### **Subfield 3 (EDP Indicator (Extended Decimal Precision))**

Valid values:

- If EDP Ind = N (default), PDS 0276 Variable and Fixed Fee Amount subfields will be right-justified and populated based on decimal precision in PDS 0148;
- If EDP Ind = Y, PDS 0147 is present, and decimal precision Variable and Fixed Fee Amount subfields will be 6 for all PDS 0276 occurrences

### **Subfield 4 (Variable Fee Amount)**

Refer to Amount Values above.

### **Subfield 5 (Variable Fee Direction)**

The direction in which the interchange rate is applied for the Variable Fee Amount.

Valid values:

- CR = amount receiver credit
- DR = amount receiver debit

### **Subfield 6 (Fixed Fee Amount)**

Refer to Amount Values above.

### **Subfield 7 (Fixed Fee Direction)**

The direction in which the interchange unit fee is applied for the Fixed Fee Amount.

Valid values:

- CR = amount receiver credit
- DR = amount receiver debit

### **Subfield 8 (Min/Max Limit Indicator)**

Valid values:

- Min/Max Limit Ind = N is default value;
- If Min/Max Limit Ind = Y, the Min or Max fee amount was applied, and the Variable and Fixed Fee Amounts will match either the Min or the Max Limit Amount setup in the IPM MPE Table IP0053T1

### Subfield 9 (Tiered Amount Indicator)

Valid values:

- Tiered Amount Ind = N is default value;
- If Tiered Amount Ind = Y, tiered amount ranges IPM(MPE Table IP0053T1 Transaction Amount Range Low value > 0) is used to select the Variable Fee Amount rate

## PDS 0280 (Source File ID)

PDS 0280 (Source File ID) provides the file ID of a referenced data file.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-25; TAGLLL               |
| Tag Field           | 0280                       |
| Data Length         | 3 positions, value = 025   |
| Data Field          | Fixed length, 25 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of PDS 0280 (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                     | Org | Sys | Dst |
|---------------------------------------------|-----|-----|-----|
| Message Exception/1644 and File Reject/1644 | .   | X   | C   |

This PDS identifies in File Reject/1644 and Message Exception/1644 messages the file that contains errors.

This PDS is comprised of four subfields to indicate the file type, the file processing date, the ID of the customer or processor associated with the file, and a file sequence number to identify the file uniquely. The combination of these four subfields together forms a value that uniquely identifies all files to or from a customer processing facility.

## PDS 0280 subfields

This PDS consists of four subfields

### PDS 0280 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1–3       | File Type            | ans-3     | N/A           |
| 2      | 4–9       | File Reference Date  | n-6       | N/A           |
| 3      | 10–20     | Processor ID         | n-11      | right         |
| 4      | 21–25     | File Sequence Number | n-5       | right         |

Refer to [PDS 0105 \(File ID\)](#) for descriptions of these subfields.

## PDS 0297 (Amount, Mexico Domestic [VAT])

PDS 0297 (Amount, Mexico Domestic [VAT]) contains the VAT amount associated with a domestic transaction.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | ans...060; TAGLLLLVAR                            |
| Tag Field           | 0297                                             |
| Length Field        | 3 positions, value = 020-060 in increments of 20 |
| Data Field          | Variable length, 020-060 positions               |
| Subfields           | 5                                                |
| Justification       | N/A                                              |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Usage

| Message Type Identifier     | Org | Sys | Dst |
|-----------------------------|-----|-----|-----|
| First Presentment/1240      | .   | X   | C   |
| First Chargeback/1442       | .   | X   | C   |
| Arbitration Chargeback/1442 | .   | X   | C   |
| Second Presentment/1240     | .   | X   | C   |
| Fee Collection/1740         | .   | X   | C   |

## Values

If present, PDS 0297 must be alphanumeric and represents the value added tax amount calculated by the Mastercard Dual Message Clearing System from DE 4 (Transaction, Amount) on Fee Collection/1740 messages, or the value added tax amount calculated from PDS 0298 (Amount, Mexico Domestic Transaction Fee) on First Presentment/1240 messages, Second Presentment/1240 messages, and Chargeback/1442 messages.

For Mexico Domestic RedMX Scheme, transactions with PDS 0191 (Originating Message Format) equal to 0 will not have PDS 0297 present on Chargeback/1442 messages and Second Presentment/1240 messages. PDS 0297 will only be present for First Presentment/1240 messages, including reversals and syntax error return messages.

For Mexico Domestic Mastercard Scheme, transactions with PDS 0191 equal to 2 will have PDS 0297 present on First Presentment/1240 messages, Second Presentment/1240 messages, and Chargeback/1442 messages.

For Mexico Domestic Mastercard Scheme and RedMX Scheme Fee Collection/1740 messages, PDS 0297 will only be present if DE 4 (Transaction, Amount) represents an actual fee.

PDS 0297 does not apply to Mexico Domestic First Presentment/1240 ATM Activity.

The Mastercard Dual Message Clearing System supplies the value added tax amount in PDS 0297, when applicable.

In each occurrence of the value added tax amount of PDS 0297, the settlement data is assigned to PDS 0299 (Mexico Domestic Settlement Data for Fees and VAT) for reconciliation.

## PDS 0297 subfields

PDS 0297 contains five subfields.

### PDS 0297 subfields

| Number | Position(s) | Name                    | Attribute | Justification |
|--------|-------------|-------------------------|-----------|---------------|
| 1      | 1-3         | Rate Type Code          | n-3       | N/A           |
| 2      | 4-15        | Amount, Value Added Tax | n-12      | N/A           |
| 3      | 16-18       | Currency Code           | n-3       | N/A           |
| 4      | 19          | Currency Exponent       | n-1       | N/A           |
| 5      | 20          | Debit/Credit Indicator  | a-1       | N/A           |

### Subfield 1 (Rate Type Code)

Customer processing systems must be able to accommodate new rate types that may be added at any time.

#### Subfield 1 (Rate Type Code)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-3                         |
| Data Field:          | Contents of positions 1-3   |
| Justification:       | N/A                         |
| Values:              | 010 = Value Added Tax (VAT) |

### Subfield 2 (Amount, Tax)

Subfield 2 indicates the tax amount that applies to the purchased goods and services or fees accrued from the purchased goods and services. This subfield must be numeric.

Subfield 2 for rate type code value 010 = VAT indicates the tax amount that applies to fees accrued from the purchased good and services.

### Subfield 2 (Amount, Tax)

| Attributes           | Description                |
|----------------------|----------------------------|
| Data Representation: | n-12                       |
| Data Field:          | Contents of positions 4-15 |
| Justification:       | N/A                        |

### Subfield 3 (Currency Code)

ISO-standard currency code that identifies the currency type.

### Subfield 3 (Currency Code)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-3                         |
| Data Field:          | Contents of positions 16-18 |
| Justification:       | N/A                         |

### Subfield 4 (Currency Exponent)

Subfield 4 identifies the implied decimal position applicable to the ISO standard currency code.

### Subfield 4 (Currency Exponent)

| Attributes           | Description             |
|----------------------|-------------------------|
| Data Representation: | n-1                     |
| Data Field:          | Contents of position 19 |
| Justification:       | N/A                     |

| Attributes | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Values:    | <p>A zero indicates that the decimal point immediately follows the least significant digit of the related amount data</p> <p>Values in the range 1 to 5 indicate that the decimal point is located 1 to 5 positions to the left of the least significant digit of the related amount data</p> <p>Values in the range A to E indicate that the decimal point is located 1 to 5 positions to the left of the least significant digit of the related amount data (Values A to E are currently not supported)</p> <p><b>NOTE: Only numeric currency exponents (values 1 to 5) are supported. ISO defined values (A to E) are for future use.</b></p> |

### Subfield 5 (Debit/Credit Indicator)

Subfield 5 identifies if subfield 2 is a debit or credit position for the message receiver.

#### Subfield 5 (Debit/Credit Indicator)

| Attributes           | Description             |
|----------------------|-------------------------|
| Data Representation: | a-1                     |
| Data Field:          | Contents of position 20 |
| Justification:       | N/A                     |

## PDS 0298 (Amount, Mexico Domestic Transaction Fee)

PDS 0298 (Amount, Mexico Domestic Transaction Fee) presents all fee amounts associated with a Mexico domestic transaction. This PDS may accommodate 1 to 12 different fee types.

#### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | n...432; TAGLLLVAR                               |
| Tag Field           | 0298                                             |
| Length Field        | 3 positions, value = 036-432 in increments of 36 |
| Data Field          | Variable length, 36-432 positions                |

| Attribute     | Description |
|---------------|-------------|
| Subfields     | 7           |
| Occurrences   | 1-12        |
| Justification | N/A         |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Usage

| Message Type Identifier     | Org | Sys | Dst |
|-----------------------------|-----|-----|-----|
| First Presentment/1240      | .   | X   | C   |
| First Chargeback/1442       | O   | X   | C   |
| Arbitration Chargeback/1442 | O   | X   | C   |
| Second Presentment/1240     | O   | X   | C   |

Fees are assessed in the domestic currency according to card program identifier, program, or service rules.

The Dual Message Clearing System calculates the fees and provides them to the receiving customer in PDS 0298.

For Mexico Domestic RedMX Scheme, transactions with PDS 0191 (Originating Message Format) equal to 0, the Dual Message Clearing System will insert PDS 0298 transaction fee amount equal to zero on Chargebacks/1442 messages and Second Presentments/1240 messages. PDS 0298 can have an amount greater than zero on First Presentments/1240 messages including reversals and syntax error return messages.

For Mexico Domestic Mastercard Scheme, transactions with PDS 0191 equal to 2, the Dual Message Clearing System will calculate and insert PDS 0298 on First Presentments/1240 messages, Second Presentment/1240 messages, and Chargebacks/1442 messages.

## Related Required PDS

PDS 0148 (Currency Exponents) must be present with PDS 0298 to identify the transaction's exponent.

## Values

All currency amounts are expressed in the minor unit of currency without a decimal separator in accordance with ISO standards for currency notation. For example, a transaction amount of MXN 212.50 is expressed as 000000021250.

**NOTE:** This field remains unchanged from the original message when processing a reversal of a previous message.

## PDS 0298 subfields

PDS 0298 contains three subfields. This PDS may contain one to 12 occurrences of transaction fees.

### PDS 0298 subfields

Each transaction fee consists of seven subfields. Each fee requires 36 positions; the length of this PDS must be a multiple of 36, with a maximum length of 432 positions. All subfields are present for each fee occurrence. If the fee reconciliation (payment) currency is the same as the fee calculation currency, fee subfields 6 and 7 contain the same values as subfields 4 and 5.

| Number | Position(s) | Name                                                                                                                  | Attribute | Justification |
|--------|-------------|-----------------------------------------------------------------------------------------------------------------------|-----------|---------------|
| 1      | 1-2         | Fee Type Code A: code in the range 00-99 to indicate the fee type                                                     | n-2       | N/A           |
| 2      | 3-4         | Fee Processing Code A: code that indicates the entity to be debited and the entity to be credited for this fee amount | n-2       | N/A           |
| 3      | 5-6         | Fee Settlement Indicator: identifies the PDS location of the settlement service information applicable to this fee    | n-2       | N/A           |
| 4      | 7-9         | Currency Code, Fee: the ISO numeric currency code for the Amount, Fee (subfield 5)                                    | n-3       | N/A           |
| 5      | 10-21       | Amount, Fee: the transaction fee amount in the calculated currency of the fee                                         | n-12      | N/A           |
| 6      | 22-24       | Currency Code, Fee, Reconciliation: the ISO numeric currency code for the Amount, Fee, Reconciliation (subfield 7)    | n-3       | N/A           |

| Number | Position(s) | Name                                                                                      | Attribute | Justification |
|--------|-------------|-------------------------------------------------------------------------------------------|-----------|---------------|
| 7      | 25-36       | Amount, Fee, Reconciliation: fee amount in the reconciliation currency (payment currency) | n-12      | N/A           |

### Subfield 1 (Fee Type Code)

Customer processing systems must be able to accommodate new fee types that may be added at any time.

#### Subfield 1 (Fee Type Code)

| Attributes           | Description                                                       |
|----------------------|-------------------------------------------------------------------|
| Data Representation: | n-2                                                               |
| Data Field:          | Contents of positions 1-2                                         |
| Justification:       | N/A                                                               |
| Values:              | 00 = Transaction interchange fee (fixed plus variable fee amount) |

### Subfield 2 (Fee Processing Code)

Subfield 2 identifies the entity to be debited and the entity to be credited for the fee amount.

#### Subfield 2 (Fee Processing Code)

| Attributes           | Description                                                               |
|----------------------|---------------------------------------------------------------------------|
| Data Representation: | n-2                                                                       |
| Data Field:          | Contents of positions 3-4                                                 |
| Justification:       | N/A                                                                       |
| Values:              | 19 = Debit transaction destination<br>29 = Credit transaction destination |

### Subfield 3 (Fee Settlement Indicator)

Subfield 3 identifies the settlement service PDS to which the fee is associated for the purpose of financial reconciliation and settlement.

#### Subfield 3 (Fee Settlement Indicator)

| Attributes           | Description                                                                                                                                                                                                                                                                                              |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data Representation: | n-2                                                                                                                                                                                                                                                                                                      |
| Data Field:          | Contents of positions 5-6                                                                                                                                                                                                                                                                                |
| Justification:       | N/A                                                                                                                                                                                                                                                                                                      |
| Values:              | 00 = Settlement services do not apply to this fee. Fee settlement or fee billing occurs as a separate activity and is not included in this transaction's reconciliation and settlement.<br><br>01 = This settlement service is identified in PDS 0299 (Mexico Domestic Settlement Data for Fee and VAT). |

### Subfield 4 (Currency Code, Fee)

Subfield 4 identifies the currency of the fee amount. This is the currency in which the Dual Message Clearing System calculates the fee. For example, if the fee is listed in Mastercard publications as a MXN Peso fee, subfields 4 and 5 will contain the fee in MXN Peso. The fee is defined in the calculated fee currency and may include a fixed amount, a percentage of the transaction amount, or both. This subfield must contain a valid ISO numeric currency code.

#### Subfield 4 (Currency Code, Fee)

| Attributes           | Description               |
|----------------------|---------------------------|
| Data Representation: | n-3                       |
| Data Field:          | Contents of positions 7-9 |
| Justification:       | N/A                       |

### Subfield 5 (Amount, Fee)

Subfield 5 is the fee amount in the currency in which the fee is calculated by the Dual Message Clearing System. In First Presentment/1240 messages, the total interchange fees assessed must not be greater than the transaction amount.

### Subfield 5 (Amount, Fee)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-12                        |
| Data Field:          | Contents of positions 10-21 |
| Justification:       | N/A                         |

### Subfield 6 (Currency Code, Fee, Reconciliation)

Subfield 6 identifies this fee's reconciliation (payment) currency. Standard ISO numeric currency codes are used.

### Subfield 6 (Currency Code, Fee, Reconciliation)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-3                         |
| Data Field:          | Contents of positions 22-24 |
| Justification:       | N/A                         |

### Subfield 7 (Amount, Fee, Reconciliation)

Subfield 7 is the fee amount converted to the reconciliation (payment) currency for the message recipient.

### Subfield 7 (Amount, Fee, Reconciliation)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-12                        |
| Data Field:          | Contents of positions 25-36 |
| Justification:       | N/A                         |

## PDS 0299 (Mexico Domestic Settlement Data for Fees and VAT)

PDS 0299 (Mexico Domestic Settlement Data for Fees and VAT) provides reconciliation and settlement information for the PDS 0297 and PDS 0298 amounts in each Mexico Domestic Dual Message Clearing System transaction that has settlement impact.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...67; TAGLLLLVAR            |
| Tag Field           | 0299                            |
| Length Field        | 3 positions, value = 001-067    |
| Data Field          | Variable length, 1-67 positions |
| Subfields           | 9                               |
| Justification       | See subfields                   |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system provided, or not required) in applicable messages.

### Usage

| Message Type Identifier            | Org | Sys | Dst |
|------------------------------------|-----|-----|-----|
| First Presentment/1240             | .   | X   | C   |
| First Chargeback/1442              | C   | X   | C   |
| Arbitration Chargeback/1442        | C   | X   | C   |
| Second Presentment/1240            | C   | X   | C   |
| Fee Collection/1740 (VAT Eligible) | .   | X   | C   |

For Mexico Domestic Mastercard and RedMX Scheme Fee collection/1740s, the PDS 0299 will only be present if the DE 4 (Transaction, Amount) represents a VAT Eligible fee. For example, PDS 0299 will not be present on a good faith Fee Collection/1740 message because the amount in DE 4 represents a cardholder transaction amount and the settlement data will be present in PDS 0159.

The Dual Message Clearing System inserts PDS 0299 into all transactions with VAT eligible settlement impact for which the Dual Message Clearing System is responsible for managing funds settlement.

A transaction has settlement impact if it causes funds to be moved between customers or between the customer and Mastercard when the transaction is successfully completed.

In PDS 0298 (Amount, Mexico Domestic Transaction Fee), each occurrence of a transaction fee (subfield 7 [Amount, Fee, Reconciliation]), the settlement data is assigned to PDS 0299 for reconciliation, as indicated by the Fee Settlement Indicator subfield associated with each fee.

## PDS 0299 subfields

PDS 0299 consists of nine subfields.

### PDS 0299 subfields

| Number | Position(s) | Name                                        | Attribute   | Justification |
|--------|-------------|---------------------------------------------|-------------|---------------|
| 1      | 1-11        | Settlement Service Transfer Agent ID Code   | ans-11      | Right         |
| 2      | 12-39       | Settlement Service Transfer Agent Account   | ans-28      | Left          |
| 3      | 40          | Settlement Service Level Code               | n-1         | N/A           |
| 4      | 41-50       | Settlement Service ID Code                  | ans-10      | Left          |
| 5      | 51          | Settlement Foreign Exchange Rate Class Code | an-1        | N/A           |
| 6      | 52-57       | Reconciliation Date                         | n-6; YYMMDD | N/A           |
| 7      | 58-59       | Reconciliation Cycle                        | n-2         | N/A           |
| 8      | 60-65       | Settlement Date                             | n-6; YYMMDD | N/A           |
| 9      | 66-67       | Settlement Cycle                            | n-2         | N/A           |

### Subfield 1 (Settlement Service Transfer Agent ID Code)

Subfield 1 is space-filled. The Settlement Service Transfer Agent ID Code identifies the transfer agent ID selected for the receiving customer. The agent established one or more accounts with at least one bank approved to effect settlement with Mastercard. The agent's accounts are used for settling activity with Mastercard for itself, a customer or group of customers, or both. The Dual Message Clearing System always determines this subfield's data value.

### Subfield 1 (Settlement Service Transfer Agent ID Code)

| Attributes           | Description                |
|----------------------|----------------------------|
| Data Representation: | ans-11                     |
| Data Field:          | Contents of positions 1-11 |
| Justification:       | Right                      |

### Subfield 2 (Settlement Service Transfer Agent Account)

Subfield 2 contains the agent's bank account number for the receiving customer associated with the settlement service identified in subfield 4. The Dual Message Clearing System always determines this subfield's value.

### Subfield 2 (Settlement Service Transfer Agent Account)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | ans-28                      |
| Data Field:          | Contents of positions 12-39 |
| Justification:       | Left                        |

### Subfield 3 (Settlement Service Level Code)

Subfield 3 is a one-digit code that identifies the settlement level of the settlement service. The Dual Message Clearing System always determines this subfield's data value.

### Subfield 3 (Settlement Service Level Code)

| Attributes           | Description             |
|----------------------|-------------------------|
| Data Representation: | n-1                     |
| Data Field:          | Contents of position 40 |
| Justification:       | N/A                     |
| Values:              | 3 = Intracurrency       |

## Subfield 4 (Settlement Service ID Code)

Subfield 4 contains a 10-position value that uniquely identifies the settlement service. This subfield is populated according to the settlement service ID selected for the receiving customer. The Dual Message Clearing System always determines this subfield's data value.

### Subfield 4 (Settlement Service ID Code)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | ans-10                      |
| Data Field:          | Contents of positions 41-50 |
| Justification:       | Left                        |

## Subfield 5 (Settlement Foreign Exchange Rate Class Code)

Subfield 5 identifies the classification of foreign exchange rates used to compute payment amounts for this settlement service. The Dual Message Clearing System always determines this subfield's data value.

### Subfield 5 (Settlement Foreign Exchange Rate Class Code)

| Attributes           | Description                                                                                                                                                                                                                                                                                   |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data Representation: | an-1                                                                                                                                                                                                                                                                                          |
| Data Field:          | Contents of position 51                                                                                                                                                                                                                                                                       |
| Justification:       | N/A                                                                                                                                                                                                                                                                                           |
| Values:              | F = Fixed; indicates that a fixed rate class was used to convert from transaction currency to receiver's payment currency<br>M = Market; indicates that a market rate was used to convert from base currency to the receiver's payment currency<br>N = Not applicable; no conversion occurred |

## Subfield 6 (Reconciliation Data)

Subfield 6 is a six-digit subfield in the format YYMMDD that identifies the Dual Message Clearing System's processing date expressed in the local time zone of the clearing system's processing center.

Clearing reconciliation cutoffs may occur every day. The Dual Message Clearing System may process a transaction on a Sunday, but the transaction may not be settled until Monday if the settlement bank is not open on Sundays. If this occurs, the Dual Message Clearing System assigns the Sunday date to subfield 6 and assigns the Monday date to subfield 8.

The Dual Message Clearing System always determines this subfield's data value. The Dual Message Clearing System inserts the reconciliation date into any transaction to which it has assigned a Settlement Service Level Code and Settlement Service ID Code. This subfield contains the same value as PDS 0158 (Business Activity), subfield 5 (Central Site Business Date).

#### Subfield 6 (Reconciliation Date)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-6; YYMMDD                 |
| Data Field:          | Contents of positions 42-57 |
| Justification:       | N/A                         |

#### Subfield 7 (Reconciliation Cycle)

Subfield 7 is a two-digit subfield that identifies a reconciliation period in a reconciliation date.

The reconciliation cycle is adjusted at each clearing reconciliation cutoff. At cutoff, the reconciliation cycle is incremented by one unless the last cycle in the reconciliation date is being cutoff. In this case, the reconciliation date is incremented to the next available business day for the settlement service, and the reconciliation cycle is 01. The reconciliation cycles are assigned.

The Dual Message Clearing System always determines this subfield's data value. The Dual Message Clearing System inserts the reconciliation cycle into any transaction to which it assigned a settlement service level code and settlement service ID code. This subfield contains the same value as PDS 0158 (Business Activity), subfield 6 (Business Cycle).

#### Subfield 7 (Reconciliation Cycle)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-2                         |
| Data Field:          | Contents of positions 58-59 |
| Justification:       | N/A                         |

| Attributes | Description                                                                                  |
|------------|----------------------------------------------------------------------------------------------|
| Values:    | 01 = Cycle 1<br>02 = Cycle 2<br>03 = Cycle 3<br>04 = Cycle 4<br>05 = Cycle 5<br>06 = Cycle 6 |

## Subfield 8 (Settlement Date)

Subfield 8 is a six-digit subfield in the format YYMMDD that identifies the date that the settlement service initiates settlement for the message, such as the settlement advisement date, which is based on the clearing date, settlement service cutoff cycle, and calendar for the settlement service. Settlement service cutoffs occur only on banking business days the settlement service specifically identifies.

The Dual Message Clearing System may process a transaction on a Sunday but may not settle it until Monday if the settlement bank is not open on Sundays. If this occurs, the Dual Message Clearing System assigns the Sunday date to subfield 6 and assigns the Monday date to subfield 8.

