions noncompliant when the values in DE 7, subfield 1 (Date) and DE 7, subfield 2 (Time) do not match the Dual Message System date and time (+/- 3 minutes). Time must be submitted in Coordinated Universal Time (UTC). Banknet time is automatically converted from St. Louis, Missouri, USA time to UTC for comparison purposes. However, the Transaction Sample report on Data Integrity displays values in St. Louis time. Monitoring start date: 1 October 2011
Baseline/ Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i>

Edit 5 Cntry2

Table 11: Edit 5 Cntry2 information

Edit Number	5
Edit Title	Country Code or Postal Code Verification (0100)

Edit Number	5
Name	Cntry2
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the postal code and country code submitted in Data Element (DE) 61 (Point-of-Service [POS] Data) to ensure values are present, valid, and correspond to the appropriate POS location.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 61, subfield 13 (POS Country Code [or Sponsored Merchant Information, if applicable]) is not present or is not a valid country code (Global) b. DE 61, subfield 13 is 840 (USA) and DE 61, subfield 14 (Acceptor Postal Code) is not present or is not a valid U.S. postal code c. DE 43 (Acceptor Name and Location), subfield 5 (Acceptor Country Code) is CAN and DE 61, subfield 14 is not a valid postal code in Canada d. DE 43, subfield 5 is AUS and DE 61, subfield 14 is not a valid postal code in Australia e. DE 43, subfield 5 is DEU and DE 61, subfield 14 is not a valid postal code in Germany f. DE 43, subfield 5 is CRI, DNK, ISR, KOR, KWT, NOR, NZL, PHL, PRI, THA, TUR, TWN or VEN and DE 61 subfield 14 contains "unknown" or is not present g. DE 43, subfield 5 is AFG, ALB, ARG, AUT, BEL, BRA, CHE, COL, CZE, FIN, FRA, GBR, GRC, HRV, HUN, IND, ITA, JPN, MYS, NLD, POL, RUS, SGP, SWE, UKR or ZAF and DE 61, subfield 14 contains "unknown" or is not present or is not in the correct format. Exclusions: DE 18 (Merchant Type [MCCs]) between 3000 and 3350 and 4511 (airline transactions) and 6011 (ATM) Exclusions: All subedits exclude MCC 4784 (Bridge and road fees, tolls) NOTE: In DE 43, subfield 5 is the contents of positions 38-40. Monitoring start date: Prior to 1 December 2006, 1 February 2021 for new countries in subedits f and g
Baseline/Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 6 DE 43

Table 12: Edit 6 DE 43 information

Edit Number	6
Edit Title	DE 43 - Acceptor Name and Location (0100)
Name	DE 43
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors Data Element (DE) 43 (Acceptor Name and Location) of the authorization transactions to ensure that all values are present and properly formatted.
Edit Criteria	Mastercard considers authorization transactions noncompliant when any of these subedits apply: a. DE 43 is blank b. DE 43, subfield 2 (Space) or subfield 4 (Space) contain anything other than a space character e. DE 43, subfield 1 (Acceptor Name) is all numeric, all one character, or all sequential characters. Such as, ABCDEF f. These fields do not represent a valid combination for AUS, CAN, DEU or 840 (USA): • DE 61, subfield 14 (Acceptor Postal Code) • DE 43, subfield 3 (Acceptor City) Exclusions: • All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) NOTE: Subedits c and d have been removed from this edit. Monitoring start date: Prior to 1 December 2006

Edit Number	6
Baseline/ Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 7 INV_STATE

Table 13: Edit 7 INV_STATE information

Edit Number	7
Edit Title	Invalid State
Name	INV_STATE
Billing Code	2DC0100
Region(s)	United States and all territories
Description	This edit monitors state submitted in Data Element (DE) 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 002 (Acceptor Country Subdivision Code) to ensure that it is present, valid and corresponds to the country code 840 (USA).

Edit Number	7
Edit Criteria	Mastercard considers transactions noncompliant when either of these subedits apply: a. DE 122, subelement 001, subfield 002 does not represent a valid state code, or the state code is not present b. DE 122, subelement 001, subfield 002 and DE 61 (Point-of-Service [POS] Data) , subfield 14 (Acceptor Postal Code) are both present but do not represent a valid combination Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) NOTE: On non-ATM transactions the state code must be left justified. Monitoring start date: 1 October 2013
Baseline/Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i>

Edit 8 TermPOS

Table 14: Edit 8 TermPOS information

Edit Number	8
Edit Title	Terminal POS Processing Fields (0100)
Name	TermPOS
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 61 (Point-of-Service [POS] Data) to ensure that the terminal processing fields are valid and correspond appropriately to the data in DE 22 (POS Entry Mode).

Edit Number	8
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 61, subfield 1 (POS Terminal Attendance) is 2 (No terminal used [voice/audio response unit (ARU) authorization]; server) and DE 61, subfield 3 (POS Terminal Location) is not 3 (No terminal used [voice/ARU authorization]; server) and DE 61, subfield 11 (POS Card Data Terminal Input Capability Indicator) is not 1 (No terminal used [voice/ARU authorization]; server) b. DE 61, subfield 3 is 3 and DE 61, subfield 1 is not 2 and DE 61, subfield 11 is not 1 c. DE 61, subfield 1 is 1 (Unattended terminal [cardholder-activated terminal (CAT), home PC, mobile phone, PDA]) and DE 61, subfield 10 (Cardholder-Activated Terminal Level) is 0 (Not a CAT transaction). Exclusions: Subedit c excludes recurring payment transactions and transactions with DE 18 (Merchant Type [MCC]) 6011 (ATM), 4111 (Transportation – Suburban and Local Commuter Passenger), 4131 (Bus Lines), and 4784 (Bridge and road fees, tolls) d. DE 61, subfield 11 is 1 and any of these conditions are true: • DE 61, subfield 1 is not 2 • DE 61, subfield 3 is not 3 • DE 22, subfield 1 (POS Terminal PAN Entry Mode) is not one of these values: – 00 (Merchant terminal PAN entry mode unknown) – 01 (Merchant terminal PAN manual entry) – 09 (PAN Token entry through electronic commerce containing DSRP cryptogram in DE 55) – 10 (Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (Electronic Commerce PAN Auto Entry through Server (issuer, acquirer, or third party vendor system). Exclusions: Subedit d excludes MCC 5542 (Fuel Dispenser, Automated) e. DE 22, subfield 1 is 00 and DE 61, subfield 11 is any of these: • 2 (Terminal supports magnetic stripe input only) • 5 (Terminal supports EMV[®] contact chip input and magnetic stripe input) • 7 (Terminal supports magnetic stripe input and key entry input) • 8 (Terminal supports EMV contact chip input, magnetic stripe input and key entry input)

Edit Number	8
	f. DE 61, subfield 11 is 6 (Terminal supports key entry input only) and DE 22, subfield 1 is any of these: • 02 (Merchant terminal PAN auto-entry through magnetic stripe - track data is not required) • 90 (PAN auto-entry through magnetic stripe - the full track data has been read from the data encoded on the card and transmitted within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) without alteration or truncation) • 91 (PAN auto-entry through contactless magnetic stripe - the full track data has been transmitted by the acquirer within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) and forwarded to the issuer without alteration or truncation.)
	g. DE 61, subfield 5 (POS Card Presence) is 0 (Card Present) and DE 61, subfield 4 (POS Cardholder Presence) is any of these: • 1 (Cardholder not present, unspecified) • 2 (Cardholder not present [mail/facsimile order]) • 3 (Cardholder not present [phone or ARU]) • 5 (Cardholder not present [Electronic order]) Exclusions: • DE 61, subfield 10 is 8 (Remote terminal)
	h. DE 61, subfield 4 (Cardholder Presence) is 0 (Cardholder present) and both of these are true: • DE 61, subfield 5 is 1 (Card not present) • DE 61, subfield 10 is not 7 (Authorized Level 7 CAT: Transponder transaction) or DE 61, subfield 10 is 0, and DE 22, subfield 1 is not 10
	i. DE 61, subfield 5 is 1 and DE 22, subfield 1 is any of these: • 02 • 03 (Merchant terminal PAN auto-entry through bar code reader) • 04 (Merchant terminal PAN auto-entry through optical character reader [OCR]) • 05 (Merchant terminal PAN auto-entry through chip) • 07 (Merchant terminal PAN auto-entry through contactless M/Chip) • 80 (Chip card at chip-capable terminal was unable to process transaction using data on the chip. Therefore, the terminal defaulted to the magnetic stripe-read PAN.) • 90 • 91
	j. DE 61, subfield 11 is 9 (Terminal supports EMV contact chip input only) and DE 22 subfield 1 is not 05
	Monitoring start date: Prior to 1 December 2006

Edit Number	8
Baseline/ Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 10 Ecom

Table 15: Edit 10 Ecom information

Edit Number	10
Edit Title	Electronic Commerce Processing Fields
Name	ECOM
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors electronic commerce processing fields to ensure they are populated accurately.

Edit Number	10
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is not any of these: • 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55) • 10 (Credential on File) • 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) • 82 (Electronic Commerce PAN Auto Entry through Server [issuer, acquirer, or third party vendor system]). And one or both of these conditions is true: • DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is 5 (Cardholder not present [Electronic order]) • DE 61, subfield 10 (Cardholder-Activated Terminal Level) is 6 (Authorized Level 6 CAT: Electronic Commerce) Exclusions: • DE 61, subfield 10 (Cardholder-activated Terminal Level) is 8 (Remote terminal) b. DE 48 (Additional Data: Private Use), subelement 42 (Electronic Commerce Indicators) is not present and any of these conditions are true: • DE 22 subfield 1 is 81 or 82 • DE 61 subfield 4 is 5 • DE 61 subfield 10 is 6 Exclusions: • DE 61, subfield 10 is 8 c. All of these conditions are true: • DE 22, subfield 1 is 10 • DE 61, subfield 4 is 5 • DE 61, subfield 10 is not 6 Exclusions: All subedits exclude DE 48, subelement 77 (Transaction Type Identifier) values C67 (Mastercard Merchant Presented QR) or C68 (Mastercard Merchant Presented QR Refund). Monitoring start date: Prior to 1 December 2006, 1 January 2019 for subedit c
Baseline/Threshold	Baseline: 25 e-commerce transactions Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 11 A_PF_ID

Table 16: Edit 11 A_PF_ID information

Edit Number	11
Edit Title	Authorization Payment Facilitator ID
Name	A_PF_ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the presence of the Payment Facilitator ID in Data Element (DE) 48 (Additional Data: Private Use), subelement 37 (Additional Merchant Data) to ensure it is valid and corresponds appropriately with other values in the authorization message.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. The Payment Facilitator ID is present in DE 48, subelement 37, subfield 1 (Payment Facilitator ID) and the sponsored merchant is not present in DE 48, subelement 37, subfield 3 (Sponsored Merchant ID) c. The value present in DE 48, subelement 37, subfield 1 is not a valid Payment Facilitator ID NOTE: Subedit b has been removed from this edit. Monitoring start date: 1 May 2015
Baseline/ Threshold	Baseline: 20,000 authorization requests Threshold: Customers with more than 1,000,000 authorization requests are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization requests are subject to a threshold of 97%.

Edit 13 Pure Magstripe POS 0100

Table 17: Edit 13 Pure Magstripe POS 0100 information

Edit Number	13
Edit Title	Pure Magnetic Stripe (Fallback) POS (0100)
Name	Pure Magstripe POS 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors pure magnetic stripe POS transactions that are submitted as technical fallback. NOTE: When an acquirer submits a POS transaction as technical fallback for a card that is only capable of magnetic stripe transactions, Mastercard will automatically downgrade the transaction from technical fallback to magnetic stripe. This change is indicated in Data Element (DE) 48 (Additional Data: Private Use), subelement 74 (Additional Processing Information).
Edit Criteria	Mastercard considers transactions noncompliant when all of these are true: - DE 18 (Merchant Type [MCC]) is not 6011 (ATM), 4784 (Bridge and road fees, tolls), or 7523 (Automobile Parking Lots and Garages) - DE 48, subelement 74 is 90C (Chip Fallback Transaction Downgrade Process Completed Successfully) Monitoring start date: 1 January 2016
Baseline/ Threshold	Baseline: 1 POS transaction Europe Threshold: 20 failures Non-Europe Threshold: 1,000 failures
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i> <i>M/Chip Requirements for Contact and Contactless</i>

Edit 15 INC_MAGSTRIPE_0100

Table 18: Edit 15 INC_MAGSTRIPE_0100 information

Edit Number	15
Edit Title	Inconsistent Magnetic Stripe (0100)
Name	INC_MAGSTRIPE_0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors transactions performed with chip cards at chip capable terminals that are submitted as magnetic stripe.
Edit Criteria	Mastercard considers transactions noncompliant when all of these are true: • Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is any of these: – 02 (Merchant terminal PAN auto-entry through magnetic stripe - track data is not required) – 90 (PAN auto-entry through magnetic stripe - full track data) • DE 35 (Track 2 Data), Field ID 5 (Extended Service Code) begins with a value of 2 or 6, indicating a chip is present • DE 61 (POS Data), subfield 11 (POS Card Data Terminal Input Capability Indicator) is any of these: – 5 (Terminal supports EMV contact chip input and magnetic stripe input) – 8 (Terminal supports EMV contact chip input, magnetic stripe input and key entry input) – 9 (Terminal supports EMV contact chip input only) Exclusions: DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) and 7523 (Automobile Parking Lots and Garages). Monitoring start date: 1 October 2016
Baseline/ Threshold	Baseline: 1 magnetic stripe transaction United States Threshold: 15,000 failures Non-United States Threshold: 1,000 failures

Edit 17 AUTH_PREAUTH_0100

Table 19: Edit 17 AUTH_PREAUTH_0100 information

Edit Number	17
Edit Title	Preauthorized Domestic Purchases
Name	AUTH_PREAUTH_0100
Billing Code	2DC0100
Region(s)	Canada, Latin America and the Caribbean, United States
Description	The edit monitors approved domestic purchase transactions to determine what percentage of the total volume was preauthorized.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 4 (Amount, Transaction) is greater than 0 • DE 39 (Response Code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 87 (Purchase Amount Only, No Cash Back Allowed) • DE 61 (Point-of-Service [POS] Data) subfield 7 (POS Transaction Status) is 4 (Preauthorized Request) Mastercard considers customers noncompliant when preauthorized requests account for 25 percent or more of all approved domestic purchase transactions. Exclusions: • E-commerce transactions where DE 22, subfield 1 (POS Terminal PAN Entry Mode) is 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) • Transactions where DE 22, subfield 1 is 10 (Credential on File) and DE 61, subfield 10 (Cardholder-Activated Terminal Level) is 6 (Authorized Level 6 CAT: Electronic commerce) • DE 18 (Merchant Type [MCCs]): equal to 4111, 4121, 4511, 4722, 5499, 5541, 5542, 5552, 5812, 5813, 5814, 5943, 5964, 5965, 5968, 5969, 5983, 5999, 6513, 7011, 7033, 7211, 7230, 7297, 7298, 7394, 7512, 7513, 7523, 7542, 7997, and between 3000 and 3999. Monitoring start date: 1 June 2017

Edit Number	17
Baseline/ Threshold	Baseline: 10,000 domestic authorization requests Threshold: 76% of domestic authorization requests are not preauthorized purchase transactions
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i>

Edit 18 AFD_MAND_PRE_AUTH

Table 20: Edit 18 AFD_MAND_PRE_AUTH information

Edit Number	18
Edit Title	Preauthorized Maestro AFD
Name	AFD_MAND_PRE_AUTH
Billing Code	2DC0100
Region(s)	Europe
Description	This edit monitors Maestro [®] Automated Fuel Dispenser (AFD) transactions to ensure that the authorization request was preauthorized.
Edit Criteria	Mastercard considers transactions noncompliant when Data Element (DE) 18 (Merchant Type [MCC]) is 5542 (Fuel Dispenser, Automated) and DE 61 (Point-of-Service [POS] Data) subfield 7 (POS Transaction Status) is not 4 (Preauthorized Request). Exclusions: DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]). Monitoring start date: 1 April 2017
Baseline/ Threshold	Baseline: 10 Maestro AFD transactions Threshold: 10 errors
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i>

Edit 20 ABU ACQ

Table 21: Edit 20 ABU ACQ information

Edit Number	20
Edit Title	Automatic Billing Updater for Acquirers
Name	ABU_ACQ
Billing Code	2DC0100
Region(s)	Latin America and the Caribbean, select countries in Europe (Armenia, Azerbaijan, Belarus, Belgium, Georgia, Germany, Gibraltar, Ireland, Italy, Kazakhstan, Kyrgyzstan, Liechtenstein, Luxembourg, Netherlands, Portugal, Russian Federation, San Marino, Switzerland, Tajikistan, Turkmenistan, United Kingdom, and Uzbekistan), Middle East/Africa
Description	This edit monitors the mandatory implementation of the Automatic Billing Updater (ABU) by acquirers submitting Credential on File (COF) and recurring payment transactions.
Edit Criteria	Mastercard identifies customers monitored under this edit when they have one or more recurring payment or COF transaction in a given month. Mastercard considers acquirers noncompliant when ABU is not implemented for ICA numbers submitting COF or recurring payment transactions. NOTE: All ICA numbers sharing a parent ICA number are considered compliant if any ICA number in the family has implemented ABU. Monitoring start date: 1 October 2018 for Latin America and the Caribbean, 1 August 2019 for Armenia, Azerbaijan, Belarus, Belgium, Georgia, Italy, Kazakhstan, Kyrgyzstan, Luxembourg, Netherlands, Russian Federation, San Marino, Tajikistan, Turkmenistan, and Uzbekistan, 1 May 2020 for Andorra, Germany, Gibraltar, Ireland, Liechtenstein, Portugal, Switzerland, and United Kingdom, and 1 November 2020 for Middle East/Africa
Baseline/Threshold	Baseline: 1 recurring payment or COF transaction

Edit 24 Contactless Terminal

Table 23: Edit 24 Contactless Terminal information

Edit Number	24
Edit Title	Contactless Terminal
Name	Contactless Terminal
Billing Code	2DC0100 Billed quarterly (January, April, July, and October)
Region(s)	Asia/Pacific (excluding Japan), Middle East/Africa
Description	This edit monitors the percentage of merchant terminals under an acquiring ICA number identified as contactless capable to determine if the percentage of merchant terminals identified as contactless capable meet the thresholds for that acquirer's region.

Edit Number	24
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 3 (Processing Code) is – 00 (Purchase) or – 09 (Purchase with Cash Back) • DE 61 (Point-of-Service [POS] Data), subfield 4 (POS Cardholder Presence) is 0 (Cardholder present) or • DE 61, subfield 5 (POS Card Presence) is 0 (Card present) Mastercard considers a merchant terminal noncompliant when these are true for all transactions: • DE 61, subfield 11 (POS Card Data Terminal Input Capability Indicator) is not 3 (Terminal supports contactless EMV input) Exclusions: • ATM Terminals • DE 61, subfield 10 (Cardholder-activated Terminal Level) is 8 (Remote terminal) NOTE: This edit is not eligible for extensions. Monitoring start date: 1 April 2021
Baseline/ Threshold	Baseline: 1,000 face-to-face transactions Threshold: 80%

Edit 27 DSRP Cryptogram Placement_0100

Table 24: Edit 27 DSRP Cryptogram Placement_0100 information

Edit Number	27
Edit Title	DSRP Cryptogram Placement_0100
Name	DSRP Cryptogram Placement_0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the presence of the Digital Secure Remote Payment (DSRP) Cryptogram in Data Element (DE) 104 (Digital Payment Data) subelement 001 (Digital Payment Cryptogram) by the acquirer for MDES and third party tokenized electronic commerce transactions in Authorization Request/0100 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is any of these: – 10 (Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (Electronic Commerce PAN Auto Entry through Server [issuer, acquirer, or third- party vendor system]) Mastercard considers transactions noncompliant when all of these criteria are met: • DE 104 (Digital Payment Data) subelement 001 (Digital Payment Cryptogram) is not present • DE 48 (Additional Data: Private Use), subelement 43 (UCAF) is not empty and the value does not have a Mastercard Identity Check AAV (leading indicator Mastercard Identity Check AAV begins with j, h, or k) Monitoring start date: 1 March 2021 and 1 December 2022 for third-party tokenized electronic commerce transactions
Baseline/ Threshold	Baseline: 100 DSRP transactions Threshold: 97%

Edit 30 ECOM COF MIT CIT Ind 0100

Table 26: Edit 30 ECOM COF MIT CIT Ind 0100 information

Edit Number	30
Edit Title	Ecommerce COF MIT and CIT Indicator 0100
Name	ECOM COF MIT CIT Ind 0100
Billing Code	2DC0100
Region(s)	Global, excluding Japan
Description	This edit monitors authorization messages for the presence of a valid Cardholder-Initiated Transaction (CIT) indicator or Merchant-Initiated Transaction (MIT) indicator value in Data Element (DE) 48 (Additional Data: Private Use), subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant-Initiated Transaction Indicator).

Edit Number	30
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 3 (Processing Code) subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is – 10 (Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (Electronic Commerce PAN Auto Entry through Server (issuer, acquirer, or third-party vendor system)) Mastercard considers transactions noncompliant when any of these subedits are true: a. DE 22, subfield 1 is 10; and DE 48, subelement 42 (Electronic Commerce Indicators), subfield 1, (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is not one of these: • 211 (Mastercard Identity Check transaction. UCAF data contains either an Attempts AAV or a Non-Low Risk AAV for Mastercard Identity Check from Smart Authentication) • 212 (Mastercard Identity Check transaction. UCAF data contains a fully authenticated AAV for Mastercard Identity Check or a Low-Risk AAV for Mastercard Identity Check from Smart Authentication) • 216 (Mastercard Identity Check transaction. Merchant Risk Based Decisioning. This includes European PSD2 Acquirer Exemption transactions) • 217 (Mastercard Identity Check transaction, Merchant Initiated Transactions) • 242 (Authenticated tokenized transaction with DSRP cryptogram. Transaction is not eligible for fraud related chargeback by the issuer) • 246 (Tokenized transaction with DSRP cryptogram) • 247 (Tokenized Merchant Initiated Transaction) and DE 48, subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant Initiated Transaction Indicator) is not one of these: • C101 (Credential-on-file [ad hoc]) • C102 (Standing Order [variable amount/fixed frequency]) • C103 (Subscription [fixed amount/fixed frequency]) • C104 (Installment) • M101 (Unscheduled Credential-on-file) • M102 (Standing Order [variable amount/fixed frequency]) • M103 (Subscription [fixed amount/fixed frequency]) • M104 (Installment) • M205 (Partial Shipment) • M206 (Related/Delayed Charge) • M207 (No-show) • M208 (Resubmission)

Edit Number	30
	b. DE 22, subfield 1 is 10; and DE 48, subelement 42, subfield 1 is 217 or 247; and DE 48, subelement 22, subfield 5 is not M101, M102, M103, M104, M205, M206, M207, or M208 c. DE 22, subfield 1 is 81 or 82; and DE 48, subelement 42, subfield 1 is not 211, 212, 216, 217, 242, 246 or 247; DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is 4 (Standing order/recurring transactions); and DE 48, subelement 22, subfield 5 is not C101, C102, C103, C104, M205, M206, M207, or M208 d. DE 22, subfield 1 is 81 or 82; and DE 48, subelement 42, subfield 1 is 217 or 247; and DE 48 subelement 22, subfield 5 is not M205, M206, M207, or M208 Exclusions: • DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) • DE 18 (Merchant Type [MCC]) is: – 4829 (Money Transfer) – 6538 (Funding Transactions for MoneySend) – 6540 (Funding Transactions) • China, India, and Mexico domestic transactions Monitoring start date: 1 June 2023
Baseline/Threshold	Baseline: 1,000 purchase, COF, ECOM transactions Threshold: 97%

Edit 32 Gambling Authorization 0100

Table 28: Edit 32 Gambling Authorization 0100 information

Edit Number	32
Edit Title	Gambling Authorization 0100
Name	Gambling Authorization 0100
Billing Code	2DC0100
Region(s)	Asia/Pacific, Canada, select countries in Europe (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Türkiye, Turkmenistan, and Uzbekistan), Latin America and the Caribbean, Middle East/Africa, United States
Description	This edit monitors the presence of the card validation code 2 (CVC2) value or EMV 3-D Secure (EMV 3DS) authentication by the acquirer for online gambling transactions in Authorization Request/0100 messages.