The Dual Message Clearing System always determines this subfield's data value. The Dual Message Clearing System inserts the settlement date in any transaction to which it assigned a settlement service level code and settlement service ID code.

The settlement date is adjusted for each settlement service level and settlement service ID.

### Subfield 8 (Settlement Date)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-6; YYMMDD                 |
| Data Field:          | Contents of positions 60-65 |
| Justification:       | N/A                         |

## Subfield 9 (Settlement Cycle)

Subfield 9 is a two-digit subfield that identifies a settlement period in a settlement date. The settlement cycle is adjusted at each settlement service reconciliation cutoff. The settlement cycle is assigned.

Clearing file activity senders and receivers should anticipate that additional settlement cycle cutoffs will be added over time to support regional and local needs. All customers and processors should be prepared to receive and reconcile against multiple settlement cycles.

### Subfield 9 (Settlement Cycle)

| Attributes           | Description                 |
|----------------------|-----------------------------|
| Data Representation: | n-2                         |
| Data Field:          | Contents of positions 66-67 |
| Justification:       | N/A                         |
| Values:              | 01 = Cycle 1                |

## PDS 0300 (Reconciled, File)

PDS 0300 (Reconciled, File) identifies in Reconciliation messages the logical file to which the reconciliation totals pertain.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-25; TAGLLL               |
| Tag Field           | 0300                       |
| Data Length         | 3 positions, value = 025   |
| Data Field          | Fixed length, 25 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                    | Org | Sys | Dst |
|----------------------------|-----|-----|-----|
| File Currency Summary/1644 | .   | X   | M   |

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | C   |
| Settlement Position Detail/1644 | .   | X   | M   |

In reconciliation messages, this PDS contains PDS 0105 (File ID) of the offline clearing logical file to which the reconciliation totals apply.

Multiple logical files may be present in a physical clearing transmission.

## PDS 0300 subfields

This PDS contains four subfields.

For customers requesting the early reconciliation file, this category is always provided.

### PDS 0300 subfields

| Number | Positions | Name                                                                                                                                                                                                                                                                                                                                                      | Attribute | Justification |
|--------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|---------------|
| 1      | 1-3       | File Type                                                                                                                                                                                                                                                                                                                                                 | n-3       | N/A           |
| 2      | 4-9       | File Reference Date                                                                                                                                                                                                                                                                                                                                       | n-6       | N/A           |

| 4      | 21-25     | File Sequence Number<br>For acknowledgments, this field contains the value assigned by the sending customer.<br>For notifications, these Mastercard® formats apply: <ul style="list-style-type: none"> <li>• Clearing Cycle (positions 21-22)</li> <li>• Delivery Cycle (position 23, values 1-6)</li> <li>• Sequence Number (positions 24-25)</li> </ul> | n-5       | right         |

Refer to [PDS 0105 \(File ID\)](#) for descriptions of these subfields.

## PDS 0301 (File Amount, Checksum)

PDS 0301 (File Amount, Checksum) provides a preliminary quick check for the file recipient to indicate or to determine that it received all messages in a file.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-16; TAGLLL               |
| Tag Field           | 0301                       |
| Data Length         | 3 positions, value = 016   |
| Data Field          | Fixed length, 16 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                       | Org | Sys | Dst |
|-----------------------------------------------|-----|-----|-----|
| File Trailer (Customer-generated)/1644        | M   | .   | .   |
| File Trailer (Clearing System-generated)/1644 | .   | X   | C   |

This PDS contains the sum amount of all amounts from each occurrence of DE 4 (Amount, Transaction) in a logical file.

This sum is a hash total only, and ignores the currency code and currency exponent associated with DE 4 in all cases.

This hash total includes only data from DE 4 when present in a message. This PDS is not present in early Reconciliation messages. It does not include any fee amounts.

Originators may provide all zeros in this field. If PDS 0301 contains a value other than all zeros, the clearing system validates PDS 0301 against the sum of all amounts in each occurrence of DE 4 within the logical file. The entire logical file rejects if the values do not match.

## Values

This PDS has no financial value.

The checksum amount is always initialized to zero before processing messages. If no messages in the file contain DE 4, the checksum amount remains all zeros.

## PDS 0302 (Reconciled, Member Activity)

PDS 0302 (Reconciled, Member Activity) indicates in reconciliation messages whether the related reconciliation totals represent acquiring activity, issuing activity, or fee collection activity.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | a-1; TAGLLL              |
| Tag Field           | 0302                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | C   |
| Settlement Position Detail/1644 | .   | X   | C   |

This PDS indicates in reconciliation messages whether the related reconciliation totals represent acquiring activity, issuing activity, or fee collection activity. Refer to [Reconciliation messages](#) for additional information about classifying activity into one of these categories.

For Settlement Position Detail/1644 messages, PDS 0302 is provided automatically if the customer selects the acquirer BIN or issuer account range settlement reconciliation categories.

## Values

The data values are listed in this table.

### Values

| Value | Description             |
|-------|-------------------------|
| A     | Acquiring activity      |
| I     | Issuing activity        |
| F     | Fee collection activity |

## PDS 0306 (File Message Counts)

PDS 0306 (File Message Counts) provides a preliminary quick check for the file recipient to indicate that all records in a file have been received.

PDS 0306 contains the total number of messages in the file.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-8; TAGLLL               |
| Tag Field           | 0306                      |
| Data Length         | 3 positions, value = 008  |
| Data Field          | Fixed length, 8 positions |
| Subfields           | None                      |
| Justification       | Right                     |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                | Org | Sys | Dst |
|----------------------------------------|-----|-----|-----|
| File Trailer (Customer-generated)/1644 | M   | .   | .   |

| Message                                       | Org | Sys | Dst |
|-----------------------------------------------|-----|-----|-----|
| File Trailer (Clearing System-generated)/1644 | .   | X   | M   |

This PDS contains the total count of messages occurring in a logical file, including the File Header (Customer-generated or Clearing System-generated)/1644 and File Trailer (Customer-generated or Clearing System-generated)/1644. This PDS is provided in File Trailer (Customer-generated)/1644 and File Trailer (Clearing System-generated)/1644 messages.

Originators may provide all zeros in this field. If PDS 0306 contains a value other than all zeros, the clearing system validates PDS 0306 against the total of all messages in the logical file, including the File Header/1644 and File Trailer/1644. The entire logical file rejects if the counts do not match.

## PDS 0358 (Reconciled, Business Activity)

PDS 0358 (Reconciled, Business Activity) identifies in reconciliation messages the business activity to which the reconciliation totals pertain.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...34; TAGLLLLVAR               |
| Tag Field           | 0358                               |
| Data Length         | 3 positions, value = 003–031       |
| Data Field          | Variable length, 003–031 positions |
| Subfields           | 15                                 |
| Justification       | See "Subfields"                    |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | C   |

This PDS reflects in Reconciliation messages, the PDS 0158 (Business Activity) to which the related reconciliation totals apply.

## PDS 0358 subfields

This PDS consists of 15 subfields.

### PDS 0358 subfields

| Number | Positions | Name                                           | Attribute | Justification |
|--------|-----------|------------------------------------------------|-----------|---------------|
| 1      | 1-3       | Card Program Identifier                        | an-3      | N/A           |
| 2      | 4         | Business Service Arrangement Type Code         | n-1       | N/A           |
| 3      | 5-10      | Business Service ID Code                       | an-6      | N/A           |
| 4      | 11-12     | Interchange Rate Designator                    | ans-2     | N/A           |
| 5      | 13-18     | Business Date (YYMMDD)                         | n-6       | N/A           |
| 6      | 19-20     | Business Cycle                                 | n-2       | N/A           |
| 7      | 21        | Acceptor Classification Override Indicator     | ans-1     | N/A           |
| 8      | 22        | Product Class Override Indicator               | ans-3     | N/A           |
| 9      | 25        | Corporate Incentive Rates Apply Indicator      | ans-1     | N/A           |
| 10     | 26        | Special Conditions Indicator                   | ans-1     | N/A           |
| 11     | 27        | Mastercard Assigned ID Override Indicator      | ans-1     | N/A           |
| 12     | 28        | Account Level Management Account Category Code | ans-1     | N/A           |
| 13     | 29        | Rate Indicator                                 | ans-1     | N/A           |
| 14     | 30        | Masterpass Incentive Indicator                 | an...1    | N/A           |
| 15     | 31        | Digital Wallet Interchange Override Indicator  | an...1    | N/A           |

Refer to [PDS 0158 \(Business Activity\)](#) for descriptions of these subfields.

## PDS 0359 (Reconciled, Settlement Activity)

PDS 0359 (Reconciled, Settlement Activity) identifies in reconciliation messages the settlement activity to which the reconciliation totals pertain.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans....67; TAGLLLLVAR           |
| Tag Field           | 0359                            |
| Data Length         | 3 positions, value = 001-067    |
| Data Field          | Variable length, 1-67 positions |
| Subfields           | 9                               |
| Justification       | See "Subfields"                 |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Settlement Position Detail/1644 | .   | X   | C   |

In reconciliation messages, this PDS reflects the settlement activity (PDS 0159 [Settlement Data]) to which the related reconciliation totals apply.

## PDS 0359 subfields

This PDS consists of nine subfields.

### PDS 0359 subfields

| Number | Positions | Name                                      | Attribute | Justification |
|--------|-----------|-------------------------------------------|-----------|---------------|
| 1      | 1-11      | Settlement Service Transfer Agent ID Code | ans-11    | left          |

| Number | Positions | Name                                        | Attribute     | Justification |
|--------|-----------|---------------------------------------------|---------------|---------------|
| 2      | 12–39     | Settlement Service Transfer Agent Account   | ans-28        | left          |
| 3      | 40        | Settlement Service Level Code               | n-1           | right         |
| 4      | 41–50     | Settlement Service ID Code                  | ans-10        | left          |
| 5      | 51        | Settlement Foreign Exchange Rate Class Code | an-1          | N/A           |
| 6      | 52–57     | Reconciliation Date                         | n-6; YYYYMMDD | N/A           |
| 7      | 58–59     | Reconciliation Cycle                        | n-2           | N/A           |
| 8      | 60–65     | Settlement Date                             | n-6; YYYYMMDD | N/A           |
| 9      | 66–67     | Settlement Cycle                            | n-2           | N/A           |

Refer to [PDS 0159 \(Settlement Data\)](#) for descriptions of these subfields.

## PDS 0360 (Reconciled, Transaction Sequence Identifier)

PDS 0360 (Reconciled, Transaction Sequence Identifier) identifies the ordering sequence number pertaining to reconciliation totals.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-10; TAGLLL               |
| Tag Field           | 0360                       |
| Length Field        | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

The following table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | C   |
| Settlement Position Detail/1644 | .   | X   | C   |
| File Currency Summary/1644      | .   | X   | C   |

### PDS 0360 subfields

This PDS consists of two subfields.

### Subfield attributes and values

| Number | Positions | Name                           | Attribute | Justification |
|--------|-----------|--------------------------------|-----------|---------------|
| 1      | 1–5       | Current Sequence Number        | n-5       | Right         |
| 2      | 6–10      | Total Number of Message Splits | n-5       | Right         |

**NOTE: PDS 0360 will be present only if a split amount is required.**

PDS 0360 indicates that there has been a split in the reconciliation total reported in reconciliation messages. The subfields indicate the sequence and the total number of message splits.

For example, assume that GCMS calculates a reconciliation amount of 19,999,999,999,999,999 (17 digits).

The current GCMS functionality will truncate (drop) the leftmost digit when placing this amount into PDS 0396 (Amount, Net Total in Reconciliation Currency). The resulting amount of 9,999,999,999,999,999 (16 digits) will present in a single 1644-685 message.

Continuing with the example above, the GCMS functionality will split that single reconciliation amount into multiple amounts (in this case, specifically three amounts) and include each amount in three separate 1644-685 reconciliation messages. The sum total of those three amounts will equal the total reconciliation amount.

Additionally, to simplify customer reconciliation processing, GCMS will insert PDS 0360 into each of those reconciliation messages to provide the sequence number of each related message and the total number of messages pertaining to given split amount, as follows:

1. PDS 0360 subfield 1 = 00001, PDS 0360 subfield 2 = 00003 and PDS 0396 = 9999999999999999 (16 positions)
2. PDS 0360 subfield 1 = 00002, PDS 0360 subfield 2 = 00003 and PDS 0396 = 9999999999999999 (16 positions)
3. PDS 0360 subfield 1 = 00003, PDS 0360 subfield 2 = 00003 and PDS 0396 = 0000000000000001 (16 positions)

The total reconciliation amount can then be calculated as: 9,999,999,999,999,999 + 9,999,999,999,999,999 + 0000000000000001 = 19,999,999,999,999,999

All of the related 1644-685 messages for a given split will always be sent in the proper order and always sent together sequentially. Mastercard will never intermix 1644-685 messages from unrelated splits, nor will Mastercard ever separate the messages belonging to a split with a single message that is not related to any split whatsoever.

## PDS 0367 (Reconciled, Card Program Identifier)

PDS 0367 (Reconciled, Card Program Identifier) in reconciliation messages provides the specific reconciliation totals by card program identifier.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0367                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Settlement Position Detail/1644 | .   | X   | C   |

## Values

Refer to PDS 0158, [Subfield 1 \(Card Program Identifier\)](#) for a list of valid values.

## PDS 0368 (Reconciled, Transaction Function Group Code)

PDS 0368 (Reconciled, Transaction Function Group Code) in reconciliation messages provides the specific transaction function group that pertains to the reconciliation totals.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-2; TAGLLL             |
| Tag Field           | 0368                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | Left                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Settlement Position Detail/1644 | .   | X   | C   |

In reconciliation messages, this PDS reflects the specific transaction function group code to which the related reconciliation totals apply. Transaction function group code refers to a combination of MTI and DE 24 (Function Code) that provides a method of uniquely identifying financial transaction categories.

## Values

This table lists the transaction functions that are supported in each transaction function group code.

### Values

| Transaction Function Group Description and MTI | Transaction Function Group Code | IPM DE 24 Function (includes both originals and reversals) |
|------------------------------------------------|---------------------------------|------------------------------------------------------------|
| First Presentment/1240                         | FP                              | 200                                                        |
| Second Presentment/1240                        | SP                              | 205 Full and 282 Partial                                   |
| First Chargeback/1442                          | FC                              | 450 Full and 453 Partial                                   |
| Arbitration Chargeback/1442                    | AC                              | 451 Full and 454 Partial                                   |
| Fee Collections/1740                           | FE                              | 700, 780, 781, 782, and 783                                |

## PDS 0369 (Reconciled, Acquirer's BIN)

PDS 0369 (Reconciled, Acquirer's BIN) in reconciliation messages provides the specific acquirer's BIN that pertains to the reconciliation totals.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0369                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Settlement Position Detail/1644 | .   | X   | C   |

In reconciliation messages, this PDS reflects the specific customer BIN (obtained from DE 31 [Acquirer's Reference Data], positions 2–7) that apply to the related reconciliation totals. Customers selecting this reconciliation category will receive totals only for their own acquiring BINs that have been established at Mastercard.

If the Reconciled, Acquirer's BIN reconciliation category is selected, the Reconciled, Member Activity reconciliation category will be automatically provided to ensure that the customer receives totals by acquiring BIN, issuing activity, and fee collection activity to provide complete reconciliation information.

### Values

PDS 0369 contains the acquirer's BIN from DE 31, positions 2–7.

## PDS 0370 (Reconciled, Account Range)

PDS 0370 (Reconciled, Account Range) identifies in reconciliation messages the specific customer issuing account range to which the reconciliation totals pertain.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | n...38; TAGLLLVAR                |
| Tag Field           | 0370                             |
| Data Length         | 3 positions, value = 019–038     |
| Data Field          | Variable length, 19–38 positions |
| Subfields           | 2                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | C   |
| Settlement Position Detail/1644 | .   | X   | C   |

This PDS reflects in reconciliation messages, the specific customer account range (obtained from the account range portion of DE 2 [Primary Account Number {PAN}]) to which the related reconciliation totals apply. Customers selecting this reconciliation category receive totals only for their own issuing account ranges that have been established at Mastercard®.

If the Reconciled, Account Range reconciliation category is selected as a clearing reconciliation category, GCMS automatically will accumulate totals for the Reconciled, Member Activity category. This ensures that the customer also receives totals for their acquiring activity and fee collection activity to provide complete reconciliation information.

### PDS 0370 subfields

This PDS consists of two subfields.

#### PDS 0370 subfields

| Number | Positions | Name                       | Attribute | Justification |
|--------|-----------|----------------------------|-----------|---------------|
| 1      | 1-19      | Beginning Account Range ID | n-19      | N/A           |
| 2      | 20-38     | Ending Account Range ID    | n-19      | N/A           |

Account ranges are profiled for each issuer customer ID.

### PDS 0372 (Reconciled, Transaction Function)

PDS 0372 (Reconciled, Transaction Function) identifies in reconciliation messages the transaction function to which the reconciliation totals pertain.

#### Attributes

| Attribute           | Description |
|---------------------|-------------|
| Data Representation | n-7; TAGLLL |
| Tag Field           | 0372        |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Length   | 3 positions, value = 007  |
| Data Field    | Fixed length, 7 positions |
| Subfields     | 2                         |
| Justification | See "Subfields"           |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | C   |

This PDS reflects in reconciliation messages, the transaction function to which the related reconciliation totals apply. A transaction function consists of MTI and DE 24 (Function Code).

## Values

Refer to [DE 24 \(Function Code\)](#) for a list of valid transaction function codes.

## PDS 0372 subfields

This PDS consists of two subfields.

## PDS 0372 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1-4       | Message Type Identifier | n-4       | right         |
| 2      | 5-7       | Function Code           | n-3       | right         |

## PDS 0374 (Reconciled, Processing Code)

PDS 0374 (Reconciled, Processing Code) identifies in reconciliation messages the processing code, or transaction type, to which the reconciliation totals pertain.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-2; TAGLLL               |
| Tag Field           | 0374                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | C   |

This PDS reflects in reconciliation messages, subfield 1 (Cardholder Transaction Type), of DE 3 (Processing Code) to which the related reconciliation totals apply.

### Values

Refer to [DE 3 \(Processing Code\)](#), subfield 1, for a list of values.

## PDS 0375 (Member Reconciliation Indicator 1)

PDS 0375 (Member Reconciliation Indicator 1) contains a proprietary value a transaction originator defines that may be assigned to its outgoing financial messages.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...50; TAGLLLLVAR            |
| Tag Field           | 0375                            |
| Data Length         | 3 positions, value = 001–050    |
| Data Field          | Variable length, 1–50 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                              | Org | Sys | Dst |
|----------------------------------------------------------------------|-----|-----|-----|
| First Presentment/1240                                               | O   | .   | .   |
| First Chargeback/1442 and Arbitration Chargeback/1442                | O   | .   | .   |
| Second Presentment/1240                                              | O   | .   | .   |
| Financial Position Detail/1644                                       | .   | X   | C   |
| Retrieval Request/1644                                               | O   | .   | .   |
| Retrieval Request Acknowledgment/1644                                | O   | .   | .   |
| Fee Collection (Retrieval Fee Billing)/1740                          | O   | .   | .   |
| Fee Collection (Handling Fees)/1740                                  | O   | .   | .   |
| Fee Collection (Other than Retrieval Fee Billing/Handling Fees)/1740 | O   | .   | .   |

Customers can assign a proprietary value to PDS 0375 and include it in any financial message. If an originating customer provides PDS 0375 in financial messages and chooses to receive

Reconciliation messages at this level, the clearing system provides reconciliation totals based on the unique values present. For Business Service Arrangements that qualify for the Extended Precision Decimal Service, acquirers are allowed to submit PDS 0375, however, it will have the value Undefined applied to it. This ensures that the acknowledgment reconciliation provided represents all of the accepted financial activity to the customer for that file.

For any First Presentment/1240, Retrieval Request/1644, Retrieval Request Acknowledgment/1644, or Fee Collection/1740 Messages that do not contain PDS 0375, the clearing system will create an acknowledgment message with a Member Reconciliation indicator 1 value of Undefined. This will ensure that the Acknowledgment reconciliation provided represents 100 percent of the accepted financial activity of the customer for that file. The value in PDS 0300 (Reconciled, File) will also be Undefined.

For example, an acquirer that wants to receive reconciliation totals for a specific acceptor chain could populate this PDS with the chain descriptor. Then the clearing system would accumulate totals based on this value in addition to the other reconciliation options the acquirer selects.

This PDS is available only for Acknowledgment Reconciliation messages.

### Values

The transaction originator assigns PDS 0375 values. If present, PDS 0375 must be left-justified and cannot contain all spaces, all zeros, all low values, or all high values.

## PDS 0378 (Original/Reversal Totals Indicator)

PDS 0378 (Original/Reversal Totals Indicator) indicates in reconciliation messages whether the related reconciliation totals represent original transactions or reversal transactions.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | a-1; TAGLLL              |
| Tag Field           | 0378                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | C   |

This PDS indicates in reconciliation messages whether the related reconciliation totals represent original activity or reversal activity. Amounts are accumulated as original activity if PDS 0025 (Reversal Indicator) is not present in the message or if the transaction is a re-submission (subfield 1 of PDS 0025 contains a space and subfield 2 contains a date). Amounts are accumulated as reversal activity if PDS 0025 is present in the message and subfield 1 contains an R.

### Values

This table shows the values that may be provided in this PDS.

### Values

| Value | Description              |
|-------|--------------------------|
| O     | Original message amounts |
| R     | Reversal message amounts |

## PDS 0380 (Debits, Transaction Amount In Transaction Currency)

PDS 0380 (Debits, Transaction Amount in Transaction Currency) provides in reconciliation messages the total of transaction amounts that have a debit impact on processing. The total is in the transaction currency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-17; TAGLLL             |
| Tag Field           | 0380                      |
| Data Length         | 3 positions, value = 017  |
| Data Field          | Fixed length, 17 position |
| Subfields           | 2                         |

| Attribute     | Description     |
|---------------|-----------------|
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| File Currency Summary/1644     | .   | X   | M   |
| Financial Position Detail/1644 | .   | X   | C   |

This PDS provides, in reconciliation messages, totals in the transaction currency of transaction amounts with a debit impact to processing. The clearing system accumulates DE 4 (Amount, Transaction) values for each message in which DE 3 (Processing Code) indicates a debit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

## Values

This PDS may contain zeros if the processed file contained only non-financial messages and the value of DE 25 (Message Reason Code) = 6861 (Acknowledgment).

## PDS 0380 subfields

This PDS consists of two subfields.

### PDS 0380 subfields

| Number | Positions | Name                   | Attribute           | Justification |
|--------|-----------|------------------------|---------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; constant,<br>D | N/A           |
| 2      | 2-17      | Amount, Transaction    | n-16                | right         |

## PDS 0381 (Credits, Transaction Amount in Transaction Currency)

PDS 0381 (Credits, Transaction Amount in Transaction Currency) provides in reconciliation messages the total of transaction amounts that have a credit impact on processing. The total is in the transaction currency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-17; TAGLLL             |
| Tag Field           | 0381                      |
| Data Length         | 3 positions, value = 017  |
| Data Field          | Fixed length, 17 position |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| File Currency Summary/1644     | .   | X   | M   |
| Financial Position Detail/1644 | .   | X   | C   |

This PDS provides, in reconciliation messages, totals in the transaction currency of transaction amounts with a credit impact to processing. The clearing system accumulates DE 4 (Amount, Transaction) values for each message in which DE 3 (Processing Code) indicates a credit impact on processing to the appropriate customer. Refer to for additional information on classifying activity as debit impact versus credit impact.

### Values

This PDS may contain zeros if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

## PDS 0381 subfields

This PDS consists of two subfields.

### PDS 0381 subfields

| Number | Positions | Name                   | Attribute       | Justification |
|--------|-----------|------------------------|-----------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; constant-C | N/A           |
| 2      | 2–17      | Amount, Transaction    | n-16            | right         |

## PDS 0384 (Amount, Net Transaction in Transaction Currency)

PDS 0384 (Amount, Net Transaction in Transaction Currency) provides in reconciliation messages the net total of transaction amounts that have a debit impact on processing and those that have a credit impact on processing. The net total is in the transaction currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-17; TAGLLL              |
| Tag Field           | 0384                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                    | Org | Sys | Dst |
|----------------------------|-----|-----|-----|
| File Currency Summary/1644 | .   | X   | M   |

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | C   |

This PDS provides, in reconciliation messages, net totals in the transaction currency of transaction amounts with a debit impact to settlement and those with a credit impact to settlement.

If the amount in PDS 0380 (Debits, Transaction Amount in Transaction Currency) is greater than the amount in PDS 0381 (Credits, Transaction Amount in Transaction Currency), the clearing system inserts a D in subfield 1 of PDS 0384 and inserts the excess amount in subfield 2 of PDS 0384.

If the amount in PDS 0381 is greater than the amount in PDS 0380, the clearing system inserts a C in subfield 1 of PDS 0384 and inserts the excess amount in subfield 2 of PDS 0384.

### Values

This PDS may contain zeros if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

## PDS 0384 subfields

This PDS consists of two subfields.

### PDS 0384 subfields

| Number | Positions | Name                   | Attribute         | Justification |
|--------|-----------|------------------------|-------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D or C | N/A           |
| 2      | 2-17      | Amount, Net            | n-16              | right         |

## PDS 0385 (Debits, Mexico Domestic VAT Amount in Reconciliation Currency)

PDS 0385 (Debits, Mexico Domestic VAT Amount in Reconciliation Currency) provides in reconciliation messages the total of VAT amounts that have a debit impact on processing. The total is in the reconciliation currency.

### Attributes

| Attribute           | Description                                                  |
|---------------------|--------------------------------------------------------------|
| Data Representation | an...57; TAGLLL                                              |
| Tag Field           | 0385                                                         |
| Length Field        | 3 positions; Value = 019 - 057 positions in increments of 19 |
| Data Field          | Variable length, 019 - 057                                   |
| Subfields           | 3                                                            |
| Occurrences         | 1-3                                                          |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system provided, or not required) in applicable messages.

### Usage

| Message Type Identifier             | Org | Sys | Dst |
|-------------------------------------|-----|-----|-----|
| Financial Position Detail/1644-685  | •   | X   | C   |
| Settlement Position Detail/1644-688 | •   | X   | C   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of VAT amounts with a debit impact to processing. The Dual Message Clearing System accumulates all occurrences of PDS 0297 (Amounts, Mexico Domestic Amount VAT), subfield 2 (Amount, Tax) for each message in which PDS 0297, subfield 5 (Debit/Credit Indicator) indicates a debit impact on processing to the appropriate customer.

Refer to Reconciliation messages for additional information on classifying activity as debit impact versus credit impact. The Financial Position Detail/1644 and the Settlement Position Detail/1644 messages both will contain totals in the receiving customer's reconciliation currency.

## Values

This element contains the sum of PDS 0297 by currency identified in DE 50 (Currency Code, Reconciliation).

## PDS 0385 subfields

PDS 0385 consists of three subfields.

### PDS 0385 subfields

| Number | Position(s) | Name                    | Attribute         | Justification |
|--------|-------------|-------------------------|-------------------|---------------|
| 1      | 1-3         | Rate Type Code          | n-3               | N/A           |
| 2      | 4           | Debit/Credit Indicator  | a-1; Constant - D | N/A           |
| 3      | 5-19        | Amount, Value Added Tax | n-15              | Right         |

## PDS 0386 (Credits, Mexico Domestic VAT Amount in Reconciliation Currency)

PDS 0386 (Credits, Mexico Domestic VAT Amount in Reconciliation Currency) provides in reconciliation messages the total of VAT amounts that have a credit impact on processing. The total is in the reconciliation currency.

### Attributes

| Attribute           | Description                                                  |
|---------------------|--------------------------------------------------------------|
| Data Representation | an...57; TAGLLL                                              |
| Tag Field           | 0386                                                         |
| Length Field        | 3 positions, Value = 019 - 057 positions in increments of 19 |
| Data Field          | Variable length, 019 - 057                                   |
| Subfields           | 3                                                            |
| Occurrences         | 1-3                                                          |
| Justification       | See subfields                                                |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system provided, or not required) in applicable messages.

### Usage

| Message Type Identifier             | Org | Sys | Dst |
|-------------------------------------|-----|-----|-----|
| Financial Position Detail/1644-685  | •   | X   | C   |
| Settlement Position Detail/1644-688 | •   | X   | C   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of VAT amounts with a credit impact to processing. The Dual Message Clearing System accumulates all occurrences of PDS 0297 (Amounts, Mexico Domestic Amount VAT), subfield 2 (Amount, Tax) for each message in which PDS 0297, subfield 5 (Debit/Credit Indicator) of PDS 0297 indicates a credit impact on processing to the appropriate customer.

Refer to Reconciliation messages for additional information on classifying activity as debit impact versus credit impact. The Financial Position Detail/1644 and the Settlement Position Detail/1644 messages both will contain totals in the receiving customer's reconciliation currency.

## Values

This element contains the sum of PDS 0297 by currency identified in DE 50 (Currency Code, Reconciliation).

## PDS 0386 subfields

PDS 0386 contains three subfields.

### PDS 0386 subfields

| Number | Position(s) | Name                    | Attribute         | Justification |
|--------|-------------|-------------------------|-------------------|---------------|
| 1      | 1-3         | Rate Type Code          | n-3               | N/A           |
| 2      | 4           | Debit/Credit Indicator  | a-1; Constant - C | N/A           |
| 3      | 5-19        | Amount, Value Added Tax | n-15              | Right         |

## PDS 0387 (Amount, Net Mexico Domestic VAT in Reconciliation Currency)

PDS 0387 (Amount, Net Mexico Domestic VAT in Reconciliation Currency) provides in reconciliation messages net total of VAT amounts that have a debit impact on processing and those that have a credit impact on processing. The net total is in the reconciliation currency.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | an-16; TAGLLL               |
| Tag Field           | 0387                        |
| Length Field        | 3 positions, Value = 016    |
| Data Field          | Fixed length, 016 positions |
| Subfields           | 2                           |
| Justification       | See subfields               |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system provided, or not required) in applicable messages.

### Usage

| Message Type Identifier            | Org | Sys | Dst |
|------------------------------------|-----|-----|-----|
| Financial Position Detail/1644-685 | .   | X   | C   |
| Settlement Position/1644-688       | .   | X   | C   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of VAT amounts with a debit impact to processing and those with a credit impact to processing.

If the sum of all amounts in PDS 0385 (Debits, VAT Amounts in Reconciliation Currency) is greater than the sum of all amounts in PDS 0386 (Credits, VAT Amounts in Reconciliation Currency), the Dual Message Clearing System inserts a D in PDS 0387, subfield 1 (Debit/Credit Indicator) and inserts the excess amount in PDS 0387, subfield 2 (Amount, Net Value Added Tax).

If the sum of all amounts in PDS 0386 is greater than the sum of all amounts in PDS 0385, the Dual Message Clearing System inserts a C in PDS 0387, subfield 1 and inserts the excess amount in PDS 0387, subfield 2.

The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

### Values

This element contains the sum of PDS 0297 by currency identified in DE 50 (Currency Code, Reconciliation).

## PDS 0387 subfields

PDS 0387 consists of two subfields.

### PDS 0387 subfields

| Number | Position(s) | Name                        | Attribute         | Justification |
|--------|-------------|-----------------------------|-------------------|---------------|
| 1      | 1           | Debit/Credit Indicator      | a-1; Value D or C | N/A           |
| 2      | 2-16        | Amount, Net Value Added Tax | n-15              | Right         |

## PDS 0390 (Debits, Transaction Amount in Reconciliation Currency)

PDS 0390 (Debits, Transaction Amount in Reconciliation Currency) provides in reconciliation messages the total of transaction amounts that have a debit impact on processing. The total is in the message receiver's reconciliation currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-17; TAGLLL              |
| Tag Field           | 0390                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | M   |
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of transaction amounts with a debit impact to processing. The clearing system accumulates DE 5 (Amount, Reconciliation) for each message in which DE 3 (Processing Code) indicates a debit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

The Financial Position Detail/1644 and the Settlement Position Detail/1644 messages all contain totals in the receiving customer's reconciliation currency.

### Values

This PDS may contain zeros in the acknowledgment reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of DE 5 by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

### PDS 0390 subfields

This PDS consists of two subfields

#### PDS 0390 subfields

| Number | Positions | Name                   | Attribute    | Justification |
|--------|-----------|------------------------|--------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D | N/A           |
| 2      | 2-17      | Amount, Transaction    | n-16         | right         |

## PDS 0391 (Credits, Transaction Amount in Reconciliation Currency)

PDS 0391 (Credits, Transaction Amount in Reconciliation Currency) provides in reconciliation messages the total of transaction amounts that have a credit impact on processing. The total is in the reconciliation currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-17; TAGLLL              |

| Data Field          | Fixed length, 17 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | M   |
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of transaction amounts with a credit impact to processing. The clearing system accumulates DE 5 (Amount, Reconciliation) for each message in which DE 3 (Processing Code) indicates a credit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

The Financial Position Detail/1644 and the Settlement Position Detail/1644 messages both contain totals in the receiving customer's reconciliation currency.

## Values

This PDS may contain zeros in the acknowledgment reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of DE 5 by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

## PDS 0391 subfields

This PDS consists of two subfields.

### PDS 0391 subfields

| Number | Positions | Name                   | Attribute       | Justification |
|--------|-----------|------------------------|-----------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; constant-C | N/A           |
| 2      | 2-17      | Amount, Transaction    | n-16            | right         |

## PDS 0392 (Debits, Fee Amounts in Reconciliation Currency)

PDS 0392 (Debits, Fee Amounts in Reconciliation Currency) provides in reconciliation messages the total of fee amounts that have a debit impact on processing. The total is in the reconciliation currency.

### Attributes

| Attribute           | Description                                      |

| Data Representation | an...216; TAGLLLLVAR                             |
| Tag Field           | 0392                                             |
| Data Length         | 3 positions, value = 018-216 in increments of 18 |
| Data Field          | Variable length, 18-216 positions                |
| Subfields           | 3                                                |
| Occurrences         | 1-12                                             |
| Justification       | See "Subfields"                                  |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | M   |
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of fee amounts with a debit impact to processing. The clearing system accumulates all occurrences of subfield 7, Amount, Fee, Reconciliation, of PDS 0146 (Amounts, Transaction Fee) for each message in which subfield 2, Fee Processing Code, of PDS 0146 indicates a debit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

The Financial Position Detail/1644 and the Settlement Position Detail/1644 messages both will contain totals in the receiving customer's reconciliation currency.

## Values

This PDS may contain zeros in the acknowledgment reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of PDS 0146 by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

## PDS 0392 subfields

This PDS consists of three subfields.

### PDS 0392 subfields

| Number | Positions | Name                   | Attribute       | Justification |
|--------|-----------|------------------------|-----------------|---------------|
| 1      | 1-2       | Fee Type Code          | n-2             | N/A           |
| 2      | 3         | Debit/Credit Indicator | a-1; constant-D | N/A           |
| 3      | 4-18      | Amount, Fee            | n-15            | N/A           |

## PDS 0393 (Credits, Fee Amounts in Reconciliation Currency)

PDS 0393 (Credits, Fee Amounts in Reconciliation Currency) provides in reconciliation messages the total of fee amounts that have a credit impact on processing. The total is in the reconciliation currency.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | an...216; TAGLLLLVAR                             |
| Tag Field           | 0393                                             |
| Data Length         | 3 positions, value = 018–216 in increments of 18 |
| Data Field          | Variable length, 18–216 positions                |
| Subfields           | 3                                                |
| Occurrences         | 1–12                                             |
| Justification       | See "Subfields"                                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | •   | X   | M   |
| Settlement Position Detail/1644 | •   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, totals in the reconciliation currency of fee amounts with a credit impact to processing. The clearing system accumulates all occurrences of subfield 7, Amount, Fee, Reconciliation, of PDS 0146 (Amounts, Transaction Fee) for each message in which subfield 2, Fee Processing Code, of PDS 0146 indicates a credit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

## Values

This PDS may contain zeros in the Acknowledgment Reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of PDS 0146 by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

## PDS 0393 subfields

This PDS consists of three subfields.

### PDS 0393 subfields

| Number | Positions | Name                   | Attribute       | Justification |
|--------|-----------|------------------------|-----------------|---------------|
| 1      | 1–2       | Fee Type Code          | n-2             | N/A           |
| 2      | 3         | Debit/Credit Indicator | a-1; constant-C | N/A           |
| 3      | 4–18      | Amount, Fee            | n-15            | N/A           |

## PDS 0394 (Amount, Net Transaction in Reconciliation Currency)

PDS 0394 (Amount, Net Transaction in Reconciliation Currency) provides in reconciliation messages the net total of the transaction amounts that have a debit impact on processing and those that have a credit impact on processing. The net total is in the reconciliation currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-17; TAGLLL              |
| Tag Field           | 0394                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | M   |
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides in Reconciliation/1644 messages, net totals in the reconciliation currency of transaction amounts with a debit impact to processing and those with a credit impact to processing.

If the amount in PDS 0390 (Debits, Transaction Amount in Reconciliation Currency) is greater than the amount in PDS 0391 (Credits, Transaction Amount in Reconciliation Currency), the clearing system inserts a D in subfield 1 of PDS 0394 and inserts the excess amount in subfield 2 of PDS 0394.

If the amount in PDS 0391 is greater than the amount in PDS 0390, the clearing system inserts a C in subfield 1 of PDS 0394 and inserts the excess amount in subfield 2 of PDS 0394.

The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

## Values

This PDS may contain zeros in the Acknowledgment Reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of DE 5 (Amount, Reconciliation) by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

## PDS 0394 subfields

This PDS consists of two subfields.

### PDS 0394 subfields

| Number | Positions | Name                   | Attribute         | Justification |
|--------|-----------|------------------------|-------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D or C | N/A           |
| 2      | 2-17      | Amount, Net            | n-16              | right         |

## PDS 0395 (Amount, Net Fee in Reconciliation Currency)

PDS 0395 (Amount, Net Fee in Reconciliation Currency) provides in reconciliation messages the net total of fee amounts that have a debit impact on processing and those that have a credit impact on processing. The net total is in the reconciliation currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-16; TAGLLL              |
| Tag Field           | 0395                       |
| Data Length         | 3 positions, value = 016   |
| Data Field          | Fixed length, 16 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| Financial Position Detail/1644 | .   | X   | M   |

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, net totals in the reconciliation currency of fee amounts with a debit impact to processing and those with a credit impact to processing.

If the sum of all amounts in PDS 0392 (Debits, Fee Amounts in Reconciliation Currency) is greater than the sum of all amounts in PDS 0393 (Credits, Fee Amounts in Reconciliation Currency), the clearing system inserts a D in subfield 1 of PDS 0395 and inserts the excess amount in subfield 2 of PDS 0395.

If the sum of all amounts in PDS 0393 is greater than the sum of all amounts in PDS 0392, the clearing system inserts a C in subfield 1 of PDS 0395 and inserts the excess amount in subfield 2 of PDS 0395.

The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

### Values

This PDS may contain zeros in the Acknowledgment Reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment).

This element contains the sum of PDS 0146 (Amounts, Transaction Fee) by currency identified in DE 50 (Currency Code, Reconciliation) and other reconciliation options in effect. Reconciliation messages that reflect totals for bilateral and Collection Only activity will contain zeros in this PDS.

### PDS 0395 subfields

This PDS consists of two subfields.

#### PDS 0395 subfields

| Number | Positions | Name                   | Attribute         | Justification |
|--------|-----------|------------------------|-------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D or C | N/A           |
| 2      | 2-16      | Amount, Net Fee        | n-15              | right         |

## PDS 0396 (Amount, Net Total in Reconciliation Currency)

PDS 0396 (Amount, Net Total in Reconciliation Currency) provides in reconciliation messages the net total of transaction and fee amounts. The net total is in the reconciliation currency.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-17; TAGLLL              |
| Tag Field           | 0396                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | M   |
| Settlement Position Detail/1644 | .   | X   | M   |

This PDS provides, in Reconciliation/1644 messages, net totals in the reconciliation currency of transaction amounts and fee amounts. The values used in calculating PDS 0396 are from PDS 0394 (Amount, Net Transaction in Reconciliation Currency) and PDS 0395 (Amount, Net Fee in Reconciliation Currency).

If subfield 1, Debit/Credit Indicator, of both PDS 0394 and PDS 0395 contains a D, the system inserts a D in subfield 1 of PDS 0396 and inserts the total of the amount subfields from PDS 0394 and PDS 0395 in subfield 2 of PDS 0396.

If subfield 1, Debit/Credit Indicator, of both PDS 0394 and PDS 0395 contains a C, the clearing system inserts a C in subfield 1 of PDS 0396 and inserts the total of the amount subfields from PDS 0394 and PDS 0395 in subfield 2 of PDS 0396.

If PDS 0394 and PDS 0395 contain two different values in subfield 1, the clearing system selects the Debit/Credit Indicator associated with the larger of the two amount subfields and

inserts it in subfield 1 of PDS 0396. The clearing system then calculates the difference between the two amount subfields and inserts the result in subfield 2 of PDS 0396.

The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

### Values

This PDS may contain zeros in the acknowledgment reconciliation messages if the processed file contained only non-financial messages and DE 25 (Message Reason Code) = 6861 (Acknowledgment). Reconciliation messages that reflect totals for bilateral and collection only activity will contain zeros in this PDS.

### PDS 0396 subfields

This PDS consists of two subfields.

#### PDS 0396 subfields

| Number | Positions | Name                   | Attribute         | Justification |
|--------|-----------|------------------------|-------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D or C | N/A           |
| 2      | 2-17      | Amount, Net Total      | n-16              | right         |

### PDS 0397 (Debits, Extended Precision Amount in Reconciliation Currency)

PDS 0397 (Debits, Extended Precision Amount in Reconciliation Currency) provides in reconciliation messages the total of extended precision fee amounts that have a debit impact on processing. The total is in the reconciliation currency. PDS 0397 is applicable only to transactions that have EDP applied.

#### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | an...252; TAGLLLVAR                              |
| Tag Field           | 0397                                             |
| Data Length         | 3 positions, value = 021-252 in increments of 21 |
| Data Field          | Variable length, 21-252 positions                |
| Subfields           | 3                                                |

| Attribute     | Description     |
|---------------|-----------------|
| Occurrences   | 1–12            |
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | •   | X   | C   |
| Settlement Position Detail/1644 | •   | X   | C   |

This PDS provides, in reconciliation messages (1644-685, 1644-688), totals in the reconciliation currency of extended precision amounts with a debit impact to processing. The clearing system accumulates all occurrences of subfield 7 (Interchange Amount, Fee, Reconciliation) of PDS 0147 (Extended Precision Amount) for each message in which subfield 2 (Fee Processing Code) of PDS 0147 indicates a debit impact on processing to the appropriate customer. The Financial Position Detail-1644-685 message and the Settlement Position Detail-1644-688 messages both contain totals in the receiving customer's reconciliation currency.

## Values

All currency amounts are expressed to 6 decimals without a decimal separator in accordance with ISO standards for currency notation. For example, an interchange fee amount of USD .000123 is expressed as 000000000000000123.

## PDS 0397 subfields

This PDS consists of three subfields.

## PDS 0397 subfields

| Number | Positions | Name                   | Attribute           | Justification |
|--------|-----------|------------------------|---------------------|---------------|
| 1      | 1-2       | Fee Type Code          | n-2                 | N/A           |
| 2      | 3         | Debit/Credit Indicator | a-1; constant,<br>D | N/A           |

| Number | Positions | Name        | Attribute | Justification |
|--------|-----------|-------------|-----------|---------------|
| 3      | 4-21      | Amount, Fee | n-18      | N/A           |

## PDS 0398 (Credits, Extended Precision Amount in Reconciliation Currency)

PDS 0398 (Credits, Extended Precision Amount in Reconciliation Currency) provides in reconciliation messages the total of extended precision fee amounts that have a credit impact on processing. The total is in the reconciliation currency. PDS 0398 is applicable only to transactions that have EDP applied.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | an...252; TAGLLLLVAR                             |
| Tag Field           | 0398                                             |
| Data Length         | 3 positions, value = 021–252 in increments of 21 |
| Data Field          | Variable length, 21–252 positions                |
| Subfields           | 3                                                |
| Occurrences         | 1–12                                             |
| Justification       | See "Subfields"                                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | •   | X   | C   |
| Settlement Position Detail/1644 | •   | X   | C   |

This PDS provides, in reconciliation messages (1644-685, 1644-688), totals in the reconciliation currency of extended precision amounts with a credit impact to processing. The clearing platform accumulates all occurrences of subfield 7, Interchange Amount, Fee, Reconciliation, of

PDS 0147 (Extended Precision Amount) for each message in which subfield 2, Fee Processing Code, of PDS 0147 indicates a credit impact on processing to the appropriate customer.

The Financial Position Detail-1644-685 message and the Settlement Position Detail-1644-688 messages both will contain totals in the receiving customer's reconciliation currency.

### Values

All currency amounts are expressed to six decimals without a decimal separator in accordance with ISO standards for currency notation. For example, an interchange fee amount of USD .000123 is expressed as 000000000000000123.

## PDS 0398 subfields

This PDS consists of three subfields.

### PDS 0398 subfields

| Number | Positions | Name                   | Attribute       | Justification |
|--------|-----------|------------------------|-----------------|---------------|
| 1      | 1-2       | Fee Type Code          | n-2             | N/A           |
| 2      | 3         | Debit/Credit Indicator | a-1; constant-C | N/A           |
| 3      | 4-21      | Amount, Fee            | n-18            | N/A           |

## PDS 0399 (Amount, Net Extended Precision in Reconciliation Currency)

PDS 0399 (Amount, Net Extended Precision in Reconciliation Currency) provides in reconciliation messages the net total of extended precision fee amounts that have a debit impact on processing and those that have a credit impact on processing.

The net total is in the reconciliation currency. PDS 0399 is applicable only to transactions that have EDP applied.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | an-19; TAGLLL              |
| Tag Field           | 0399                       |
| Data Length         | 3 positions, value = 019   |
| Data Field          | Fixed length, 19 positions |

| Attribute     | Description     |
|---------------|-----------------|
| Subfields     | 2               |
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                         | Org | Sys | Dst |
|---------------------------------|-----|-----|-----|
| Financial Position Detail/1644  | .   | X   | C   |
| Settlement Position Detail/1644 | .   | X   | C   |

This PDS provides, in reconciliation messages (1644-685, 1644-688), net totals in the reconciliation currency of Extended Precision amounts with a debit impact to processing and those with a credit impact to processing. If the sum of all amounts in PDS 0397 (Debits, Extended Precision Amounts in Reconciliation Currency) is greater than the sum of all amounts in PDS 0398 (Credits, Extended Precision Amounts in Reconciliation Currency), the GCMS inserts a D in PDS 0399, subfield 1 and inserts the excess amount in PDS 0399, subfield 2. If the sum of all amounts in PDS 0397 is greater than the sum of all amounts in PDS 0398, the GCMS inserts a C in subfield 1 of PDS 0399 and inserts the excess amount in PDS 0399, subfield 2. The Financial Position Detail/1644 message and Settlement Position Detail/1644 message will contain totals in the receiving customer's reconciliation currency.