Edit Number	32
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 18 (Merchant Type [MCC]) is any of these: – 7995 (Gambling Transactions) – 7800 (Government Owned Lottery [U.S. Region Only]) – 7801 (Internet Gambling [U.S. Region Only]) – 7802 (Government Licensed Horse/Dog Racing [U.S. Region Only]) – 9406 (Government Owned Lottery [global, excluding U.S. region]) • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is any of these: – 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55 (Integrated Circuit Card [ICC] System-Related Data)) – 10 (Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (Electronic Commerce PAN Auto Entry through Server [issuer, acquirer, or third-party vendor system]) Mastercard considers transactions noncompliant when: • DE 48 (Additional Data: Private Use), subelement 92 (CVC 2) is not present, and one of these are true: – DE 48, subelement 42 (Electronic Commerce Indicators) subfield 1 (Electronic Commerce Security Level Indicator [SLI] UCAF Collection Indicator) is not 212 or 242, or – DE 61 (POS Cardholder Presence Indicator), subfield 4 (POS Cardholder Presence) is 4 (Recurring Payment) and DE 48, subelement 42, subfield 1 is not 214 or 217, or DE 48, subelement 63 (Trace ID is not populated), or – DE 61, subfield 4 is 4 and DE 48, subelement 63 is present but the length is less than 13 bytes, contains all zeros, or non-uppercase alpha-numeric combinations. Monitoring start date: 1 August 2024
Baseline/ Threshold	Baseline: 10 online gambling authorization transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>Mastercard Identity Check Program Guide</i> • <i>Mastercard Rules</i> • <i>AN 6856 New Data Integrity Monitoring Program Edit for Online Gambling Authorization</i>

Edit 33 Software MPOS 0100

Table 29: Edit 33 Software MPOS 0100 information

Edit Number	33
Edit Title	Software MPOS 0100
Name	Software MPOS 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the software mobile point-of-sale (mPOS) indicator in Data Element (DE) 61 (Point-of-Service [POS] Data), subfield 10 (Cardholder-Activated Terminal Level) in the acquirer Authorization Request/0100 messages to ensure proper identification is occurring.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - DE 61, subfield 10 is 9 (mPOS Acceptance Device) Mastercard considers transactions noncompliant when: - DE 22 (Point-of-Service [POS] Entry Mode), subfield 2 (POS Terminal PIN Entry Mode) is not one of these: 2 (Terminal does not have PIN entry capability) 3 (mPOS Software-based PIN Entry Capability), or - DE 22, subfield 2 is 2 and DE 48 (Additional Data: Private Use), subelement 21 (Acceptance Data), subfield 01 (mPOS Acceptance Device Type) is not 1 (Off the Shelf Mobile Device), or - DE 22, subfield 2 is 3 (MPOS Software-based PIN Entry Capability) and DE 48, subelement 21, subfield 01 is not one of these: 0 (Dedicated mPOS terminal with PCI compliant dongle [with or without keypad]) 1 Exclusions: - DE 22, subfield 2 is 1 (Terminal has PIN entry capability) and DE 48, subelement 21, subfield 01 is 0 - DE 22, subfield 2 is 2 and DE 48, subelement 21, subfield 01 is blank, null or 0 - DE 22, subfield 2 is 8 (Terminal has PIN entry capability but PIN pad is not currently operative) and DE 48, subelement 21, subfield 01 is 0 - DE 61, subfield 11 (POS Card Data Terminal Input Capability Indicator) is 9 (Terminal supports EMV contact chip input only) Monitoring start date: 1 April 2023

Edit Number	33
Baseline/ Threshold	Baseline: 300 software mPOS transactions Threshold: 95%

Edit 34 Merchant Cntry of Origin 0100

Table 30: Edit 34 Merchant Cntry of Origin 0100 information

Edit Number	34
Edit Title	Merchant Country of Origin 0100
Name	Merchant Cntry of Origin 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors government-controlled merchants to help ensure that the acquirer populates the numeric country code of the government entity that owns or controls the merchant in Data Element (DE) 48 (Additional Data: Private Use), subelement 37 (Additional Merchant Data), subfield 4 (Merchant Country of Origin) in the Authorization Request/0100 messages.

Edit Number	34
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 18 (Merchant Type [MCC]) is any of these: – 9211 (Court costs including alimony and child support) – 9222 (Fines) – 9311 (Tax payments) – 9399 (Government services – not elsewhere classified) – 9402 (Postal services – government only) – 9405 (Intra-government purchases-government only) – 9406 (Government-owned lottery [Global, excluding U.S. region]) Mastercard considers transactions noncompliant when: • DE 48, subelement 37, subfield 4 is not populated or is not a valid country code. Exclusions: • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 28 NOTE: This edit is not eligible for extensions. Monitoring start date: 1 September 2023
Baseline/ Threshold	Baseline: 1 transaction Threshold: 100%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>Quick Reference Booklet</i> • <i>AN 8026 Data Integrity Monitoring Program Edits for Merchant Country of Origin Identifier</i>

Edit 35 SCOF for Merchants COFi 0100

Table 31: Edit 35 SCOF for Merchants COFi 0100 information

Edit Number	35
Edit Title	Secure Card on File for Merchants Credential on File 0100
Name	SCOF for Merchants COFi 0100
Billing Code	2DC0100
Region(s)	Global, excluding Azerbaijan, Chile, Colombia, Jordan, Pakistan, Palestine, and Türkiye

Edit Number	35
Description	This edit monitors for the presence of the Electronic Commerce Credential on File indicator in Mastercard Digital Enablement Service (MDES) for Merchants and Secure Card on File (SCOF) for Merchants transactions in the Authorization Request/0100 message.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Data Element (DE) 48 (Additional Data: Private Use) subelement 26 (Wallet Program Data) subfield 1 (Wallet Identifier) is 327 (Remote commerce programs) - DE 03 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) Mastercard considers transactions noncompliant when: - DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is not 10 (Electronic Commerce Credential on File). Exclusions: - DE 48, subelement 22 (Multi-Purpose Merchant Indicator), subfield 05 (Cardholder/Merchant Initiated Transaction Indicator) is any of these: - C101 (Credential-on-file [ad hoc]) - C102 (Cardholder-Initiated Standing Order [variable amount and fixed frequency]) - C103 (Cardholder-Initiated Subscription [fixed amount and frequency]) - C104 (Cardholder-Initiated Installment) - DE 61 (Point-of-Service [POS] Data), subfield 7 (POS Transaction Status) is any of these: 8 (Account Status Inquiry Service [ASI]) 9 (Tokenization Request/Notification) NOTE: Only MDES for Merchants and Secure Card on File for Merchants transactions under WID 327 are considered in this edit. Monitoring start date: 1 November 2023 and 1 August 2025 for Brazil
Baseline/ Threshold	Baseline: 10,000 MDES and SCOF for Merchants transactions Threshold: 97%
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i> <i>Mastercard Secure Card on File Program Guide</i> <i>MDES for Merchants Merchant Implementation Guide</i> <i>AN 8181 Data Integrity Monitoring Program Edit for Credential on File Indicator Use in Secure Card on File Program for Merchants</i> <i>LAC 11919 Data Integrity Monitoring Program Edit for Secure Card on File for Merchants Credential on File Indicator for Brazil</i>

Edit 36 MPG ID 0100

Table 32: Edit 36 MPG ID 0100 information

Edit Number	36
Edit Title	Merchant Payment Gateway ID 0100
Name	MPG ID 0100
Billing Code	2DC0100
Region(s)	Global, excluding Jordan, Nigeria, and Pakistan
Description	This edit monitors the presence of the Merchant Payment Gateway (MPG) ID in Data Element (DE) 48 (Additional Data: Private Use), subelement 37 (Additional Merchant Data), subfield 5 (Merchant Payment Gateway ID) to ensure it is populated and valid in e-commerce Authorization Request/0100 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal Primary Account Number [PAN] Entry Mode) is any of these: 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55 (Integrated Circuit Card [ICC] System-Related Data)) 10 (Credential on File) 81 (Electronic Commerce PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) Mastercard considers transactions noncompliant when: - DE 48, subelement 37, subfield 5 is not populated or is not a valid MPG ID Exclusions: - DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 28 (Payment Transaction) and DE 48, subelement 77 (Transaction Type Identifier) is C67 (Merchant Presented QR) or C68 (Merchant Presented QR Refund) - DE 18 (Merchant Type [MCC]) is 6011 (ATM) - DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is either of these: 2 (Cardholder not present [mail/facsimile order]) 3 (Cardholder not present [phone or Automated Response Unit (ARU)]) Monitoring start date: 1 May 2024
Baseline/Threshold	Baseline: 10,000 ECOM transactions Threshold: - Effective 1 May 2024: 50% - Effective 1 April 2026: 70% - Effective 1 April 2027: 90%

Edit Number	36

Edit 37 Preauthorization 0100

Table 33: Edit 37 Preauthorization 0100 information

Edit Number	37
Edit Title	Preauthorization 0100
Name	Preauthorization 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors preauthorization transactions to ensure the final authorization indicator in Data Element (DE) 48 (Additional Data: Private Use), subelement 61 (Point-of-Service [POS] Data Extended Condition Codes), subfield 5 (Final Authorization Indicator) is properly coded.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 61 (POS Data), subfield 7 (POS Transaction Status) is 4 (Preauthorized request) Mastercard considers transactions noncompliant when: • DE 48, subelement 61, subfield 5 value is not 0 (Normal Authorization/Undefined Finality) or null Monitoring start date: 1 April 2024
Baseline/ Threshold	Baseline: 10,000 preauthorization transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>Transaction Processing Rules</i> • <i>AN 9080 Data Integrity Monitoring Program Edit for Preauthorization</i>

Edit 38 Invalid Street 0100

Table 34: Edit 38 Invalid Street 0100 information

Edit Number	38
Edit Title	Invalid Street Address 0100
Name	Invalid Street 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the street address values in Data Element (DE) 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 001 (Acceptor Street Address) of the authorization transactions to ensure they are valid and properly formatted.
Edit Criteria	Mastercard considers authorization transactions noncompliant when either of these subedits apply. a. In Australia, Brazil, Canada, China, France, Germany, India, Italy, Japan, Mexico, Poland, Russian Federation, Spain, United Kingdom, and United States only, an authorization transaction is submitted and any of these are true: • DE 122, subelement 001, subfield 001 is null or all spaces • DE 122, subelement 001, subfield 001 contains unknown value • DE 122, subelement 001, subfield 001 is all numeric • DE 122, subelement 001, subfield 001 is fewer than three characters in length • In the U.S. only, DE 122 subelement 001 subfield 001 is missing the street number or street name Exception: A value of RR is permitted in the Canada and United States regions. b. Globally, an authorization transaction is submitted and DE 43 (Acceptor Name and Location), subfield 1 (Acceptor Name) matches DE 122, subelement 001, subfield 001. (Spaces, character case and special characters are removed prior to matching) Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) and MCCs between 3000 and 3350 and 4511 (airline transactions) Monitoring start date: 1 October 2024
Baseline/Threshold	Baseline: 20,000 authorization transactions Threshold: Customers with more than 1,000,000 authorization transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization transactions are subject to a threshold of 97%.

Edit Number	38
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>AN 9987 Data Integrity Monitoring Program Edits for Standardization of Transaction Data Elements</i>

Edit 39 Acceptor ID 0100

Table 35: Edit 39 Acceptor ID 0100 information

Edit Number	39
Edit Title	Acceptor ID 0100
Name	Acceptor ID 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 42 (Acceptor ID) of face-to-face authorization transactions to ensure that each Acceptor ID has a unique address.
Edit Criteria	Mastercard considers authorization transactions noncompliant when the same Acceptor ID value found in DE 42 appears in multiple authorization transactions but these values are not consistent: • DE 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 001 (Acceptor Street Address) • DE 43 (Acceptor Name and Location), subfield 3 (Acceptor City Name) • DE 122, subelement 001, subfield 002 (Acceptor Country Subdivision Code) • DE 61 (Point-of-Service [POS] Data), subfield 14 (Acceptor Postal Code) Exclusions: Transactions with DE 48 (Additional Data: Private Use), subelement 37 (Additional Merchant Data), subfield 1 (Payment Facilitator ID) populated NOTE: This edit only applies to face-to-face transactions. Monitoring start date: 1 April 2025
Baseline/ Threshold	Baseline: 20,000 authorization transactions Threshold: Customers with more than 1,000,000 authorization transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer authorization transactions are subject to a threshold of 97%

Edit 40 Token SCA

Table 36: Edit 40 Token SCA information

Edit Number	40
Edit Title	Token Strong Customer Authentication
Name	Token SCA
Billing Code	2DC0100
Region(s)	Europe
Description	This edit monitors acquirers to ensure that only tokens that are strong customer authenticated (SCA) are used in authorization transactions.

Edit Number	40
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Both issuer and acquirer are in one of the monitored countries - Data Element (DE) 48 (Additional Data: Private Use), subelement 26 (Wallet Program Data), subfield 1 (Wallet Identifier) is 327 (Remote commerce programs) Mastercard considers transactions noncompliant when either of these scenarios are true: DE 48, subelement 33 (PAN Mapping File Information), subfield 6 (Token Requestor ID) is (50123197928 [Click to Pay ID]) and - DE 48, subelement 33, subfield 5 (Token Assurance Method) is not one of these: 14 (Card Issuer Asserted Authentication) 21 (Push Provisioned Token with Additional Identity Check Authentication) 23 (Identity Check Interactive Cardholder Authentication) and - DE 48, subelement 42 (Electronic Commerce Indicators) is not one of these: 212 (Mastercard Identity Check transaction) and DE 48, subelement 43 (Universal Cardholder Authentication Field [UCAF]) does not begin with 'kB' or 'kG' 242 (Authenticated tokenized transaction with Digital Secure Remote Payments [DSRP] cryptogram) DE 48, subelement 33, subfield 6 is not 50123197928 and DE 61 (Point-of-Service [POS] Data), subfield 4 (POS Cardholder Presence) value is 4 (Recurring transactions) - DE 48, subelement 33, subfield 5 is not one of these: 14 21 23 and - DE 48, subelement 42 is not 212 and DE 48, subelement 43 does not begin with 'kB' or 'kG' and - DE 48, subelement 63 (Trace ID) is null Exclusions: - DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is one of these: 20 (Purchase Return/Refund) 28 (Payment Transaction) - Zero amount transactions denoted when DE 4 (Amount, Transaction) is 0 (Zero) - MDES Tokens created before 13 October 2023 - In Control mobile payments virtual card numbers Countries excluded: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Serbia, Tajikistan, Türkiye, Turkmenistan, Ukraine, and Uzbekistan Monitoring start date: 1 January 2025
Baseline/ Threshold	Baseline: 1,000 tokenized authorizations Threshold: 95%

Edit 41 ECOM COF CIT Ind 0100

Table 37: Edit 41 ECOM COF CIT Ind 0100 information

Edit Number	41
Edit Title	Ecommerce COF CIT Indicator 0100
Name	ECOM COF CIT Ind 0100
Billing Code	2DC0100
Region(s)	Global, excluding Japan
Description	This edit monitors authorization messages for the presence of a Cardholder-Initiated Transaction (CIT) indicator and Electronic Commerce Security Level Indicator (SLI) combination to ensure that the acquirer is not populating a Merchant-Initiated Transaction (MIT) indicator value in Data Element (DE) 48 (Additional Data: Private Use), subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/ Merchant Initiated Transaction Indicator).

Edit Number	41
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is – 10 (Credential on File) – 81 (PAN/Token entry via electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (PAN Auto Entry via Server (issuer, acquirer, or third-party vendor system)) • DE 48, subelement 42 (Electronic Commerce Indicators), subfield 1, (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is one of these: – 211 (Mastercard Identity Check transaction. UCAF data contains either an Attempts AAV or a Non-Low Risk AAV for Mastercard Identity Check from Smart Authentication) – 212 (Mastercard Identity Check transaction. UCAF data contains a fully authenticated AAV for Mastercard Identity Check or a Low-Risk AAV for Mastercard Identity Check from Smart Authentication) – 216 (Mastercard Identity Check transaction. Merchant Risk Based Decisioning. This includes European PSD2 Acquirer Exemption transactions) – 242 (Authenticated tokenized transaction with DSRP cryptogram. Transaction is not eligible for fraud related chargeback by the issuer) – 246 (Tokenized transaction with DSRP cryptogram) Mastercard considers transactions to be noncompliant when any of these subedits are true. a. DE 22, subfield 1 is 10; and DE 48, subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant Initiated Transaction Indicator) is not one of these: • C101 (Credential-on-file [ad hoc]) • C102 (Standing Order [variable amount/fixed frequency]) • C103 (Subscription [fixed amount/fixed frequency]) • C104 (Installment) DE 22, subfield 1 is 81 or 82; and DE 61 (Point-of-Service [POS] Data), subfield 4 (POS Cardholder Presence) is 4 (Standing order/recurring transactions); and DE 48, subelement 22, subfield 5 is not C101, C102, C103, C104

Edit Number	41
	Exclusions: • DE 61, subfield 7 (POS Transaction Status) 8 (Account Status Inquiry Service [ASI]) • DE 18 (Merchant Type): – MCC 4829 (Money Transfer) – MCC 6538 (Funding Transactions for MoneySend) – MCC 6540 (Funding Transactions) • China, India, and Mexico domestic transactions Monitoring start date: 1 September 2025
Baseline/Threshold	Baseline: 1,000 purchase, COF, ECOM transactions Threshold: 97%

Edit 42 Acceptor Contact Data 0100

Table 38: Edit 42 Acceptor Contact Data 0100 information

Edit Number	42
Edit Title	Acceptor Contact Data 0100
Name	Acceptor Contact Data 0100
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors authorization request messages to ensure that the Acceptor Customer Service Phone Number and Acceptor URL address contains valid values defined and formatted to the specifications in the <i>Mastercard Network Processing Dual Message Authorization System Guide</i> .

Edit Number	42
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Authorization Request/0100 messages Mastercard considers transactions noncompliant when any of these subedits apply: a. Data Element (DE) 122 (Additional Data), subelement 001 (Additional Acceptor Data), subfield 003 (Acceptor URL address) is not populated and DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is one of these: • 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55 (Integrated Circuit Card [ICC] System-Related Data)) • 10 (Credential on File) • 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV in DE 48, subelement 43 [UCAF] or DSRP cryptogram in DE 104, subelement 001 [Digital Payment Cryptogram]) • 82 (Electronic Commerce PAN Auto Entry through Server [issuer, acquirer, or third-party vendor System]) b. DE 122, subelement 001, subfield 003 is populated and does not contain a period or does not contain at least one alphanumeric character before the period and at least two alpha characters after the period or contains a space or @ character. c. DE 122, subelement 001, subfield 004 (Acceptor Customer Service Phone Number) is not populated and all of these are true: • DE 122, subelement 001, subfield 003 is not populated • DE 22, subfield 1 is not equal to 09, 10, 81, or 82 d. DE 122, subelement 001, subfield 004 is populated and • DE 43 (Acceptor Name and Location), subfield 5 (Acceptor Country Code) is USA or CAN and DE 122, subelement 001, subfield 004 is not 10 positions with the first three positions being numeric or • DE 122, subelement 001, subfield 004 is not between five and fifteen numeric characters (excluding Canada and the United States). Exclusions: • DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) Monitoring start date: 1 February 2026
Baseline/Threshold	Baseline: 20,000 authorization transactions Threshold: 98%

Chip testing requirement

Before sending and receiving chip transactions, every customer is required to test with Mastercard through a chip implementation project.

Once the chip implementation project is successfully completed, Customer Implementation Services activates the customer's chip testing status flag to correspond to the profile that was implemented.

Data Integrity monitors specific fields to validate the status of the codes and ensure they remain accurately aligned with the chip implementation plan.

Edit 1 AC_Missing_DE12

Table 39: Edit 1 AC_Missing_DE12 information

Edit Number	1
Edit Title	Missing DE 12 (0100)
Name	AC_Missing_DE12
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors dual message chip transactions to ensure that the local time is populated.

Edit Number	1
Edit Criteria	Mastercard identifies chip transactions monitored under this edit by one of these values in Data Element (DE) 22 (Point of Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode): • 05 (Merchant terminal PAN auto-entry through integrated circuit card) • 07 (Merchant terminal PAN auto-entry through contactless M/Chip) • 80 (Chip card at chip-capable terminal was unable to process transaction using data on the chip; therefore, the terminal defaulted to the magnetic stripe-read PAN) Mastercard considers transactions noncompliant when DE 12 (Time, Local Transaction) is missing. Monitoring start date: 1 December 2014
Baseline/Threshold	Baseline: 20,000 chip transactions Threshold: 99.7%

Region(s)	Asia/Pacific, Latin America and the Caribbean, and select countries in Middle East/Africa (Angola, Bahrain, Botswana, Egypt, Eswatini (formerly Swaziland), Ghana, Jordan, Kenya, Kuwait, Lebanon, Lesotho, Malawi, Mauritius, Morocco, Mozambique, Namibia, Nigeria, Oman, Qatar, Saudi Arabia, Seychelles, South Africa, Tanzania, Uganda, United Arab Emirates, and Zambia)
Description	This edit monitors merchant terminals to ensure that they are accurately setting the CVM limits to Mastercard published values.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 22 (Point of Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 07 (Merchant terminal PAN auto-entry through contactless M/Chip) • DE 55 (Integrated Circuit Card [ICC] System-Related Data) tag value 9F1A (Terminal Country Code) • DE 49 (Currency Code, Transaction) and DE 55 tag value 9F1A is a valid currency and country code combination published on the Mastercard CVM and Transit Limit Amounts spreadsheet Mastercard considers transactions noncompliant when either of these subedits are true: a. Transaction amount in DE 4 (Amount, Transaction) is less than or equal to the CVM limit for each country, and DE 55 is present and tag 9F34 (Cardholder Verification Method [CVM] Results) values do not start with 00011111 or 00111111; or b. Transaction amount in DE 4 (or DE 54, subfield 4 for DCC) is greater than the CVM limit for each country, and DE 55 is present and tag 9F34 values start with 00011111 or 00111111 The compliance rating percentage is not exclusive according to the subedit (a or b) and if customer fails a or b on a transaction it is counted as a failure and adds up against total failures. NOTE: DCC is determined when DE 54 (Additional Amounts), subfield 2 (Account Type) value is 58 (POI Amount (also known as Dynamic Currency Conversion [DCC])). Exclusions • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 09 (Purchase with Cash Back) • DE 18 (Merchant Type [MCC]) is 4784, 4829, 5542, 6010, 6011, 6050, 6051, 6540, 7802, 7995, and 9405 • DE 61 (Point-of-Service [POS] Data), subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) • DE 61, subfield 10 (Cardholder-activated Terminal Level) is 8 (Remote terminal) Monitoring start date: 1 April 2022

Edit 2 MERCHANT ID

Table 52: Edit 2 MERCHANT ID information

Edit Number	2
Edit Title	Merchant ID
Name	MERCHANT ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 42 (Acceptor ID) to ensure that each Acceptor ID, or Merchant ID, has a unique address.
Edit Criteria	Mastercard considers transactions noncompliant when the same Merchant ID value found in DE 42 appears in multiple transactions, but these values are not consistent: • DE 43 (Acceptor Name and Location), subfield 2 (Acceptor Street Address) • DE 43, subfield 3 (Acceptor City Name) • DE 43, subfield 4 (Acceptor Postal Code) • DE 43, subfield 5 (Acceptor Country Subdivision Code) Exclusions: • Transactions with Private Data Subelement (PDS) 0208 (Additional Merchant Data), subfield 1 (Payment Facilitator ID) populated. NOTE: This edit only applies to face-to-face transactions. Monitoring start date: 1 January 2005

Edit Number	2
Baseline/ Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 3 INV DE43

Table 53: Edit 3 INV DE43 information

Edit Number	3
Edit Title	Invalid Values DE 43
Name	INV DE43
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 43 (Acceptor Name and Location) to ensure they are valid and properly formatted.

Edit Number	3
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 43, subfield 1 (Acceptor Name) is a street address b. DE 43, subfield 1 is a telephone number and DE 26 (Acceptor Business Code [MCC]) is not consistent with a telephone service d. DE 43, subfield 1 is all numeric, all one character, or all sequential characters (for example, ABCDEF) Exclusions: Telephone Service MCCs e. DE 43, subfield 1 does not contain the chain merchant name that is most recognizable to the cardholder NOTE: The Acceptor Name must contain the chain/franchise merchant name at the beginning of this subfield. If a chain is listed in MCCs between 3000 and 3999, use the exact chain name. Exclusions: MCC 5511 (Automobile and Truck Dealers - Sales, Service, Repairs, Parts, and Leasing) f. DE 43, subfield 1, positions 20-22 contains one of these substrings: PAA, Rxx, Sxx, Wxx, PAY Exclusions: All subedits exclude MCC 4784 (Bridge and road fees, tolls) Monitoring start date: 1 January 2005
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 4 CNTRY GEO

Table 54: Edit 4 CNTRY GEO information

Edit Number	4
Edit Title	Country Code or Postal Code Verification (1240)

Edit Number	4
Name	CNTRY GEO
Billing Code	2DC0100
Region(s)	This edit applies to these countries: Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Brazil, Canada, Colombia, Costa Rica, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, India, Israel, Italy Japan, Korea, Kuwait, Malaysia, Netherlands, New Zealand, Norway, Philippines, Poland, Puerto Rico, Russian Federation, Singapore, South Africa, Sweden, Switzerland, Taiwan, Thailand, Türkiye, Ukraine, United Kingdom, United States, and Venezuela
Description	This edit monitors the postal code or country code values submitted in Data Element (DE) 43 (Acceptor Name and Location) to ensure values are present, valid, and correspond to the appropriate Point of Service (POS) location.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 43, subfield 6 (Acceptor Country Code) is CAN and DE 43, subfield 4 (Acceptor Postal Code) is unknown or is not a valid postal code in Canada b. DE 43, subfield 6 is AUS and DE 43, subfield 4 is unknown or is not a valid postal code in Australia c. DE 43, subfield 6 is DEU and DE 43, subfield 4 is unknown or is not a valid postal code in Germany d. DE 43, subfield 6 is USA and DE 43, subfield 4 is not a valid U.S. postal code e. DE 43, subfield 6 is CRI, DNK, ISR, KOR, KWT, NOR, NZL, PHL, PRI, THA, TUR, TWN, or VEN, and subfield 4 contains unknown or is not present f. DE 43, subfield 6 is AFG, ALB, ARG, AUT, BEL, BRA, CHE, COL, CZE, FIN, FRA, GBR, GRC, HRV, HUN, IND, ITA, JPN, MYS, NLD, POL, RUS, SGP, SWE, UKR or ZAF and DE 43, subfield 4 contains unknown or is not present or is not in the correct format. Exclusions: DE 26 (Acceptor Business Code [MCCs]) between 3000 and 3350 and 4511 (airline transactions) Exclusions: All subedits exclude MCC 4784 (Bridge and road fees, tolls) Monitoring start date: 1 January 2005, 1 February 2021 for new countries in subedits e and f
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 5 INV_STREET

Table 55: Edit 5 INV_STREET information

Edit Number	5
Edit Title	Invalid Street Address (1240)
Name	INV_STREET
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the street address values in Data Element (DE) 43 (Acceptor Name and Location), subfield 2 (Acceptor Street Address) of First Presentment/1240 transactions to ensure they are valid and properly formatted.
Edit Criteria	Mastercard considers First Presentment/1240 transactions noncompliant when any of these subedits apply: a. In Australia, Brazil, Canada, China, France, Germany, India, Italy, Japan, Mexico, Poland, Russian Federation, Spain, United Kingdom, and United States only, if a First Presentment/1240 transaction is submitted and any of these are true: • DE 43, subfield 2 is null or all spaces • DE 43, subfield 2 contains unknown value • DE 43, subfield 2 is all numeric • DE 43, subfield 2 is fewer than three characters in length • In the U.S. only, DE 43, subfield 2 is missing the street number or street name Exception: A value of RR is permitted in the Canada and United States regions. b. Globally, if DE 43, subfield 1 (Acceptor Name) matches DE 43, subfield 2 (Spaces, character case and special characters are removed prior to matching.) Exclusions: All subedits exclude DE 26 (Acceptor Business Code [MCC]) 4784 (Bridge and road fees, tolls) Monitoring start date: 1 February 2010, 1 February 2021 for subedit b
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 6 INV ADDR

Table 56: Edit 6 INV ADDR information

Edit Number	6
Edit Title	Invalid City/Address
Name	INV ADDR
Billing Code	2DC0100
Region(s)	Global (Some subedits apply to select countries.)
Description	This edit monitors the values in Data Element (DE) 43 (Acceptor Name and Location) of First Presentment/1240 transactions to ensure the city name is valid and corresponds appropriately to the provided postal code.
Edit Criteria	Mastercard considers First Presentment/1240 transactions noncompliant when any of these subedits apply: a. Globally, DE 43, subfield 3 (Acceptor City Name) contains invalid character sets for the specified country code b. In Canada, Germany, and Australia only, DE 43, subfield 4 (Acceptor Postal Code) is invalid for the city populated in DE 43, subfield 3 c. In the U.S. only, either of these are true: • DE 43, subfield 3 is all spaces, all numeric, or null • DE 43, subfield 3 and subfield 4 do not represent a valid combination Exclusions: All subedits exclude DE 26 (Acceptor Business Code [MCC]) 4784 (Bridge and road fees, tolls) Monitoring start date: 1 January 2005

Edit Number	6
Baseline/ Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 7 TERM POS

Table 57: Edit 7 TERM POS information

Edit Number	7
Edit Title	Terminal POS Input Capability (1240)
Name	TERM POS
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the card data input capability in Data Element (DE) 22 (Point of Service [POS] Entry Mode) to ensure it corresponds appropriately to the terminal operating environment and card data input mode.

Edit Number	7
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 22, subfield 1 (Terminal Data, Card Data Input Capability) is 1 (No POS terminal used), and DE 22, subfield 7 (Card Data, Input Mode) is not any of these: • 0 (PAN entry mode unknown) • 1 (PAN manual entry; no terminal used) • 7 (Credential on File) • S (PAN entry through electronic commerce) • T (PAN auto-entry through a server [issuer, acquirer, or third party vendor system]) b. DE 22, subfield 1 is 1, and DE 22, subfield 4 (Terminal Operating Environment) is not 0 (No terminal used) c. DE 22, subfield 5 (Cardholder Present Data) is 9 (Unknown; data unavailable) d. DE 22, subfield 6 (Card Present Data) is 9 (Unknown; data unavailable) Monitoring start date: 1 January 2005
Baseline/ Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Clearing System Guide</i>

Edit 8 TRACE_ID

Table 58: Edit 8 TRACE_ID information

Edit Number	8
Edit Title	Trace ID Match
Name	TRACE_ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the Trace ID value in the First Presentment/1240 to ensure it is populated with the same values contained in the related the Authorization Request Response/0110 message.

Edit Number	8
Edit Criteria	Mastercard considers transactions noncompliant when Data Element (DE) 63 (Transaction Life Cycle ID), subfield 2 (Trace ID) does not match the data in DE 63 (Network Data) and DE 15 (Settlement Date) of the authorization response. NOTE: The Trace ID consists of the Network Reference Number (nine positions) followed by the Network Date (four positions–MMDD), followed by two spaces. For each transaction authorized through the network (“online-authorized transactions”), IPM DE 63 subfield 2 (Trace ID) of the First Presentment/1240 message must be populated with the same values contained in the related authorization message. Exclusions: • Transactions where online authorization is not requested or required, such as offline-authorized chip-read transactions, credit (purchase return) transactions, payment transactions, and collection only transactions. Monitoring start date: 1 October 2011
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Clearing System Guide</i>

Edit 9 POST_CD_MATCH

Table 59: Edit 9 POST_CD_MATCH information

Edit Number	9
Edit Title	Postal Code Match
Name	POST_CD_MATCH
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the postal code value present in the First Presentment/1240 message to ensure that it matches the postal code value submitted in the Authorization Request/0100.

Edit Number	9
Edit Criteria	Mastercard considers transactions noncompliant when Data Element (DE) 43 (Acceptor Name and Location), subfield 4 (Acceptor Postal Code) of the First Presentment/1240 message does not match DE 61 (Point-of-Service [POS] Data), subfield 14 (Acceptor Postal Code) of the Authorization/0100 message. NOTE: This edit only monitors face-to-face transactions. Monitoring start date: 1 October 2011
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i>

Edit 10 POS_AUTH

Table 60: Edit 10 POS_AUTH information

Edit Number	10
Edit Title	POS Authorization Values
Name	POS_AUTH
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the data in Data Element (DE) 22 (Point-of-Service [POS] Entry Mode) of the First Presentment/1240 to ensure that it corresponds appropriately to the data in DE 61 (POS Data) of the Authorization Request/0100.

Edit Number	10
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: e. Comparison of Clearing DE 22, subfield 5 (Cardholder Present Data) to Authorization DE 61, subfield 4 (POS Cardholder Presence) • Clearing DE 22, subfield 5 is 0 (Cardholder present) and Authorization DE 61, subfield 4 is not 0 (Cardholder present) • Clearing DE 22, subfield 5 is 1 (Cardholder not present - unspecified) and Authorization DE 61, subfield 4 is not 1 (Cardholder not present-unspecified) • Clearing DE 22, subfield 5 is 2 (Cardholder not present - mail/facsimile transaction) and Authorization DE 61, subfield 4 is not 2 (mail/facsimile order) • Clearing DE 22, subfield 5 is 3 (Cardholder not present - phone order or from Automated Response Unit [ARU]) and Authorization DE 61, subfield 4 is not 3 (Phone/Automated Response Unit [ARU] order). • Clearing DE 22, subfield 5 is 4 (Cardholder not present – standing order/recurring transactions) and Authorization DE 61, subfield 4 is not 4 (Standing order/recurring transactions) • Clearing DE 22, subfield 5 is 5 (Cardholder not present – electronic order: PC, Internet, mobile phone or PDA) and Authorization DE 61, subfield 4 is not 5 (Electronic order) f. Comparison of Clearing DE 22, subfield 6 (Card Present Data) to Authorization DE 61, subfield 5 (POS Card Presence) • Clearing DE 22, subfield 6 is 1 (Card present) and Authorization DE 61, subfield 5 is not 0 (Card present) • Clearing DE 22, subfield 6 is 0 (Card not present) and Authorization DE 61, subfield 5 is not 1 (Card not present)

Edit Number	10
	g. Comparison of Clearing DE 22, subfield 7 (Card Data, Input Mode) to Authorization DE 22 (POS Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) • Clearing DE 22, subfield 7 is 0 (PAN entry mode unknown) and Authorization DE 22, subfield 1 is not 00 (PAN entry mode unknown) • Clearing DE 22, subfield 7 is 1 (PAN manual entry; no terminal used) and Authorization DE 22, subfield 1 is not 01 (PAN manual entry) • Clearing DE 22, subfield 7 is 2 (PAN auto-entry through magnetic stripe: track data is not required within transaction) and Authorization DE 22, subfield 1 is not 02 (PAN auto-entry through magnetic stripe-track data not required) • Clearing DE 22, subfield 7 is 0 (PAN entry mode unknown) and Authorization DE 22, subfield 1 is not 03 (PAN auto-entry through bar code • Clearing DE 22, subfield 7 is 0 (PAN entry mode unknown) and Authorization DE 22, subfield 1 is not 04 (PAN auto-entry through optical character reader • reader) • Clearing DE 22, subfield 7 is C (PAN auto-entry through Chip (Online authorized transaction)) and Authorization DE 22, subfield 1 is not 05 (PAN auto-entry through chip) • Clearing DE 22, subfield 7 is M (PAN auto-entry through contactless M/Chip) and Authorization DE 22, subfield 1 is not 07 (PAN auto-entry through contactless M/Chip) • Clearing DE 22, subfield 7 is 6 (PAN manual entry using a terminal, or through voice transaction after chip card read error or chip fallback transaction failure) and Authorization DE 22, subfield 1 is not 79 (Hybrid terminal with an online connection to the acquirer failed in sending a chip fallback transaction to the issuer) • Clearing DE 22, subfield 7 is R (PAN entry through electronic commerce containing Digital Secure Remote Payment (DSRP) cryptogram within DE 55 (Integrated Circuit Card [ICC]) and Authorization DE 22, subfield 1 is not 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55) • Clearing DE 22, subfield 7 is B (PAN auto-entry through magnetic stripe: track data provided unaltered within transaction [magnetic stripe entry may also be chip fallback transaction]) and Authorization DE 22, subfield 1 is not 80 (Chip card at chip-capable terminal was unable to process transaction using data on the chip; therefore, terminal defaulted to the magnetic stripe-read PAN) • Clearing DE 22, subfield 7 is S (PAN entry through electronic commerce) and Authorization DE 22, subfield 1 is not 81 (PAN/Token entry through electronic commerce with optional Identify Check-AAV or DSRP cryptogram in UCAF) • Clearing DE 22, subfield 7 is T (PAN auto entry through server) and Authorization DE 22, subfield 1 is not 82 (PAN auto-entry through Server) • Clearing DE 22, subfield 7 is B (PAN auto-entry through magnetic stripe: track data provided unaltered within transaction [magnetic stripe entry may also be chip fallback transaction]) and Authorization DE 22, subfield 1 is not 90 (PAN auto-entry through magnetic stripe)

Edit Number	10
	- Clearing DE 22, subfield 7 is A (PAN auto-entry through contactless magnetic stripe: track data provided unaltered within transaction) and Authorization DE 22, subfield 1 is not 91 (PAN auto-entry through contactless magnetic stripe) - Clearing DE 22, subfield 7 is C (PAN auto-entry through Chip (Online authorized transaction) and Authorization DE 22, subfield 1 is not 95 (Visa only. Chip card with unreliable Card Verification Value [CVV] data) - Clearing DE 22, subfield 7 is 7 (Credential on File) and Authorization DE 22, subfield 1 is not 10 (Credential on File)
	Monitoring start date: 1 February 2010
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i> <i>Mastercard Network Processing Dual Message Clearing System Guide</i> <i>AN 1411 - Data Integrity Monitoring Program - New Edits and Updates to Existing Edit</i> <i>AN 2232 - Data Integrity Monitoring Program - Mapping of Authorization and Clearing Values</i>

Edit 11 C_PF_ID

Table 61: Edit 11 C_PF_ID information

Edit Number	11
Edit Title	Clearing Payment Facilitator ID
Name	C_PF_ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Private Data Subelement (PDS) 0208 (Additional Merchant Data) to ensure that when a Payment Facilitator ID is present, a sponsored merchant ID is also present, and that all values submitted in the First Presentment/1240 match the corresponding values in the Authorization Request/0100. This edit also monitors proper formatting of the Payment Facilitator ID and sponsored merchant ID.

Edit Number	11
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. PDS 0208, subfield 1 (Payment Facilitator ID) is present and PDS 0208, subfield 2 (Sponsored Merchant ID) is missing b. PDS 0208, subfield 1 of the First Presentment/1240 does not match Data Element (DE) 48 (Additional Data: Private Use), subelement 37 (Additional Merchant Data), subfield 1 (Payment Facilitator ID) of the Authorization Request/0100 d. PDS 0208, subfield 1 does not contain a valid Payment Facilitator ID NOTE: Subedit c has been removed from this edit. Monitoring start date: 1 May 2015
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.
Reference	- Mastercard Network Processing Dual Message Clearing System Guide - Mastercard Network Processing Dual Message Authorization System Guide

Edit 13 MCC_MATCH

Table 62: Edit 13 MCC_MATCH information

Edit Number	13
Edit Title	Merchant Category Code Match
Name	MCC_MATCH
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors Data Element (DE) 26 (Acceptor Business Code [MCC]) in the clearing message to ensure it matches the MCC in the corresponding authorization request.

Edit Number	13
Edit Criteria	Mastercard identifies transactions monitored under this edit by Clearing First Presentment/1240 MCC. Mastercard considers transactions noncompliant when the value in Clearing First Presentment/1240 DE 26 does not match the value in DE 18 (Merchant Type [MCC]) of the corresponding Authorization Request/0100 record. Exclusions: MCCs between 3000 and 3350, 4112, 4511, 4722, 7800, 7801, 7802, 7995, and 9406 Monitoring start date: 1 January 2018
Baseline/Threshold	Baseline: 5,000 First Presentment/1240 transactions Threshold: 99.85%.

Edit 14 MERCH_DBA_NAME_MATCH

Table 63: Edit 14 MERCH_DBA_NAME_MATCH information

Edit Number	14
Edit Title	Merchant DBA Name Match
Name	MERCH_DBA_NAME_MATCH
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the merchant Doing Business As (DBA) name in the First Presentment/1240 to ensure it matches the DBA name in the corresponding Authorization Request/0100.

Edit Number	14
Edit Criteria	Mastercard considers transactions noncompliant when Data Element (DE) 43 (Acceptor Name and Location), subfield 1 (Acceptor Name) of the First Presentment/1240 and DE 43, subfield 1 of the Authorization Request/0100 are not the same value. Monitoring start date: 1 January 2018
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 16 TERM_INPUT_MATCH

Table 64: Edit 16 TERM_INPUT_MATCH information

Edit Number	16
Edit Title	Terminal Input Capability Indicator Match
Name	TERM_INPUT_MATCH
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the Terminal Input Capability Indicator in the First Presentment/1240 to ensure it matches the Terminal Input Capability Indicator in the corresponding Authorization Request/0100.

Edit Number	16
Edit Criteria	Mastercard considers transactions noncompliant when any of these criteria applies: • Clearing Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (Terminal Data: Card Data Input Capability) is 0 (Input capability unknown or unspecified) and authorization DE 61 (POS Data), subfield 11 (POS Card Data Terminal Input Capability Indicator) is not 0 (Input capability unknown or unspecified) • Clearing DE 22, subfield 1 is 1 (No POS terminal used [for example, voice/ARU authorization or other transactions that originated from a data server]) and authorization DE 61, subfield 11 is not 1 (no terminal used; server) • Clearing DE 22, subfield 1 is 2 (Terminal supports magnetic stripe input only) and authorization DE 61, subfield 11 is not 2 (magnetic stripe input only) • Clearing DE 22, subfield 1 is M (Contactless EMV/Chip [Proximity Chip]) and authorization DE 61, subfield 11 is not 3 (Contactless EMV/Chip) • Clearing DE 22, subfield 1 is A (Contactless Mag Stripe [Proximity Chip]) and authorization DE 61, subfield 11 is not 4 (Contactless Mag Stripe) • Clearing DE 22, subfield 1 is D (Terminal supports EMV contact chip input and magnetic stripe input) and authorization DE 61, subfield 11 is not 5 (Terminal supports EMV contact chip input and magnetic stripe input) • Clearing DE 22, subfield 1 is 6 (Terminal supports key entry input only) and authorization DE 61, subfield 11 is not 6 (Terminal supports key entry input only) • Clearing DE 22, subfield 1 is B (Terminal supports magnetic stripe input and key entry input) and authorization DE 61, subfield 11 is not 7 (Terminal supports magnetic stripe input and key entry input) • Clearing DE 22, subfield 1 is C (Terminal supports EMV contact chip input, magnetic stripe input and key entry input) and authorization DE 61, subfield 11 is not 8 (Terminal supports EMV contact chip input, magnetic stripe input, and key entry input) • Clearing DE 22, subfield 1 is 5 (Terminal supports EMV contact chip input only) and authorization DE 61, subfield 11 is not 9 (Terminal supports EMV contact chip input only) Monitoring start date: 1 January 2018
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: Customers with more than 1,000,000 First Presentment/1240 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer First Presentment/1240 transactions are subject to a threshold of 97%.

Edit 17 AAV_RATE_CLEAR_TRAN

Table 65: Edit 17 AAV_RATE_CLEAR_TRAN information

Edit Number	17
Edit Title	Valid AAV for Authenticated Transactions (1240)
Name	AAV_RATE_CLEAR_TRAN
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the Accountholder Authentication Value (AAV) in transactions that were authenticated through 3DS 1.0 or EMV 3DS to ensure it is valid and corresponds appropriately to the security level indicator (SLI).
Edit Criteria	Mastercard considers transactions noncompliant when Private Data Subelement (PDS) 0052 (Electronic Commerce Security Level Indicator [SLI]) contains a valid SLI (211, 212 or 215), but PDS 0185 (AAV) does not begin with j, k, or h. Monitoring start date: 1 March 2019
Baseline/ Threshold	Baseline: 5,000 3DS transactions Threshold: 90%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 18 DS_TRAN_ID_CLEAR_TRANS

Table 66: Edit 18 DS_TRAN_ID_CLEAR_TRANS information

Edit Number	18
Edit Title	Directory Server Transaction ID (1240)
Name	DS_TRAN_ID_CLEAR_TRANS
Billing Code	2DC0100
Region(s)	Global

Edit Number	18
Description	This edit monitors transactions authenticated through EMV 3-D Secure to ensure that the Directory Server (DS) Transaction ID is present.
Edit Criteria	Mastercard considers transactions noncompliant when all of these are true: • Private Data Subelement (PDS) 0052 (Electronic Commerce Security Level Indicator) is 211, 212, 216, or 217 • PDS 0185 (Accountholder Authentication Value) has a leading indicator of k indicating the transaction was authenticated through EMV 3DS • PDS 0184 (Directory Server Transaction ID) is missing Monitoring start date: 1 September 2019
Baseline/ Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 90%
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 20 Cross Border TC28 Force Post 1240

Table 67: Edit 20 Cross Border TC28 Force Post 1240 information

Edit Number	20
Edit Title	Cross Border TC28 Force Post 1240
Name	Cross Border_TC28_Force Post
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 63 (Transaction Life Cycle ID), subfield 2 (Trace ID) and DE 2 (Primary Account Number [PAN]) to help ensure that when a First Presentment/1240 Cross-Border Payment Transaction is present an authorization request is also present.

Edit Number	20
Edit Criteria	Mastercard considers transactions noncompliant when the First Presentment/1240 Cross-Border Payment Transaction does not have a matching authorization request within the 30 the days before the Clearing record submission. Mastercard identifies a Cross-Border transaction when the DE 43 (Acceptor Name and Location), subfield 6 (Acceptor Country Code) is not equal to the Issuer Country. Mastercard identifies a Payment Transaction when the DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type), is 28. Exclusions: Intra-EEA, United Kingdom and Gibraltar Cross-Border Transactions, Collection Only Transactions, Reversals, and Rebates. Mastercard identifies a rebate when the Private Data Subelement (PDS) 0043 (Program Registration ID), is C02 (Mastercard rebate), and when the acceptor business code (MCC) is 6555 (MA Initiated Rewards/Rebate) in DE 18 (Merchant Type). Monitoring start date: 1 June 2020
Baseline/Threshold	Baseline: 1 First Presentment/1240 Cross-Border Payment Transaction Threshold: Zero (A single First Presentment/1240 Cross Border Payment Force-posted Transaction is considered noncompliant)
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Transaction Processing Rules</i> • <i>AN 4089 Data Integrity Monitoring Program: New Acquirer Edit to Monitor Force Post Cross-Border Payment Transactions</i>

Edit 21 High Risk MCC Mismatch

Table 68: Edit 21 High Risk MCC Mismatch information

Edit Number	21
Edit Title	High Risk MCC Mismatch
Name	High Risk MCC Mismatch
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the Data Element (DE) 26 (Acceptor Business Code [MCC]) in the clearing message to ensure it matches the MCC value in the corresponding authorization request for high risk MCCs.