## Values

All currency amounts are expressed to six decimals without a decimal separator in accordance with ISO standards for currency notation. For example, an interchange fee amount of USD .000123 is expressed as 000000000000000123.

## PDS 0399 subfields

This PDS consists of two subfields.

## PDS 0399 subfields

| Number | Positions | Name                   | Attribute         | Justification |
|--------|-----------|------------------------|-------------------|---------------|
| 1      | 1         | Debit/Credit Indicator | a-1; value D or C | N/A           |

| Number | Positions | Name            | Attribute | Justification |
|--------|-----------|-----------------|-----------|---------------|
| 2      | 2-19      | Amount, Net Fee | n-18      | right         |

## PDS 0400 (Debits, Transaction Number)

PDS 0400 (Debits, Transaction Number) provides in reconciliation messages the number of transactions whose transaction amounts have a debit impact on processing.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-10; TAGLLL               |
| Tag Field           | 0400                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| File Currency Summary/1644     | .   | X   | M   |
| Financial Position Detail/1644 | .   | X   | M   |

This PDS provides in Reconciliation/1644 messages the total number of transactions whose transaction amounts have a debit impact to processing. The clearing system accumulates the number of messages for which DE 3 (Processing Code) indicates a debit impact on processing to the appropriate customer. Refer to [Reconciliation messages](#) for additional information on classifying activity as debit impact versus credit impact.

### Values

This PDS may contain zeros if the processed file contained only non-financial messages.

## PDS 0401 (Credits, Transaction Number)

PDS 0401 (Credits, Transaction Number) provides in reconciliation messages the number of transactions whose transaction amounts have a credit impact on processing.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-10; TAGLLL               |
| Tag Field           | 0401                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| File Currency Summary/1644     | .   | X   | M   |
| Financial Position Detail/1644 | .   | X   | M   |

This PDS provides in Reconciliation/1644 messages, the total number of transactions whose transaction amounts have a credit impact to processing. To do this, the clearing system accumulates the number of messages for which DE 3 (Processing Code) indicates a credit impact on processing to the appropriate customer.

### Values

This PDS may contain zeros if the processed file contained only non-financial messages.

This PDS is populated based on final fund direction of the customer. If the customer's net position is a debit then the PDS contains the accumulated counts.

## PDS 0402 (Total, Transaction Number)

PDS 0402 (Total, Transaction Number) provides in reconciliation messages the number of transactions whose transaction amounts have either a debit or a credit impact on processing.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-10; TAGLLL               |
| Tag Field           | 0402                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                        | Org | Sys | Dst |
|--------------------------------|-----|-----|-----|
| File Currency Summary/1644     | .   | X   | M   |
| Financial Position Detail/1644 | .   | X   | M   |

This PDS provides in Reconciliation/1644 messages the total number of transactions whose transaction amounts have either a debit or a credit impact to processing. To do this, the clearing system accumulates PDS 0400 (Debits, Transaction Number) and PDS 0401 (Credits, Transaction Number) and inserts the result in PDS 0402.

### Values

This PDS may contain zeros if the processed file contained only non-financial messages.

This PDS is populated based on the final fund direction of the customer. If the customer's net position is a credit then this PDS contains the accumulated counts.

## PDS 0444 (Resubmission Code)

PDS 0444 (Resubmission Code) will provide a unique value for each rejected potential duplicate clearing transaction. Acquirers must use this value to resubmit First Presentment messages after confirming that the potential duplicate designation was unwarranted. GCMS will not send PDS 0444 to issuers.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-11, TAGLLL               |
| Tag Field           | 0444                       |
| Data Length         | 3 positions, value = 011   |
| Data Field          | Fixed length, 11 positions |
| Subfields           | None                       |
| Justification       | N/A                        |

### Usage

The following table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                          | Org | Sys | Dst |
|------------------------------------------------------------------|-----|-----|-----|
| First Presentment/1240: rejected by Mastercard                   | C   | X   | .   |
| First Presentment/1240: resubmitted by customer after validation | C   | .   | .   |

### Values

If present, PDS 0444 must be numeric and cannot contain all zeros.

If a First Presentment message rejects because the transaction has been identified as a potential duplicate by Mastercard, the clearing system provides this PDS to the acquirer in the First Presentment message that accompanies the Message Exception/1644 message.

If the acquirer resubmits the transaction following validation, this PDS must be present and contain the same value received in the Message Exception/1644 message. This PDS is not forwarded to the issuer.

## PDS 0445 (Original Transaction Information)

PDS 0445 (Original Transaction Information) contains one or more data elements (DE) and private data subelements (PDS) echoing the transaction information submitted in inbound processing.

### Attributes

| Attribute           | Description                       |
|---------------------|-----------------------------------|
| Data Representation | ans...992; TAGLLLVAR              |
| Tag Field           | 0445                              |
| Data Length         | 3 positions, value = 011-992      |
| Data Field          | Variable length, 11-992 positions |
| Subfields           | None                              |
| Justification       | Left                              |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                | Org | Sys | Dst |
|----------------------------------------|-----|-----|-----|
| Message Exception/<br>1644-691 message | •   | X   | C   |

### Values

PDS 0445 is a free-form text field in the following format and can accommodate any DE and PDS values that are replaced and substituted from its original value. This position representation illustrates multiple DEs or PDSs being changed during processing:

- Position 1 (Tag type) which can have value of either 2 representing DE or a value of 3 PDS.
- Position 2 (Tag number) which is a format of nnnn (numeric 4 bytes) representing the actual DE or PDS number.
- Position 6 (Tag subfield number) which is a format of nn (numeric 2 bytes) representing the DE or PDS subfield number. It is "00" if the DE or PDS does not have any subfields.

- Position 8 (Tag length) which is a format of nnn (numeric 3 bytes) representing the DE or PDS length.
- Position 11 represents its original DE or PDS value.

### Requirements

PDS 0445 can accommodate any number of DEs and PDSs, up to a maximum of 999 characters in length, with what GCMS replaced it with during the time of processing.

## PDS 0446 (Transaction Fee Amount, Syntax Error)

PDS 0446 (Transaction Fee Amount, Syntax Error) contains the submitted value from PDS 0146 (Amount, Transaction Fee) that was flagged for a soft syntax error. This element is generated by the clearing platform.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-12; TAGLLL             |
| Tag Field           | 0446                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Justification       | None                       |

### Usage

This element is created when PDS 0146, subfield 5 (Amount, Fee) was flagged for a syntax error.

### Values

All currency amounts are expressed in the minor unit of currency without a decimal separator in accordance with ISO standards for currency notation. For example, a transaction amount of USD 212.50 is expressed as 000000021250.

## PDS 0501 (Transaction Description)

PDS 0501 (Transaction Description) contains information describing the type of addendum data that is presented.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-16; TAGLLL               |
| Tag Field           | 0501                       |
| Data Length         | 3 positions, value = 016   |
| Data Field          | Fixed length, 16 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                                                                 | Org | Sys | Dst |

| Financial Detail Addendum (Private Label Line Item Detail)/1644          | M   | .   | M   |

This PDS provides the information necessary to identify the type of addendum information in a Financial Detail Addendum/1644. The PDS also contains a sequence number to associate the addendum message with the related First Presentment/1240.

## PDS 0501 subfields

PDS 0501 consists of 4 subfields.

### PDS 0501 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1–2       | Usage Code             | n-2       | N/A           |
| 2      | 3–5       | Industry Record Number | n-3       | right         |

| Number | Positions | Name                                | Attribute | Justification |
|--------|-----------|-------------------------------------|-----------|---------------|
| 3      | 6–8       | Occurrence Indicator                | n-3       | right         |
| 4      | 9–16      | Associated First Presentment Number | n-8       | right         |

## Subfield 1 (Usage Code)

Subfield 1 (Usage Code) indicates the type of addendum data to be provided. The codes supporting various industries or programs are in this table.

### Subfield 1 (Usage Code)

| Usage Code | Transaction Detail Description                          | Supported Acceptor Category, Industry, or Programs                                                                    |
|------------|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| 01         | Passenger Transport Detail                              | Airline, railway, travel agency                                                                                       |
| 05         | Vehicle Rental Detail                                   | Vehicle rental agencies                                                                                               |
| 06         | Lodging Summary                                         | Hotel, motel, and related lodging facilities                                                                          |
| 07         | Temporary Services                                      | New business opportunities for the temporary services sector                                                          |
| 08         | Shipping/Courier Services                               | New business opportunities for the shipping/courier services sector                                                   |
| 09         | Electronic Invoice, Transaction Data/ Party Information | New business opportunities to enable issuers to supply more transaction information to their corporate clients        |
| 10         | Payment Transaction Detail                              | Payments from money transfer agents or financial institutions                                                         |
| 11         | Telephony Billing, Detail/Summary                       | New business opportunities for companies to pay for telephony services using a Mastercard Corporate Purchasing Card®. |
| 12         | Travel Agency Detail                                    | New business opportunities to enable users to provide travel agency-specific fee information                          |
| 13         | Lodged Account Detail                                   | New business opportunities to enable users to provide stored client information provided by preferred travel agencies |

| Usage Code | Transaction Detail Description | Supported Acceptor Category, Industry, or Programs             |
|------------|--------------------------------|----------------------------------------------------------------|
| 14         | Private Label                  | New business opportunities unique to using private label cards |
| 15         | Healthcare                     | Healthcare                                                     |
| 98         | Commercial Detail              | New business opportunities unique to the corporate environment |
| 99         | Generic Detail                 | Other new business opportunities                               |

New usage codes are added periodically as required to support various industry and acceptor organizations. The clearing system validates the usage code and rejects a message if it contains an invalid usage code.

## Subfield 2 (Industry Record Number)

Subfield 2 (Industry Record Number) and the usage code are used in conjunction to uniquely identify the addendum data format (layout) as shown in this table.

### Subfield 2 (Industry Record Number)

| Usage Code | Industry Record Number | Description                                            |
|------------|------------------------|--------------------------------------------------------|
| 01         | 000                    | Passenger Transport Detail, General Ticket Information |
| 01         | 001                    | Passenger Transport Detail, Trip Leg Data              |
| 01         | 002                    | Passenger Transport Detail, Rail Data                  |
| 05         | 000                    | Vehicle Rental Detail                                  |
| 06         | 000                    | Lodging Summary                                        |
| 07         | 000                    | Temporary Services                                     |
| 08         | 000                    | Shipping/Courier Services                              |
| 09         | 000                    | Electronic Invoice, Transaction Data                   |
| 09         | 001                    | Electronic Invoice, Party Information                  |
| 10         | 000                    | Payment Transaction Detail                             |
| 11         | 000                    | Telephony Billing, Summary                             |
| 11         | 001                    | Telephony Billing, Detail                              |
| 12         | 000                    | Travel Agency Detail                                   |

| Usage Code | Industry Record Number | Description                                               |
|------------|------------------------|-----------------------------------------------------------|
| 13         | 000                    | Lodged Account Detail                                     |
| 14         | 000                    | Private Label Common Data                                 |
| 14         | 001                    | Private Label Line Item Detail                            |
| 15         | 000                    | Healthcare-IIAS Detail                                    |
| 98         | 000                    | Corporate Detail, Corporate Card Common Data Requirements |
| 98         | 002                    | Corporate Detail, Corporate Fleet Transaction Information |
| 98         | 950                    | Corporate Detail, Corporate Line Item Detail              |
| 99         | 000                    | Generic Detail                                            |

New industry record numbers are added periodically as required to support various industry and acceptor organizations. Customers should prepare their systems to accept new industry record numbers. The clearing system does not reject a message containing an unrecognized industry record number if it contains a valid usage code. Instead, the clearing system passes the unedited contents of the addendum data to the receiving customer. This policy allows the timely assignment of new industry record numbers in response to specific needs, without waiting for corresponding updates to the clearing system.

### Subfield 3 (Occurrence Indicator)

Subfield 3 (Occurrence Indicator) identifies the specific occurrence number of each addendum data in a particular usage code. This list details the specific rules for PDS 0501, subfield 3.

- For Financial Detail Addendum (Passenger Transport, General Ticket Information)/1644 messages (PDS 0501, subfield 1 Usage Code 01 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be 001.
- For Financial Detail Addendum (Passenger Transport, Trip Leg Data)/1644 messages (PDS 0501, subfield 1 Usage Code 01 and PDS 0501, subfield 2 Industry Record Number 001), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 002 to 999.
- For Financial Detail addendum (Passenger Transport Detail, Rail Data)/1644 messages (PDS 0501, subfield 1 Usage Code 01 and PDS 0501, subfield 2 Industry Record Number 002), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999 or within the range of 002 to 999 when provided in conjunction with the Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 message.
- For Financial Detail Addendum (Vehicle Rental Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 05 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.

- For Financial Detail Addendum (Lodging Summary)/1644 messages (PDS 0501, subfield 1 Usage Code 06 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Temporary Services)/1644 messages (PDS 0501, subfield 1 Usage Code 07 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Shipping/Courier Services)/1644 messages (PDS 0501, subfield 1 Usage Code 08 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Electronic Invoice, Transaction Data) /1644 messages (PDS 0501, subfield 1 Usage Code 09 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Electronic Invoice, Party Information)/1644 messages (PDS 0501, subfield 1 Usage Code 09 and PDS 0501, subfield 2 Industry Record Number 001), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 002 to 999.
- For Financial Detail Addendum (Payment Transaction Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 10 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be 001.
- For Financial Detail Addendum (Telephony Billing, Summary)/1644 messages (PDS 0501, subfield 1 Usage Code 11 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must 001.
- For Financial Detail Addendum (Travel Agency, Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 12 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Lodged Account, Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 13 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.
- For Financial Detail Addendum (Telephony Billing, Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 11 and PDS 0501, subfield 2 Industry Record Number 001), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 002 to 999.
- For Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 messages (PDS 0501, subfield 1 Usage Code 98 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be 001.
- For Financial Detail Addendum (Corporate Fleet Transaction Information) /1644 messages (PDS 0501, subfield 1 Usage Code 98 and PDS 0501, subfield 2 Industry Record Number 002), the value of PDS 0501, subfield 3 Occurrence Indicator must be between 001 and 003.
- For Financial Detail Addendum (Corporate Line Item Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 98 and PDS 0501, subfield 2 Industry Record Number 950), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 002 to 999.
- For Financial Detail Addendum (Generic Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 99 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001 to 999.

- For Financial Detail Addendum (Healthcare)/1644 messages (PDS 0501, subfield 1 Usage Code 15 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 001–999.
- For Financial Detail Addendum (Private Label Common Data)/1644 messages (PDS 0501, subfield 1 Usage Code 14 and PDS 0501, subfield 2 Industry Record Number 000), the value of PDS 0501, subfield 3 Occurrence Indicator must be the value of 001.
- For Financial Detail Addendum (Private Label Line Item Detail)/1644 messages (PDS 0501, subfield 1 Usage Code 14 and PDS 0501, subfield 2 Industry Record Number 001), the value of PDS 0501, subfield 3 Occurrence Indicator must be within the range of 002 to 999.

### Subfield 4 (Associated First Presentment Number)

The number in subfield 4 (Associated First Presentment Number) is copied from DE 71 of the associated First Presentment/1240. The associated first presentment number is placed in this subfield to tie the addendum message back to the related First Presentment/1240.

## PDS 0502 (Custom Identifier)

PDS 0502 (Custom Identifier) enables customers to provide custom information pertinent to the transaction.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...82; TAGLLLLVAR             |
| Tag Field           | 0502                             |
| Data Length         | 3 positions, value = 006–082     |
| Data Field          | Variable length, 06–82 positions |
| Subfields           | 2                                |
| Justification       | See “Subfields”                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Usage

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| First Presentment/1240                                 | C   | .   | C   |
| Financial Detail Addendum (Travel Agency, Detail)/1644 | C   | X   | C   |
| Financial Detail Addendum (Lodged Account Detail)/1644 | C   | X   | C   |

This PDS is required in First Presentment/1240, Financial Detail Addendum (Travel Agency, Detail)/1644, or Financial Detail Addendum (Lodged Account Detail)/1644 messages for transactions submitted for the interchange rate programs with Brand Product MEF in this table.

## IRDs for Brand Product MEF

| IRD | Description                |
|-----|----------------------------|
| 67  | Commercial Data Rate II    |
| 82  | Electronic Payment Account |

## Values

If PDS 0502 is present, both subfield 1 and subfield 2 must be present.

PDS 0502 is required in First Presentment/1240 messages to qualify for corporate incentives within some intra-European and inter-European interchange programs.

For Mastercard In Control™ First Presentment/1240 messages:

- If PDS 0502 is present in the message then the values will be overlaid with the value OTHER1 in subfield 1 (Custom Identifier Type) and the Virtual Account Number in subfield 2 (Custom Identifier Detail).
- If PDS 0502 is not present in the First Presentment/1240 then PDS 0502 is added to the message and sent to the issuer. The values are OTHER1 in subfield 1 (Custom Identifier Type) and the Virtual Account Number in subfield 2 (Custom Identifier Detail).

PDS 0502 (Custom Identifier), subfield 1 (Custom Identifier Type) is required and must contain the value PMTREF along with the data in subfield 2 (Customer Identifier Detail) for U.S. region (2/010001) transactions submitted for IRD 67 (Commercial Data Rate II) when the account number represents the MEF product.

PDS 0502 (Custom Identifier), subfield 1 (Custom Identifier Type) is required and must contain the value PMTREF along with the data in subfield 2 (Customer Identifier Detail) for U.S. region (2/010001) transactions submitted for IRD 82 (Commercial Electronic Payment Account).

## PDS 0502 subfields

This PDS consists of two subfields.

### PDS 0502 subfields

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 1      | 1-6       | Custom Identifier Type   | ans-06    | N/A           |
| 2      | 7-82      | Custom Identifier Detail | ans-1     | left          |

### Subfield 1 (Custom Identifier Type)

Subfield 1 identifies the type of custom information that is contained in subfield 2 as free-form text. The valid values for subfield 1 are listed in this table.

### Subfield 1 (Custom Identifier Type)

| Value  | Description                                 |
|--------|---------------------------------------------|
| CUSORD | Customer Order                              |
| CUSTPO | Customer Purchase Order                     |
| FOLNUM | Folio Number                                |
| INVACT | Invoice or Account Number for Bill Payments |
| OTHER1 | Other                                       |
| PMTREF | Payment Reference Number                    |
| PRCHID | Purchase Identification                     |
| RECLOC | Record Locator                              |
| RESNUM | Reservation Number                          |
| RNTAGR | Rental Agreement                            |
| SUPINV | Supplier Invoice                            |
| SUPORD | Supplier Order                              |
| TKTNUM | Ticket Number                               |
| TRANID | Transaction Identification                  |
| TRKNUM | Tracking Number                             |

## Subfield 2 (Custom Identifier Detail)

Subfield 2 is a free-form text field for custom information that is related the transaction. The information provided should relate to the value provided in subfield 1.

If present, subfield 2 must be left-justified and cannot be all zeros, all spaces, all high values, or all low values.

## PDS 0503 (Travel Agency Sequence Number)

PDS 0503 (Travel Agency Sequence Number) contains a sequence number indicating the sequence of this travel agency fee for this transaction.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-4 TAGLLL              |
| Tag Field           | 0503                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Travel Agency, Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0504 (Travel Agency Fee)

PDS 0504 (Travel Agency Fee) contains descriptive information regarding the fee charged by the travel agency.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...42; TAGLLLLVAR             |
| Tag Field           | 0504                             |
| Data Length         | 3 positions, value = 014-042     |
| Data Field          | Variable length, 14-42 positions |
| Subfields           | 5                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Travel Agency, Detail)/1644 | O   | .   | C   |

## PDS 0504 subfields

This PDS consists of five subfields.

### PDS 0504 subfields

| Number | Positions | Name                              | Attribute | Justification |
|--------|-----------|-----------------------------------|-----------|---------------|
| 1      | 1-12      | Travel Agency Fee Amount          | n-12      | right         |
| 2      | 13        | Travel Agency Fee Amount Exponent | n-1       | N/A           |
| 3      | 14        | Travel Agency Fee Amount Sign     | a-1       | N/A           |

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 4      | 15–26     | Travel Agency Fee Amount Rate | n-12      | right         |
| 5      | 27–42     | Travel Agency Fee Description | ans-16    | left          |

### Subfield 1 (Travel Agency Fee Amount)

If PDS 0504 is present, subfield 1 must be numeric and greater than zero.

### Subfield 2 (Travel Agency Fee Amount Exponent)

Subfield 2 (Travel Agency Fee Amount Exponent) indicates the decimal location for the Travel Agency Fee Amount subfield.

If PDS 0504 is present, subfield 2 must be numeric and contain a value in the range 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Travel Agency Fee Amount Sign)

If PDS 0504 is present, subfield 3 must be a value D or C. This subfield identifies whether PDS 0504 is a debit or a credit transaction from the perspective of the cardholder.

| Value | Description                           |
|-------|---------------------------------------|
| D     | Travel Agency Fee Amount is a debit.  |
| C     | Travel Agency Fee Amount is a credit. |

### Subfield 4 (Travel Agency Fee Amount Rate)

If subfield 4 is present, it must be numeric.

### Subfield 5 (Travel Agency Fee Description)

If subfield 5 is present, it must be left-justified and cannot be all zeros, all spaces, all high values, or all low values.

## PDS 0505 (Passenger Name)

PDS 0505 (Passenger Name) contains the name of the passenger to whom the ticket was issued.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...29; TAGLLLVAR             |
| Tag Field           | 0505                            |
| Data Length         | 3 positions, value = 001-029    |
| Data Field          | Variable length, 1-29 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | C   | .   | C   |
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644                  | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description      |
|-----|------------------|
| 10  | Merit III Tier 1 |
| 11  | Merit III Tier 2 |

| IRD        | Description                   |
|------------|-------------------------------|
| 12         | Merit III Tier 3              |
| 24         | Merchant UCAF                 |
| 69         | Commercial T&E Rate II        |
| 70, 80     | Merit III Base                |

This PDS is required if a Passenger Transport Detail, Rail Data Addendum message is submitted and the associated First Presentment/1240 contains a rail or travel agency MCC and is submitted for IRD 89, Commercial T&E Rate III.

This PDS optionally may be provided for airline, railway, or travel agency transactions submitted for any other interchange program.

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 or Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0506 (Ticket Number) and cannot contain null values.

### Values

If present, PDS 0506 must contain the ticket number and be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. If multiple tickets are purchased using a single transaction, the primary ticket number should be provided.

## PDS 0507 (Issuing Carrier)

PDS 0507 (Issuing Carrier) contains the standard abbreviation for the airline or railway carrier issuing the ticket.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-4; TAGLLL             |
| Tag Field           | 0507                      |

| 4O       | Business Level 4 T&E Rate III         |

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0507 (Issuing Carrier) and cannot contain null values.

### Values

If present, PDS 0507 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

PDS 0507 must contain a valid International Air Transport Association (IATA) two character Airline code.

## PDS 0508 (Customer Code)

PDS 0508 (Customer Code) contains the code that the cardholder supplied to the acceptor.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLVAR             |
| Tag Field           | 0508                            |
| Data Length         | 3 positions, value = 001–025    |
| Data Field          | Variable length, 1–25 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |

| Financial Detail Addendum (Private Label Line Item Detail)/1644          | O   | •   | C   |

This PDS is required in Financial Detail Addendum (Shipping/Courier) and Financial Detail Addendum (Temporary Services) messages for transactions submitted for the interchange rate programs listed in this table, if provided by the customer.

#### IRDs for Financial Detail Addendum

| IRD | Description                                      |
|-----|--------------------------------------------------|
| 60  | Commercial Face-to-Face                          |
| 62  | Commercial Large Ticket I                        |
| 66  | Commercial Data Rate III                         |
| 67  | Interregional Commercial Purchasing Data Rate II |
| 67  | Commercial Data Rate II                          |
| 94  | Commercial Large Ticket II                       |
| 99  | Commercial Large Ticket III                      |
| E1  | Commercial Large Ticket Rate 1 MPG               |
| E2  | Commercial Large Ticket Rate 2 MPG               |
| E3  | Commercial Large Ticket Rate 3 MPG               |

This PDS is required in Financial Detail Addendum (Corporate Card Common Data Requirements) messages for transactions submitted with interchange rate program GCMS Product Code MEF 82 (Commercial Electronic Payment Account).

PDS 0508 must be present in a Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 when all of these conditions exist:

- The product code is MCP or MCF at a non-fuel location.
- The Business Service is equal to one of the values in this table.

#### PDS 0158 codes

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

#### IRD descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

If the customer provides the customer code, this PDS must be submitted to qualify the transaction for the U.S. region and international incentive interchange rate programs listed in this table.

#### IRD descriptions

| IRD | Description                                       |
|-----|---------------------------------------------------|
| 60  | Commercial Face-to-Face                           |
| 62  | Commercial Large Ticket I                         |
| 66  | Commercial Data Rate III                          |
| 67  | Commercial Data Rate II                           |
| 67  | Inter-regional Commercial Purchasing Data Rate II |

| IRD | Description                    |
|-----|--------------------------------|
| 94  | Commercial Large Ticket II     |
| 99  | Commercial Large Ticket III    |
| F1  | Commercial Fleet Data Rate I   |
| F2  | Commercial Fleet Data Rate II  |
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

If the customer provides the customer code, PDS 0508 must be submitted to qualify the transaction for these Canada incentive interchange rate programs:

- BQ: Canada Intracountry Commercial Data Rate I (only for transactions at non-fuel and non-maintenance locations)
- BR: Canada Intracountry Commercial Data Rate II
- BS: Canada Intracountry Commercial Large Ticket

#### Values

If present, PDS 0508 must be left-justified and cannot contain all spaces.

## PDS 0509 (Issue Date)

PDS 0509 (Issue Date) is the date the ticket was issued to the customer.

#### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0509                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0509 (Issue Date) and cannot contain null values.

### Values

If present, PDS 0509 must contain a valid date in the format YYMMDD.

## PDS 0510 (Travel Agency Code)

PDS 0510 (Travel Agency Code) is a code assigned to the travel agency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-8; TAGLLL             |
| Tag Field           | 0510                      |
| Data Length         | 3 positions, value = 008  |
| Data Field          | Fixed length, 8 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644                  | O   | .   | C   |

### Values

If present, PDS 0510 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0511 (Travel Agency Name)

PDS 0511 (Travel Agency Name) is the name of the travel agency that issued the ticket.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLLVAR            |
| Tag Field           | 0511                            |
| Data Length         | 3 positions, value = 001–025    |
| Data Field          | Variable length, 1–25 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0511 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0512 (Total Fare)

PDS 0512 (Total Fare) contains the total amount of the ticket and should equal the total amount of the transaction.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0512                       |
| Data Length         | 3 positions, value = 012   |
| Data Length         | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | C   | .   | C   |

Information on the IRDs which require the PDS, refer to the Interchange Manuals.

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

## Values

If present, PDS 0512 can contain all zeros. It cannot contain all spaces.

## PDS 0513 (Total Fees)

PDS 0513 (Total Fees) is the amount of the fees associated with the ticket.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0513                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |

| Attribute     | Description |
|---------------|-------------|
| Justification | Left        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

### Values

If present, PDS 0516 cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0517 (NAICS Code)

PDS 0517 (NAICS Code) contains the North American Industry Classification System (NAICS) code assigned to the acceptor.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-15; TAGLLL              |
| Tag Field           | 0517                        |
| Data Length         | 3 positions, value = 015    |
| Data Field          | Fixed length, 015 positions |
| Subfields           | None                        |
| Justification       | Left                        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

### Values

If present, PDS 0517 cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0518 (Line Item Date)

PDS 0518 (Line Item Date) contains the purchase date of the line item referenced in the associated Corporate Card Line Item Detail.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | n-6; TAGLLL                 |
| Tag Field           | 0518                        |
| Data Length         | 3 positions, value = 006    |
| Data Field          | Fixed length, 006 positions |
| Subfields           | None                        |
| Justification       | N/A                         |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644 | C   | .   | C   |

## Values

If present, PDS 0518 must contain a valid date in the format YYMMDD. This field is required to be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when a Financial Detail Addendum (Lodging Summary)/1644 message is presented with the transaction.

## PDS 0519 (Additional Fuel Location Information)

PDS 0519 (Additional Fuel Location Information) contains additional information about the fuel location, such as hours of operation and interstate access/exit number.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | an-14; TAGLLL               |
| Tag Field           | 0519                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 14                          |
| Justification       | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | O   | .   | C   |

## Values

If present, PDS 0519 must be a fixed length of 14, and each of the 14 subfields must contain a value of Y or N. If unknown, a value of N should be provided.

## PDS 0519 subfields

This PDS consists of fourteen subfields.

### PDS 0519 subfields

| Number | Positions | Name                                                    | Attribute | Justification |
|--------|-----------|---------------------------------------------------------|-----------|---------------|
| 1      | 1         | Hours of Operation/24 Hours Available                   | a-1       | N/A           |
| 2      | 2         | 18 Wheeler Access Available                             | a-1       | N/A           |
| 3      | 3         | Diesel Sites Available                                  | a-1       | N/A           |
| 4      | 4         | Interstate Access/Exit Number with Directions Available | a-1       | N/A           |
| 5      | 5         | Convenience Store Available                             | a-1       | N/A           |
| 6      | 6         | Truck Stop Restaurant Available                         | a-1       | N/A           |
| 7      | 7         | Truck Stop Hotel Available                              | a-1       | N/A           |
| 8      | 8         | Truck Stop with Showers Available                       | a-1       | N/A           |
| 9      | 9         | Vehicle Maintenance/Repair Bays Available               | a-1       | N/A           |
| 10     | 10        | Car Wash Available                                      | a-1       | N/A           |
| 11     | 11        | Aviation Locations Available                            | a-1       | N/A           |
| 12     | 12        | Marina Locations Available                              | a-1       | N/A           |
| 13     | 13        | Alternative Fuel Locations Available                    | a-1       | N/A           |
| 14     | 14        | Pay-At-Pump Available                                   | a-1       | N/A           |

### Values

Each subfield must have a valid value of Y or N. If the information is unknown, a value of N should be provided.

## PDS 0520 (Travel Date)

PDS 0520 (Travel Date) is the effective ticket date, previously referred to as departure date.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0520                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | •   | C   |
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644     | C   | •   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description      |
|-----|------------------|
| 10  | Merit III Tier 1 |
| 11  | Merit III Tier 2 |
| 12  | Merit III Tier 3 |

| IRD   | Description                           |

| RK    | Enhanced Public Sector                |
| RN    | Enhanced Merchant UCAF                |
| RO    | Enhanced Full UCAF                    |
| RR    | Enhanced Passenger Transport          |
| WP    | World Elite Public Sector             |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 or Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0520 (Travel Date) and cannot contain null values.

### Values

If present, PDS 0520 must be a valid date in the format YYMMDD. Customers must use the ticket purchase date for open tickets.

## PDS 0521 (Carrier Code)

PDS 0521 (Carrier Code) is the standard abbreviation for the airline or railway carrier providing the service.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-2; TAGLLL             |
| Tag Field           | 0521                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644                           | O   | .   | C   |

This PDS is required for these conditions:

- The associated First Presentment/1240 contains an airline acceptor business code and is submitted for one of the interchange rate programs listed in this table.
- The associated First Presentment/1240 contains a rail acceptor business code, the transaction is submitted for one of the interchange rate programs listed in this table, and the acquirer submits the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 instead of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 message.

### IRDs and descriptions

| IRD   | Description                           |
|-------|---------------------------------------|
| 10    | Merit III Tier 1                      |
| 11    | Merit III Tier 2                      |

| RR    | Enhanced Passenger Transport          |
| WP    | World Elite Public Sector             |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0521 (Carrier Code) and cannot contain null values.

## Values

PDS 0521 must contain a valid International Air Transport Association (IATA) two character Airline code.

If present, it must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0522 (Service Class Code)

PDS 0522 (Service Class Code) is the service type (such as coach or first class).

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-2; TAGLLL             |
| Tag Field           | 0522                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields:          | None                      |
| Justification:      | Left                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | .   | C   |

This PDS is required for these conditions:

- The associated First Presentment/1240 contains an airline acceptor business code and is submitted for one of the interchange rate programs listed in this table.
- The associated First Presentment/1240 contains a rail acceptor business code, the transaction is submitted for one of the interchange rate programs listed in this table, and the acquirer submits the Financial Detail Addendum (Passenger Transport Detail, Trip Leg

Data)/1644 instead of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 message.

### IRDs and descriptions

| IRD    | Description                           |

| RR    | Enhanced Passenger Transport          |
| WP    | World Elite Public Sector             |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0523 (City of Origin/Airport Code) and cannot contain null values.

## Values

PDS 0523 must contain a valid International Air Transport Association (IATA) three letter Location Identifier (Airport Code) or Mastercard defined non-travel code.

### Mastercard Defined Non-Travel Codes

| Code | Description          |
|------|----------------------|
| XUP  | Upgrade              |
| XAF  | Club fee             |
| XCA  | Cargo                |
| XOT  | Tour order           |
| XDF  | Duty free            |
| XAE  | Baggage charge       |
| XAO  | Prepaid ticket       |
| XAA  | Miscellaneous charge |
| XTD  | Delivery             |
| XPC  | Pet carrier          |
| XPE  | Ticket reissue       |

If present, this PDS must be left-justified and cannot contain these values or formats:

- Low values
- High values
- All spaces
- All zeros, or
- Only one character.

## PDS 0524 (City of Destination Airport Code)

PDS 0524 (City of Destination Airport Code) is the destination airport or railway name standard abbreviation.

### Attributes

| Attribute           | Description   |
|---------------------|---------------|
| Data Representation | ans-5; TAGLLL |
| Tag Field           | 0524          |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Length   | 3 positions, value = 005  |
| Data Field    | Fixed length, 5 positions |
| Subfields     | None                      |
| Justification | Left                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | .   | C   |

This PDS is required for these conditions:

- The associated First Presentment/1240 contains an airline acceptor business code and is submitted for one of the interchange rate programs listed in this table.
- The associated First Presentment/1240 contains a rail acceptor business code, the transaction is submitted for one of the interchange rate programs listed in this table, and the acquirer submits the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 instead of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 message.

## IRDs and descriptions

| IRD | Description                           |
|-----|---------------------------------------|
| 10  | Merit III Tier 1                      |
| 11  | Merit III Tier 2                      |
| 12  | Merit III Tier 3                      |
| 22  | Public Sector                         |

| HP     | World High Value Public Sector |
| RK     | Enhanced Public Sector         |
| WP     | World Elite Public Sector      |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0524 (City of Destination/Airport Code) and cannot contain null values.

### Values

PDS 0524 must contain a valid International Air Transport Association (IATA) three letter Location Identifier (Airport Code) or Mastercard defined non-travel code.

### Mastercard Defined Non-Travel Codes

| Code | Description          |
|------|----------------------|
| XUP  | Upgrade              |
| XAF  | Club fee             |
| XCA  | Cargo                |
| XOT  | Tour order           |
| XDF  | Duty free            |
| XAE  | Baggage charge       |
| XAO  | Prepaid ticket       |
| XAA  | Miscellaneous charge |
| XTD  | Delivery             |
| XPC  | Pet carrier          |
| XPE  | Ticket reissue       |

If present, this PDS must be left-justified and cannot contain these values or formats:

- Low values
- High values
- All spaces
- All zeros, or
- Only one character.

## PDS 0525 (Stop Over Code)

PDS 0525 (Stop Over Code) contains a code indicating whether there was a direct or a non-direct flight or route on the same ticket number.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | ans-1; TAGLLL            |
| Tag Field           | 0525                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | •   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC and is submitted for the U.S. region Commercial T&E III (IRD 89) incentive interchange rate program and the acquirer submits a Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 message.

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

### Values

PDS 0525 is the stop over code obtained from the IATA or its equivalent. If present, PDS 0525 may contain a space but cannot contain all low values or all high values. If present, a value of a space indicates a direct flight (that is, no stopover). A value other than a space indicates a non-direct flight (includes stopover). Valid values for PDS 0525 are 0–9, A–Z, or space.

## PDS 0526 (Conjunction Ticket)

PDS 0526 (Conjunction Ticket) is the ticket that contains additional coupons on an itinerary that is more than four segments.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-15; TAGLLL             |
| Tag Field           | 0526                       |
| Data Length         | 3 positions, value = 015   |
| Data Field          | Fixed length, 15 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0526 must be left-justified and cannot contain all spaces, all zeros, all low values, or all high values.

## PDS 0527 (Exchange Ticket)

PDS 0527 (Exchange Ticket) is the original ticket number replaced by a new ticket number.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-15; TAGLLL             |
| Tag Field           | 0527                       |
| Data Length         | 3 positions, value = 015   |
| Data Field          | Fixed length, 15 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0527 must be left-justified and cannot contain all spaces, all zeros, all low values, or all high values.

## PDS 0528 (Coupon Number)

PDS 0528 (Coupon Number) contains information for each leg of travel for a purchased ticket.

A ticket can contain several legs of travel and each leg of travel requires a separate coupon within the series identified by a coupon number.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | ans-1; TAGLLL            |
| Tag Field           | 0528                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0528 can not contain a space, low value, high value, zero.

## PDS 0529 (Fare Basis Code)

PDS 0529 (Fare Basis Code) contains a code that carriers assign to a particular ticket type, such as business class or discounted/nonrefundable.

### Attributes

| Attribute           | Description                  |
|---------------------|------------------------------|
| Data Representation | ans...15; TAGLLLVAR          |
| Tag Field           | 0529                         |
| Data Length         | 3 positions, value = 001–015 |

| Attribute     | Description                     |
|---------------|---------------------------------|
| Data Field    | Variable length, 1–15 positions |
| Subfields     | None                            |
| Justification | N/A                             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | •   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program and the acquirer submits a Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 message.

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

## Values

If present, PDS 0529 cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0530 (Flight Number)

PDS 0530 (Flight Number) is the number that the operating or marketing carrier assigned.

## Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-5; TAGLLL             |
| Tag Field           | 0530                      |
| Data Length         | 3 positions, value = 005  |
| Data Field          | Fixed length, 5 positions |

| Attribute     | Description |
|---------------|-------------|
| Subfields     | None        |
| Justification | Left        |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644                           | O   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC, the transaction is submitted for the U.S. region Commercial T&E III (IRD 89) incentive interchange rate program, and the acquirer submits a Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 message.

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0530 (Flight Number) and cannot contain null values.

## Values

PDS 0530 must contain the numerical operating or marketing carrier assigned flight number. It should not include the leading IATA two character carrier code.

It must also not be all spaces or all zeros.

## PDS 0531 (Departure Time)

PDS 0531 (Departure Time) is the time of departure provided by the airline or railway, per trip leg.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-5; TAGLLL             |
| Tag Field           | 0531                      |
| Data Length         | 3 positions, value = 005  |
| Data Field          | Fixed length, 5 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC, the transaction is submitted for the U.S. region Commercial T&E III (IRD 89) incentive interchange rate program and the acquirer submits a Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 message.

This PDS optionally may be provided for airline or railway transactions submitted for any other interchange program.

## PDS 0531 subfields

This PDS consists of two subfields.

### PDS 0531 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1–4       | Departure Time         | n-4       | right         |
| 2      | 5         | Departure Time Segment | ans-1     | N/A           |

### Subfield 1 (Departure Time)

Subfield 1 (Departure Time) consists of hours and minutes (hhmm), with an implied colon. The hours (hh) must be 00–23 and the minutes (mm) must be 00–59.

**NOTE: Midnight is provided as 0000.**

### Subfield 2 (Departure Time Segment)

Subfield 2 (Departure Time Segment) must contain one of the values in this table.

### Values and descriptions

| Value | Description               |
|-------|---------------------------|
| A     | 00:00 (midnight) to 11:59 |
| P     | 12:00 (noon) to 23:59     |
| space | Unknown or not available  |

## PDS 0532 (Total Charges)

PDS 0532 (Total Charges) contains the total amount of the room charges.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |

| Attribute     | Description                 |
|---------------|-----------------------------|
| Tag Field     | 0532                        |
| Data Length   | 3 positions, value = 014    |
| Data Field    | Fixed length, 014 positions |
| Subfields     | 3                           |
| Justification | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0532 (Total Charges) must be a fixed length of 14.

## PDS 0532 subfields

This PDS consists of three subfields.

## PDS 0532 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-12      | Total Charges Amount   | n-12      | Right         |
| 2      | 13        | Total Charges Exponent | n-1       | N/A           |
| 3      | 14        | Total Charges Sign     | a-1       | N/A           |

## Subfield 1 (Total Charges Amount)

If PDS 0532 is present, subfield 1 (Total Charges Amount) must contain the amount of the charges and may be all zeros.

## Subfield 2 (Total Charges Exponent)

If PDS 0532 is present, subfield 2 (Total Charges Exponent) must contain a value.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Total Charges Sign)

If PDS 0532 is present, subfield 3 (Total Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0532 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                       |
|-------|-----------------------------------|
| D     | Total charges amount is a debit.  |
| C     | Total charges amount is a credit. |

## PDS 0533 (Arrival Time)

PDS 0533 (Arrival Time) is the arrival time provided by the airline or railway, per trip leg.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-5; TAGLLL             |
| Tag Field           | 0533                      |
| Data Length         | 3 positions, value = 005  |
| Data Field          | Fixed length, 5 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

## PDS 0533 subfields

This PDS consists of two subfields.

### PDS 0533 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1-4       | Arrival Time         | n-4       | right         |
| 2      | 5         | Arrival Time Segment | ans-1     | N/A           |

### Subfield 1 (Arrival Time)

Subfield 1 (Arrival Time) consists of hours and minutes (hhmm), with an implied colon. The hours (hh) must be 00–23, and the minutes (mm) must be 00–59.

**NOTE: Midnight is provided as 0000.**

### Subfield 2 (Arrival Time Segment)

Subfield 2 (Arrival Time Segment) must contain one of the values in this table.

### Values and descriptions

| Value | Description               |
|-------|---------------------------|
| A     | 00:00 (midnight) to 11:59 |
| P     | 12:00 (noon) to 11:59     |
| space | Unknown or not available  |

## PDS 0534 (Total Non-Room Charges)

PDS 0534 (Total Non-Room Charges) contains the total amount of the non-room charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0534                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0534 must be a fixed length of 14.

## PDS 0534 subfields

This PDS consists of three subfields.

### PDS 0534 subfields

| Number | Positions | Name                            | Attribute | Justification |
|--------|-----------|---------------------------------|-----------|---------------|
| 1      | 1-12      | Total Non-Room Charges Amount   | n-12      | Right         |
| 2      | 13        | Total Non-Room Charges Exponent | n-1       | N/A           |

| Number | Positions | Name                        | Attribute | Justification |
|--------|-----------|-----------------------------|-----------|---------------|
| 3      | 14        | Total Non-Room Charges Sign | a-1       | N/A           |

### Subfield 1 (Total Non-Room Charges Amount)

If PDS 0534 is present, subfield 1 (Total Non-Room Charges Amount) must contain the amount of the non-room charges and may be all zeros.

### Subfield 2 (Total Non-Room Charges Exponent)

If PDS 0534 is present, subfield 2 (Total Non-Room Charges Exponent) must contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Total Non-Room Charges Sign)

If PDS 0534 is present, subfield 3 (Total Non-Room Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0534 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| D     | Total non-room charges amount is a debit.  |
| C     | Total non-room charges amount is a credit. |

## PDS 0535 (Fare)

PDS 0535 (Fare) is the total amount of the trip leg ticket.

### Attributes

| Attribute           | Description  |
|---------------------|--------------|
| Data Representation | n-12; TAGLLL |

| Attribute     | Description                |
|---------------|----------------------------|
| Tag Field     | 0535                       |
| Data Length   | 3 positions, value = 012   |
| Data Field    | Fixed length, 12 positions |
| Subfields     | None                       |
| Justification | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0535 can contain all zeros.

## PDS 0536 (Fee)

PDS 0536 (Fee) is the total fee amount, per trip leg, associated with the ticket.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0536                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

## Values

If present, PDS 0536 can contain all zeros.

## PDS 0537 (Taxes)

PDS 0537 (Taxes) is the amount of the total taxes, per trip leg, associated with the ticket.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0537                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

### Values

If present, PDS 0537 can contain all zeros.

## PDS 0538 (Endorsements/Restrictions)

PDS 0538 (Endorsements/Restrictions) can be agency-added notations and, in some cases, mandatory government-required notations, such as VAT. Restrictions are limitations set on a ticket according to the type of fare, such as nonrefundable or three-day minimum stay.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...20; TAGLLLLVAR            |
| Tag Field           | 0537                            |
| Data Length         | 3 positions, value = 001–020    |
| Data Field          | Variable length, 1–20 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                    | Org | Sys | Dst |
|----------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Trip Leg Data)/1644 | O   | .   | C   |

## Values

If present, PDS 0538 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0539 (Total Amount Charged on Card)

PDS 0539 (Total Amount Charged on Card) contains the total amount of the room charges, charged to this account.

## Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0539                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0539 must be a fixed length of 14.

## PDS 0539 subfields

This PDS consists of three subfields.

### PDS 0539 subfields

| Number | Positions | Name                                  | Attribute | Justification |
|--------|-----------|---------------------------------------|-----------|---------------|
| 1      | 1–12      | Total Amount Charged on Card Amount   | n-12      | Right         |
| 2      | 13        | Total Amount Charged on Card Exponent | n-1       | N/A           |
| 3      | 14        | Total Amount Charged on Card Sign     | a-1       | N/A           |

### Subfield 1 (Total Amount Charged on Card Amount)

If PDS 0539 is present, subfield 1 (Total Amount Charged on Card Amount) must be numeric and contain the amount charged on this account, and it may be all zeros.

### Subfield 2 (Total Amount Charged on Card Exponent)

If PDS 0539 is present, subfield 2 (Total Amount Charged on Card Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Total Amount Charged on Card Sign)

If PDS 0539 is present, subfield 3 (Total Amount Charged on Card Sign) must contain a value of D or C. This subfield identifies whether PDS 0539 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                      |
|-------|--------------------------------------------------|
| D     | Total amount charged on this account is a debit. |

| Value | Description                                       |
|-------|---------------------------------------------------|
| C     | Total amount charged on this account is a credit. |

## PDS 0540 (Room Service Charges)

PDS 0540 (Room Service Charges) contains the amount of the room service charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0540                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0540 must be a fixed length of 14.

## PDS 0540 subfields

This PDS consists of three subfields.

### PDS 0540 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1–12      | Room Service Charges Amount   | n-12      | Right         |
| 2      | 13        | Room Service Charges Exponent | n-1       | N/A           |
| 3      | 14        | Room Service Charges Sign     | a-1       | N/A           |

### Subfield 1 (Room Services Charges Amount)

If PDS 0540 is present, subfield 1 (Room Services Charges Amount) must be numeric and contain the amount of the room service charges, and it may be all zeros.