Edit Number	21
Edit Criteria	Mastercard identifies high risk transactions monitored under this edit by one of these values in the Clearing First Presentment/1240 DE 26: • 7800 Government Owned Lottery (U.S. Region Only) • 7801 Internet Gambling (U.S. Region Only) • 7802 Government Licensed Horse/Dog Racing (U.S. Region Only) • 7995 Gambling Transactions • 9406 Government-owned Lottery (Specific Countries) Mastercard considers transactions noncompliant when the value in the Clearing First Presentment/1240 DE 26 does not match the value in DE 18 (Merchant Type [MCC]) of the corresponding Authorization Request/0100 record. NOTE: This edit is not eligible for extensions. Monitoring start date: 1 March 2021
Baseline/ Threshold	Baseline: 10 high risk transactions Threshold: 1 mismatched transaction
Reference	• <i>Quick Reference Guide</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>AN 4669 Announcing New and Updated Edits for the Data Integrity Monitoring Program</i> • <i>AN 6961 Data Integrity Monitoring Program Update for Card Acceptor Business Code Edits</i>

Edit 22 POI Currency Conversion 1240

Table 69: Edit 22 POI Currency Conversion 1240 information

Edit Number	22
Edit Title	POI Currency Conversion 1240
Name	POI Currency Conversion 1240
Billing Code	2DC0100
Region(s)	Global

Edit Number	22
Description	This edit monitors point-of-interaction (POI) currency conversion (also known as dynamic currency conversion [DCC]) card-present/cardholder-present POS and ATM transactions to ensure that when DCC is applied, it is not applied to accounts that issuers or Mastercard designate as not allowing DCC.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 22, subfield 5 (Cardholder Present Data) is 0 (Cardholder present) • DE 22, subfield 6 (Card Present Data) is 1 (Card present) • Declared DCC: In any occurrence of DE 54, subfield 2 (Additional Amount, Amount Type) is 58 (Amount, POI Amount) Mastercard considers transactions noncompliant when: • the account is within an issuer account range identified in the IPM Member Parameter Extract (MPE) table resource file as prohibiting DCC - Cardholder Currency Indicator field value of: – C (Do not provide POI currency conversion (or DCC) corporate client optout) or – T (Do not provide POI currency conversion (or DCC) according to <i>Mastercard Rules</i> travel cards or multi-currency accounts). Monitoring start date: 1 April 2022
Baseline/Threshold	Baseline: 100 DCC transactions Threshold: 99.5%
Reference	• <i>GCMS Parameter Table Layouts</i> • <i>IPM MPE Table IP0040T1: Issuer Account Range</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Transaction Processing Rules, section 3.8 (POI Currency Conversion)</i> • <i>AN 5913 Data Integrity Monitoring Program: New Edits for Point-of-Interaction Currency Conversion</i>

Edit 24 Merchant Cntry of Origin 1240

Table 70: Edit 24 Merchant Cntry of Origin 1240 information

Edit Number	24
Edit Title	Merchant Country of Origin 1240
Name	Merchant Cntry of Origin 1240
Billing Code	2DC0100

Edit Number	24
Region(s)	Global
Description	This edit monitors government-controlled merchants to help ensure that the acquirer populates the numeric country code of the government entity that owns or controls the merchant in Private Data Subelement (PDS) 0213 (Merchant Country of Origin) in the clearing First Presentment/1240 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 26 (Acceptor Business Code [MCC]) equals: – 9211 (Court costs including alimony and child support) – 9222 (Fines) – 9311 (Tax payments) – 9399 (Government services - not elsewhere classified) – 9402 (Postal services - government only) – 9405 (Intra-government purchases-government only) – 9406 (Government-owned lottery [global, excluding U.S. region]) Mastercard considers transactions noncompliant when: • PDS 0213 is not populated or is not a valid country code. Exclusions: • Reversals NOTE: This edit is not eligible for extensions.
	Monitoring start date: 1 September 2023
Baseline/ Threshold	Baseline: 1 transaction Threshold: 100%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Quick Reference Booklet</i> • <i>AN 8026 Data Integrity Monitoring Program Edits for Merchant Country of Origin Identifier</i>

Edit 25 Purchase Return Trace ID

Table 71: Edit 25 Purchase Return Trace ID information

Edit Number	25
Edit Title	Purchase Return Trace ID

Edit Number	25
Name	Purchase Return Trace ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the Trace ID value in the 1240 Credit (Purchase Return) First Presentment message to ensure that it is populated with the same value contained in the corresponding 0110 Authorization Response message.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type) is 20 (Purchase Return/Refund) Mastercard considers transactions noncompliant when: - DE 63 (Transaction Life Cycle ID), subfield 2 (Trace ID) does not match the data in DE 63 (Network Data) and DE 15 (Settlement Date) of the authorization response Exclusions: - Contactless aggregated transit transaction refunds: Private Data Subelement (PDS) 0210 (Transit Program), subfield 1 (Transit Transaction Type Indicator) is: 03 (Post-Authorized Aggregated) 04 (Authorized Aggregated Split Clearing) 05 (Other) 06 (Post-authorized Aggregated Maestro®). - Transportation and Mastercard defined airline travel transactions; DE 26 (Acceptor Business Code [MCC]) equal to 1221, 4511 or is within the range 3000 to 3350. - Mastercard Initiated Rebate/Reward MCC 6555. - Transactions where online authorization is not requested or required. For example: offline-authorized chip-read transactions, payment transactions, and collection only transactions. - Select Commercial Card Products. Refer to the <i>Transaction Processing Rules</i>, 3.3.1 "Mastercard POS Transaction Authorization Procedures." NOTE: The Trace ID consists of the network reference number followed by the network date. For each transaction authorized by using the network ("online authorized transactions"), IPM DE 63 subfield 2 (Trace ID) of the First Presentment/1240 message must be populated with the same values contained in the related authorization message. Monitoring start date: 1 November 2024 for Asia/Pacific, Latin America and the Caribbean (excluding Brazil), Europe, Middle East/Africa, 1 February 2025 for Brazil, and 1 March 2026 for Canada and the United States.
Baseline/Threshold	Baseline: 5,000 purchase return transactions Threshold: 95%

Edit Number	25
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AP/EUR/LAC/MEA 9302 Data Integrity Monitoring Program Edit for Purchase Return Trace ID</i> • <i>AN 10534 Data Integrity Monitoring Program Edit for Purchase Return Trace ID in Brazil</i> • <i>CAN/US 11558 Data Integrity Monitoring Program Edit for Purchase Return Trace ID in the Canada and United States Regions</i>

Edit 26 Transaction Link ID 1240

Table 72: Edit 26 Transaction Link ID 1240 information

Edit Number	26
Edit Title	Transaction Link ID 1240
Name	Transaction Link ID 1240
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the First Presentment/1240 messages for Transaction Link Identifier (TLID) enablement and ensures that the lifecycle TLID validation action indicator is submitted properly without any validation issues.

Edit Number	26
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - First Presentment/1240 transaction messages Mastercard considers transactions noncompliant when either of these are true: - DE 105 (Multi-Use Transaction Identification Data), subelement 001 (Transaction Link ID [TLID]) is not populated or it does not match the data in DE 105, subelement 001 in the authorization response message Exclusions: - Transactions where online authorization is not requested or required. Refer to the <i>Transaction Processing Rules, 3.3.1 Mastercard POS Transaction Authorization Procedures</i>. - Contactless aggregated transit transaction refunds: Private Data Subelement (PDS) 0210 (Transit Program), subfield 1 (Transit Transaction Type Indicator) is: 03 (Post-Authorized Aggregated) 04 (Authorized Aggregated Split Clearing) 05 (Other) 06 (Post-authorized Aggregated Maestro®) Monitoring start date: 2 June 2026
Baseline/Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: 98%
Reference	<i>Mastercard Network Processing Dual Message Clearing System Guide</i> <i>Mastercard Transaction Linking Implementation Guide</i> <i>Transaction Processing Rules, section 3.3.1</i> <i>GLB 11418 Data Integrity Monitoring Program Edit for Transaction Link Identifier</i>

Edit 27 Acceptor Contact Data 1240

Table 73: Edit 27 Acceptor Contact Data 1240 information

Edit Number	27
Edit Title	Acceptor Contact Data 1240
Name	Acceptor Contact Data 1240
Billing Code	2DC0100
Region(s)	Global

Edit Number	27
Description	This edit monitors First Presentment/1240 messages to ensure that the Acceptor Customer Service Phone Number and Acceptor URL address contains valid values defined and formatted to the specifications in the <i>Mastercard Network Processing Dual Message Clearing System Guide</i> .
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - First Presentment/1240 transaction messages Mastercard considers transactions noncompliant when any of these subedits apply: a. Private Data Subelement (PDS) 0175 (Acceptor URL Address) is not populated and Data Element (DE) 22 (Point of Service [POS] Entry Mode), subfield 7 (Card Data, Input Mode) is equal to: 7 (Credential on File) - R (PAN entry through electronic commerce containing Digital Secure Remote Payment (DSRP) cryptogram within DE 55 [Integrated Circuit Card [ICC]]) - S (PAN entry through electronic commerce) - T (PAN auto-entry through server (issuer, acquirer, or third-party vendor system)) b. PDS 0175 is populated and does not contain a period, or does not contain at least one alphanumeric character before the period and at least two alpha characters after the period, or contains a space or @ character. c. PDS 0170 (Acceptor Inquiry Information), subfield 1 (Acceptor Customer Service Phone Number) is not populated and all of these are true: - PDS 0175 is not populated - DE 22, subfield 7 is not equal to 7, R, S, or T. d. PDS 0170, subfield 1 is populated - DE 43 (Acceptor Name and Location), subfield 6 (Acceptor Country Code) is USA or CAN, and PDS 0170, subfield 1 is not 10 positions with the first three positions being numeric. - PDS 0170, subfield 1 is not between five and fifteen numeric characters (excluding the US and Canada). Monitoring start date: 1 February 2026.
Baseline/ Threshold	Baseline: 20,000 First Presentment/1240 transactions Threshold: 98%
Reference	<i>Mastercard Network Processing Dual Message System Guide</i> <i>GLB 12111 Data Integrity Monitoring Program Edits for Acceptor Contact Data</i>

Chapter 5 Acquirer Clearing Chip Dual Message System Edits (1240)

The edits in this program focus on the chip data and EMV requirements monitored in the 1240/First Presentment message. In the Data Integrity application, the program name appears in its abbreviated form, Acq Clear Chip Dual Msg (1240).

Chapter 6 Acquirer Debit Single Message System Edits (0200)

The edits in this program focus primarily on the data in 0200/Financial Transaction message. Most edits look at Point of Service (POS) transactions only, but ATM transactions can be monitored where specified. In the Data Integrity application, the program name appears in its abbreviated form, Acq Debit Single Msg (0200).

Table 79: Edit 2 D_MAGSTRIPE information

Edit Number	2
Edit Title	Magnetic Stripe (0200)
Name	D_MAGSTRIPE
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors magnetic stripe transactions to ensure that Data Element (DE) 35 (Track 2 Data) and DE 45 (Track 1 Data) are present when necessary and correspond appropriately to the values in various other data elements.

Edit Number	2
Edit Criteria	Mastercard identifies magnetic stripe transactions monitored under this edit by one of these values in DE 22 (Point of Service Entry Mode) subfield 1 (POS Terminal PAN Entry Mode): • 80 (Chip card at chip-capable terminal was unable to process transaction through data on the chip; therefore, the terminal defaulted to the magnetic stripe-read PAN) • 90 (PAN auto-entry through magnetic stripe) • 91 (PAN auto-entry through contactless magnetic stripe) Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 22, subfield 1 is 80, 90, or 91 and neither DE 35 nor DE 45 are present b. DE 22, subfield 1 is 80, 90, or 91 and both DE 35 and DE 45 are both present c. Both of these are true: • DE 22, subfield 1 is one of these: – 00 (Merchant terminal PAN entry mode unknown) – 01 (Merchant terminal PAN manual entry) – 03 (Merchant terminal PAN auto-entry through bar code reader) – 04 (Merchant terminal PAN auto-entry through optical character reader (OCR)) – 79 (Chip card at chip-capable terminal was unable to process transaction through data on the chip; therefore, the terminal defaulted to the magnetic stripe-read PAN. The full track data has been read from the data encoded on the card and transmitted within the Financial Transaction Request/0200 message in DE 45 (Track 1 Data) or DE 35 (Track 2 Data) without alteration or truncation) – 81 (PAN/Token entry through e-commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) • DE 35 or DE 45 is present d. DE 22, subfield 1 is either 80, 90, or 91 and DE 35 or DE 45 is present, and DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is not 0 (Cardholder present) e. DE 22, subfield 1 is either 80, 90, or 91 and DE 35 or DE 45 is present, and DE 61, subfield 5 (POS Card Presence) is 1 (Card not present) f. DE 22, subfield 1 is either 80, 90, or 91 and DE 35 or DE 45 is present and DE 48 (Additional Data), position 1 (Transaction Category Code [TCC]) is T (All Other Non-Face-to-Face Transactions) Monitoring start date: 1 October 2011
Baseline/ Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer transactions are subject to a threshold of 97%.

Edit 4 D_DE42

Table 80: Edit 4 D_DE42 information

Edit Number	4
Edit Title	Debit DE 42
Name	D_DE42
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 42 (Card Acceptor ID) to ensure that they are present and valid.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 42 is the same value as DE 43 (Acceptor Name and Location), subfield 1 (Acceptor Name) b. DE 42 contains spaces c. DE 42 contains a Chain Merchant Name or Franchise Merchant Name NOTE: This edit includes Cirrus transactions along with Mastercard-branded transactions in the monitoring in accordance with AN 6022 Introduction and Standardization of Transaction Data Elements. Monitoring start date: 1 April 2014
Baseline/ Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer transactions are subject to a threshold of 97%.

Edit 5 D_DE43

Table 81: Edit 5 D_DE43 information

Edit Number	5
Edit Title	DE 43 - Acceptor Name and Location (0200)
Name	D_DE43
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors Data Element (DE) 43 (Acceptor Name and Location) to ensure that all necessary values are present and properly formatted.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 43, subfield 1 (Acceptor Name) is all numeric b. DE 43, subfield 1 contains a chain merchant name that is not in the correct format, or DE 48 (Additional Data), subelement 32 (Mastercard Assigned ID) is not present c. DE 61 (Point-of-Service [POS] Data), subfield 13 (POS Country Code [or Sponsored Merchant Information, if applicable]) is 840 (USA) and DE 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 002 (Acceptor Country Subdivision Code) is not a valid U.S. state code d. DE 61, subfield 13 is 124 (CAN) and DE 122, subelement 001, subfield 002 is not a valid Canadian province code e. DE 43, subfield 5 is not a valid three-character alphabetic country code f. DE 61, subfield 13 is blank, or is 000 g. DE 43, subfield 5 is AFG, ALB, ARG, AUT, BEL, BRA, CHE, COL, CZE, FIN, FRA, GBR, GRC, HRV, HUN, IND, ITA, JPN, MYS, NLD, POL, RUS, SGP, SWE, UKR or ZAF and DE 61, subfield 14 contains unknown or is not present or is not in the correct format. Exclusions: DE 18 (Merchant Type [MCCs]) equal to 4511 and between 3000 and 3350 (airline transactions) and 6011 (ATM) Exclusions: All subedits exclude MCC 4784 (Bridge and road fees, tolls) NOTE: This edit includes Cirrus transactions along with Mastercard-branded transactions in the monitoring in accordance with AN 6022 Introduction and Standardization of Transaction Data Elements. Monitoring start date: 1 October 2011, 1 February 2021 for subedit g

Edit Number	5
Baseline/ Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer transactions are subject to a threshold of 97%.

Edit 7 D_TERMPOS

Table 82: Edit 7 D_TERMPOS information

Edit Number	7
Edit Title	Terminal POS Processing Fields (0200)
Name	D_TERMPOS
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 61 (Point-of-Service [POS] Data) to ensure that the terminal processing fields are valid and correspond appropriately to the data in DE 22 (POS Entry Mode).

Edit Number	7
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. DE 61, subfield 1 (POS Terminal Attendance) is 2 (No terminal used [voice/ARU authorization]; server) and DE 61, subfield 3 (POS Terminal Location) is not 3 (No terminal used [voice/ARU authorization]; server) b. DE 61, subfield 3 is 3 and DE 61, subfield 1 is not 2 c. DE 61, subfield 1 is 1 (Unattended Terminal [CAT, home PC, mobile phone, PDA]) and DE 61, subfield 10 (Cardholder-Activated Terminal [CAT] Level) is 0 Exclusions: Recurring payment transactions and DE 18 (Merchant Type [MCCs]: 6011 (ATM), 4111 (Transportation - Suburban and Local Commuter Passenger), 4131 (Bus Lines), and 4784 (Bridge and road fees, tolls) d. DE 61, subfield 11 (POS Card Data Terminal Input Capability) is 1 (No terminal used [voice/ARU authorization]; server) and all of these conditions are true: • DE 61, subfield 1 is not 2 • DE 61, subfield 3 is not 3 • DE 22, subfield 1 (POS Terminal PAN Entry Mode) is not 00 (Merchant Terminal PAN entry mode unknown) or 01 (Merchant terminal PAN manual entry) e. DE 22, subfield 1 is 00 and DE 61, subfield 11 is any of these: • 2 (Terminal supports magnetic stripe input only) • 5 (Terminal supports EMV contact chip input and magnetic stripe input) • 7 (Terminal supports magnetic stripe input and key entry input) • 8 (Terminal supports EMV contact chip input, magnetic stripe input and key entry input) f. DE 61, subfield 11 is 6 (Terminal supports key entry input only) and DE 22, subfield 1 is either of these: • 02 (Merchant terminal PAN auto-entry through magnetic stripe) • 90 (PAN auto-entry through magnetic stripe, the full track data has been read from the data encoded on the card and transmitted within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) without alteration or truncation) • 91 (PAN auto-entry through contactless magnetic stripe, the full track data has been transmitted by the acquirer within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) and forwarded to the issuer without alteration or truncation)

Edit Number	7
	g. DE 61, subfield 5 is 0 and DE 61, subfield 4 (POS Cardholder Presence) is any of these: • 1 (Cardholder not present, unspecified) • 2 (Cardholder not present [mail/facsimile order]) • 3 (Cardholder not present [phone or ARU]) • 4 (Standing order/recurring transactions) • 5 (Cardholder not present [Electronic order]) Exclusions: DE 61, subfield 10 (Cardholder-activated Terminal Level) is 8 (Remote terminal)
	h. All of these are true: • DE 61, subfield 4 is 0 (Cardholder present) • DE 61, subfield 5 is 1 (Card not present) • DE 61, subfield 10 (Cardholder-Activated Terminal Level) is not 7 (Authorized Level 7 CAT: Transponder transaction)
	i. DE 61, subfield 5 is 1 and DE 22, subfield 1 is any of these: • 02 (Merchant terminal PAN auto-entry through magnetic stripe) • 05 (Merchant terminal PAN auto-entry through integrated circuit card) • 80 (Chip card at chip-capable terminal was unable to process transaction through data on the chip; therefore, the terminal defaulted to the magnetic stripe-read PAN) • 90 (PAN auto-entry through magnetic stripe-the full track data has been read from the data encoded on the card and transmitted within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) without alteration or truncation) • 91 (PAN auto-entry through contactless magnetic stripe-the full track data has been transmitted by the acquirer within the authorization request in DE 35 (Track 2 Data) or DE 45 (Track 1 Data) and forwarded to the issuer without alteration or truncation)
	Monitoring start date: 1 October 2011
Baseline/ Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer transactions are subject to a threshold of 97%.

Edit 9 D_PF_ID

Table 83: Edit 9 D_PF_ID information

Edit Number	9
Edit Title	Payment Facilitator ID (0200)
Name	D_PF_ID
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the presence of the Payment Facilitator ID in Data Element (DE) 48 (Additional Data), subelement 37 (Additional Merchant Data) to ensure it is valid and corresponds appropriately with other values in the financial transaction.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. The Payment Facilitator ID is present in DE 48, subelement 37, subfield 1 (Payment Facilitator ID) and the sponsored merchant is not present in DE 48, subelement 37, subfield 3 (Sponsored Merchant ID) c. The value in DE 48 subelement 37, subfield 1 is not a valid Payment Facilitator ID NOTE: Subedit b has been removed from this edit. Monitoring start date: 1 May 2015
Baseline/ Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer transactions are subject to a threshold of 97%.

Edit 16 DSRP Cryptogram Placement_0200

Table 86: Edit 16 DSRP Cryptogram Placement_0200 information

Edit Number	16
Edit Title	DSRP Cryptogram Placement_0200
Name	DSRP Cryptogram Placement_0200
Billing Code	2DC0100
Region(s)	Global

Edit Number	16
Description	This edit monitors the presence of the Digital Secure Remote Payment (DSRP) Cryptogram in Data Element (DE) 104 (Digital Payment Data) subelement 001 (Digital Payment Cryptogram) by the acquirer for MDES and third-party tokenized electronic commerce transactions in Financial Transaction Request/0200 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is any of these: – 10 (Electronic commerce credential on file) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (PAN Auto Entry through Server [issuer, acquirer, or third-party vendor system]) Mastercard considers transactions noncompliant when all of these criteria are met: • DE 104 (Digital Payment Data) subelement 001 (Digital Payment Cryptogram) is not present • DE 48 (Additional Data), subelement 43 (UCAF) is not empty and the value does not have a Mastercard Identity Check AAV (leading indicator Mastercard Identity Check AAV begins with j, h, or k) Monitoring start date: 1 March 2021 and 1 December 2022 for third party tokenized electronic commerce transactions
Baseline/ Threshold	Baseline: 100 DSRP transactions Threshold: 97%
Reference	• <i>Mastercard Network Processing Single Message System Guide</i> • <i>AN 4670 New Data Integrity Monitoring Program Edits for Digital Secure Remote Payment Cryptogram</i>

Edit 18 POI Currency Conversion 0200

Table 87: Edit 18 POI Currency Conversion 0200 information

Edit Number	18
Edit Title	POI Currency Conversion 0200
Name	POI Currency Conversion 0200
Billing Code	2DC0100
Region(s)	Global

Edit Number	18
Description	This edit monitors point-of-interaction (POI) currency conversion (also known as dynamic currency conversion [DCC]) card-present/cardholder-present POS and ATM transactions to ensure that when DCC is applied, it is not applied to accounts that issuers or Mastercard designate as not allowing DCC.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 61 (Point-of-Service [POS] Data), subfield 4 (Cardholder Presence) is 0 (Cardholder present) • DE 61, subfield 5 (POS Card Presence) is 0 (Card present) • Declared DCC: In any occurrence of DE 54, subfield 2 (Additional Amounts, Amount Type) is 58 (POI Amount) Mastercard considers transactions noncompliant when: • the account is within an issuer account range identified in the FIT Optional Addendum Record (FIT1) table resource file as prohibiting DCC - Cardholder Currency Indicator field value of: – C (Do not provide POI currency conversion [or DCC], corporate client opt-out) or – T (Do not provide POI currency conversion [or DCC] according to <i>Mastercard Rules</i>, travel cards or multi-currency accounts). Monitoring start date: 1 April 2022
Baseline/Threshold	Baseline: 100 DCC transactions Threshold: 99.5%

Edit 20 ECOM COF MIT CIT Ind 0200

Table 89: Edit 20 ECOM COF MIT CIT Ind 0200 information

Edit Number	20
Edit Title	Ecommerce COF MIT and CIT Indicator 0200
Name	ECOM COF MIT CIT Ind 0200
Billing Code	2DC0100
Region(s)	Global, excluding Japan
Description	This edit monitors financial detail messages for the presence of a valid Cardholder-Initiated Transaction (CIT) indicator or Merchant-Initiated Transaction (MIT) indicator value in Data Element (DE) 48 (Additional Data), subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant-Initiated Transaction Indicator).

Edit Number	20
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is – 10 (Electronic Commerce Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (PAN Auto Entry through Server (issuer, acquirer, or third-party vendor system)) Mastercard considers transactions noncompliant when any of these subedits are true: a. DE 22, subfield 1 is 10; and DE 48, subelement 42 (Electronic Commerce Indicators), subfield 1 (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is not one of these: • 211 (Mastercard Identity Check transaction. UCAF data contains either an Attempts AAV or a Non-Low Risk AAV for Mastercard Identity Check from Smart Authentication) • 212 (Mastercard Identity Check transaction. UCAF data contains a fully authenticated AAV for Mastercard Identity Check or a Low-Risk AAV for Mastercard Identity Check from Smart Authentication) • 216 (Mastercard Identity Check transaction. Merchant Risk Based Decisioning. This includes European PSD2 Acquirer Exemption transactions) • 217 (Mastercard Identity Check transaction, Merchant Initiated Transactions) • 242 (Authenticated tokenized transaction with DSRP cryptogram. Transaction is not eligible for fraud related chargeback by the issuer) • 246 (Tokenized transaction with DSRP cryptogram) • 247 (Tokenized Merchant Initiated Transaction) and DE 48, subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant Initiated Transaction Indicator) is not one of these: • C101 (Credential-on-file [ad hoc]) • C102 (Standing Order [variable amount/fixed frequency]) • C103 (Subscription [fixed amount/fixed frequency]) • C104 (Installment) • M101 (Unscheduled Credential-on-file) • M102 (Standing Order [variable amount/fixed frequency]) • M103 (Subscription [fixed amount/fixed frequency]) • M104 (Installment) • M205 (Partial Shipment) • M206 (Related/Delayed Charge) • M207 (No-show) • M208 (Resubmission)

Edit Number	20
	b. DE 22, subfield 1 is 10; and DE 48, subelement 42, subfield 1 is 217 or 247; and DE 48, subelement 22, subfield 5 is not M101, M102, M103, M104, M205, M206, M207, or M208 c. DE 22, subfield 1 is 81 or 82; and DE 48, subelement 42, subfield 1 is not 211, 212, 216, 217, 242, 246, or 247; DE 61 (Point-of-Service [POS] Data), subfield 4 (POS Cardholder Presence) is 4 (Standing order/recurring transactions); and DE 48, subelement 22, subfield 5 is not C101, C102, C103, C104, M205, M206, M207, or M208 d. DE 22, subfield 1 is 81 or 82; and DE 48, subelement 42, subfield 1 is 217 or 247; and DE 48 subelement 22, subfield 5 is not M205, M206, M207, or M208 Exclusions: • DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) • DE 18 (Merchant Type [MCC]): – 4829 (Money Transfer) – 6538 (Funding Transactions for MoneySend) – 6540 (Funding Transactions) • China, India, and Mexico domestic transactions Monitoring start date: 1 June 2023
Baseline/Threshold	Baseline: 1,000 purchase, COF, ECOM transactions Threshold: 97%

Edit 23 MPG ID 0200

Table 92: Edit 23 MPG ID 0200 information

Edit Number	23
Edit Title	Merchant Payment Gateway ID 0200
Name	MPG ID 0200
Billing Code	2DC0100
Region(s)	Global, excluding Jordan, Nigeria, and Pakistan
Description	This edit monitors the presence of the Merchant Payment Gateway ID in Data Element (DE) 48 (Additional Data), subelement 37 (Additional Merchant Data), subfield 5 (Merchant Payment Gateway ID) to ensure it is populated and valid in e-commerce Financial Transaction Request/0200 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal Primary Account Number [PAN] Entry Mode) is any of these: 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55 (Integrated Circuit Card [ICC] System-Related Data)) 10 (Electronic Commerce Credential on File) 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) Mastercard considers transactions noncompliant when: - DE 48, subelement 37, subfield 5 is not populated or is not a valid MPG ID Exclusions: - DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 28 (Payment Transaction) and DE 48, subelement 77 (Transaction Type Identifier) is C67 (Merchant Presented QR) or C68 (Merchant Presented QR Refund) - DE 18 (Merchant Type [MCC]) is 6011 (ATM) - DE 61 (POS Data), subfield 4 (POS Cardholder Presence) is either of these: 2 (Cardholder not present [mail/facsimile order]) 3 (Cardholder not present [phone or Automated Response Unit (ARU)]) Monitoring start date: 1 May 2024
Baseline/Threshold	Baseline: 10,000 ECOM transactions Threshold: - Effective 1 May 2024: 50% - Effective 1 April 2026: 70% - Effective 1 April 2027: 90%

Edit 24 Invalid City 0200

Table 93: Edit 24 Invalid City 0200 information

Edit Number	24
Edit Title	Invalid City/Postal Code 0200
Name	Invalid City 0200
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 43 (Acceptor Name and Location) of financial transactions to ensure the city name is valid and corresponds appropriately to the provided postal code.
Edit Criteria	Mastercard considers financial transactions noncompliant when either of these subedits apply. a. Globally, DE 43, subfield 3 (Acceptor City Name) contains invalid character sets for the specified country code. b. Canada, Germany, Australia, and the U.S., DE 61 (Point-of-Service [POS] Data), subfield 14 (Acceptor Postal Code) is invalid for the city populated in DE 43, subfield 3. Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls). Monitoring start date: 1 October 2024
Baseline/Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 financial transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer financial transactions are subject to a threshold of 97%

Edit Number	24
Reference	• <i>Mastercard Network Processing Single Message System Guide</i> • <i>AN 9987 Data Integrity Monitoring Program Edits for Standardization of Transaction Data Elements</i>

Edit 25 Invalid Street 0200

Table 94: Edit 25 Invalid Street 0200 information

Edit Number	25
Edit Title	Invalid Street Address 0200
Name	Invalid Street 0200
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the street address values in Data Element (DE) 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 001 (Acceptor Street Address) of financial transactions to ensure they are valid and properly formatted.

Edit Number	25
Edit Criteria	Mastercard considers financial transactions noncompliant when either of these subedits apply. a. In Australia, Brazil, Canada, China, France, Germany, India, Italy, Japan, Mexico, Poland, Russian Federation, Spain, United Kingdom, and United States only, a financial transaction is submitted and any of these are true: • DE 122, subelement 001, subfield 001 is null or all spaces • DE 122, subelement 001, subfield 001 contains unknown value • DE 122, subelement 001, subfield 001 is all numeric • DE 122, subelement 001, subfield 001 is fewer than three characters in length • In the U.S. only, DE 122 subelement 001 subfield 001 is missing the street number or street name. Exception: A value of RR is permitted in the Canada and United States regions. b. Globally, a financial transaction is submitted and DE 43 (Acceptor Name and Location), subfield 1 (Acceptor Name) matches DE 122, subelement 001, subfield 001. (Spaces, character case and special characters are removed prior to matching) Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) and MCCs between 3000 and 3350 and 4511 (airline transactions) Monitoring start date: 1 October 2024
Baseline/Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 financial transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer financial transactions are subject to a threshold of 97%.

Edit 26 Acceptor ID 0200

Table 95: Edit 26 Acceptor ID 0200 information

Edit Number	26
Edit Title	Acceptor ID 0200
Name	Acceptor ID 0200

Edit Number	26
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 42 (Acceptor ID) of face-to-face financial transactions to ensure that each Acceptor ID has a unique address.
Edit Criteria	Mastercard considers financial transactions noncompliant when the same Acceptor ID value found in DE 42 appears in multiple financial transactions but these values are not consistent: • DE 122 (Additional Record Data), subelement 001 (Additional Acceptor Data), subfield 001 (Acceptor Street Address) • DE 43 (Acceptor Name and Location), subfield 3 (Acceptor City) • DE 122, subelement 001, subfield 002 (Acceptor Country Subdivision Code) • DE 61 (Point-of-Service [POS] Data), subfield 14 (Acceptor Postal Code) NOTE: This edit only applies to face-to-face transactions. Exclusions: Transactions with DE 48 (Additional Data), subelement 37 (Additional Merchant Data), subfield 1 (Payment Facilitator ID) populated Monitoring start date: 1 October 2024
Baseline/Threshold	Baseline: 20,000 financial transactions Threshold: Customers with more than 1,000,000 financial transactions are subject to a threshold of 98%. Customers with 1,000,000 or fewer financial transactions are subject to a threshold of 97%.

Edit 27 ECOM COF CIT Ind 0200

Table 96: Edit 27 ECOM COF CIT Ind 0200 information

Edit Number	27
Edit Title	Ecommerce COF CIT Indicator 0200
Name	ECOM COF CIT Ind 0200
Billing Code	2DC0100

Edit Number	27
Region(s)	Global, excluding Japan
Description	This edit monitors financial transaction messages for the presence of a Cardholder-Initiated Transaction (CIT) indicator and Electronic Commerce Security Level Indicator (SLI) combination to ensure that the acquirer is not populating a Merchant-Initiated Transaction (MIT) indicator value in Data Element (DE) 48 (Additional Data: Private Use), subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant Initiated Transaction Indicator).

Edit Number	27
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria. • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 00 (Purchase) • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is – 10 (Credential on File) – 81 (PAN/Token entry via electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) – 82 (PAN Auto Entry via Server (issuer, acquirer, or third-party vendor system)) • DE 48, subelement 42 (Electronic Commerce Indicators), subfield 1, (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is one of these: – 211 (Mastercard Identity Check transaction. UCAF data contains either an Attempts AAV or a Non-Low Risk AAV for Mastercard Identity Check from Smart Authentication) – 212 (Mastercard Identity Check transaction. UCAF data contains a fully authenticated AAV for Mastercard Identity Check or a Low-Risk AAV for Mastercard Identity Check from Smart Authentication) – 216 (Mastercard Identity Check transaction. Merchant Risk Based Decisioning. This includes European PSD2 Acquirer Exemption transactions) – 242 (Authenticated tokenized transaction with DSRP cryptogram. Transaction is not eligible for fraud related chargeback by the issuer) – 246 (Tokenized transaction with DSRP cryptogram) Mastercard considers transactions to be noncompliant when any of these subedits are true a. DE 22, subfield 1 is 10; and DE 48, subelement 22 (Multi-purpose Merchant Indicator), subfield 5 (Cardholder/Merchant Initiated Transaction Indicator) is not one of these: • C101 (Credential-on-file [ad hoc]) • C102 (Standing Order [variable amount/fixed frequency]) • C103 (Subscription [fixed amount/fixed frequency]) • C104 (Installment) b. DE 22, subfield 1 is 81 or 82; and DE 61 (Point-of-Service [POS] Data), subfield 4 (POS Cardholder Presence) is 4 (Standing order/recurring transactions); and DE 48, subelement 22, subfield 5 is not C101, C102, C103, C104 Exclusions: • DE 61, subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) • DE 18 (Merchant Type): – MCC 4829 (Money Transfer) – MCC 6538 (Funding Transactions for MoneySend) – MCC 6540 (Funding Transactions) • China, India, and Mexico domestic transactions

Edit Number	27
	Monitoring start date: 1 September 2025
Baseline/ Threshold	Baseline: 1,000 purchase, COF, ECOM transactions Threshold: 97%

Chip testing requirement

Before sending and receiving chip transactions, every customer is required to test with Mastercard through a chip implementation project.

Once the chip implementation project is successfully completed, Customer Implementation Services activates the customer's chip testing status flag to correspond to the profile that was implemented.

Data Integrity monitors specific fields to validate the status of the codes and ensure they remain accurately aligned with the chip implementation plan.

Edit 1 DC_Missing_DE35

Table 98: Edit 1 DC_Missing_DE35 information

Edit Number	1
Edit Title	Missing DE35 (0200)
Name	DC_Missing_DE35
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors single message chip transactions to ensure that the Track 2 data is populated.

Edit Number	1
Edit Criteria	Mastercard identifies chip transactions monitored under this edit by one of these values in Data Element (DE) 22 (Point of Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode): • 05 (Merchant terminal PAN auto-entry through integrated circuit card) • 07 (Merchant terminal PAN auto-entry through contactless M/Chip) Mastercard considers transactions noncompliant when DE 35 (Track 2 Data) is missing. Monitoring start date: 1 December 2014
Baseline/Threshold	Baseline: 20,000 chip transactions Threshold: 99.7%

Edit 11 DC_INV_EMVTAGS_DE55

Table 106: Edit 11 DC_INV_EMVTAGS_DE55 information

Edit Number	11
Edit Title	Invalid EMV Tags (0200)
Name	DC_INV_EMVTAGS_DE55
Billing Code	2DC0100
Regoin(s)	Global
Description	This edit monitors single message chip transactions to determine if any EMV tag data present in Data Element (DE) 55 (Integrated Circuit Card [ICC] System-Related Data) is invalid.

Edit Number	11
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. Tag 9F27 (Cryptogram Information Data) is not any of these: • 0x • 4x • 8x b. Tag 5F2A (Transaction Currency Code) does not contain a valid currency code c. Tag 9F1A (Terminal Country Code) does not contain a valid country code d. Tag 9A (Transaction Date) is not a valid date or is not submitted in the correct format (YYMMDD) e. Any bit designated as Reserved for Future Use (RFU) in Tag 95 (Terminal Verification Results [TVR]) is not set correctly Monitoring start date: 1 October 2016
Baseline/ Threshold	Baseline: 20,000 chip transactions Threshold: 99.7%
Reference	• <i>M/Chip Requirements for Contact and Contactless</i> • <i>Mastercard Network Processing Single Message System Guide</i> • <i>AN 2301 - Data Integrity Monitoring Program -Updated Threshold on Chip Edits</i> • <i>AN 10677 Data Integrity Monitoring Program Threshold Update for Chip Edits</i>

Edit 12 Contactless CVM Limits 0200

Table 107: Edit 12 Contactless CVM Limits 0200 information

Edit Number	12
Edit Title	Contactless Cardholder Verification Method Limits 0200
Name	Contactless CVM Limits 0200
Billing Code	2DC0100
Regoin(s)	Asia/Pacific, Latin America and the Caribbean, and select countries in Middle East/ Africa (Angola, Bahrain, Botswana, Egypt, Eswatini (formerly Swaziland), Ghana, Jordan, Kenya, Kuwait, Lebanon, Lesotho, Malawi, Mauritius, Morocco, Mozambique, Namibia, Nigeria, Oman, Qatar, Saudi Arabia, Seychelles, South Africa, Tanzania, Uganda, United Arab Emirates, and Zambia)

Edit Number	12
Description	This edit monitors merchant terminals to ensure that they are accurately setting the CVM limits to Mastercard published values.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Data Element (DE) 22 (Point of Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 07 (Merchant terminal PAN auto-entry through contactless M/Chip) • DE 55 (Integrated Circuit Card [ICC] System-Related Data) tag value 9F1A (Terminal Country Code) • DE 49 (Currency Code, Transaction) and DE 55 tag value 9F1A is a valid currency and country code combination published on the Mastercard CVM and Transit Limit Amounts spreadsheet. Mastercard considers transactions noncompliant when either of these subedits are true: a. Transaction amount in DE 4 (Amount, Transaction) is less than or equal to the CVM limit for each country, and DE 55 is present and tag 9F34 (Cardholder Verification Method [CVM] Results) values do not start with 00011111 or 00111111; or b. Transaction amount in DE 4 (or DE 54, subfield 5 for DCC) is greater than the CVM limit for each country, and DE 55 is present and tag 9F34 values start with 00011111 or 00111111 The compliance rating percentage is not exclusive according to subedit (a or b) and if customer fails a or b on a transaction, it is counted as a failure and adds up against total failures. NOTE: DCC is determined when DE 54 (Additional Amounts), subfield 2 (Account Type) is 58 (POI Amount (also known as Dynamic Currency Conversion [DCC])) Exclusions: • DE 3 (Processing Code), Subfield 1 (Cardholder Transaction Type Code) is 09 (Purchase with Cash Back) • DE 18 (Merchant Type [MCC]) is 4784, 4829, 5542, 6010, 6011, 6050, 6051, 6540, 7802, 7995, and 9405 • DE 61 (Point-of-Service [POS] Data), subfield 7 (POS Transaction Status) is 8 (Account Status Inquiry Service [ASI]) • DE 61, subfield 10 (Cardholder-activated Terminal Level) is 8 (Remote terminal) Monitoring start date: 1 April 2022
Baseline/ Threshold	Baseline: 1,000 contactless POS transactions Threshold: 90%

Chapter 8 Acquirer Chargeback Monitoring Program

The edits in this program evaluate transactions in support of the Acquirer Chargeback Monitoring Program (ACMP). This is to encourage each acquirer to closely monitor, on an ongoing basis, its fraud and chargeback compliance at the merchant level and to promptly determine when a Mastercard merchant has exceeded or is likely to exceed monthly thresholds.

About edits

The Acquirer Chargeback Monitoring Program includes two edits: Excessive Fraud Merchant and Excessive Chargeback Merchant (also known as the Excessive Chargeback Program [ECP]).

Detailed information about the ECP can be found in section 8.3 of the *Security Rules and Procedures* manual. Once a merchant ID reaches month 12 of being identified under either Edit 1 Excessive Fraud Merchant or Edit 2 Excessive Chargeback Merchant, and is identified under both in the same month, the higher assessment amount (whether for Edit 1 or Edit 2) takes priority for billing purposes.

Edit 1 Excessive Fraud Merchant

Table 108: Edit 1 Excessive Fraud Merchant information

Edit Number	1
Edit Title	Excessive Fraud Merchant
Name	Excessive Fraud Merchant
Billing Code	2DC0400
Region(s)	Global
Description	This edit monitors the total amount of fraud occurring at a given e-commerce merchant as well as the number of transactions authenticated through EMV 3-D Secure (3DS) or Digital Secure Remote Payment (DSRP).

Edit Number	1
Edit Criteria	Mastercard considers merchants noncompliant when all of these conditions are met in a given month: 1. The total dollar amount (or local currency equivalent) of fraud-related chargebacks is greater than or equal to EUR/USD 50,000 (USD 15,000 for Australia) 2. The total number of fraud chargeback basis points (BPS) is greater than or equal to 50 (20 for Australia) 3. The percentage of monthly clearing volume processed using 3DS (including Identity Check Insights [IDCI] transactions) or DSRP is less than 10 percent in nonregulated countries, or less than 50 percent in regulated countries NOTE: Monthly fraud-related chargebacks are defined as those first presentment chargebacks processed within a calendar month under the 4837 (No cardholder authorization) message reason code. 3DS transactions are identified in clearing in Private Data Subelement (PDS) 0052 (Security Level Indicators) with a value of 211, 212, 214, 216, or 217. DSRP transactions are identified in clearing in PDS 0052 with a value of 242 (Issuer Fully Authenticated) or 246 (Merchant Risk Based Decisioning). IDCI (previously called Data Only) refers to non-3DS transactions in which Mastercard performs risk scoring and injects Digital Transaction Insights to the authorization request message. The term non-regulated refers to those countries without a legal or regulatory requirement for strong cardholder authentication. The term regulated refers to those countries with a legal or regulatory requirement for strong cardholder authentication. Refer to the <i>Acquirer Chargeback Monitoring Program Regulated/Non-regulated Countries</i> tables for full list. Exclusions: This program does not apply to merchants in Germany, India, Liechtenstein, Saint Helena, Ascension and Tristan Da Cunha and Switzerland. Country exclusions effective 1 January 2023: This program does not apply to merchants in Aland Islands, Albania, Andorra, Antarctica, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Falkland Islands (Malvinas), Faroe Islands, Finland, France, French Guiana, Gibraltar, Greece, Greenland, Guadeloupe, Guernsey, Hungary, Iceland, Ireland, Isle of Man, Italy, Jersey, Kosovo, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Martinique, Mayotte, Moldova, Monaco, Montenegro, Netherlands (the), Norway, Poland, Portugal, Réunion, Romania, Saint Barthélemy, Saint Helena, Ascension and Tristan da Cunha, Saint Martin (French part), San Marino, Serbia, Slovakia, Slovenia, South Georgia and the South Sandwich Islands, Spain, Svalbard and Jan Mayen, Sweden, Ukraine, United Kingdom and Vatican City Monitoring start date: 1 October 2019, 1 May 2022 for Australia updates
Baseline/Threshold	Baseline: 1,000 e-commerce transactions (by MID) in Clearing Threshold: By MID (see edit description)

Edit Number	1
Reference	• <i>Chargeback Guide</i> • <i>AN 2530-U.S. Assurance Framework</i> • <i>AN 2819-Canada Assurance Framework</i> • <i>AN 2852 Revised Standards-Excessive Fraud Merchant Compliance Program</i> • <i>AN 2968 Revised Standards - Data Integrity Monitoring Program - Introducing the Acquiring Chargeback Program</i> • <i>AN 5879 Data Integrity Monitoring Program, Update to the Excessive Fraud Merchant Edit in Australia</i>

The acquirer may be subject to these assessments if noncompliant.

Table 109: EFM assessment structure

Number of months above EFM thresholds	EFM violation assessment amount
	Violation assessment
1	EUR/USD 0
2	EUR/USD 500
3	EUR/USD 1,000
4 to 6	EUR/USD 5,000
7 to 11	EUR/USD 25,000
12 to 18	EUR/USD 50,000
19+	EUR/USD 100,000

Edit 2 Excessive Chargeback Merchant

Table 110: Edit 2 Excessive Chargeback Merchant information

Edit Number	2
Edit Title	Excessive Chargeback Merchant
Name	Excessive Chargeback Merchant
Billing Code	2DC0401 and 2DC0402
Region(s)	Global

Edit Number	2
Description	This edit monitors chargeback compliance at the merchant ID (MID) level to determine if a merchant has exceeded monthly chargeback thresholds.
Edit Criteria	Mastercard evaluates merchants under two categories, Excessive Chargeback Merchant (ECM) and High ECM (HECM). Mastercard considers merchants noncompliant in the ECM category when both of these are true: • The total number of chargebacks is greater than or equal to 100 • The total number of chargeback basis points (BPS) is greater than or equal to 150 Mastercard considers merchants noncompliant in the High ECM category when both of these are true: • The total number of chargebacks is greater than or equal to 300 • The total number of BPS is greater than or equal to 300 A merchant identified as noncompliant for Edit 1 - Excessive Fraud Merchant will not be assessed for Edit 2 - Excessive Chargeback Merchant. Once a merchant ID is identified in the ECM edit, the merchant ID will continue to be monitored until there are three consecutive months below the ECM thresholds, at which time the ECM status resets. Mastercard defines monthly chargebacks as all first presentment chargebacks with a processed date within the violation month. BPS are the number of chargebacks received by the acquirer for a merchant ID in a calendar month divided by the number of Mastercard transactions processed for the merchant ID in the preceding month, and then multiplied by 10,000. Monitoring start date: 1 October 2019, 1 March 2022 for additional baseline of 25 or more cleared transactions.
Baseline/ Threshold	Baseline: 1 chargeback and 25 or more cleared transactions for each MID Threshold: By MID (see edit description)
Reference	• <i>Mastercard Network Processing Single Message System Guide</i> • <i>AN 2968 Revised Standards - Data Integrity Monitoring Program - Introducing the Acquiring Chargeback Program</i> • <i>AN 5588 Revised Standards for the Acquirer Chargeback Monitoring Program</i>

Table 111: ECP assessment structure

Number of months above ECP thresholds	ECM violation assessment amount (100–299 chargebacks and–299 BPS)	HECM violation assessment amount (> 300 chargebacks and > 300 BPS)	
	Violation assessment	Violation assessment	Issuer recovery assessment
1	EUR/USD 0	EUR/USD 0	No
2	EUR/USD 1,000	EUR/USD 1,000	No
3	EUR/USD 1,000	EUR/USD 2,000	No
4 to 6	EUR/USD 5,000	EUR/USD 10,000	Yes ³
7 to 11	EUR/USD 25,000	EUR/USD 50,000	Yes ³
12 to 18	EUR/USD 50,000	EUR/USD 100,000	Yes ³
19+	EUR/USD 100,000	EUR/USD 200,000	Yes ³
A merchant's status in the Acquirer Chargeback Monitoring Program does not reset as compliant, until the Merchant ID has achieved three consecutive months below the program thresholds.			

Table 112: Example of ECM/HECM status reset

Month	ECP status	Assessment amount
January	ECM (month 1)	0
February	No Violation	0
March	ECM (month 2)	EUR/USD 1,000
April	HECM (month 3)	EUR/USD 2,000
May	No Violation	0
June	No Violation	0
July	No Violation - Audit Closed	0

³ Issuer recovery assessment applies at EUR/USD 5 for each chargeback over 300 chargebacks. For example, a merchant with 500 chargebacks would be assessed EUR/USD 1,000 in issuer recovery (500-300 = 200 x EUR/USD 5 = EUR/USD 1,000)

Acquirer Chargeback Monitoring Program regulated/non-regulated countries

The tables in this section list the countries identified as regulated or non-regulated.

Asia/Pacific region

The countries in this table are regulated countries.

Table 113: Regulated countries

Bangladesh	Malaysia	Singapore
------------	----------	-----------

The countries in this table are non-regulated countries.

Table 114: Non-regulated countries

American Samoa	Korea, Republic of	Philippines
Australia	Lao People's Democratic Republic	Pitcairn
Bhutan	Macao	Samoa
Brunei Darussalam	Maldives	Solomon Islands
Cambodia	Marshall Islands	Sri Lanka
China	Micronesia, Federated States of	Taiwan
Christmas Island	Mongolia	Thailand
Cocos (Keeling Islands)	Myanmar	Timor-Leste
Cook Islands	Nauru	Tokelau
Fiji	Nepal	Tonga
French Polynesia	New Caledonia	Tuvalu
Guam	New Zealand	U.S. Minor Outlying Islands
Heard and McDonald Islands	Niue	Vanuatu
Hong Kong	Norfolk Island	Viet Nam
Indonesia	Northern Mariana Islands	Wallis and Futuna
Japan	Palau	
Kiribati	Papua New Guinea	

Canada region

Canada is a non-regulated country.

Europe region

The countries in this table are regulated countries.

Table 115: Regulated countries

Austria	Gibraltar	Netherlands
Belgium	Greece	Norway
Bulgaria	Hungary	Poland
Croatia	Iceland	Portugal
Cyprus	Ireland	Romania
Czech Republic	Italy	Slovakia
Denmark	Latvia	Slovenia
Estonia	Lithuania	Spain
Finland	Luxembourg	Sweden
France	Malta	United Kingdom

The countries in this table are non-regulated countries.

Table 116: Non-regulated countries

Albania	Israel	Serbia
Andorra	Kazakhstan	Tajikistan
Armenia	Kosovo	Türkiye
Azerbaijan	Kyrgyzstan	Turkmenistan
Belarus	Macedonia	Ukraine
Bosnia and Herzegovina	Moldova	Uzbekistan
Channel Islands	Montenegro	Vatican City
Georgia	Russian Federation	
Isle of Man	San Marino	

Latin America and the Caribbean region

All countries in the Latin America and the Caribbean Region are non-regulated countries.

Middle East/Africa region

Nigeria is a regulated country.

The countries in this table are non-regulated countries.

Table 117: Non-regulated countries

Afghanistan	French Southern Territories	Pakistan
Algeria	Gabon	Palestine
Angola	Gambia	Qatar
Bahrain	Ghana	Reunion
Benin	Guinea	Rwanda
Botswana	Guinea-Bissau	Sao Tome and Principe
Bouvet Island	Iraq	Saudi Arabia
British Indian Ocean Territory	Jordan	Senegal
Burkina Faso	Kenya	Seychelles
Burundi	Kuwait	Sierra Leone
Cameroon	Lebanon	Somalia
Cape Verde	Lesotho	South Africa
Central African Republic	Liberia	South Sudan
Chad	Libyan Arab Jamahiriya	Syrian Arab Republic
Comoros	Madagascar	Tanzania
Congo	Malawi	Togo
Cote D'Ivoire	Mali	Tunisia
Democratic Republic of Congo	Mauritania	Uganda
Djibouti	Mauritius	United Arab Emirates
Egypt	Morocco	Western Sahara
Equatorial Guinea	Mozambique	Yemen
Eswatini (formerly Swaziland)	Namibia	Zambia
Eritrea	Niger	Zimbabwe

Ethiopia	Oman
----------	------

United States region

The United States is a non-regulated country.

Chapter 9 Issuer Authorization Dual Message System Edits (0110)

The edits in this program focus on the data and product requirements monitored in the 0110/ Authorization Response message. In the Data Integrity application, the program name appears in its abbreviated form, Iss Auth Dual Msg (0110).