### Subfield 2 (Room Service Charges Exponent)

If PDS 0540 is present, subfield 2 (Room Service Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Room Services Charges Sign)

If PDS 0540 is present, subfield 3 (Room Services Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0540 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                              |
|-------|------------------------------------------|
| D     | Room service charges amount is a debit.  |
| C     | Room service charges amount is a credit. |

## PDS 0541 (Lounge/Bar Charges)

PDS 0541 (Lounge/Bar Charges) contains the amount of the lounge or bar charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0541                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0541 must be a fixed length of 14.

## PDS 0541 subfields

This PDS consists of three subfields.

### PDS 0541 subfields

| Number | Positions | Name                        | Attribute | Justification |
|--------|-----------|-----------------------------|-----------|---------------|
| 1      | 1-12      | Lounge/Bar Charges Amount   | n-12      | right         |
| 2      | 13        | Lounge/Bar Charges Exponent | n-1       | N/A           |

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 3      | 14        | Lounge/Bar Charges Sign | a-1       | N/A           |

### Subfield 1 (Lounge/Bar Charges Amount)

If PDS 0541 is present, subfield 1 (Lounge/Bar Charges Amount) must be numeric and contain the amount of the lounge or bar charges, and it may be all zeros.

### Subfield 2 (Lounge/Bar Charges Exponent)

If PDS 0541 is present, subfield 2 (Lounge/Bar Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Lounge/Bar Charges Sign)

If PDS 0541 is present, subfield 3 (Lounge/Bar Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0541 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| D     | Lounge/Bar charges amount is a debit.  |
| C     | Lounge/Bar charges amount is a credit. |

## PDS 0542 (Transportation Charges)

PDS 0542 (Transportation Charges) contains the amount of the transportation charges.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |

| Attribute     | Description                 |
|---------------|-----------------------------|
| Tag Field     | 0542                        |
| Data Length   | 3 positions, value = 014    |
| Data Field    | Fixed length, 014 positions |
| Subfields     | 3                           |
| Justification | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0542 must be a fixed length of 14.

## PDS 0542 subfields

This PDS consists of three subfields.

## PDS 0542 subfields

| Number | Positions | Name                            | Attribute | Justification |
|--------|-----------|---------------------------------|-----------|---------------|
| 1      | 1-12      | Transportation Charges Amount   | n-12      | Right         |
| 2      | 13        | Transportation Charges Exponent | n-1       | N/A           |
| 3      | 14        | Transportation Charges Sign     | a-1       | N/A           |

## Subfield 1 (Transportation Charges Amount)

If PDS 0542 is present, subfield 1 (Transportation Charges Amount) must be numeric and contain the amount of the transportation charges, and it may be all zeros.

## Subfield 2 (Transportation Charges Exponent)

If PDS 0542 is present, subfield 2 (Transportation Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Transportation Charges Sign)

If PDS 0542 is present, subfield 3 (Transportation Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0542 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| D     | Transportation charges amount is a debit.  |
| C     | Transportation charges amount is a credit. |

## PDS 0543 (Gratuity Charges)

PDS 0543 (Gratuity Charges) contains the amount of the gratuity charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0543                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0543 must be a fixed length of 14.

## PDS 0543 subfields

This PDS consists of three subfields.

### PDS 0543 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1-12      | Gratuity Charges Amount   | n-12      | Right         |
| 2      | 13        | Gratuity Charges Exponent | n-1       | N/A           |
| 3      | 14        | Gratuity Charges Sign     | a-1       | N/A           |

### Subfield 1 (Gratuity Charges Amount)

If PDS 0543 is present, subfield 1 (Gratuity Charges Amount) must be numeric and may be all zeros.

### Subfield 2 (Gratuity Charges Exponent)

If PDS 0543 is present, subfield 2 (Gratuity Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Gratuity Charges Sign)

If PDS 0543 is present, subfield 3 (Gratuity Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0543 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                          |
|-------|--------------------------------------|
| D     | Gratuity charges amount is a debit.  |
| C     | Gratuity charges amount is a credit. |

### PDS 0544 (Rental Agreement Number)

PDS 0544 (Rental Agreement Number) contains the original vehicle rental agreement invoice number.

#### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-9; TAGLLL             |

| Data Field          | Fixed length, 9 positions |
| Subfields           | None                      |
| Justification       | Left                      |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

#### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0544 (Rental Agreement Number) and cannot contain null values.

### Values

If the actual rental agreement number contains more than nine digits, customers should populate PDS 0544 with the agreement number's right-most nine digits. If present, PDS 0544 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0545 (Renter Name)

PDS 0545 (Renter Name) is the name of the individual making the vehicle rental agreement.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...40; TAGLLLVAR             |
| Tag Field           | 0545                            |
| Data Length         | 3 positions, value = 001-040    |
| Data Field          | Variable length, 1-40 positions |
| Subfields           | None                            |

| Attribute     | Description |
|---------------|-------------|
| Justification | Left        |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

## IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0545 (Renter Name) and cannot contain null values.

## Values

PDS 0545 must be a length of 1-040.

If present, PDS 0545 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0546 (Rental Return City)

PDS 0546 (Rental Return City) is the city where the vehicle was returned to the rental agency.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLLVAR            |
| Tag Field           | 0546                            |
| Data Length         | 3 positions, value = 001–025    |
| Data Field          | Variable length, 1–25 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description            |
|-----|------------------------|
| 24  | Merchant UCAF          |
| 69  | Commercial T&E Rate II |
| 79  | Full UCAF              |

| IRD | Description                      |
|-----|----------------------------------|
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0546 (Rental Return City) and cannot contain null values.

### Values

PDS 0546 must be a length of 001–025.

If present, PDS 0546 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0547 (Rental Return State/Province)

PDS 0547 (Rental Return State/Province) is the state or province where the vehicle was returned to the rental agency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0547                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0547 (Rental Return State/Province) and cannot contain null values.

### Values

If present, PDS 0547 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. It must contain a valid U.S. state code when PDS 0548 (Rental Return Country) contains USA.

If the rental return occurs in a U.S. territory (Guam, Puerto Rico, or Virgin Islands), customers should provide the three-position country code (GUM, PRI, or VIR) in both PDS 0547 and PDS 0548.

If rental return occurs outside the U.S. region, this field is not edited.

## PDS 0548 (Rental Return Country)

PDS 0548 (Rental Return Country) is the country where the vehicle was returned to the rental agency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0548                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description             |
|-----|-------------------------|
| 24  | Merchant UCAF           |
| 69  | Commercial T&E Rate II  |
| 79  | Full UCAF               |
| 89  | Commercial T&E Rate III |

| IRD | Description                      |
|-----|----------------------------------|
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0548 (Rental Return Country) and cannot contain null values.

### Values

If present, PDS 0548 must be left-justified and contain a valid alphabetic ISO country code. It cannot contain all spaces.

When territories have a defined country code in Chapter 2 of the *Quick Reference Booklet*, that country code must be used.

## PDS 0549 (Rental Return Location ID)

PDS 0549 (Rental Return Location ID) contains the agency code, phone number, or address abbreviation used to identify the vehicle rental return location.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-10; TAGLLL             |
| Tag Field           | 0549                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 97  | Lodging and Auto Rentals         |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0549 (Rental Return Location ID) and cannot contain null values.

### Values

If present, PDS 0549 must be left-justified and cannot contain all spaces.

## PDS 0550 (Rental Return Date)

PDS 0550 (Rental Return Date) indicates the date when the vehicle was returned to the rental agency.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0550                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0550 (Rental Return Date) and cannot contain null values.

### IRDs and descriptions

| IRD | Description            |
|-----|------------------------|
| 24  | Merchant UCAF          |
| 69  | Commercial T&E Rate II |

| IRD | Description                      |
|-----|----------------------------------|
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0550 (Rental Return Date) and cannot contain null values.

### Values

If present, PDS 0550 must contain a valid date in the format YYMMDD.

## PDS 0551 (Rental Check-Out Date)

PDS 0551 (Rental Check-Out Date) is the date when the vehicle was originally rented.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0551                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0551 (Rental Checkout Date) and cannot contain null values.

### Values

If present, PDS 0551 must contain a valid date in the format YYMMDD.

## PDS 0552 (Customer Service Toll-Free [800] Number)

PDS 0552 (Customer Service Toll-Free [800] Number) contains the customer service phone number used to resolve cardholder questions and disputes.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-17; TAGLLL             |
| Tag Field           | 0552                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644       | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Lodging and Auto Rental (IRD 97) incentive interchange rate program.

This PDS is required if the associated First Presentment/1240 contains a vehicle rental MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description   |
|-----|---------------|
| 24  | Merchant UCAF |

| IRD | Description                      |
|-----|----------------------------------|
| 69  | Commercial T&E Rate II           |

| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

This PDS is required if the associated First Presentment/1240 contains a lodging MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

#### IRDs and descriptions

| IRD | Description             |
|-----|-------------------------|
| 69  | Commercial T&E Rate II  |
| 89  | Commercial T&E Rate III |
| 96  | World T&E               |

For transactions acquired in the U.S. region or Canada region, PDS 0552, if present, must contain a 10-position phone number and be left-justified with trailing spaces. The first three positions must be numeric.

#### Values

If present, PDS 0552 cannot contain all zeros, all spaces, all low values, or all high values.

## PDS 0553 (Rental Rate)

PDS 0553 (Rental Rate) contains the rental rate charged for the vehicle and indicates whether it is a daily, weekly, or monthly rate.

#### Attributes

| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0553 (Rental Rate) and cannot contain null values.

## Requirements

This PDS is required if the associated First Presentment/1240 contains a fleet card MCC and is submitted for U.S. region incentive interchange rate program 66 (Commercial Data Rate III).

## PDS 0553 subfields

This PDS consists of two subfields.

## PDS 0553 subfields

| Number | Positions | Name                  | Attribute | Justification |
|--------|-----------|-----------------------|-----------|---------------|
| 1      | 1         | Rental Rate Indicator | as-1      | N/A           |
| 2      | 2-13      | Rental Rate           | n-12      | right         |

## Subfield 1 (Rental Rate Indicator)

If PDS 0553 is present, subfield 1 (Rental Rate Indicator) must contain one of the values listed in this table.

### Values and descriptions

| Value | Description           |
|-------|-----------------------|
| D     | Daily rate            |
| W     | Weekly rate           |
| M     | Monthly rate          |
| space | Unknown or unreported |

## Subfield 2 (Rental Rate)

If PDS 0553 is present, subfield 2 (Rental Rate) must be numeric and may contain all zeros.

## PDS 0554 (Conference Room Charges)

PDS 0554 (Conference Room Charges) contains the amount of the charges associated with conference room use.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0554                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0554 must be a fixed length of 14.

### PDS 0554 subfields

This PDS consists of three subfields

#### PDS 0554 subfields

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 1      | 1–12      | Conference Room Charges Amount   | n-12      | Right         |
| 2      | 13        | Conference Room Charges Exponent | n-1       | N/A           |
| 3      | 14        | Conference Room Charges Sign     | a1        | N/A           |

#### Subfield 1 (Conference Room Charges Amount)

If PDS 0554 is present, subfield 1 (Conference Room Charges Amount) must be numeric and may be all zeros.

#### Subfield 2 (Conference Room Charges Exponent)

If PDS 0554 is present, subfield 2 (Conference Room Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Conference Room Charges Sign)

If PDS 0554 is present, subfield 3 (Conference Room Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0554 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                                 |
|-------|---------------------------------------------|
| D     | Conference room charges amount is a debit.  |
| C     | Conference room charges amount is a credit. |

### PDS 0555 (Rate Per Mile [or Per Kilometer])

PDS 0555 (Rate Per Mile [or Per Kilometer]) contains the rate charged for each mile or kilometer. It may be a daily, weekly, or monthly rate.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0555                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0555 must be numeric and may contain all zeros.

## PDS 0556 (Total Miles [or Kilometers])

PDS 0556 (Total Miles [or Kilometers]) contains the total miles or kilometers that the customer drove.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-4; TAGLLL               |
| Tag Field           | 0556                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0556 must be numeric and cannot contain all zeros.

## PDS 0557 (Maximum Free Miles [or Kilometers])

PDS 0557 (Maximum Free Miles [or Kilometers]) contains the free miles or kilometers allowed to a customer for the duration of the vehicle rental agreement.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-4; TAGLLL               |
| Tag Field           | 0557                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0557 must be numeric and may contain all zeros.

## PDS 0558 (Miles/Kilometers Indicator)

PDS 0558 (Miles/Kilometers Indicator) shows whether the miles fields are expressed in miles or kilometers.

### Attributes

| Attribute           | Description  |
|---------------------|--------------|
| Data Representation | as-1; TAGLLL |

| Attribute     | Description              |
|---------------|--------------------------|
| Tag Field     | 0558                     |
| Data Length   | 3 positions, value = 001 |
| Data Field    | Fixed length, 1 position |
| Subfields     | None                     |
| Justification | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0558 must contain one of the values listed in this table.

### Values and descriptions

| Value | Description           |
|-------|-----------------------|
| K     | Kilometers            |
| M     | Miles                 |
| space | Unknown or unreported |

## PDS 0559 (Vehicle Insurance)

PDS 0559 (Vehicle Insurance) contains an indicator of whether the customer purchased insurance and of the insurance amount.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-13; TAGLLL             |
| Tag Field           | 0559                       |
| Data Length         | 3 positions, value = 013   |
| Data Field          | Fixed length, 13 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## PDS 0559 subfields

This PDS consists of two subfields.

### PDS 0559 subfields

| Number | Positions | Name                | Attribute | Justification |
|--------|-----------|---------------------|-----------|---------------|
| 1      | 1         | Insurance Indicator | as-1      | N/A           |
| 2      | 2-13      | Insurance Charges   | n-12      | right         |

## Subfield 1: Insurance Indicator

If PDS 0559 is present, subfield 1 (Insurance Indicator) must contain one of the values listed in this table.

### Values and descriptions

| Value  | Description                      |
|--------|----------------------------------|
| Y      | Yes (insurance was purchased)    |
| N      | No (insurance was not purchased) |
| spaces | Unknown or unreported            |

## Subfield 2 (Insurance Charges)

If PDS 0559, subfield 1 is Y, PDS 0559, subfield 2 (Insurance Charges) cannot contain all spaces or all zeros.

## PDS 0560 (Audio Visual Charges)

PDS 0560 (Audio Visual Charges) contains the amount of the audiovisual equipment charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0560                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0560 must be a fixed length of 14.

### PDS 0560 subfields

This PDS consists of three subfields.

#### PDS 0560 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1–12      | Audio Visual Charges Amount   | n-12      | Right         |
| 2      | 13        | Audio Visual Charges Exponent | n-1       | N/A           |
| 3      | 14        | Audio Visual Charges Sign     | a-1       | N/A           |

#### Subfield 1 (Audio Visual Charges Amount)

If PDS 0560 is present, subfield 1 (Audio Visual Charges Amount) must be numeric and contain the amount of the audiovisual equipment charges, and it may be all zeros.

#### Subfield 2 (Audio Visual Charges Exponent)

If PDS 0560 is present, subfield 2 (Audio Visual Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

#### Subfield 3 (Audio Visual Charges Sign)

If PDS 0560 is present, subfield 3 (Audio Visual Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0560 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                              |
|-------|------------------------------------------|
| D     | Audio visual charges amount is a debit.  |
| C     | Audio visual charges amount is a credit. |

## PDS 0561 (Adjusted Amount)

PDS 0561 (Adjusted Amount) indicates whether any miscellaneous charges were incurred after the vehicle was returned.

PDS 0561 should be provided only when additional charges have been identified.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-13; TAGLLL             |
| Tag Field           | 0561                       |
| Data Length         | 3 positions, value = 013   |
| Data Field          | Fixed length, 13 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## PDS 0561 subfields

This PDS consists of two subfields.

### PDS 0561 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1         | Adjusted Amount Indicator | as-1      | N/A           |
| 2      | 2–13      | Adjusted Amount           | n-12      | right         |

### Subfield 1 (Adjusted Amount Indicator)

If PDS 0561 is present, subfield 1 (Adjusted Amount Indicator) must contain one of the values listed in this table.

### Values and descriptions

| Value | Description                         |
|-------|-------------------------------------|
| A     | Drop-off charges                    |
| B     | Delivery charges                    |
| C     | Parking expenses                    |
| D     | Extra hours                         |
| E     | Violations                          |
| X     | Multiple charges of the above types |
| space | Unknown or no additional charges    |

### Subfield 2 (Adjusted Amount)

If subfield 1 does not contain a space, subfield 2 (Adjusted Amount) must be numeric and greater than zero.

## PDS 0562 (Banquet Charges)

PDS 0562 (Banquet Charges) contains the amount of the banquet charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0562                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0562 must be a fixed length of 14.

## PDS 0562 subfields

This PDS consists of three subfields.

### PDS 0562 subfields

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 1      | 1-12      | Banquet Charges Amount   | n-12      | right         |
| 2      | 13        | Banquet Charges Exponent | n-1       | N/A           |

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 3      | 14        | Banquet Charges Sign | a-1       | N/A           |

### Subfield 1 (Banquet Charges Amount)

If PDS 0562 is present, subfield 1 (Banquet Charges Amount) must be numeric and contain the amount of the banquet charges, and it may be all zeros.

### Subfield 2 (Banquet Charges Exponent)

If PDS 0562 is present, subfield 2 (Banquet Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Banquet Charges Sign)

If PDS 0562 is present, subfield 3 (Banquet Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0562 is a debit or credit from the perspective of the cardholder.

#### Values and description

| Value | Description                         |
|-------|-------------------------------------|
| D     | Banquet charges amount is a debit.  |
| C     | Banquet charges amount is a credit. |

## PDS 0563 (Program Code)

PDS 0563 (Program Code) identifies special circumstances, such as frequent renter.

#### Attributes

| Attribute           | Description   |
|---------------------|---------------|
| Data Representation | ans-2; TAGLLL |
| Tag Field           | 0563          |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Length   | 3 positions, value = 002  |
| Data Field    | Fixed length, 2 positions |
| Subfields     | None                      |
| Justification | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0563 must be left-justified and cannot be all low values, all high values, all spaces, or all zeros.

## PDS 0564 (Rental Location City)

PDS 0564 (Rental Location City) indicates where the vehicle was rented.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLLVAR            |
| Tag Field           | 0564                            |
| Data Length         | 3 positions, value = 001-025    |
| Data Field          | Variable length, 1-25 positions |
| Subfields           | None                            |
| Justification       | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

## Values

PDS 0564, Rental Location City must be a length of 001–025.

If present, PDS 0564 must be left-justified and cannot be all low values, all high values, all spaces, or all zeros.

## PDS 0565 (Rental Location State/Province)

PDS 0565 (Rental Location State/Province) indicates the state or province where the vehicle was rented.

## Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0565                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

### Values

If present, PDS 0565 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. It must contain a valid U.S. state code if PDS 0566 (Rental Location Country) contains USA.

If the rental location occurs in a U.S. territory (Guam, Puerto Rico, or Virgin Islands), customers should provide the three-position country code (GUM, PRI, or VIR) in both PDS 0565 and PDS 0566 (Rental Location Country).

## PDS 0566 (Rental Location Country)

PDS 0566 (Rental Location Country) indicates the country where the vehicle was rented.

### Attributes

| Attribute            | Description               |
|----------------------|---------------------------|
| Data Representation: | as-3; TAGLLL              |
| Tag Field:           | 0566                      |
| Data Length          | 3 positions, value = 003  |
| Data Field           | Fixed length, 3 positions |
| Subfields            | None                      |
| Justification        | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

### Values

If present, PDS 0566 must be left-justified and be a valid alphabetic ISO country code. It cannot contain all spaces.

When territories have a defined country code in Chapter 2 of the *Quick Reference Booklet*, that country code must be used.

## PDS 0567 (Rental Location ID)

PDS 0567 (Rental Location ID) contains the agency code, phone number, or address abbreviation used to identify the rental location.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-10; TAGLLL             |
| Tag Field           | 0567                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values)

If present, PDS 0567 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0568 (Rental Class ID)

PDS 0568 (Rental Class ID) contains the classification, such as midsize or luxury, of the vehicle rented.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-4; TAGLLL             |
| Tag Field           | 0568                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

## Values

If present, PDS 0568 must be left-justified and cannot contain all low values, high values, all spaces, or all zeros. Otherwise, the clearing system does not edit PDS 0568. Suggested values are listed in this table.

### Values and descriptions

| Value | Description      |
|-------|------------------|
| 0001  | Mini             |
| 0002  | Subcompact       |
| 0003  | Economy          |
| 0004  | Compact          |
| 0005  | Midsize          |
| 0006  | Intermediate     |
| 0007  | Standard         |
| 0008  | Full size        |
| 0009  | Luxury           |
| 0010  | Premium          |
| 0011  | Minivan          |
| 0012  | 12-passenger van |
| 0013  | Moving van       |
| 0014  | 15-passenger van |
| 0015  | Cargo van        |
| 0016  | 12-foot truck    |
| 0017  | 20-foot truck    |
| 0018  | 24-foot truck    |
| 0019  | 26-foot truck    |
| 0020  | Moped            |
| 0021  | Stretch          |
| 0022  | Regular          |

| Value | Description        |
|-------|--------------------|
| 0023  | Unique             |
| 0024  | Exotic             |
| 0025  | Small/medium truck |
| 0026  | Large truck        |
| 0027  | Small SUV          |
| 0028  | Medium SUV         |
| 0029  | Large SUV          |
| 0030  | Exotic SUV         |
| 9999  | Miscellaneous      |

## PDS 0569 (Internet Access Charges)

PDS 0569 (Internet Access Charges) contains the amount of the internet access charges.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0569                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0569 must be a fixed length of 14.

## PDS 0569 subfields

This PDS consists of three subfields.

### PDS 0569 subfields

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 1      | 1–12      | Internet Access Charges Amount   | n-12      | right         |
| 2      | 13        | Internet Access Charges Exponent | n-1       | N/A           |
| 3      | 14        | Internet Access Charges Sign     | a-1       | N/A           |

### Subfield 1 (Internet Access Charges Amount)

If PDS 0569 is present, subfield 1 (Internet Access Charges Amount) must be numeric, contain the amount of the Internet access charges, and may be all zeros.

### Subfield 2 (Internet Access Charges Exponent)

If PDS 0569 is present, subfield 2 (Internet Access Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Internet Access Charges Sign)

If PDS 0569 is present, subfield 3 (Internet Access Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0569 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| D     | Internet Access Charges amount is a debit. |

| Value | Description                                 |
|-------|---------------------------------------------|
| C     | Internet Access Charges amount is a credit. |

## PDS 0570 (Early Departure Charges)

PDS 0570 (Early Departure Charges) contains the amount charged because of early departure.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |
| Tag Field           | 0570                        |
| Data Length         | 3 positions, value = 014    |
| Data Field          | Fixed length, 014 positions |
| Subfields           | 3                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0570 must be a fixed length of 14.

## PDS 0570 subfields

This PDS consists of three subfields.

### PDS 0570 subfields

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 1      | 1–12      | Early Departure Charges Amount   | n-12      | right         |
| 2      | 13        | Early Departure Charges Exponent | n-1       | N/A           |
| 3      | 14        | Early Departure Charges Sign     | a-1       | N/A           |

### Subfield 1 (Early Departure Charges Amount)

If PDS 0570 is present, subfield 1 (Early Departure Charges Amount) must be numeric, contain the amount of the early departure charges, and may be all zeros.