Table 118: Edit 4 EMV_ARPC_0110 information

Edit Number	4
Edit Title	ARPC Presence (0110)
Name	EMV_ARPC_0110
Billing Code	2DC0100
Region(s)	Global

Edit Number	4
Description	The edit monitors Data Element (DE) 55 (Integrated Circuit Card [ICC] System-Related Data) to ensure the Authorization Response Cryptogram (ARPC) value is present in approved chip transactions.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (Merchant terminal PAN auto-entry through integrated circuit card) • DE 39 (Response code) is one of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 87 (Purchase Amount Only, No Cash Back Allowed) • DE 55 is present in the originating 0100/Authorization Request with all mandatory tags Mastercard considers transactions noncompliant when the ARPC value is missing from DE 55, subelement 91 (Issuer Authentication Data) Exclusions: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 20 (Purchase Return/Refund) • Transactions originated from Mastercard Stand-In NOTE: This edit is not eligible for extensions. Monitoring start date: 1 April 2015
Baseline/ Threshold	Baseline: 500 chip transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>M/Chip Requirements for Contact and Contactless</i>

Edit 15 ISS_OFFLINE_CAM_0110

Table 119: Edit 15 ISS_OFFLINE_CAM_0110 information

Edit Number	15
Edit Title	Issuer Offline CAM (0110)
Name	ISS_OFFLINE_CAM_0110
Billing Code	2DC0100

Edit Number	15
Region(s)	Global
Description	This edit monitors the offline Cardholder Authentication Method (CAM) supported on offline CAM-capable cards to ensure that customers migrate from Static Data Authentication (SDA) and Dynamic Data Authentication (DDA) to Combined Data Authentication (CDA).
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Card is capable of offline authentication • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (Merchant terminal PAN auto-entry through integrated circuit card) • DE 39 (Response code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 85 (Not Declined) – 87 (Purchase Amount Only, No Cash Back Allowed) Mastercard considers issuers non-compliant when less than the current annual threshold percent of eligible transactions show that CDA is supported in DE 55, subelement 82 (Application Interchange Profile [AIP]) (Byte 1, bit 1). Monitoring start date: 1 January 2017
Baseline/Threshold	Baseline: 500 offline CAM-capable card chip transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>M/Chip Requirements for Contact and Contactless</i> • <i>AN 2871 - Updates to EMV Offline CAM Requirements and Associated Data Integrity Edits</i> • <i>AN 7692 Data Integrity Monitoring Program Threshold Updates for Issuer Offline Card Authentication Method Edits</i>

Edit 18 Fallback Decline Rate 0110

Table 120: Edit 18 Fallback Decline Rate 0110 information

Edit Number	18
Edit Title	Issuer Fallback Decline Rate (0110)
Name	Fallback Decline Rate 0110

Edit Number	18
Billing Code	2DC0100
Region(s)	Canada Europe Latin America and the Caribbean Middle East/Africa
Description	This edit monitors transactions submitted as technical fallback to ensure issuers are declining them.
Edit Criteria	Mastercard considers transactions noncompliant when both of these are true: • Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 80 (Chip card at chip-capable terminal was unable to process transaction using data on the chip) • DE 39 (Response Code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 87 (Purchase Amount Only, No Cash Back Allowed) Exclusions: • DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) equal to 20 (Purchase Return/Refund) • DE 18 (Merchant Type [MCCs]) 4784 (Bridge and road fees, tolls) and 7523 (Automobile parking lots and garages) • Product code MPV • Transactions taking place at merchant locations in the United States and Asia/Pacific. Monitoring start date: 1 December 2018
Baseline/ Threshold	Baseline: 50 fallback transactions Threshold: 97%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>M/Chip Requirements for Contact and Contactless</i> • <i>Transaction Processing Rules</i> • <i>AN 2237-Data Integrity Monitoring Program-New Edits to Monitor Issuer Fallback Transaction Approvals</i>

Edit 19 Issuer COF Monitoring (0110)

Table 121: Edit 19 Issuer COF Monitoring (0110) information

Edit Number	19
Edit Title	Credential on File (COF) Approval Rate
Name	Issuer COF Monitoring (0110)
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the monthly approval rate of COF transactions.
Edit Criteria	Mastercard identifies transactions monitored under this edit by a value of 10 (Electronic Commerce Credential on File) in Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode). Mastercard considers issuers noncompliant when they have 50 or more COF transactions in a given month, and 100 percent of those transactions are declined with a value of 05 (Do not honor) or 30 (Format Error) in DE 39 (Response Code). Monitoring start date: 1 January 2019
Baseline/ Threshold	Baseline: 50 COF transactions Threshold: Greater than 0%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>AN 2288 Data Integrity Monitoring Program New Edits to Monitor Use and Acceptance of Credential-On-File Indicator</i>

Edit 20 ABU Penetration Rate

Table 122: Edit 20 ABU Penetration Rate information

Edit Number	20
Edit Title	ABU Penetration Rate
Name	ABU Penetration Rate
Billing Code	2DC0100

Edit Number	20
Region(s)	Asia/Pacific (excluding China, India, and Taiwan), Middle East/Africa, United States, Puerto Rico and Virgin Islands, U.S.
Description	This edit monitors the account range cardholder penetration rate of the Automatic Billing Updater (ABU).
Edit Criteria	Mastercard determines the cardholder penetration rate by the total number of unique primary account numbers (PANs) registered for ABU within a given account range and the number of unique PANs active on the Mastercard Network in the last 12 months. Mastercard considers an ICA number noncompliant when any account range under that ICA number does not maintain a cardholder penetration rate of 95 percent. Exclusions: Refer to Rule 5.7, "Use of Automatic Billing Updater," in the <i>Transaction Processing Rules</i>. NOTE: Assessments for this edit is applied at the parent ICA number level. A parent ICA number is assessed according to the standard Data Integrity assessment structure as long as any ICA number in the family has at least one noncompliant account range. A parent ICA number is not assessed more than one time for each month, even if multiple child ICA numbers are considered noncompliant. Monitoring start date: 1 October 2019 for United States, 1 January 2020 for Asia/Pacific, 1 April 2020 for Middle East/Africa, and 1 December 2021 for Puerto Rico and Virgin Islands, U.S.
Baseline/Threshold	Baseline: 15,000 approved authorizations on unique PANs in the past 12 months Threshold: 95% of active cards in every account range
Reference	• <i>Automatic Billing Updater Reference Guide</i> • <i>Transaction Processing Rules</i> • <i>AN 2834—Data Integrity Monitoring Program—U.S. Region Issuers to be Monitored for Compliance with ABU Mandate</i> • <i>AN 2990—Data Integrity Monitoring Program—Asia/Pacific Region Issuers to be Monitored for Compliance with ABU Mandate</i> • <i>AN 2997—Data Integrity Monitoring Program—Middle East/Africa Region Issuers to be Monitored for Compliance with ABU Mandate</i> • <i>AN 5795 Data Integrity Monitoring Program: ABU Penetration Rate Edit for Puerto Rico and U.S. Virgin Islands</i>

Edit 21 ABU for Issuers

Table 123: Edit 21 ABU for Issuers information

Edit Number	21
Edit Title	ABU for Issuers
Name	ABU for Issuers
Billing Code	2DC0100
Region(s)	Select countries in Europe (Armenia, Azerbaijan, Belarus, Belgium, Georgia, Germany, Gibraltar, Ireland, Italy, Kazakhstan, Kyrgyzstan, Liechtenstein, Luxembourg, Netherlands, Portugal, Russian Federation, San Marino, Switzerland, Tajikistan, Turkmenistan, United Kingdom, Uzbekistan)
Description	This edit monitors the implementation of Automatic Billing Updater (ABU) by issuers in countries where it is mandated.
Edit Criteria	Mastercard considers a parent ICA number noncompliant when any ICA number in the family has not implemented ABU. Exclusions: Refer to Rule 5.7, "Use of Automatic Billing Updater," in the <i>Transaction Processing Rules</i>. NOTE: Assessments for this edit is applied at the parent ICA number level. A parent ICA number will be assessed according to the standard Data Integrity assessment structure until every ICA number in the family has implemented ABU. A parent ICA number is not assessed more than one time for each month, even if multiple child ICA numbers are considered noncompliant. Monitoring start date: 1 October 2019
Baseline/Threshold	Baseline: 500 approved recurring payment or credential-on-file transactions
Reference	<i>Automatic Billing Updater Reference Guide</i> <i>Transaction Processing Rules</i> <i>AN 2835—Data Integrity Monitoring Program—Issuers in Select Europe Region Countries to be Monitored for Compliance with ABU Mandate</i>

Edit 22 Invalid AVS Value (0110)

Table 124: Edit 22 Invalid AVS Value (0110) information

Edit Number	22
Edit Title	Invalid AVS Response (0110)
Name	Invalid AVS Value (0110)
Billing Code	2DC0100
Region(s)	Canada, United States
Description	This edit monitors issuer support of address verification service (AVS) response.
Edit Criteria	Mastercard considers transactions noncompliant when Data Element (DE) 48 (Additional Data: Private Use), subelement 83 (AVS Response), contains a value of S (AVS currently not supported). NOTE: Issuers are required to populate DE 48, subelement 83, of the Authorization Response/0110 message any time the acquirer requests address verification in DE 48, subelement 82, of the Authorization Request/0100 message. AVS response code U (No response from issuer authorization platform) can be used where there is a decline authorization and the issuer cannot disclose the address verification service (AVS) response. Exclusions: • Transactions performed on prepaid anonymous cards within the brand product codes: – MPF (Mastercard Prepaid Gift) – MPM (Mastercard Prepaid Consumer Incentive) – MPY (Mastercard Prepaid Employee Incentive) • DE 48, subelement 33 (PAN Mapping File Information), subfield 1 (Account Number Indicator) contains a value of V (virtual card number) Monitoring start date: 1 January 2021
Baseline/Threshold	Baseline: 1,000 AVS transactions Threshold: 97%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>AN 2798 Data Integrity Monitoring Program Monitoring Compliance with Address Verification Service Mandate</i> • <i>AN 4166 Data Integrity Monitoring Program, Deferred Comply By Dates Due to COVID-19</i>

Edit 23 SDA Capable Cards (0110)

Table 125: Edit 23 SDA Capable Cards (0110) information

Edit Number	23
Edit Title	SDA Capable Cards (0110)
Name	SDA Capable Cards (0110)
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the offline Card Authentication Method (CAM) supported on offline CAM-capable cards to ensure that no cards with Static Data Authentication (SDA) remain in circulation.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Card supports offline CAM • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (PAN auto-entry using chip) • DE 39 (Response code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 85 (Not Declined) – 87 (Purchase Amount Only, No Cash Back Allowed) Mastercard considers transactions noncompliant when SDA is present in DE 55, subelement 82 (Application Interchange Profile [AIP]). Monitoring start date: 1 January 2020
Baseline/Threshold	Baseline: 500 eligible transactions Threshold: 100 errors
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>M/Chip Requirements for Contact and Contactless</i> • <i>AN 2871 - Updates to EMV Offline CAM Requirements and Associated Data Integrity Edits</i>

Edit 26 EMV3DS_Non_Low_Risk_Appr_Rt

Table 126: Edit 26 EMV3DS_Non_Low_Risk_Appr_Rt information

Edit Number	26
Edit Title	Non Low Risk Transaction Approval Rate
Name	EMV3DS_Non_Low_Risk_Appr_Rt
Billing Code	2DC0100
Region(s)	Global, select countries in Asia/Pacific, Europe and Middle East/Africa regions excluded
Description	This edit monitors issuers approval rates on authorizations for Mastercard Identity Check EMV 3DS non-low risk authenticated transactions. A transaction is considered noncompliant if it is non-low risk through EMV 3DS and systematically declined by issuer.

Edit Number	26
Edit Criteria	Mastercard identifies noncompliant transactions monitored under this edit by these criteria: • Data Element (DE) 39 (Response Code) is not equal to 00, 08, 10, or 85 • DE 48 (Additional Data: Private Use), subelement 42 (Electronic Commerce Indicators) subfield 1 (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is 211 • DE 48, subelement 43 (Universal Cardholder Authentication Field [UCAF]) starts with kE Exclusions: • Prepaid product codes • DE 39 (Response Code) is 51 (Insufficient funds/over credit limit) or 61 (Exceeds withdrawal amount limits) • DE 48, subelement 43 has a leading indicator of kE and DE 39 is any of these: – 04 (Capture card) – 14 (Invalid card number) – 41 (Lost card) – 43 (Stolen card) – 54 (Expired card) Countries excluded: Aland Islands, Albania, Andorra, Antarctica, Ascension and Tristan Da Cunha, Austria, Bangladesh, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Falkland Islands (Malvinas), Faroe Islands, Finland, France, French Guiana, Germany, Gibraltar, Greece, Greenland, Guadeloupe, Guernsey, Hungary, Iceland, India, Ireland, Isle of Man, Italy, Jersey, Kazakhstan, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malaysia, Malta, Martinique, Mayotte, Moldova, Monaco, Montenegro, Netherlands, Nigeria, Norway, Poland, Portugal, Qatar, Reunion, Romania, Russian Federation, Saint Barthelemy, Saint Helena, Saint Martin, San Marino, Serbia, Singapore, Slovakia, Slovenia, South Georgia and South Sandwich Islands, Spain, Svalbard and Jan Mayen, Sweden, Switzerland, Ukraine, United Kingdom, Vatican City and Viet Nam. Monitoring start date: 1 October 2020
Baseline/Threshold	Baseline: 5,000 e-commerce transactions with SLI 211 Threshold: 10%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>Mastercard Identity Check Program Guide</i> • <i>AN 4309 Data Integrity Monitoring Program, New Edits for Mastercard Identity Check</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 27 EMV3DS_Full_Authent_Appr_Rt

Table 127: Edit 27 EMV3DS_Full_Authent_Appr_Rt information

Edit Number	27
Edit Title	Fully Authenticated Transaction Approval Rate
Name	EMV3DS_Full_Authent_Appr_Rt
Billing Code	2DC0100
Region(s)	Global, select countries in Asia/Pacific and Europe regions excluded
Description	This edit monitors issuers approval rates on authorizations for Mastercard Identity Check EMV 3DS fully authenticated transactions. A transaction is considered non-compliant if it is fully authenticated through EMV 3DS and declined by the issuer.

Edit Number	27
Edit Criteria	Mastercard identifies noncompliant transactions monitored under this edit by these criteria: • Data Element (DE) 39 (Response Code) is not equal to 00, 08, 10, or 85 • DE 48 (Additional Data: Private Use), subelement 42 (Electronic Commerce Indicators) subfield 1 (Electronic Commerce Security Level Indicator and UCAF Collection Indicator) is 212 or 217 • DE 48, subelement 43 (UCAF) begins with k Exclusions: • Prepaid product codes • DE 39 (Response Code) is 51 (Insufficient funds/over credit limit) or 61 (Exceeds withdrawal amount limits) • DE 48, subelement 43 has a leading indicator of kC or kJ and DE 39 is any of these: – 04 (Capture card) – 14 (Invalid card number) – 41 (Lost card) – 43 (Stolen card) – 46 (Closed Account) – 54 (Expired card) – 72 (Account Not Yet Activated) • DE 48, subelement 43 has a leading indicator of kA, kC, or kO and DE 48, subelement 56, subfield 1 (Security Services Indicator) is AIQ (Digital Transaction Insights) and the value in DE 48, subelement 56, subfield 2 (Security Services Data) position 1 is 8 or higher. • DE 48, subelement 71 (On-behalf [OB] Services), subfield 1 (OB Service) is 05 (Mastercard Identity Check AAV Verification Service) and subfield 2 (OB Result 1) are any of these combinations: – 05C (Consider the Amount) – 05D (DS Transaction ID does not match with PAN and SPA2 AAV within the authentication record) – 05E (Formatting Error) – 05F (Failed MAC key Validation) – 05I (Invalid AAV) – 05M (Monetary Currency mismatch between authorization and authentication) – 05T (DS Transaction ID Present) – 05U (Unable to process) – 05X (Security platform time out) – 05Z (Security platform processing error).

Edit Number	27
	- DE 48, subelement 87 (Card Validation Code Result) is any of these: - N (Invalid CVC 2 [non-match]) - P (CVC 2 not processed [issuer temporarily unavailable]) - U (CVC 2 Unverified-Mastercard Use Only) - Systematic declines from Mastercard Safety Net. Countries excluded: Aland Islands, Albania, Andorra, Antarctica, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Falkland Islands (Malvinas), Faroe Islands, Finland, France, French Guiana, French Polynesia, Germany, Gibraltar, Greece, Greenland, Guadeloupe, Guernsey, Hungary, Iceland, India, Ireland, Isle of Man, Italy, Jersey, Kazakhstan, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Martinique, Mayotte, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Reunion, Romania, Russian Federation, Saint Barthelemy, Saint Helena, Ascension and Tristan Da Cunha, Saint Martin, San Marino, Serbia, Slovakia, Slovenia, South Georgia and the South Sandwich Islands, Spain, Svalbard and Jan Mayen, Sweden, Switzerland, Ukraine, United Kingdom and Vatican City. Monitoring start date: 1 October 2020
Baseline/Threshold	Baseline: 5,000 e-commerce transactions with SLI 212 or 217 Threshold: 85%

Edit 28 Contactless Issuer

Table 128: Edit 28 Contactless Issuer information

Edit Number	28
Edit Title	Contactless Issuer
Name	Contactless Issuer

Edit Number	28
Billing Code	2DC0100 Billed quarterly (February, May, August, and November)
Region(s)	Asia/Pacific (excluding Japan), Europe, Middle East/Africa
Description	This edit monitors that the percentage of cards under a given primary issuer ICA number reported as contactless capable meet the thresholds for that issuer's region.
Edit Criteria	Mastercard considers issuers noncompliant when the percentage of issuer cards reported as contactless capable (compared to the overall number of cards issued) does not meet the threshold for that issuer's region. Mastercard monitors issuers to help ensure that an increasing percentage of their cards are contactless capable by the dates outlined in the Baseline/Threshold for this edit. Mastercard determines the number of contactless capable cards (under a given issuer ICA number) by cards reported in the Quarterly Mastercard Report (QMR) database by ICA number and region. NOTE: This edit is not eligible for extensions. Monitoring start date: 1 April 2021
Baseline/ Threshold	Baseline: 1,000 cards issued Threshold: 80%
Reference	• <i>AN 1474 Revised Standards for EMV and Contactless Roadmap</i> • <i>AN 4489 Data Integrity Monitoring Program: New Edit for Contactless Issuer</i> • <i>AN 6427 Data Integrity Monitoring Program Contactless Issuer Edit Requirements</i> • <i>AN 7265 New Data Integrity Monitoring Program Edit for Contactless Issuer in Korea</i> • <i>AN 7531 Data Integrity Monitoring Program Edit for Contactless Issuers in Select Countries in the Asia/Pacific Region</i> • <i>AN 7682 Introducing Data Integrity Monitoring Program Contactless Issuer Edit in India</i> • <i>AN 9502 Data Integrity Monitoring Program Edit for Contactless Issuer in Indonesia</i> • <i>AP 12176 Data Integrity Monitoring Program Edit for Contactless Issuer in Bangladesh</i>

Edit 29 Do Not Honor 05 Declines 0110

Table 129: Edit 29 Do Not Honor 05 Declines 0110 information

Edit Number	29
Edit Title	Do Not Honor 05 Decline Response 0110
Name	Do Not Honor 05 Declines 0110
Billing Code	2DC0101 This event bills for each transaction; billed monthly based on the calculation: $([\text{total DNH declines}] - [\text{total CNP declines} * 0.05]) * [\text{Pricing and billing rate for each transaction}] = [\text{billing amount}]$
Region(s)	Asia/Pacific (excluding India), Canada, select countries in Europe, Latin America and the Caribbean, and United States
Description	This edit monitors issuer usage of the decline Response code 05 (Do Not Honor [DNH]) for card-not-present (CNP) transactions in the authorization response message.

Edit Number	29
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Message Type Identifier is 0110 (Authorization Request Response) • Data Element (DE) 61 (Point-of-Service [POS] Data), subfield 5 (POS Card Presence) is 1 (CNP) Mastercard considers transactions noncompliant when: • more than 5 percent of an ICA number or processor IDs decline responses in DE 39 (Response code) equal 05 (Do Not Honor) – Decline responses are defined as any transaction whose response contains a DE 39 value that is not equal to 00, 08, 10, 85, or 87 Exclusions: • DE 48 (Additional Data: Private Use), subelement 84 (Merchant Advice Codes) is 21 (Payment Cancellation) • Mastercard generated declines (or on-behalf service declines) • MDES provisioning request declines • Stand-In services • Systematic declines from Mastercard Safety Net • Token provisioning request responses Excluded Europe countries: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Spain, Tajikistan, Türkiye, Turkmenistan, Ukraine, and Uzbekistan Monitoring start date: 1 January 2022 for Asia/Pacific (excluding India), Canada, Latin America and the Caribbean, and United States, 1 November 2023 for Europe Group 1 and 1 June 2024 for Europe Group 2
Baseline/Threshold	Baseline: 20,000 Mastercard and Maestro CNP decline responses Threshold: 95%
Reference	• <i>Mastercard Network Processing Dual Message Authorization System Guide</i> • <i>AN 5675 Data Integrity Monitoring Program: New Edits for Issuer Do Not Honor Declines for Select Regions</i> • <i>AN 7902 Data Integrity Monitoring Program Edits for Issuer Do Not Honor Declines for Select Countries in the Europe Region</i>

Edit 30 Auth Refund Inv Declines 0110

Table 130: Edit 30 Auth Refund Inv Declines 0110 information

Edit Number	30
Edit Title	Authorization Refund Invalid Declines 0110
Name	Auth Refund Inv Declines 0110
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the validity of the issuer decline reason code for purchase refund transactions in Authorization Request Response/0110 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 20 (Purchase Return/Refund) Mastercard considers transactions noncompliant when: - DE 39 (Response Code) is one of these: 10 (Partial Approval) 12 (Invalid transaction) 51 (Insufficient funds/over credit limit) or - DE 39 is 57 (Transaction not permitted to issuer/cardholder) and the account is not flagged as non-reloadable prepaid Exclusions: - DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 91 (PAN auto-entry through contactless magnetic stripe - the full track data has been transmitted by the acquirer within the authorization request in DE 35 [Track 2 Data] or DE 45 [Track 1 Data] and forwarded to the issuer without alteration or truncation). - Stand In service, X-Code declines and On-behalf service declines. Monitoring start date: 1 September 2022
Baseline/ Threshold	Baseline: 100 purchase refund transactions Threshold: 99%
Reference	<i>Mastercard Network Processing Dual Message Authorization System Guide</i> <i>GCMS Reference Manual</i> <i>AN 6409 New Data Integrity Monitoring Program Edits for Purchase Refund Authorizations</i>

Edit 31 Auth Refund Appr Rt 0110

Table 131: Edit 31 Auth Refund Appr Rt 0110 information

Edit Number	31
Edit Title	Auth Refund Approval Rate 0110
Name	Auth Refund Appr Rt 0110
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the monthly approval rate of purchase refund transactions in Authorization Request Response/0110 messages.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 20 (Purchase Return/Refund) Mastercard considers issuers noncompliant when they have 100 or more purchase refund transactions in a given month, with 100 percent decline rates, or zero percent approval rates. Exclusions: - Prepaid account ranges flagged with the non-reloadable indicator in the Authorization BIN Resource file (TR52) or Financial Institution Table (FIT) Optional Addendum Record (FIT1). - Stand In service, X-Code declines and On-behalf service declines. Monitoring start date: 1 September 2022
Baseline/ Threshold	Baseline: 100 purchase refund transactions Threshold: Greater than 0% approved

Edit 32 ABU Expired Credentials

Table 132: Edit 32 ABU Expired Credentials information

Edit Number	32
Edit Title	ABU Expired Credentials
Name	ABU Expired Credentials
Billing Code	2DC0100
Region(s)	Select countries in Europe (Armenia, Azerbaijan, Belarus, Georgia, Gibraltar, Guernsey, Ireland, Jersey, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine, United Kingdom, Uzbekistan), Middle East/Africa, and United states
Description	This edit monitors the Automatic Billing Updater (ABU) to ensure that registered accounts have future expiration dates or are marked closed.
Edit Criteria	Mastercard identifies registered accounts monitored under this edit by these criteria: - Active registered accounts that were last updated on or after 31 October 2021. Mastercard considers registered ABU accounts noncompliant when: - The expiry date of the registered account is greater than two months expired before the month being monitored on Data Integrity. Exclusions: - Registered accounts with reason codes: - C (Closed account) - O (Override for deletion) Countries excluded: Congo, Democratic Republic of Congo, Iraq, Jordan, Morocco, Nigeria, Pakistan, Palestine NOTE: Mastercard updates the ABU database daily therefore the Data Integrity sample report will show noncompliant registered accounts with one-day lag. Monitoring start date: 1 July 2025 for Middle East/Africa and United States regions and select countries in the Europe region (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan), 1 December 2025 for Gibraltar, Guernsey, Ireland, Jersey and United Kingdom
Baseline/Threshold	Baseline: 5,000 registered accounts Threshold: 97%

Edit 33 Name Validation Match Ind 0110

Table 133: Edit 33 Name Validation Match Ind 0110 information

Edit Number	33
Edit Title	Name Validation Match Indicator 0110
Name	Name Validation Match Ind 0110
Billing Code	2DC0100
Region(s)	Canada, Europe, United States
Description	This edit monitors Dual Message Authorization Name Validation transactions to ensure issuers respond to name validation requests with proper response codes.

Edit Number	33
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Data Element (DE) 39 (Response Code) is: 00 (Approved or completed successfully) 08 (Honor with ID) 10 (Partial Approval) 85 (Not Declined) 87 (Purchase Amount Only, No Cashback Allowed) - DE 108 (Additional Transaction Reference Data), subelement 07 (Data Validation Request), subfield 01 (Name Validation Request) values: 10 (Receiver Name Validation Request) 11 (Sender Name Validation Request) Mastercard considers transactions noncompliant when either of these subedits are true: a. DE 108, subelement 07, subfield 01 is 10 and DE 108, subelement 08 (Data Validation Response), subfield 01 (Receiver Name Validation Response) is not one of these: - A (Match) - B (Partial Match) - C (No Match) b. DE 108, subelement 07, subfield 01 is 11 and DE 108, subelement 08, subfield 02 (Sender Name Validation Response) is not one of these: - A (Match) - B (Partial Match) - C (No Match) Exclusions: Consumer or commercial card programs where no cardholder name is associated with the account, including types: - Non-reloadable prepaid - Vehicle-assigned Mastercard Corporate Fleet - Central Travel Solutions Country exclusions: Türkiye Monitoring start date: 1 July 2025 for Canada and the United States, 1 July 2026 for Europe
Baseline/ Threshold	Baseline: 500 name validation requests Threshold: 97%

Edit Number	33

Edit 2 EMV_ARPC_0210

Table 136: Edit 2 EMV_ARPC_0210 information

Edit Number	2
Edit Title	ARPC Presence (0210)
Name	EMV_ARPC_0210
Billing Code	2DC0100
Region(s)	Global
Description	The edit monitors Data Element (DE) 55 (Integrated Circuit Card [ICC] System-Related Data) to ensure the Authorization Response Cryptogram (ARPC) value is present in approved chip transactions.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • DE 22 (Point of Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (PAN auto-entry using chip) • DE 39 (Response code) is one of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 87 (Purchase Amount Only, No Cash Back Allowed) • DE 55 is present in the originating Financial Transaction Request/0200 message with all mandatory tags Mastercard considers transactions noncompliant when the ARPC value is missing from DE 55, subelement 91 (Issuer Authentication Data). Exclusions: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 20 (Purchase Return/Refund) • Transactions originated from Mastercard Stand-In NOTE: This edit is not eligible for extensions. Monitoring start date: 1 April 2015

Edit Number	2
Baseline/ Threshold	Baseline: 500 approved chip transactions Threshold: 98%

Edit 3 ISS_OFFLINE_CAM_0210

Table 137: Edit 3 ISS_OFFLINE_CAM_0210 information

Edit Number	3
Title	Issuer Offline CAM (0210)
Name	ISS_OFFLINE_CAM_0210
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the offline Cardholder Authentication Method (CAM) supported on offline CAM-capable cards to ensure that customers migrate from Static Data Authentication (SDA) and Dynamic Data Authentication (DDA) to Combined Data Authentication (CDA).
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Card is capable of offline authentication • Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (PAN auto-entry using chip) • DE 39 (Response code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 85 (Not Declined) – 87 (Purchase Amount Only, No Cash Back Allowed) Mastercard considers issuers noncompliant when less than the current annual threshold percent of eligible transactions show that CDA is supported in DE 55, subelement 82 (Application Interchange Profile [AIP]) (Byte 1, bit 1). Monitoring start date: 1 January 2017
Baseline/ Threshold	Baseline: 500 offline CAM-capable card chip transactions Threshold: 98%

Edit Number	3

Edit 5 SDA Capable Cards 0210

Table 139: Edit 5 SDA Capable Cards 0210 information

Edit Number	5
Edit Title	SDA Capable Cards 0210
Name	SDA Capable Cards 0210
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the offline Card Authentication Method (CAM) supported on offline CAM-capable cards to ensure that no cards with Static Data Authentication (SDA) remain in circulation.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Card supports offline CAM • Data Element (DE) 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is 05 (Merchant terminal PAN auto-entry through integrated circuit card) • DE 39 (Response code) is any of these: – 00 (Approved or completed successfully) – 08 (Honor with ID) – 10 (Partial Approval) – 85 (Not Declined) – 87 (Purchase Amount Only, No Cash Back Allowed) Mastercard considers transactions noncompliant when SDA is present in DE 55, subelement 82 (Application Interchange Profile [AIP]). Monitoring start date: 1 January 2020
Baseline/ Threshold	Baseline: 500 eligible transactions Threshold: 100 errors

Edit Number	5
Reference	• <i>M/Chip Requirements for Contact and Contactless</i> • <i>Mastercard Network Processing Single Message System Guide</i> • <i>AN 2871 - Updates to EMV Offline CAM Requirements and Associated Data Integrity Edits</i>

Edit 6 Do Not Honor 05 Declines 0210

Table 140: Edit 6 Do Not Honor 05 Declines 0210 information

Edit Number	6
Edit Title	Do Not Honor 05 Decline Response 0210
Name	Do Not Honor 05 Declines 0210
Billing Code	2DC0101 This event bills for each transaction; billed monthly based on the calculation: $([\text{total DNH declines}] - [\text{total CNP declines} * 0.05]) * [\text{price for each transaction}] = [\text{billing amount}]$
Region(s)	Asia/Pacific (excluding India), Canada, select countries in Europe, Latin America and the Caribbean, and United States
Description	This edit monitors issuer usage of the decline response code 05 (Do Not Honor [DNH]) for card-not-present (CNP) transactions in the Financial Transaction Request Response message.

Edit Number	6
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • MTI (Message Type Identifier) is 0210 (Financial Transaction Request Response) • Data Element (DE) 61 (Point-of-Service [POS] Data), subfield 5 (POS Card Presence) is 1 (CNP) Mastercard considers transactions noncompliant when: • more than 5 percent of an ICA number or processor IDs decline responses in DE 39 (Response code) equal 05 (Do Not Honor) – Decline responses are defined as any transaction whose response contains a DE 39 value that is not equal to 00, 08, 10, 85, or 87 Exclusions: • DE 48 (Additional), subelement 84 (Merchant Advice Code) is 21 (Payment Cancellation) • Mastercard generated declines (or on-behalf service declines) • MDES provisioning request declines • Stand-In services • Systematic declines from Mastercard Safety Net • Token provisioning request responses Excluded Europe countries: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Spain, Tajikistan, Türkiye , Turkmenistan, Ukraine, and Uzbekistan Monitoring start date: 1 January 2022 for Asia/Pacific (excluding India), Canada, Latin America and the Caribbean, and United States, 1 November 2023 for Europe Group 1 and 1 June 2024 for Europe Group 2
Baseline/Threshold	Baseline: 20,000 Mastercard and Maestro CNP decline responses Threshold: 95%

Chapter 11 Issuer Chargeback Program

The edits in this program evaluate transactions in support of the Issuer Monitoring Program (IMP), which establishes criteria for minimum standards of acceptable issuer chargeback compliance. Detailed information about the IMP can be found in chapter 8.5 of the Security Rules and Procedures manual.

Edit 1 ISS_Excessive_CBs

Table 142: Edit 1 ISS_Excessive_CBs information

Edit Number	1
Edit Title	Issuer Excessive Chargebacks
Name	ISS_Excessive_CBs
Billing Code	2DC0300
Regions	Global
Description	This edit monitors the number of chargebacks submitted on a single Primary Account Number (PAN) each month.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • MTI (Message Type Identifier) is 1442 • Data Element (DE) 24 (Function Code) is 450 (First Chargeback [Full]) • DE 25 (Message Reason Code) is not any of these: – 4807 (Warning Bulletin File) – 4808 (Authorization Related Chargeback) – 4812 (Account number not on file) – 4850 (Installments) Mastercard considers transactions noncompliant when the issuer submits 40 or more chargebacks on the same PAN each month, for two months in a row. Issuers can refer to the Central Site processing date found in PDS 0158 (Business Activity), subfield 5 (Central Site Business Date) to determine the month that the chargeback took place. NOTE: This edit is not eligible for extensions. Monitoring start date: 1 October 2018
Baseline/ Threshold:	Baseline: 1 PAN Threshold: Fewer than 40 errors for each PAN

Edit Number	1
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Security Rules and Procedures</i> • <i>AN 2170 Data Integrity Monitoring Program - New Edits to Monitor Issuer Chargebacks</i> • <i>AN 8068 Updating Data Integrity Monitoring Program Issuer Chargeback Program Edits</i>

Edit 2 ISS_FNS

Table 143: Edit 2 ISS_FNS information

Edit Number	2
Edit Title	Issuer Fraud Notification Service
Name	ISS_FNS
Billing Code	2DC0300
Regions	Global
Description	This edit monitors chargebacks to ensure that issuers are not circumventing the Fraud Notification Service (FNS) block rule.

Edit Number	2
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • MTI (Message Type Identifier) is 1442 • Data Element (DE) 24 (Function Code) is 450 (First Chargeback [Full]) • DE 25 (Message Reason Code) is not any of these: – 4807 (Warning Bulletin File) – 4808 (Authorization Related Chargeback) – 4812 (Account number not on file) – 4850 (Installments) – 4837 (No Cardholder Authorization) Mastercard considers customers noncompliant when a single Primary Account Number (PAN) has 35 fraud chargebacks, followed by five non-fraud chargebacks in a given month. Issuers can refer to the Central Site processing date found in PDS 0158 (Business Activity), subfield 5 (Central Site Business Date) to determine the month the chargeback took place. NOTE: This edit is not eligible for extensions. Important: Data Integrity displays the number of non-fraud chargebacks after the issuer has submitted 35 fraud chargebacks. So, a display of five errors or more indicates the customer is noncompliant. Monitoring start date: 1 October 2018
Baseline/ Threshold	Baseline: 1 chargeback Threshold: Fewer than 5 errors for each PAN

Chapter 12 Digital Standards Program

The edits in this program evaluate transactions in support of the Digital Standards Program to help issuers to improve card-not-present (CNP) approval rates across consumer debit, mass credit, affluent credit, and prepaid reloadable card products.

About Digital Standards Program.....	229
Edit 1 CNP APP RT CREDIT 0110.....	230
Edit 2 CNP APP RT DEBIT 0110.....	232
Edit 3 CNP APP RT CR WORLD 0110.....	234
Edit 4 CNP APP RT PREPAID 0110.....	236

About Digital Standards Program

The Digital Standards Program (DSP) applies to issuer portfolios that meet the baseline number of transactions by country or market, by year for each edit.

Every quarter, issuer compliance is assessed against the annual benchmark with assessments calculated at the transaction level.

Mastercard bases compliance on processed data and includes domestic and cross-border CNP transactions, excluding zero-dollar transactions, Mastercard® MoneySend® (funding and payments), and EMV® 3-D Secure (3DS) transactions. All issuer responded decline reason codes are considered with the exception of credit related declines (DE 39 Response Code 51). Approval rate compliance is calculated based on approval rate count data with declined transaction duplicates removed.

NOTE: CNP transactions with DE 48 (Additional Data: Private Use), subelement 77 (Transaction Type Identifier) containing any of these values are excluded from monitoring for all of Non-SEPA and Middle East/Africa countries:

- **P70 (Cryptocurrency)**
- **P76 (Mastercard approved [fiat backed] stablecoins; retail Central bank Digital Currencies [CBDCs])**
- **P77 (Mastercard nonapproved stablecoins, floating cryptocurrency)**

The edits monitor issuers in all countries in the Latin America and Caribbean (LAC) region, excluding Mexico, Puerto Rico and the Virgin Islands, U.S. Additionally the edits monitor issuers in these Non-SEPA and Middle East/Africa countries: Azerbaijan, Bahrain, Egypt, Ghana, Iraq, Kazakhstan, Kenya, Kuwait, Lebanon, Morocco, Nigeria, Oman, Pakistan, Qatar, Saudi Arabia, South Africa, Türkiye, and United Arab Emirates.

For LAC, the DSP monitors domestic and cross-border CNP transactions, except where there are regulatory restrictions; Argentina only includes domestic transactions. The covered markets are individual countries in the case of Brazil and clusters of countries for the remainder of the LAC region based on adjacent markets with similar compliance as listed in Table 13: Country markets.

Table 144: Country markets

Market	Countries included
Argentina and Uruguay	Argentina (ARG), Uruguay (URY)
Brazil	Brazil (BRA)

Market	Countries included
Caribbean	Anguilla (AIA), Antigua and Barbuda (ATG), Aruba (ABW), Bahamas (BHS), Barbados (BRB), Belize (BLZ), Bermuda (BMU), Bonaire Saint Eustatius & Saba (BES), Cayman Islands (CYM), Cuba (CUB), Curacao (CUW), Dominica (DMA), Dominican Republic (DOM), Grenada (GRD), Haiti (HTI), Jamaica (JAM), Montserrat (MSR), Saint Kitts and Nevis (KNA), Saint Lucia (LCA), Saint Maarten (SXM), St. Vincent and The Grenadines (VCT), Trinidad and Tobago (TTO), Turks and Caicos Islands (TCA), Virgin Islands British (VGB)
Central America	Costa Rica (CRI), El Salvador (SLV), Guatemala (GTM), Honduras (HND), Nicaragua (NIC), Panama (PAN)
Chile and Paraguay	Chile (CHL), Paraguay (PRY)
Colombia and Ecuador	Colombia (COL), Ecuador (ECU)
Peru and Bolivia	Bolivia (BOL), Peru (PER)
Venezuela, Guyana and Suriname	Guyana (GUY), Suriname (SUR), Venezuela (VEN)

For Non-SEPA and the Middle/East Africa regions, the DSP monitors domestic and cross-border CNP transactions except where there are regulatory restrictions: Azerbaijan, Kazakhstan, Morocco, and Türkiye only includes cross-border transactions.

Edit 1 CNP APP RT CREDIT 0110

Table 145: Edit 1 CNP APP RT CREDIT 0110 information

Edit Number	1
Edit Title	Card Not Present Consumer Credit Approval Rate 0110
Name	CNP APP RT CREDIT 0110
Billing Code	2DC0500 Billed quarterly (February, May, August, and November)
Region(s)	Latin America and the Caribbean, excluding Mexico, Puerto Rico and the Virgin Islands, United States, select countries in Europe (Azerbaijan, Kazakhstan, and Türkiye) and select countries in Middle East/Africa (Bahrain, Egypt, Ghana, Iraq, Kenya, Kuwait, Lebanon, Morocco, Nigeria, Oman, Pakistan, Qatar, Saudi Arabia, South Africa, and United Arab Emirates)

Edit Number	1
Description	This edit monitors issuer's minimum approval rate for domestic and cross-border card not present (CNP) consumer credit transactions.
Edit Criteria	Mastercard considers issuers noncomplaint when the quarterly approval rate for all qualified transactions is less than market (target) threshold percent and there is not greater than one percent quarter over quarter improvement. Mastercard identifies transactions monitored under this edit by these criteria: • Message Type Identifier is 0110 (Authorization Request Response) • Data Element (DE) 61 (Point-of-Service [POS] Data), subfield 5 (POS Card Presence) is 1 (Card not present) • DE 48 (Additional Data: Private Use), subelement 33 (PAN Mapping File Information), subfield 4 (product code) – for LAC is MCA, MCC, MCE, MCG, MCS, MCU, MCV, MHC, MHG, MHP, MHS, MIB, MIC, MIG, MNS, MRF, MRO, or MR – for MEA is MCA, MCC, MCE, MCG, MCH, MCS, MCT, MCU, MCV, MCX, MFD, MFL, MHC, MHG, MHP, MHS, MIB, MIC, MIG, MKE, MNS, MPL, MRF, MRO, or MRP • DE 22 (Point-of-Service [POS] Entry Mode), subfield 1 (POS Terminal PAN Entry Mode) is any of these: – 00 (Merchant terminal PAN entry mode unknown) – 01 (Merchant terminal PAN manual entry) – 09 (PAN/Token entry through electronic commerce containing DSRP cryptogram in DE 55 (Integrated Circuit Card System-Related Data)) – 10 (Credential on File) – 81 (PAN/Token entry through electronic commerce with optional Identity Check-AAV or DSRP cryptogram in UCAF) Mastercard considers transactions noncomplaint when if the DE 39 (Response code) is not any of these: • 00 (Approved or completed successfully) • 08 (Honor with ID) • 10 (Partial Approval) • 85 (Not Declined) • 87 (Purchase Amount Only, No Cash Back Allowed) Important: • Argentina and Nigeria are monitored on domestic transactions only. • Azerbaijan, Kazakhstan, Morocco, and Türkiye are monitored on cross-border transactions only. – Cross-border is identified when the value in DE 20 (Primary Account Number [PAN] Country Code) does not match the value in DE 43 (Acceptor Name and Location), subfield 5 (Acceptor Country Code) • An issuer of accounts in Türkiye may have their minimum average approval rate adjusted by 4 percent for cross-border CNP transactions for a covered consumer product type.

Edit Number	1
	Monitoring start date: 1 January 2021 for Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates, 1 January 2022 for LAC countries, 1 January 2023 for Azerbaijan, Egypt, Ghana, Iraq, Kazakhstan, Kenya, Lebanon, Morocco, Pakistan, South Africa, and Türkiye, and 1 January 2024 for Nigeria

About Global Collection Only edits

According to the *Global Collection Only Program Handbook*, Mastercard requires customers to submit collection-only transaction records to Mastercard for all purchase, purchase with cash back, unique/quasi-cash, ATM cash withdrawal, payment transactions, manual cash disbursement, and refund/credit transactions enacted on the Mastercard family of brands (including Mastercard[®], Debit Mastercard, Maestro[®], or Circus Card[®] issued under a Mastercard assigned BIN) that have not been switched on the Mastercard Network.

This includes, but is not limited to, these transactions:

- On-Us: Acquired and issued by the same customer
- Intraprocessor: Acquired and issued by customers processing through the same processor
- Bilateral Agreement: Separate issuer and acquirer using separate processors directly connected to each other
- Domestic Network: Separate issuer and acquirer using processors connected to each other through a central switch
- Other Transaction Scenarios: includes those transactions partially processed through the Mastercard Network

Edit 3 GCO INVALID MERCH ID

Table 149: Edit 3 GCO INVALID MERCH ID information

Edit Number	3
Edit Title	GCO Invalid Merchant ID
Name	GCO INVALID MERCH ID
Billing Code	2DC0200
Region(s)	Global

Edit Number	3
Description	This edit monitors the Acceptor ID (Merchant ID) in collection-only transactions to ensure that each acceptor location is uniquely identified. IMPORTANT: A Merchant ID can only be assigned to one location. Every transaction containing a given Merchant ID must have the same corresponding address, city, state, and postal code. NOTE: This edit only applies to face-to-face transactions.
Edit Criteria	Mastercard considers a merchant location noncompliant when one or more transactions taking place at that location contains the same Merchant ID value, found in Data Element (DE) 42 (Acceptor ID) in multiple transactions but these values are not consistent: • DE 43 (Acceptor Name and Location), subfield 2 (Acceptor Street Address) • DE 43, subfield 3 (Acceptor City Name), • DE 43, subfield 4 (Acceptor Postal Code), • DE 43, subfield 5 (Acceptor Country Subdivision Code) Monitoring start date: 1 January 2018
Baseline/ Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 1397 Data Integrity - New Edits- Global Collection Only Data Quality Edits</i>

Edit 4 GCO INVALID DE43

Table 150: Edit 4 GCO INVALID DE43 information

Edit Number	4
Edit Title	GCO Invalid DE 43
Name	GCO INVALID DE43
Billing Code	2DC0200
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 43 (Acceptor Name and Location) in collection-only transactions to ensure they are valid and properly formatted.

Edit Number	4
Edit Criteria	Mastercard considers a merchant location noncompliant when one or more transactions taking place at that location meets any of these subedits: a. DE 43, subfield 1 (Acceptor Name) is a street address b. DE 43, subfield 1 is a telephone number and DE 26 (Acceptor Business Code [MCC]) is an MCC that is not a telephone service c. DE 43, subfield 1 is all numeric, all one character or all sequential characters (for example ABCDEF) d. DE 43, subfield 1, positions 20-22 contain the substring PAA e. DE 43, subfield 1, positions 20-22 contain the substring Rxx f. DE 43, subfield 1, positions 20-22 contain the substring Sxx g. DE 43, subfield 1, positions 20-22 contain the substring Wxx h. DE 43, subfield 1, positions 20-22 contain the substring PAY Exclusions: MCC 4784 (Bridge and road fees, tolls) Monitoring start date: 1 January 2018
Baseline/ Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations

Edit 5 GCO INVALID COUNTRY

Table 151: Edit 5 GCO INVALID COUNTRY information

Edit Number	5
Edit Title	GCO Invalid Country
Name	GCO INVALID COUNTRY
Billing Code	2DC0200

Edit Number	5
Region(s)	This edit applies to these countries: Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Brazil, Canada, Colombia, Costa Rica, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, India, Israel, Italy, Japan, Korea, Kuwait, Malaysia, Netherlands, New Zealand, Norway, Philippines, Poland, Puerto Rico, Russian Federation, Singapore, South Africa, Sweden, Switzerland, Taiwan, Thailand, Türkiye, Ukraine, United Kingdom, United States, Venezuela.
Description	This edit monitors the postal code and country code values submitted in Data Element (DE) 43 (Acceptor Name and Location) in collection-only transactions to ensure values are present, valid, and correspond to the appropriate Point of Service (POS) location.
Edit Criteria	Mastercard considers a merchant location noncompliant when one or more transactions taking place at that location meets any of these subedits: a. DE 43, subfield 6 (Acceptor Country Code) is CAN and DE 43, subfield 4 (Acceptor Postal Code) is unknown or is not a valid postal code in Canada b. DE 43, subfield 6 is AUS and DE 43, subfield 4 is unknown or is not a valid postal code in Australia c. DE 43, subfield 6 is DEU and DE 43, subfield 4 is unknown or is not a valid postal code in Germany d. DE 43, subfield 6 is USA and DE 43, subfield 4 is unknown or is not a valid postal code in the United States e. DE 43, subfield 6 is CRI, DNK, ISR, KOR, KWT, NOR, NZL, PHL, PRI, THA, TUR, TWN, or VEN and DE 43, subfield 4 is unknown or is not present f. DE 43, subfield 6 is AFG, ALB, ARG, AUT, BEL, BRA, CHE, COL, CZE, FIN, FRA, GBR, GRC, HRV, HUN, IND, ITA, JPN, MYS, NLD, POL, RUS, SGP, SWE, UKR or ZAF and DE 43, subfield 4 is unknown or is not present or is not in the correct format. Exclusions: DE 26 (Acceptor Business Code MCCs) is between 3000 and 3350 and 4511 (airline transactions) Exclusions: All subedits exclude MCC 4784 (Bridge and road fees, tolls) Monitoring start date: 1 January 2018 and 1 February 2021 for new countries in the last two bullets
Baseline/Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations
Reference	• <i>Global Collection Only Program Handbook</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 1397 Data Integrity - New Edits - Global Collection Only Data Quality Edits</i> • <i>AN 4589 Data Integrity Monitoring Program: Updates to Existing Edits for Global Address Standardization</i>

Edit 6 GCO INVALID STREET

Table 152: Edit 6 GCO INVALID STREET information

Edit Number	6
Edit Title	GCO Invalid Street Address
Name	GCO INVALID STREET
Billing Code	2DC0200
Region(s)	Global
Description	This edit monitors Data Element (DE) 43 (Acceptor Name and Location), subfield 2 (Acceptor Street Address) in collection-only transactions to ensure it is formatted properly.
Edit Criteria	Mastercard considers transactions noncompliant when any of these subedits apply: a. if any of these are true: • DE 43, subfield 2 is null or all spaces • DE 43, subfield 2 contains unknown • DE 43, subfield 2 is all numeric • DE 43, subfield 2 is less than three characters in length Exception: A value of RR is permitted in the Canada and United States regions. b. In the U.S. only, DE 43, subfield 2 is missing the street number or street name. c. DE 43, subfield 1 (Acceptor Name) matches DE 43, subfield 2 (Spaces, character case and special characters are removed prior to matching.) Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) NOTE: This edit only applies to face-to-face transactions. Monitoring start date: 1 January 2018 for subedit a and b and 1 February 2021 for subedit c
Baseline/Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 1397 Data Integrity New Edits- Global Collection Only Data Quality Edits</i> • <i>AN 4589 Data Integrity Monitoring Program: Updates to Existing Edits for Global Address Standardization</i>