### Subfield 2 (Early Departure Charges Exponent)

If PDS 0570 is present, subfield 2 (Early Departure Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Early Departure Charges Sign)

If PDS 0570 is present, subfield 3 (Early Departure Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0570 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                 |
|-------|---------------------------------------------|
| D     | Early departure charges amount is a debit.  |
| C     | Early departure charges amount is a credit. |

## PDS 0571 (Guest Name)

PDS 0571 (Guest Name) contains the name of the lodging patron.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...40; TAGLLLVAR                |
| Tag Field           | 0571                               |
| Data Length         | 3 positions, value = 001–040       |
| Data Field          | Variable length, 001–040 positions |
| Subfields           | None                               |
| Justification       | Left                               |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0571 must be a length of 001–040. If present, PDS 0571 must be left-justified and cannot contain all low values, high values, all spaces, or all zeros.

## PDS 0572 (Guest Number)

PDS 0572 (Guest Number) contains the number assigned to the lodging patron.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-25; TAGLLL |
| Tag Field           | 0572           |

| Attribute     | Description                 |
|---------------|-----------------------------|
| Data Length   | 3 positions, value = 025    |
| Data Field    | Fixed length, 025 positions |
| Subfields     | None                        |
| Justification | Left                        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

PDS 0572 must be a fixed length of 025. If present, PDS 0572 must be left-justified and cannot contain all low values, high values, all spaces, or all zeros.

## PDS 0573 (Invoice Number)

PDS 0573 (Invoice Number) contains the number of the electronic invoice.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...25; TAGLLLLVAR               |
| Tag Field           | 0573                               |
| Data Length         | 3 positions, value = 001–025       |
| Data Field          | Variable length, 001–025 positions |
| Subfields           | None                               |
| Justification       | Left                               |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                               | Org | Sys | Dst |
|-----------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Transaction Data)/1644 | C   | •   | C   |

PDS 0573 must be present in a Financial Addendum (Electronic Invoice, Transaction Data)/1644 when the transaction is for one of these Mastercard Payment Gateway Interchange Programs:

- E1 Commercial Large Ticket Rate 1 MPG
- E2 Commercial Large Ticket Rate 2 MPG, or
- E3 Commercial Large Ticket Rate 3 MPG.

## Values

PDS 0573 must be a length of 001–025. If present, PDS 0573 must be left-justified and cannot contain all low values, high values, all spaces, or all zeros.

## PDS 0574 (Arrival Date)

PDS 0574 (Arrival Date) contains the cardholder check-in date.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0574                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0574 (Arrival Date) and cannot contain null values.

## Values

If present, PDS 0574 must contain a valid date in the format YYMMDD.

## PDS 0575 (Departure Date)

PDS 0575 (Departure Date) contains the cardholder checkout date.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0575                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0575 (Departure Date) and cannot contain null values.

### IRDs and descriptions

| IRD | Description            |
|-----|------------------------|
| 24  | Merchant UCAF          |
| 69  | Commercial T&E Rate II |

| IRD | Description                      |
|-----|----------------------------------|
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0575 (Departure Date) and cannot contain null values.

### Values

If present, PDS 0575 must contain a valid date in the format YYMMDD.

## PDS 0576 (Folio Number)

PDS 0576 (Folio Number) contains the acceptor's internal invoice or billing ID reference number.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLLVAR            |
| Tag Field           | 0576                            |
| Data Length         | 3 positions, value = 001-025    |
| Data Field          | Variable length, 1-25 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for one of the following U.S. region incentive interchange rate programs.

### IRDs and descriptions

| IRD | Description                      |
|-----|----------------------------------|
| 24  | Merchant UCAF                    |
| 69  | Commercial T&E Rate II           |
| 79  | Full UCAF                        |
| 89  | Commercial T&E Rate III          |
| 96  | World T&E                        |
| 97  | Lodging and Auto Rental          |
| RN  | Enhanced Merchant UCAF           |
| RO  | Enhanced Full UCAF               |
| RS  | Enhanced Lodging and Auto Rental |

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0576 (Folio Number) and cannot contain null values.

### Values

PDS 0576, Folio Number must be a length of 001–025.

If present, PDS 0576 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0577 (Property Phone Number)

PDS 0577 (Property Phone Number) identifies specific lodging property location by its local phone number.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-17; TAGLLL             |
| Tag Field           | 0577                       |
| Data Length         | 3 positions, value = 017   |
| Data Field          | Fixed length, 17 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Lodging and Auto Rental (IRD 97) incentive interchange rate program.

Either this PDS or PDS 0552 (Customer Service Toll-Free [800] Number) is required if the associated First Presentment/1240 contains a lodging MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD | Description            |
|-----|------------------------|
| 24  | Merchant UCAF          |
| 69  | Commercial T&E Rate II |

| IRD | Description             |
|-----|-------------------------|
| 79  | Full UCAF               |
| 89  | Commercial T&E Rate III |
| 96  | World T&E               |
| RN  | Enhanced Merchant UCAF  |
| RO  | Enhanced Full UCAF      |

For transactions acquired in the U.S. or Canada region, PDS 0577, if present, must contain a 10-position phone number, left-justified with trailing spaces. The first three positions must be numeric.

### Values

If present, PDS 0577 cannot contain all low values, all high values, all zeros, or all spaces.

## PDS 0578 (Billing Adjustment)

PDS 0578 (Billing Adjustment) indicates whether any additional charges were incurred after the cardholder's departure.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-15; TAGLLL             |
| Tag Field           | 0578                       |
| Data Length         | 3 positions, value = 015   |
| Data Field          | Fixed length, 15 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## PDS 0578 subfields

This PDS consists of two subfields.

### PDS 0578 subfields

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 1      | 1         | Billing Adjustment Indicator | as-1      | N/A           |
| 2      | 2–13      | Billing Adjustment Amount    | n-12      | right         |
| 3      | 14        | Billing Adjustment Exponent  | n-1       | N/A           |
| 4      | 15        | Billing Adjustment Sign      | a-1       | N/A           |

### Subfield 1 (Billing Adjustment Indicator)

If PDS 0578 is present, subfield 1 (Billing Adjustment Indicator) should contain one of the values listed in this table.

### Values and descriptions

| Value | Description                           |
|-------|---------------------------------------|
| Y     | Yes (additional charges were added)   |
| N     | No (no additional charges were added) |
| space | No additional charges or unknown      |

### Subfield 2 (Billing Adjustment Amount)

Subfield 2 (Billing Adjustment Amount) contains the total amount of the charges added after the departure. If subfield 1 contains a Y, subfield 2 must be numeric and greater than zero.

### Subfield 3 (Billing Adjustment Exponent)

Subfield 3 (Billing Adjustment Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 4 (Billing Adjustment Sign)

If PDS 0578 is present, subfield 4 (Billing Adjustment Sign) must contain a value of D or C. This subfield identifies whether PDS 0578 is a debit or credit from the perspective of the cardholder. The values are listed in this table.

#### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| D     | Billing Adjustment amount is a debit.  |
| C     | Billing Adjustment amount is a credit. |

## PDS 0579 (Invoice Date)

PDS 0579 (Invoice Date) contains the date of the electronic invoice.

#### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0579                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                               | Org | Sys | Dst |
|-----------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Transaction Data)/1644 | O   | .   | C   |

### Values

PDS 0579 must be numeric and must be a fixed length of 006. If present, PDS 0579 must contain a valid date in the format YYMMDD.

## PDS 0580 (Room Rate)

PDS 0580 (Room Rate) contains the daily room charges exclusive of taxes and fees.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-13; TAGLLL             |
| Tag Field           | 0580                       |
| Data Length         | 3 positions, value = 013   |
| Data Field          | Fixed length, 13 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0580 (Room Rate) and cannot contain null values.

### Values

If various room rates apply for the same stay (folio), the room rate for the majority of number of days should be listed.

If present, PDS 0580 must be a fixed length of 13 and may contain all zeros.

## PDS 0580 subfields

This PDS consists of two subfields.

### PDS 0580 subfields

| Number | Positions | Name               | Attribute | Justification |
|--------|-----------|--------------------|-----------|---------------|
| 1      | 1-12      | Room Rate Amount   | n-12      | right         |
| 2      | 13        | Room Rate Exponent | n-1       | N/A           |

### Subfield 1 (Room Rate Amount)

Subfield 1 (Room Rate Amount) contains the daily room charges exclusive of taxes and fees. If PDS 0580 is present, subfield 1 must be numeric.

### Subfield 2 (Room Rate Exponent)

Subfield 2 (Room Rate Exponent) must be numeric and contain a value of 0 to 5.

## PDS 0581 (Total Room Tax)

PDS 0581 (Total Room Tax) contains tax amount information such as the daily room tax, occupancy tax, energy tax, and tourist tax amounts.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0581                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

### Values

If present, must be a fixed length of 14.

## PDS 0581 subfields

This PDS consists of three subfields.

### PDS 0581 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1–12      | Total Room Tax Amount   | n–12      | right         |
| 2      | 13        | Total Room Tax Exponent | n–1       | N/A           |
| 3      | 14        | Total Room Tax Sign     | a–1       | N/A           |

### Subfield 1 (Total Room Tax Amount)

Subfield 1 (Total Room Tax Amount) contains the total amount of the charges for Total Room Tax. If PDS 0581 is present, subfield 1 must be numeric.

### Subfield 2 (Total Room Tax Exponent)

If PDS 0581 is present, subfield 2 (Total Room Tax Exponent) must be numeric and contain a value of 0 to 5.

#### NOTE:

**Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Total Room Tax Sign)

If PDS 0581 is present, subfield 3 (Total Room Tax Sign) must contain a value of D or C. This subfield identifies whether PDS 0581 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                        |
|-------|------------------------------------|
| D     | Total room tax amount is a debit.  |
| C     | Total room tax amount is a credit. |

## PDS 0582 (Program Code)

PDS 0582 (Program Code) indicates special circumstances such as no-show situations.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-2; TAGLLL             |
| Tag Field           | 0582                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0582 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0583 (Phone Charges)

PDS 0583 (Phone Charges) contains the total amount of charges for all phone calls.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |
| Tag Field           | 0583           |

| Attribute     | Description                |
|---------------|----------------------------|
| Data Length   | 3 positions, value = 014   |
| Data Field    | Fixed length, 14 positions |
| Subfields     | 3                          |
| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

If present, PDS 0583 must be a fixed length of 14.

## PDS 0583 subfields

This PDS consists of three subfields.

## PDS 0583 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-12      | Phone Charges Amount   | n-12      | right         |
| 2      | 13        | Phone Charges Exponent | n-1       | N/A           |
| 3      | 14        | Phone Charges Sign     | a-1       | N/A           |

## Subfield 1 (Phone Charges Amount)

Subfield 1 (Phone Charges Amount) contains the total amount of charges for all phone calls. If PDS 0583 is present, subfield 1 must be numeric.

## Subfield 2 (Phone Charges Exponent)

If PDS 0583 is present, subfield 2 (Phone Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Phone Charges Sign)

If PDS 0583 is present, subfield 3 (Phone Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0583 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                       |
|-------|-----------------------------------|
| D     | Phone charges amount is a debit.  |
| C     | Phone charges amount is a credit. |

## PDS 0584 (Restaurant Charges)

PDS 0584 (Restaurant Charges) contains the total amount of all restaurant charges.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0584                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0584 must be a fixed length of 14.

### PDS 0584 subfields

This PDS consists of three subfields.

#### PDS 0584 subfields

| Number | Positions | Name                        | Attribute | Justification |
|--------|-----------|-----------------------------|-----------|---------------|
| 1      | 1–12      | Restaurant Charges Amount   | n–12      | right         |
| 2      | 13        | Restaurant Charges Exponent | n–1       | N/A           |
| 3      | 14        | Restaurant Charges Sign     | a–1       | N/A           |

#### Subfield 1 (Restaurant Charges Amount)

If PDS 0584 is present, subfield 1 (Restaurant Charges Amount) must be numeric and contain the restaurant charges amount.

#### Subfield 2 (Restaurant Charges Exponent)

If PDS 0584 is present, subfield 2 (Restaurant Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

#### Subfield 3 (Restaurant Charges Sign)

If PDS 0584 is present, subfield 3 (Restaurant Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0584 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| D     | Restaurant charges amount is a debit.  |
| C     | Restaurant charges amount is a credit. |

## PDS 0585 (Mini-Bar Charges)

PDS 0585 (Mini-Bar Charges) contains the total amount of in-room mini-bar service charges.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0585                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0585 must be a fixed length of 14.

## PDS 0585 subfields

This PDS consists of three subfields.

### PDS 0585 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1–12      | Mini-Bar Charges Amount   | n–12      | right         |
| 2      | 13        | Mini-Bar Charges Exponent | n–1       | N/A           |
| 3      | 14        | Mini-Bar Charges Sign     | a–1       | N/A           |

### Subfield 1 (Mini-Bar Charges Amount)

If PDS 0585 is present, subfield 1 (Mini-Bar Charges Amount) must be numeric and contain the mini-bar charges amount.

### Subfield 2 (Mini-Bar Charges Exponent)

If PDS 0585 is present, subfield 2 (Mini-Bar Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Mini-Bar Charges Sign)

If PDS 0585 is present, subfield 3 (Mini-Bar Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0585 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                          |
|-------|--------------------------------------|
| D     | Mini-Bar charges amount is a debit.  |
| C     | Mini-Bar charges amount is a credit. |

## PDS 0586 (Gift Shop Charges)

PDS 0586 (Gift Shop Charges) contains the total amount of all gift shop and specialty shop charges.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0586                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0586 must be a fixed length of 14.

## PDS 0586 subfields

This PDS consists of three subfields.

### PDS 0586 subfields

| Number | Positions | Name                       | Attribute | Justification |
|--------|-----------|----------------------------|-----------|---------------|
| 1      | 1-12      | Gift Shop Charges Amount   | n-12      | right         |
| 2      | 13        | Gift Shop Charges Exponent | n-1       | N/A           |

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 3      | 14        | Gift Shop Charges Sign | a-1       | N/A           |

### Subfield 1 (Gift Shop Charges Amount)

Subfield 1 (Gift Shop Charges Amount) contains the total amount of all gift shop and specialty shop charges. If PDS 0586 is present, subfield 1 must be numeric.

### Subfield 2 (Gift Shop Charges Exponent)

If PDS 0586 is present, subfield 2 (Gift Shop Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Gift Shop Charges Sign)

If PDS 0586 is present, subfield 3 (Gift Shop Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0586 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                           |
|-------|---------------------------------------|
| D     | Gift Shop charges amount is a debit.  |
| C     | Gift Shop charges amount is a credit. |

## PDS 0587 (Laundry and Dry Cleaning Charges)

PDS 0587 (Laundry and Dry Cleaning Charges) contains the total amount of cleaning charges.

#### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |
| Tag Field           | 0587           |

| Attribute     | Description                |
|---------------|----------------------------|
| Data Length   | 3 positions, value = 014   |
| Data Field    | Fixed length, 14 positions |
| Subfields     | 3                          |
| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

If present, PDS 0587 must be a fixed length of 14.

## PDS 0587 subfields

This PDS consists of three subfields.

## PDS 0587 subfields

| Number | Positions | Name                                      | Attribute | Justification |
|--------|-----------|-------------------------------------------|-----------|---------------|
| 1      | 1-12      | Laundry and Dry Cleaning Charges Amount   | n-12      | right         |
| 2      | 13        | Laundry and Dry Cleaning Charges Exponent | n-1       | N/A           |
| 3      | 14        | Laundry and Dry Cleaning Charges Sign     | a-1       | N/A           |

## Subfield 1 (Laundry and Dry Cleaning Charges Amount)

Subfield 1 (Laundry and Dry Cleaning Charges Amount) contains the total amount of all laundry and dry cleaning charges. If PDS 0587 is present, subfield 1 must be numeric.

## Subfield 2 (Laundry and Dry Cleaning Charges Exponent)

If PDS 0587 is present, subfield 2 (Laundry and Dry Cleaning Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Laundry and Dry Cleaning Charges Sign)

If PDS 0587 is present, subfield 3 (Laundry and Dry Cleaning Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0587 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                          |
|-------|------------------------------------------------------|
| D     | Laundry and Dry Cleaning charges amount is a debit.  |
| C     | Laundry and Dry Cleaning charges amount is a credit. |

## PDS 0588 (Other Services)

PDS 0588 (Other Services) contains the total amount of other service charges, not elsewhere classified.

### Attributes

| Attribute           | Description                       |
|---------------------|-----------------------------------|
| Data Representation | ans-102; TAGLLLVAR                |
| Tag Field           | 0588                              |
| Data Length         | 3 positions, value = 017–102      |
| Data Field          | Variable length, 17–102 positions |
| Subfields           | 4                                 |
| Occurrences         | 1–6                               |
| Justification       | See "Subfields"                   |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

PDS 0588 must be a length of 017–102, and it must be divisible by a minimum occurrence length of 017.

## PDS 0588 subfields

This PDS consists of four subfields.

### PDS 0588 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1–3       | Other Services Code     | ans-3     | left          |
| 2      | 4–15      | Other Services Amount   | n-12      | right         |
| 3      | 16        | Other Services Exponent | n-1       | N/A           |
| 4      | 17        | Other Services Sign     | a-1       | N/A           |

### Subfield 1 (Other Services Code)

Subfield 1 (Other Services Code) contains the code indicating the type of services provided. If present, subfield 1 must be left-justified and cannot be all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Other Services Amount)

Subfield 2 (Other Services Amount) must be numeric.

### Subfield 3 (Other Services Exponent)

If PDS 0588 is present, subfield 3 (Other Services Exponent) must be numeric and must contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 4 (Other Services Sign)

If PDS 0588 is present, subfield 4 (Other Services Sign) must contain a value of D or C. This subfield identifies whether PDS 0588 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| D     | Other Services charges amount is a debit.  |
| C     | Other Services charges amount is a credit. |

## PDS 0589 (Invoice Creation Date/Time)

PDS 0589 (Invoice Creation Date/Time) contains the date and time the electronic invoice was created.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0589                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                               | Org | Sys | Dst |
|-----------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Transaction Data)/1644 | O   | .   | C   |

## Values

PDS 0589 must be a fixed length of 12.

## PDS 0589 subfields

This PDS consists of two subfields.

### PDS 0589 subfields

| Number | Positions | Name                  | Attribute | Justification |
|--------|-----------|-----------------------|-----------|---------------|
| 1      | 1–6       | Invoice Creation Date | n-6       | right         |
| 2      | 7–12      | Invoice Creation Time | n-6       | right         |

### Subfield 1 (Invoice Creation Date)

If PDS 0589 is present, subfield 1 (Invoice Creation Date) must be numeric and must contain a valid date in the format YYMMDD.

### Subfield 2 (Invoice Creation Time)

If PDS 0589 is present, subfield 2 (Invoice Creation Time) must be numeric and must contain a valid time in the format HHMMSS.

## PDS 0590 (Party Identification)

PDS 0590 (Party Identification) contains a code that identifies the various parties on an invoice.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-2; TAGLLL              |
| Tag Field           | 0590                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

### Values

If present, PDS 0590 must be a fixed length of 02 and contain one of the values listed in this table.

### Values and descriptions

| Value | Description                                                  |
|-------|--------------------------------------------------------------|
| BY    | Buyer or company buying the goods or services (Corporate)    |
| SU    | Supplier or the provider of the goods or services (Merchant) |
| IV    | The party to whom the invoice is addressed                   |
| PE    | Payee or the party that will receive payment                 |

| Value | Description                                                                     |
|-------|---------------------------------------------------------------------------------|
| DP    | Delivery party or the party that will receive the goods                         |
| SF    | Ship from party or the company from which the goods or services will be shipped |

## PDS 0591 (Party Name)

PDS 0591 (Party Name) contains name of the party identified on the invoice.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...120; TAGLLLLVAR          |
| Tag Field           | 0591                           |
| Data Length         | 3 positions, value = 040–120   |
| Data Field          | Variable length, 120 positions |
| Subfields           | 1                              |
| Occurrences         | 1–3                            |
| Justification       | Left                           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

## PDS 0591 subfields

This PDS contains from one to three occurrences of party name information.

Each occurrence requires 40 positions. The length of this PDS must be a multiple of 40, with a maximum length of 120 positions.

### PDS 0591 subfields

| Number | Positions | Name       | Attribute | Justification |
|--------|-----------|------------|-----------|---------------|
| 1      | 1-40      | Party Name | ans-40    | left          |

### Subfield 1 (Party Name)

If present, PDS 0591, subfield 1 (Party Name) must be left-justified and cannot contain all low values, high values, spaces, or zeros.

## PDS 0592 (Party Address)

PDS 0592 (Party Address) contains the address of the party identified on the invoice.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...240; TAGLLLLVAR          |
| Tag Field           | 0592                           |
| Data Length         | 3 positions, value = 040-240   |
| Data Field          | Variable length, 240 positions |
| Subfields           | 1                              |
| Occurrences         | 1-6                            |
| Justification       | Left                           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

## Values

PDS 0592 contains from one to six occurrences of party address information. The PDS must be a length of 040–240 and must be divisible by minimum occurrence length of 040.

## PDS 0592 subfields

This PDS contains from one to six occurrences of party address information.

Each occurrence requires 40 positions. The length of this PDS must be a multiple of 40, with a maximum length of 240 positions.

### PDS 0592 subfields

| Number | Positions | Name               | Attribute | Justification |
|--------|-----------|--------------------|-----------|---------------|
| 1      | 1–40      | Party Address Line | ans-40    | left          |

## Subfield 1 (Party Address Line)

If present, PDS 0592 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0593 (Party Postal Information)

PDS 0593 (Party Postal Information) contains the city, state/province, country code, and postal code of the party identified on the invoice.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...46; TAGLLLLVAR          |
| Tag Field           | 0593                          |
| Data Length         | 3 positions, value = 025–046  |
| Data Field          | Variable length, 46 positions |
| Subfields           | 4                             |
| Justification       | See "Subfields"               |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

## Values

PDS 0593 must be a length of 025–046.

## PDS 0593 subfields

PDS 0593 consists of four subfields.

### PDS 0593 subfields

| Number | Positions | Name                | Attribute | Justification |
|--------|-----------|---------------------|-----------|---------------|
| 1      | 1–25      | City                | ans-25    | left          |
| 2      | 26–28     | State/Province Code | ans-3     | left          |
| 3      | 29–31     | Country Code        | ans-3     | left          |
| 4      | 32–46     | Postal Code         | ans-15    | left          |

### Subfield 1 (City)

When PDS 0593 is present, subfield 1 (City) is required to be present, must be 25 positions, and must contain the city of the party identified on the invoice. This subfield must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (State/Province Code)

Subfield 2 (State/Province Code) contains the state or province code of the party identified on the invoice. This subfield must be a fixed length of 003 and must be left-justified. It cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Country Code)

Subfield 3 (Country Code) contains the country code of the party identified on the invoice. This subfield must be a fixed length of 003 and must be left-justified. It cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 4 (Postal Code)

Subfield 4 (Postal Code) contains the postal code of the party identified on the invoice. This subfield must be a fixed length of 015 and must be left-justified. It cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0594 (Party Contact)

PDS 0594 (Party Contact) contains a contact descriptor and party information for the party identified on the invoice.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...305; TAGLLLLVAR          |
| Tag Field           | 0594                           |
| Data Length         | 3 positions, value = 061–305   |
| Data Field          | Variable length, 305 positions |
| Subfields           | 2                              |
| Occurrences         | 5                              |
| Justification       | See "Subfields"                |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

## Values

PDS 0594 must be a length of 061–305 and must be divisible by minimum occurrence length of 061.

## PDS 0594 subfields

PDS 0594 consists of two subfields.