Edit 7 GCO INVALID CITY

Table 153: Edit 7 GCO INVALID CITY information

Edit Number	7
Edit Title	GCO Invalid City
Name	GCO INVALID CITY
Billing Code	2DC0200
Region(s)	Global
Description	This edit monitors the values in Data Element (DE) 43 (Acceptor Name and Location) on face-to-face collection-only transactions to ensure the city name is valid and corresponds appropriately to the provided postal code.
Edit Criteria	Mastercard considers a merchant location noncompliant when one or more transactions taking place at that location meets any of these criteria: a. Globally, DE 43, subfield 3 (Acceptor City Name) contains invalid character sets for the specified country code page b. DE 43, subfield 4 (Acceptor Postal Code) is invalid for the city given in DE 43, subfield 3 when merchant country is CAN c. DE 43, subfield 4 is invalid for the city given in DE 43, subfield 3 when merchant country is DEU d. DE 43, subfield 4 is invalid for the city given in DE 43, subfield 3 when merchant country is AUS e. DE 43, subfield 4 is invalid for the city given in DE 43, subfield 3 when merchant country is USA f. Globally, DE 43 subfield 3 is blank or null, all one character, all numeric, less than three characters, or UNKNOWN. Exclusions: Subedit f excludes CAN, DEU, AUS, and USA. Exclusions: All subedits exclude DE 18 (Merchant Type [MCC]) 4784 (Bridge and road fees, tolls) NOTE: This edit only applies to face-to-face transactions. Monitoring start date: 1 January 2018
Baseline/ Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations

Edit Number	7

Edit 8 GCO INVALID TIME

Table 154: Edit 8 GCO INVALID TIME information

Edit Number	8
Edit Title	GCO Invalid Time
Name	GCO INVALID TIME
Billing Code	2DC0200
Region(s)	Global
Description	This edit monitors collection-only transactions to ensure that no two transactions in the same batch file have identical values for the local time and date.
Edit Criteria	Mastercard considers a merchant location noncompliant when one or more transactions taking place at that location have identical values in Data Element (DE) 12 (Date and Time, Local Transaction), subfield 1 (Date) and subfield 2 (Time). Monitoring start date: 1 January 2018
Baseline/ Threshold	Baseline: 500 unique merchant locations Threshold: 98% of merchant locations
Reference	• <i>Global Collection Only Program Handbook</i> • <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>AN 1397 Data Integrity - New Edits - Global Collection Only Data Quality Edits</i>

Edit 9 GCO Quarterly Reporting

Table 155: Edit 9 GCO Quarterly Reporting information

Edit Number	9
Edit Title	GCO Quarterly Reporting
Name	GCO Quarterly Reporting
Billing Code	2DC0202 Billed quarterly (February, May, August, and November)
Region(s)	Asia/Pacific, Latin America and the Caribbean, and Middle East/Africa
Description	This edit monitors collection-only transactions to ensure that customers are accurately reporting their Global Collection Only (GCO) volume.
Edit Criteria	Mastercard considers customers noncompliant when the GCO Reporting percentage is below 90 percent of the same quarter's Reported volume. Monitoring start date: 1 January 2022
Baseline/ Threshold	Baseline: Customers must have at least 25,000 eligible GCO transactions and 5 percent or more of GCO activity on total transaction volume to be monitored. Threshold: 90%
Reference	• <i>Global Collection Only Program Handbook</i> • <i>AN 5355 GCO Data Collection and Compliance Program Update from Monthly to Quarterly for Select Countries</i> • <i>AN 5356 GCO Data Collection and Compliance Program Update from Monthly to Quarterly for Brazil</i> • <i>AN 5357 GCO Data Collection and Compliance Program Update from Monthly to Quarterly for Select Countries in the Asia-Pacific Region</i> • <i>AN 5358 GCO Data Collection and Compliance Program Update from Monthly to Quarterly for Select Countries in the Middle East and Africa Region</i>

Edit 10 GCO QTR Reporting ATM Tran

Table 156: Edit 10 GCO QTR Reporting ATM Tran information

Edit Number	10
Edit Title	GCO Quarterly Reporting ATM Transactions
Name	GCO QTR Reporting ATM Tran
Billing Code	2DC0209
Region(s)	Europe
Description	This edit monitors collection-only ATM transactions to ensure that customers are accurately reporting their Global Collection Only (GCO) ATM transactions.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: - Customers must have at least 10,000 eligible GCO ATM transactions. Mastercard considers customers noncompliant when: - the GCO Compliance Percentage for ATM transactions is less than 95% and - the total Mastercard Data Processing Level for ATM transactions is less than 95%. NOTE: ATM transactions in the <i>Mastercard Network Processing Dual Message Clearing System Guide</i> are defined as Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type) equal to 01 (ATM Cash Withdrawal) or 12 (Cash Disbursement). Exclusions: Cross-border transactions Monitoring start date: 1 July 2023
Baseline/Threshold	Baseline: Customers must have at least 10,000 eligible GCO ATM transactions Threshold: 95%
Reference	<i>Global Collection Only Program Handbook</i> <i>Mastercard Network Processing Dual Message Clearing System Guide</i> <i>AN 7625 Data Integrity Monitoring Program Edits for Global Collection Only Quarterly Reporting in the Europe Region</i>

Edit 11 GCO QTR Reporting POS Tran

Edit 1 Authentication Rate

Table 161: Edit 1 Authentication Rate information

Edit Number	1
Edit Title	Issuer Authentication Rate (ARes)
Name	Authentication Rate
Billing Code	2DC0100
Region(s)	Asia/Pacific, Canada, Latin America and the Caribbean, United States, Middle East/Africa
Description	This edit monitors the Authentication Response (ARes) messages to determine the issuer's overall authentication rate.
Edit Criteria	Mastercard considers issuers noncompliant when more than 30 percent of frictionless authentication requests are not authenticated. Mastercard identifies authenticated transactions by the EMV 3DS Specification data element definition of Transaction Status. A value of Y indicates that the transaction was successfully authenticated. Exclusions: • Authentications that use a cardholder challenge (RReq) • Transaction Status is N (Not Authenticated/Account Not Verified; Transaction denied) and Transaction Status Reason is 05 (Expired card) or 06 (Invalid card number) • Transaction Status is R (Authentication/Account Verification Rejected; Issuer is rejecting) and Transaction Status Reason is 05 (Expired card) or 06 (Invalid card number), 08 (No Card record) or 10 (Stolen card) • MCC 6051 (Quasi Cash) from Cameroun • Issuing country is Egypt and Transaction Status is R or N and Transaction Status Reason is 12 (Transaction not Permitted to cardholder) Countries excluded: Bangladesh, India, Nepal, Nigeria, Pakistan, Qatar, and Viet Nam Monitoring start date: 1 March 2019
Baseline/Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 70%

Edit 2 Authn Non-Static Method

Table 162: Edit 2 Authn Non-Static Method information

Edit Number	2
Edit Title	Issuer Authentication Non-Static Method
Name	Authn Non-Static Method
Billing Code	2DC0100
Region(s)	Global, excluding select countries in Europe. Refer to the table <i>Mastercard Identity Check excluded countries</i> .
Description	This edit monitors the method used by issuers to authenticate cardholders.
Edit Criteria	Mastercard considers transactions noncompliant when authentication is performed using a static method. Mastercard identifies static method authentication by the EMV 3DS Specification data element definition of Authentication Type. A value of 01 indicates a static method was used. Monitoring start date: 1 March 2019
Baseline/ Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 99%

Edit Number	2
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2401 Data Integrity Monitoring Program New Edits for EMV 3-D Secure and New Alerts and Notifications Feature</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 3 ACS Authn Error Rate

Table 163: Edit 3 ACS Authn Error Rate information

Edit Number	3
Edit Title	Issuer ACS Authentication Error Rate (ARes)
Name	ACS Authn Error Rate
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors all authentication messages sent by the Access Control Server (ACS) to determine the number of messages that result in an error response.
Edit Criteria	Mastercard considers authentication messages from issuer's ACS noncompliant when they result in an error message. Monitoring start date: 1 March 2019
Baseline/Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 99%
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2401 Data Integrity Monitoring Program New Edits for EMV 3-D Secure and New Alerts and Notifications Feature</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 4 3DSS Authn Error Rate

Table 164: Edit 4 3DSS Authn Error Rate information

Edit Number	4
Edit Title	Acquirer 3DSS Authentication Error Rate
Name	3DSS Authn Error Rate
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors all authentication messages sent by the 3DS Server (3DSS) to determine the number of messages that result in an error response.
Edit Criteria	Mastercard considers authentication messages from the Acquirer 3DSS non-compliant when they result in an error message. Monitoring start date: 1 March 2019
Baseline/Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 99%
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2401 Data Integrity Monitoring Program New Edits for EMV 3-D Secure and New Alerts and Notifications Feature</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 5 ACS Availability

Table 165: Edit 5 ACS Availability information

Edit Number	5
Edit Title	Issuer ACS Availability (ARes)
Name	ACS Availability
Billing Code	2DC0100

Edit Number	5
Region(s)	Global
Description	This edit monitors the Access Control server (ACS) response rate to Authentication Request (AReq) messages.
Edit Criteria	Mastercard considers issuers noncompliant when the ACS fails to respond to more than 1 percent of AReq messages. Monitoring start date: 1 March 2019
Baseline/ Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 99%
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2401 Data Integrity Monitoring Program New Edits for EMV 3-D Secure and New Alerts and Notifications Feature</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 7 3RI_AUTH_TRANS_DECLINE

Table 166: Edit 7 3RI_AUTH_TRANS_DECLINE information

Edit Number	7
Edit Title	3DS Requestor Initiated (ARes)
Name	3RI_AUTH_TRANS_DECLINE
Billing Code	2DC0100
Region(s)	Asia/Pacific, Canada, Latin America and the Caribbean, Middle East/Africa (excluding Qatar), United States
Description	This edit monitors 3DS Requestor Initiated (3RI) transactions to ensure issuers are able to support the 3RI flow.

Edit Number	7
Edit Criteria	Mastercard considers issuers noncompliant when they respond to all 3RI requests with a value of N, R, or U in the ARes, indicating they are unable to support 3RI transactions. Exclusions: transStatusReason = 88 ("threeDSReqPriorAuth Data" was provided but not found by the ACS or it was expired) Monitoring start date: 1 September 2019
Baseline/Threshold	Baseline: 100 3RI transactions Threshold: 5%
Reference	- Mastercard Identity Check Program Guide - AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity

Edit 8 ACS_AUTHEN_ABANDON_RATE

Table 167: Edit 8 ACS_AUTHEN_ABANDON_RATE information

Edit Number	8
Edit Title	Issuer Authentication Abandonment Rate (RReq)
Name	ACS_AUTHEN_ABANDON_RATE
Billing Code	2DC0100
Region(s)	Global, excluding Mexico and select countries in Europe. Refer to the table <i>Mastercard Identity Check excluded countries</i> .
Description	This edit monitors challenge responses sent by the issuer Access Control Server (ACS) to the Directory Server (DS) to ensure that issuers are executing the challenge flow as required.
Edit Criteria	Mastercard considers issuers noncompliant when more than 10 percent of challenge responses contain the cancellation indicator. Monitoring start date: 1 September 2019
Baseline/Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 90%

Edit Number	8
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Table 168: Edit 9 CHALLENGE_FLOW_3DS information

Edit Number	9
Edit Title	Acquirer Challenge Flow Execution Rate (ARes/RReq)
Name	CHALLENGE_FLOW_3DS
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the ARes and RReq messages to ensure merchants execute the challenge flow when they receive a challenge response from an issuer ACS.
Edit Criteria	Mastercard considers acquirers noncompliant when more than 10 percent of challenge responses are abandoned by the merchant. Monitoring start date : 1 September 2019
Baseline/ Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 90%
Reference	• <i>Mastercard Identity Check Program Guide</i> • <i>AN 2853 Data Integrity Monitoring Program Updates to Existing Programs and New Edits to Monitor 3DS Activity</i> • <i>AN 7685 Increasing the Data Integrity Monitoring Program Baseline for Identity Check 3DS Edits</i>

Edit 11 ISS_AUTH_SCA_EXEMP

Table 169: Edit 11 ISS_AUTH_SCA_EXEMP information

Edit Number	11
Edit Title	3DS Issuer Authentication Rate for SCA Exemption
Name	ISS_AUTH_SCA_EXEMP
Billing Code	2DC0100
Region(s)	Select countries in Europe (Aland Islands, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, French Guiana, Germany, Gibraltar, Greece, Guadeloupe, Hungary, Iceland, Ireland, Italy, Svalbard and Jan Mayen, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Martinique, Mayotte, Netherlands, Norway, Poland, Portugal, Reunion, Romania, Slovakia, Slovenia, Spain, Sweden and United Kingdom)
Description	This edit monitors European PSD2 issuers who are not allowing Strong Consumer Authentication (SCA) delegation or acquirer exemptions when requested.
Edit Criteria	Mastercard considers transactions noncompliant when: - Both issuer and acquirer are in one of the listed countries. - The authentication request contains a request for acquirer exemption or SCA delegation (sca Exemption = 05 or 07 in v2.1, Challenge Indicator = 05 or 07 in V2.2) and the issuer Access Control Server (ACS) does not respond with an: - ARes = N with Reason Code 81 and with Electronic Commerce Indicator (ECI) 06 in v2.1, or - ARes = I with ECI 06 in v2.2, or - ARes = Y with ECI 02 Exclusions: - Merchant Category Codes (MCCs): 4829 (Money Transfer) 7800 (Government Owned Lottery [U.S. Region]) 7801 (Internet Gambling) 7802 (Government Licensed Horse/Dog Racing) 7995 (Betting, including lottery tickets, casino gaming chips, off-track betting and wagers at race tracks) 9406 (Government-owned Lottery [Specific countries]) Monitoring start date: 1 January 2021
Baseline/Threshold	Baseline: 5,000 EMV 3DS transactions Threshold: 80%

Chapter 15 Fraud Reporting Performance Program

The edits in this program monitor issuers' compliance with the Fraud and Loss Database (FLD) to help ensure issuers are submitting and managing fraudulent transactions according to the FLD fraud reporting requirements and that issuers report all fraud data using the appropriate FLD functionality to record fraudulent events accurately and in a timely manner.

Edit 4 Deletes (Retired from active monitoring)

About edits

The Fraud Reporting Performance Program includes three edits: Rejects, Suspends Suspicious Amount, and Suspends Amount Difference.

All items reported under The Fraud Reporting Performance Program should be actioned within the Fraud and Loss Database. For information on how to action those items refer to the *Fraud and Loss Database User Guide*.

Edit 1 Rejects

Table 170: Edit 1 Rejects information

Edit Number	1
Edit Title	Rejects
Name	Rejects
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors the number of resubmitted rejected transactions in relation to the total number of rejected transactions an issuer submits to the Fraud and Loss Database (FLD) in a given month.
Edit Criteria	Mastercard considers issuers noncompliant when 10 percent or more of rejected transactions are not resubmitted into FLD within 30 days of the original submission date. Exclusions: Error Codes 80100 and 80102 (The user is unauthorized for this function, Customer ID, or ICA number. Record is rejected.) Monitoring start date: 1 January 2022
Baseline/ Threshold	Baseline: 50 rejected transactions Threshold: 90%

Edit Title	Suspends Suspicious Amount
Name	Suspends Suspicious Amount
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors when issuers either confirm, modify, or delete suspended transactions within the required time frame. Transactions can be suspended as a suspicious amount.
Edit Criteria	Mastercard considers transactions noncompliant when a suspended transaction previously submitted into the Fraud and Loss Database (FLD) is not confirmed, modified, or deleted within 30 days of the original submission. Mastercard identifies a suspended transaction monitored under this edit by these criteria: • Error Code 24800 (transaction amount is greater than USD 25,000) Mastercard considers issuers noncompliant when they have a single transaction with Error Code 24800 (suspended transaction). NOTE: If issuer is noncompliant on either of the Suspends Suspicious Amount or Suspends Amount Difference they are charged only once for the highest tier count. Monitoring start date: 1 January 2022
Baseline/ Threshold	Baseline: 1 suspended transaction Threshold: 1 suspended transaction with Error Code 24800

Edit 3 Suspends Amount Difference

Table 172: Edit 3 Suspends Amount Difference information

Edit Number	3
Edit Title	Suspends Amount Difference
Name	Suspends Amount Difference
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors if issuers either confirm, modify, or delete suspended transactions with an amount difference within 30 days of the original submission date.
Edit Criteria	Mastercard considers transactions noncompliant when a suspended transaction previously submitted into the Fraud and Loss Database (FLD) is not confirmed, modified, or deleted within 30 days of the original submission. Mastercard identifies a suspended transaction monitored under this edit by these criteria: • Error Code 24511 (where the transaction amount and the cardholder billing amount differ by more than 25 percent when converted to USD) Mastercard considers transactions noncompliant when they have 20 or more outstanding suspended transactions with Error Code 24511. NOTE: If issuer is noncompliant on either of the Suspends Suspicious Amount or Suspends Amount Difference they are charged only once for the highest tier count. Monitoring start date: 1 January 2022
Baseline/ Threshold	Baseline: 1 suspended transaction Threshold: 20 errors

Edit 7 PDS 0524 Dest City Airport Cd.....	274
Edit 8 PDS 0530 Flight Number.....	275

Edit 1 PDS 0507 Issuing Carrier

Table 173: Edit 1 PDS 0507 Issuing Carrier information

Edit Number	1
Edit Title	PDS 0507 Issuing Carrier
Name	PDS 0507 Issuing Carrier
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors financial detail addendum messages for the presence and validity of values in Private Data Subelement (PDS) 0507 (Issuing Carrier), which contains the standard abbreviation for the airline or railway carrier issuing the ticket.
Edit Criteria	When PDS 0507 is populated, the value in the field is considered noncompliant when: • PDS 0507 is not left-justified and contains all low values, all high values, all spaces, or all zeros or • an invalid International Air Transport Association (IATA) code is provided for Data Element (DE) 26 (Acceptor Business Code [MCC]) equal to 4511 or between 3000 and 3350 NOTE: For airline transactions, the carrier code is obtained from the Official Airline Guide (OAG) or its equivalent. Monitoring start date: 1 December 2022
Baseline/ Threshold	Baseline: 500 addendum transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Mastercard Rules</i> • <i>AN 6743 New Data Integrity Monitoring Program Edits for Addendum Data</i>

Edit 2 PDS 0509 Issue Date

Table 174: Edit 2 PDS 0509 Issue Date information

Edit Number	2
Edit Title	PDS 0509 Issue Date
Name	PDS 0509 Issue Date
Billing Code	2DC0100
Region(s)	Global
Description	The edit monitors financial detail addendum messages for the presence and formatting of the values in Private Data Subelement (PDS) 0509 (Issue Date), which contains the date the ticket was issued to the customer.
Edit Criteria	When PDS 0509 is populated, the value in the field is considered noncompliant when: • PDS 0509 is not a valid date or is not in the form of YYMMDD. – YY must be plus or minus 3 years from current date Monitoring start date: 1 December 2022
Baseline/ Threshold	Baseline: 500 addendum transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Mastercard Rules</i> • <i>AN 6743 New Data Integrity Monitoring Program Edits for Addendum Data</i>

Edit 3 PDS 0520 Travel Date

Edit Number	3
Edit Title	PDS 0520 Travel Date
Name	PDS 0520 Travel Date
Billing Code	2DC0100
Region(s)	Global

Edit Number	3
Description	This edit monitors financial detail addendum messages for the presence and formatting of the values in Private Data Subelement (PDS) 0520 (Travel Date), which contains the effective ticket date, previously referred to as departure date.
Edit Criteria	When PDS 0520 is populated, the value in the field is considered noncompliant when: • PDS 0520 is not a valid date or is not in the form of YYMMDD. – YY must be plus or minus 3 years from current date • PDS 0520 date is less than (prior to) PDS 0509 (Issue Date) Exclusion: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) value 20 (Purchase Return/Refund) Monitoring start date: 1 December 2022
Baseline/Threshold	Baseline: 500 addendum transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Mastercard Rules</i> • <i>AN 6743 New Data Integrity Monitoring Program Edits for Addendum Data</i>

Edit 4 PDS 0574 Arrival Date

Table 176: Edit 4 PDS 0574 Arrival Date

Edit Number	4
Edit Title	PDS 0574 Arrival Date
Name	PDS 0574 Arrival Date
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors financial detail addendum messages for the presence and accuracy of the values in Private Data Subelement (PDS) 0574 (Arrival Date), which contains the cardholder check-in date.

Edit Number	4
Edit Criteria	When PDS 0574 is populated, the value in the field is considered noncompliant when: • PDS 0574 is not a valid date or is not in the form of YYMMDD. – YY must be plus or minus 3 years from current date • PDS 0574 date is greater than (after or later than) PDS 0575 (Departure Date) Monitoring start date: 1 December 2022
Baseline/ Threshold	Baseline: 500 addendum transactions Threshold: 98%
Reference	• <i>Mastercard Network Processing Dual Message Clearing System Guide</i> • <i>Mastercard Rules</i> • <i>AN 6743 New Data Integrity Monitoring Program Edits for Addendum Data</i>

Edit 5 PDS 0577 Property Phone Number

Table 177: Edit 5 PDS 0577 Property Phone Number information

Edit Number	5
Edit Title	PDS 0577 Property Phone Number
Name	PDS 0577 Property Phone Number
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors financial detail addendum messages for the presence and formatting of the values in Private Data Subelement (PDS) 0577 (Property Phone Number), which identifies specific lodging property location by its local phone number.
Edit Criteria	When PDS 0577 is populated, the value in the field is considered noncompliant when: • PDS 0577 contains all low values, all high values, all zeros, or all spaces. NOTE: For transactions acquired in the U.S. or Canada region, PDS 0577, if present, must contain a 10-position phone number, left-justified with trailing spaces. The first three positions must be numeric. Monitoring start date: 1 December 2022
Baseline/ Threshold	Baseline: 500 addendum transactions Threshold: 98%

Edit Number	5

Edit 6 PDS 0523 Origin Cty Airport Cd

Table 178: Edit 6 PDS 0523 Origin Cty Airport Cd information

Edit Number	6
Edit Title	PDS 0523 City of Origin Airport Code
Name	PDS 0523 Origin Cty Airport Cd
Billing Code	2DC0100
Region(s)	Global
Description	This edit monitors financial detail addendum messages for the presence and formatting of the values in Private Data Subelement (PDS) 0523 (City of Origin/ Airport Code), which contains the origin airport or railway name standard abbreviation.
Edit Criteria	Mastercard identifies transactions monitored under this edit by these criteria: • Addendum (Passenger Transport Detail, Trip Leg Data)/1644 messages Mastercard considers transactions noncompliant when: • PDS 0523 is null, or • For airline travel transactions, the value provided in PDS 0523 does not contain a valid International Air Transport Association (IATA) Location Identifier for the airport or Mastercard non-travel related airline code. Exclusions: • Data Element (DE) 3 (Processing Code), subfield 1 (Cardholder Transaction Type Code) is 20 (Purchase Return/Refund) NOTE: Mastercard defines airline travel transactions as DE 26 (Acceptor Business Code [MCC]) equal to 4511 or between 3000 and 3350 Monitoring start date: 1 May 2024
Baseline/ Threshold	Baseline: 500 addendum transactions Threshold: 98%

Edit Number	6
Reference	• Mastercard Network Processing Dual Message Clearing System Guide • Mastercard Rules • AN 9108 New Data Integrity Monitoring Program Edits for Addendum Data

Edit 7 PDS 0524 Dest City Airport Cd

Chapter 17 Non-transactional Data Performance Program

The edits in this program evaluate data that is not in message format.

Edit 1 QMR Late Reporting.....	278
--------------------------------	-----

Edit 1 QMR Late Reporting

Table 181: Edit 1 QMR Late Reporting information

Edit Number	1
Edit Title	QMR Late Reporting
Name	QMR Late Reporting
Billing Code	2DC0600
Region(s)	Global
Description	This edit monitors the submission dates of products submitted to the Quarterly Mastercard Reporting (QMR) to ensure issuers and acquirers submit their QMR to Mastercard in compliance with communicated due dates.

Edit Number	1
Edit Criteria	Mastercard identifies data monitored under this edit by these criteria: • Product level data submitted to the QMR. Mastercard considers products submitted to the QMR noncompliant when the submission date of the product submitted to the QMR is after the Mastercard communicated due date. NOTE: This edit is not eligible for extensions. All customers must submit the QMR to Mastercard by the 15th day of the month* following the end of a quarter by 11:59 pm St. Louis, Missouri, USA time (January, April, July, and October). If the 15th falls on a weekend or a legal holiday in the United States, the QMR is due on the last business day before the 15th. *For Indonesia, the required date is the 10th of the month. Monitoring start date: 1 October 2025 for Asia/Pacific, Canada, Latin America and the Caribbean (excluding Brazil), select countries in the Middle East/Africa region (Afghanistan, Bahrain, Egypt, Iraq, Jordan, Kuwait, Lebanon, Oman, Pakistan, Palestine, Qatar, Saudi Arabia, United Arab Emirates, and Yemen), and the United States 1 January 2026 for select countries in the Europe region (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Türkiye, Turkmenistan, Ukraine, and Uzbekistan) and select countries in the Middle East/Africa region (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Congo, Congo Democratic Republic Of, Cote D'Ivoire, Djibouti, Equatorial Guinea, Eswatini (formerly Swaziland), Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Libyan Arab Jamahiriya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Republic of South Sudan, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Tanzania United Republic Of, Togo, Tunisia, Uganda, Zambia, and Zimbabwe)
Baseline/ Threshold	Baseline: 1 product Threshold: 1 late product