### PDS 0594 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1         | Party Contact Descriptor  | n-1       | N/A           |
| 2      | 2–61      | Party Contact Information | ans-60    | left          |

### Subfield 1 (Party Contact Descriptor)

Subfield 1 (Party Contact Descriptor) contains a code that identifies the type of party information being provided. If present, this subfield must be numeric and must be left-justified. It cannot contain all low values, all high values, all spaces, or all zeros, and it must contain one of the values listed in this table.

### Values and descriptions

| Value | Description    |
|-------|----------------|
| 1     | Name           |
| 2     | Title          |
| 3     | Telephone      |
| 4     | E-mail address |
| 5     | Function       |

### Subfield 2 (Party Contact Information)

Subfield 2 (Party Contact Information) contains the contact information of the party. This subfield must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0595 (Acceptor Type)

PDS 0595 (Acceptor Type) contains various classifications of business ownership characteristics.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-8; TAGLLL             |
| Tag Field           | 0595                      |
| Data Length         | 3 positions, value = 008  |
| Data Field          | Fixed length, 8 positions |
| Subfields           | 8                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | C   | •   | C   |

This PDS must be present in the associated Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 message for First Presentment/1240 transactions submitted with this criteria:

- DE 43 (Acceptor Name/Location), subfield 6 (Acceptor Country Code) equals USA.
- DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type) equals 00 (Purchase [Goods and Services]) or 18 (Unique).
- The GCMS Product ID associated with DE 2 (Primary Account Number) is a corporate product.

### Requirements

This requirement applies to corporate card transactions conducted with a U.S.-based merchant or acceptor.

PDS 0595, subfield 5, value of R (Acceptor refused to provide business type), is only valid with transactions submitted for the interchange programs listed in this table.

### IRDs and descriptions

| IRD                                         | Description                                                          |
|---------------------------------------------|----------------------------------------------------------------------|
| Interregional Interchange Programs          |                                                                      |

| 3K                                          | Business Level 3 Standard                                            |
| 4K                                          | Business Level 4 Standard                                            |

### Values

If present, PDS 0595 must be a fixed length of 8.

Value of 2 (Not known), in Subfield 1 is not permitted for commercial card transactions conducted with a U.S.-based acceptor, unless submitted for a Standard interchange program.

Value R (Acceptor refused to provide business type) is permitted in Subfield 5 for commercial card transactions conducted with a U.S.-based acceptor, only when submitted for a Standard interchange program.

If Subfield 5 contains the value R (Acceptor refused to provide business type), Subfield 1 must contain the value 2 (Not known) for commercial card transactions conducted with a U.S.-based acceptor, when submitted for a standard interchange program.

## PDS 0595 subfields

PDS 0595 consists of eight subfields.

### PDS 0595 subfields

| Number | Positions | Name                                      | Attribute | Justification |
|--------|-----------|-------------------------------------------|-----------|---------------|
| 1      | 1         | Business Type                             | ans-1     | N/A           |
| 2      | 2         | Business Owner Type                       | ans-1     | N/A           |
| 3      | 3         | Business Certification Type               | ans-1     | N/A           |
| 4      | 4         | Business Racial/Ethnic Type               | ans-1     | N/A           |
| 5      | 5         | Business Type Provided Code               | ans-1     | N/A           |
| 6      | 6         | Business Owner Type Provided Code         | ans-1     | N/A           |
| 7      | 7         | Business Certification Type Provided Code | ans-1     | N/A           |
| 8      | 8         | Business Racial/Ethnic Type Provided Code | ans-1     | N/A           |

## Subfield 1 (Business Type)

If PDS 0595 is present, subfield 1 (Business Type) contains a code to identify the specific classification or type of business. PDS 0595 subfield 1 cannot contain all low values or all high values. The values in this table must be used in this subfield.

### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| 1     | Corporation                    |
| 2     | Not known                      |
| 3     | Individual/Sole Proprietorship |
| 4     | Partnership                    |

| Value | Description                     |
|-------|---------------------------------|
| 5     | Association/Estate/Trust        |
| 6     | Tax Exempt Organizations (501C) |
| 7     | International Organization      |
| 8     | Limited Liability Company (LLC) |
| 9     | Government Agency               |

### Subfield 2 (Business Owner Type)

Subfield 2 (Business Owner Type) contains a code to identify specific characteristics about the business owner. Subfield 2 cannot contain all low values or all high values. The valid values are listed in this table.

#### Values and descriptions

| Value | Description                                  |
|-------|----------------------------------------------|
| 1     | No application classification                |
| 2     | Female business owner                        |
| 3     | Physically handicapped female business owner |
| 4     | Physically handicapped male business owner   |
| 0     | Unknown                                      |

### Subfield 3 (Business Certification Type)

Subfield 3 (Business Certification Type) contains a code to identify specific characteristics about the business certification type, such as small business, disadvantaged, or other certification type. This subfield cannot contain all low values or all high values. The valid values are listed in this table.

#### Values and descriptions

| Value | Description                                                      |
|-------|------------------------------------------------------------------|
| 1     | Not certified                                                    |
| 2     | Small Business Administration (SBA) certification small business |

| Value | Description                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------|
| 3     | SBA certification as small disadvantaged business                                                         |
| 4     | Other government or agency-recognized certification (such as Minority Supplier Development Council)       |
| 5     | Self-certified small business                                                                             |
| 6     | SBA certification as small and other government or agency-recognized certification                        |
| 7     | SBA certification as small disadvantaged business and other government or agency-recognized certification |
| 8     | Other government or agency-recognized certification and self-certified small business                     |
| A     | SBA certification as 8(a)                                                                                 |
| B     | Self-certified small disadvantaged business (SDB)                                                         |
| C     | SBA certification as HUBZone                                                                              |
| 0     | Unknown                                                                                                   |

#### Subfield 4 (Business Racial/Ethnic Type)

Subfield 4 (Business Racial/Ethnic Type) contains a code identifying the racial or ethnic type of the majority owner of the business. This subfield cannot contain all low values or all high values. The valid values are listed in this table.

#### Values and descriptions

| Value | Description                 |
|-------|-----------------------------|
| 1     | African American            |
| 2     | Asian Pacific American      |
| 3     | Subcontinent Asian American |
| 4     | Hispanic American           |
| 5     | Native American Indian      |
| 6     | Native Hawaiian             |
| 7     | Native Alaskan              |
| 8     | Caucasian                   |
| 9     | Other                       |

| Value | Description |
|-------|-------------|
| 0     | Unknown     |

### Subfield 5 (Business Type Provided Code)

The valid values for subfield 5 (Business Type Provided Code) are listed in this table.

#### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| Y     | Business type is provided.                 |
| N     | Business type was not provided.            |
| R     | Acceptor refused to provide business type. |

### Subfield 6 (Business Owner Type Provided Code)

The valid values for subfield 6 (Business Owner Type Provided Code) are listed in this table.

#### Values and descriptions

| Value | Description                                |
|-------|--------------------------------------------|
| Y     | Business owner type is provided.           |
| N     | Business owner type was not provided.      |
| R     | Acceptor refused to provide business type. |

### Subfield 7 (Business Certification Type Provided Code)

The valid values for subfield 7 (Business Certification Type Provided Code) are listed in this table.

#### Values and descriptions

| Value | Description                              |
|-------|------------------------------------------|
| Y     | Business certification type is provided. |

| Value | Description                                   |
|-------|-----------------------------------------------|
| N     | Business certification type was not provided. |
| R     | Acceptor refused to provide business type.    |

### Subfield 8 (Business Racial/Ethnic Type Provided Code)

The valid values for subfield 8 (Business Racial/Ethnic Type Provided Code) are listed in this table.

#### Values and descriptions

| Value | Description                                              |
|-------|----------------------------------------------------------|
| Y     | Business racial/ethnic type is provided.                 |
| N     | Business racial/ethnic type was not provided.            |
| R     | Acceptor refused to provide business racial/ethnic type. |

## PDS 0596 (Acceptor Tax ID)

PDS 0596 (Acceptor Tax ID) contains the identifier of the Acceptor issued by a taxation authority, including U.S. federal tax ID, value added tax (VAT) ID or other national, state or local taxation authority ID.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-21;TAGLLL              |
| Tag Field           | 0596                       |
| Data Length         | 3 positions, value = 021   |
| Data Field          | Fixed length, 21 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| First Presentment/1240                                                   | C   | .   | C   |
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | C   | .   | C   |

PDS 0596 must be present in a Financial Detail Addendum (Corporate Common Card Data)/1644 when all of these conditions exist.

- The product code is any corporate product code.
- The Acceptor Country Code (DE 43 subfield 6) equals USA.
- Financial Detail Addendum (Corporate Card Common Data) the Processing Code (DE 3, subfield 1) is equal to 00 (Purchase [Goods and Services]), 09 (Purchase [Goods and Services]) with Cash Back, or 18 (Unique), 09 (Purchase [Goods and Services]) with Cash Back, or 18 (Unique Transaction). Transaction).
- The transaction is not a reversal.

For transactions acquired outside the U.S. region, PDS 0596 must be present if the associated First Presentment/1240 is submitted for IRD 67: Interregional Commercial Purchasing Data Rate II.

PDS 0596 must be present in a Financial Detail Addendum (Corporate Common Card Data)/1644 when all these conditions exist.

- The product code is MCP or MCF at a non-fuel location.
- The business service is equal to one of the values in this table.

### Business services and descriptions

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

- The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

#### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

#### Values

If present, PDS 0596 must be a fixed length of 21.

#### PDS 0596 subfields

This PDS consists of two subfields.

#### PDS 0596 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1–20      | Acceptor Tax ID               | ans-20    | N/A           |
| 2      | 21        | Acceptor Tax ID Provided Code | ans-1     | right         |

#### Subfield 1 (Acceptor Tax ID)

##### Subfield 1 (Acceptor Tax ID)

If present, subfield 1 (Acceptor Tax ID) cannot contain a known invalid Tax ID.

Acceptor Tax ID must be populated and formatted as defined by taxation authority standards.

If PDS 0596, subfield 1 is present on both the First Presentment/1240 message and any subsequent associated addendum messages, the values must be identical.

For transactions where the merchant is U.S. region, if present, subfield 1 must contain nine numeric characters and be left-justified with trailing spaces.

When present, and PDS 0596, subfield 2 is equal to Y, GCMS edits the field to ensure it is not considered a known invalid value or format, including:

- Low values

- High values
- All spaces
- These ranges:
  - 000000000–000000009
  - 111111110–111111119
  - 123456780–123456789
  - 222222220–222222229
  - 333333330–333333339
  - 444444440–444444449
  - 555555550–555555559
  - 666666660–666666669
  - 777777770–777777779
  - 888888880–888888889
  - 999999990–999999999

PDS 0596, subfield 1 can be spaces when one of these conditions exist.

- The transaction is submitted for the U.S. region Commercial or Interregional Commercial standard interchange programs and PDS 0596, subfield 2 is equal to R (Refused to Provide Acceptor Tax ID).
- PDS 0596, subfield 2 is equal to N or R.

For First Presentment/1240 messages, PDS 0596, subfield 1 must be present and cannot contain all zeros, all nines, all spaces, all low values, or all high values for Commercial Card transactions in and between participating countries where value-added tax (VAT) applies. The edit validates that DE 43, subfield 6 (Acceptor Country Code) and the country code associated with the issuer account range in DE 2 (Primary Account Number) are on the list of participating countries. Participating VAT countries will be announced via the Operations Bulletin and identified via the VAT Indicator in Table IP0028T1 (Country Codes) of the Mastercard Parameter Extract (MPE).

### Program rules

Payment facilitator-enabled transactions: The Sponsored Merchant Tax ID must be provided.

### Subfield 2 (Acceptor Tax ID Provided Code)

If PDS 0596 is present, subfield 2 (Acceptor Tax ID Provided Code) must contain one of the values listed in this table.

#### Subfield 2 (Acceptor Tax ID Provided Code)

| Value | Description              |
|-------|--------------------------|
| Y     | Acceptor Tax ID provided |

| Value | Description                        |
|-------|------------------------------------|
| N     | Acceptor Tax ID not provided       |
| R     | Refused to provide Acceptor Tax ID |

PDS 0596, subfield 2 must contain a value of Y when all of these conditions exist.

- The product code is any corporate product code.
- The Acceptor Country Code (DE 43 subfield 6) equals USA.
- The transaction is not a reversal.
- The transaction is not submitted for the U.S. region Commercial or Interregional Commercial standard interchange programs.

Acceptor Tax ID Provided Code must contain the value of Y or R and not the value of N for transactions submitted for one of the interchange programs listed in this table.

### Interregional interchange programs

| IRD | Description                                                          |
|-----|----------------------------------------------------------------------|
| 61  | Interregional Commercial Standard                                    |
| 63  | Interregional Commercial Purchasing Standard                         |
| IP  | Interregional Commercial Premium Standard                            |
| LD  | Interregional Regulated POS Debit                                    |
| LF  | Interregional Regulated POS Debit with Fraud Adjustment              |
| LS  | Interregional Regulated POS Debit Small Ticket                       |
| LT  | Interregional Regulated POS Debit Small Ticket with Fraud Adjustment |

### U.S. region consumer interchange programs

| IRD | Description                                            |
|-----|--------------------------------------------------------|
| LD  | Regulated POS Debit                                    |
| LF  | Regulated POS Debit with Fraud Adjustment              |
| LS  | Regulated POS Debit Small Ticket                       |
| LT  | Regulated POS Debit Small Ticket with Fraud Adjustment |

### U.S. region commercial interchange programs

| IRD | Description                     |
|-----|---------------------------------|
| 65  | U.S. region Commercial Standard |
| SK  | Business Level 2 Standard       |
| 3K  | Business Level 3 Standard       |
| 4K  | Business Level 4 Standard       |

For First Presentment/1240 messages, PDS 0596, subfield 2 must be present for Commercial Card transactions in and between participating countries where value-added tax (VAT) applies. The edit validates that DE 43, subfield 6 (Acceptor Country Code) and the country code associated with the issuer account range in DE 2 (Primary Account Number) are on the list of participating countries. Participating VAT countries will be announced via the Operations Bulletin and identified via the VAT Indicator in Table IP0028T1 (Country Codes) of the MPE.

## PDS 0597 (Total Tax Amount)

PDS 0597 (Total Tax Amount) contains the total amount of sales tax or value added tax (VAT) on the total purchase amount.

### Attributes

This PDS is allowed on First Presentment messages for Maestro® (MSI) transactions only. This field will not be submitted to the transaction receiver if provided on a First Presentment/1240 for transactions other than Maestro.

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 when the following occurs.

- The transaction is submitted for Commercial Data Rate III (IRD66), Commercial Large Ticket I (IRD 62), Commercial Large Ticket II (IRD 94), or Commercial Large Ticket III (IRD 99).
- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]).

- 4214 Motor Freight Carriers, Trucking-Local/Long Distance, Moving and Storage Companies, Local Delivery
- 4215 Courier Services: Air and Ground, Freight Forwards.
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.

This PDS is required in a Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 message if the associated First Presentment/1240 message is other than a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for one of the following incentive interchange rate programs.

#### Canada region incentive interchange rate programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate I  |
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

#### U.S. region incentive interchange rate programs

| IRD | Description                                      |
|-----|--------------------------------------------------|
| 3B  | Business Level 3 Data Rate II                    |
| 3D  | Business Level 3 Face-to-face                    |
| 4B  | Business Level 4 Data Rate II                    |
| 4D  | Business Level 4 Face-to-face                    |
| 60  | Commercial Face-to-Face                          |
| 62  | Commercial Large Ticket I                        |
| 66  | Commercial Data Rate III                         |
| 67  | Commercial Data Rate II                          |
| 67  | Interregional Commercial Purchasing Data Rate II |
| 82  | Electronic Payment Account                       |
| 94  | Commercial Large Ticket II                       |
| 99  | Commercial Large Ticket III                      |
| E1  | Commercial Large Ticket Rate 1 MPG               |
| E2  | Commercial Large Ticket Rate 2 MPG               |
| E3  | Commercial Large Ticket Rate 3 MPG               |

| IRD | Description                    |
|-----|--------------------------------|
| F2  | Commercial Fleet Data Rate II  |
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |
| SB  | Business Level 2 Data Rate II  |
| SD  | Business Level 2 Face-to-face  |

PDS 0597 must be present in a Financial Detail Addendum (Corporate Common Card Data)/1644 when all the following conditions exist:

- The product code is MCP or MCF at a non-fuel location.
- The Business Service is equal to one of the values in this table.

### Business services

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

### IRDs in First Presentment/1240

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

Indicators in subfield 1 of these PDSs are used to reflect the collection of the individual tax amounts that are summarized in PDS 0597:

- PDS 0682 (Detail Tax Amount 1)

- PDS 0683 (Detail Tax Amount 2)
- PDS 0684 (Detail Tax Amount 3)
- PDS 0751 (Detail Tax Amount 4)
- PDS 0752 (Detail Tax Amount 5)
- PDS 0753 (Detail Tax Amount 6)

PDS 0682, PDS 0683, PDS 0684, PDS 0751, PDS 0752, and PDS 0753 are used to categorize the individual tax amounts such as state, local, and municipal taxes that are summarized in PDS 0597.

PDS 0597 is submitted when PDS 0682, PDS 0683, PDS 0684, PDS 0751, PDS 0752, or PDS 0753 are submitted in the transaction.

### Values

If present, PDS 0597 must be a fixed length of 014.

If present, Total Tax Amount must contain the total amount of all taxes applicable to the transaction exactly as shown on the Transaction Information Document (Transaction receipt) or buyer invoice. If no taxes were collected, Total Tax Amount must be zero.

### PDS 0597 subfields

This PDS consists of three subfields.

#### PDS 0597 subfields

| Number | Positions | Name               | Attribute | Justification |
|--------|-----------|--------------------|-----------|---------------|
| 1      | 1–12      | Total Tax Amount   | n-12      | right         |
| 2      | 13        | Total Tax Exponent | n-1       | N/A           |
| 3      | 14        | Total Tax Sign     | a-1       | N/A           |

### Subfield 1 (Total Tax Amount)

If PDS 0597 is present, subfield 1:

- Must be numeric and contain the total tax amount.
- May contain all zeros, except for the U.S. region Incentive Interchange Rate Programs when it cannot contain all zeros unless:
  - The GCMS Product Identifier is MCF, MGF, MNF, or MRK.
  - The value is 0.1 percent to 30 percent of the value in DE 4 (Amount, Transaction) unless PDS 0686 (Tax Exempt Indicator) is present or the transaction is a commercial card at fuel locations (MCC 4468, 5499, 5541, 5542, and 5983).

### IRDs and descriptions

| IRD | Description                         |
|-----|-------------------------------------|
| 3B  | Business Level 3 Data Rate II       |
| 3D  | Business Level 3 Face-to-face       |
| 4B  | Business Level 4 Data Rate II       |
| 4D  | Business Level 4 Face-to-face       |
| 60  | U.S. region Commercial Face-to-Face |
| 67  | U.S. region Commercial Data Rate II |
| F2  | Commercial Fleet Data Rate II       |
| SB  | Business Level 2 Data Rate II       |
| SD  | Business Level 2 Face-to-face       |

- For the interchange programs listed in this table, the value must be 0.1 percent to 30 percent of the value in DE 4 unless PDS 0686 is present.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate I  |
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

## Subfield 2 (Total Tax Exponent)

If PDS 0597 is present, subfield 2 (Total Tax Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Total Tax Sign)

If PDS 0597 is present, subfield 3 (Total Tax Sign) must contain a value of D or C. This subfield identifies whether PDS 0597 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                   |
|-------|-------------------------------|
| D     | Total tax amount is a debit.  |
| C     | Total tax amount is a credit. |

## PDS 0598 (Total Tax Collected Indicator)

PDS 0598 (Total Tax Collected Indicator) reflects total sales tax capture and reporting information such as whether sales tax was included in the purchase amount or if goods and services were not taxable.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | ans-1; TAGLLL            |
| Tag Field           | 0598                     |

| Financial Detail Addendum (Corporate Line Item Detail)/1644                   | O   | .   | C   |

## Values

If present, this PDS cannot contain all low values or high values. It must contain one of the values listed in this table.

## Values and descriptions

| Value     | Description                                                                              |
|-----------|------------------------------------------------------------------------------------------|
| Y         | Sales tax is included in the total purchase amount.                                      |
| N or zero | The acceptor has the ability to provide tax amount, but goods/services were not taxable. |
| space     | The information is unknown.                                                              |

## PDS 0599 (Corporation VAT Number)

PDS 0599 (Corporation VAT Number) contains a corporation's value added tax (VAT) number.

## Attributes

| Attribute           | Description          |
|---------------------|----------------------|
| Data Representation | ans...20; TAGLLLLVAR |
| Tag Field           | 0599                 |

| Attribute     | Description                    |

| Justification | Left                           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

### Values

If present, PDS 0599 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. It must be a length of 001-020.

## PDS 0600 (Acceptor Reference Number)

PDS 0600 (Acceptor Reference Number) contains a code that facilitates acceptor/corporation communication and record keeping.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...25; TAGLLLVAR             |

| Justification       | N/A                             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | C   | •   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644               | O   | •   | C   |

PDS 0600 must be present in a Financial Detail Addendum (Corporate Common Card Data)/1644 when all these conditions exist.

- The product code is MCP or MCF at a non-fuel location.
- The Business Service is equal to one of the values in this table.

### Business services and descriptions

| Business Service Type Code(PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|--------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                | 050001                                     | Europe Intraregional |
| 3                                                | 050012                                     | Europe Intercountry  |
| 3                                                | 050021                                     | Europe Intercountry  |
| 3                                                | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

## Values

If present, PDS 0600 must be left-justified and cannot contain all low values, high values, all spaces, or all zeros.

## PDS 0601 (Party Nature of Filing)

PDS 0601 (Party Nature of Filing) contains a code that identifies the disposition of the electronic invoice.

## Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | a-1; TAGLLL              |
| Tag Field           | 0601                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

## Usage

This table shows the usage of PDS 0601 (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

## Values

If present, PDS 0601 must be a fixed length of 001 and contain one of the values listed in this table.

### Values and descriptions

| Value | Description                                                                                 |
|-------|---------------------------------------------------------------------------------------------|
| P     | Invoice printed and given to purchaser and then used for tax reclaim                        |
| S     | Invoice printed but treated as supplemental because electronic copy is used for tax reclaim |
| E     | Printed invoice suppressed because electronic master version is used for tax reclaim        |
| N     | Not applicable to Party Identification                                                      |

## PDS 0602 (Party Supplemental Data 1)

PDS 0602 (Party Supplemental Data 1) contains information about the invoice party.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...672; TAGLLLLVAR          |
| Tag Field           | 0602                           |
| Data Length         | 3 positions, value = 084–672   |
| Data Field          | Variable length, 672 positions |
| Subfields           | 3                              |
| Occurrences         | 1–8                            |
| Justification       | See "Subfields"                |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

### Values

PDS 0602 must be a length of 084–672 and must be divisible by minimum occurrence length of 084.

### PDS 0602 subfields

PDS 0602 consists of three subfields.

### PDS 0602 subfields

| Number | Positions | Name                                  | Attribute | Justification |
|--------|-----------|---------------------------------------|-----------|---------------|
| 1      | 1–40      | Party Supplemental Data Description 1 | ans-40    | left          |
| 2      | 41–80     | Party Supplemental Data 1             | ans-40    | left          |
| 3      | 81–84     | Party Supplemental Data Code 1        | ans-4     | left          |

### Subfield 1 (Party Supplemental Data Description 1)

Subfield 1 (Party Supplemental Data Description 1) must be left-justified and cannot contain all low values, high values, all spaces, or all zeros.

### Subfield 2 (Party Supplemental Data 1)

Subfield 2 (Party Supplemental Data 1) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Party Supplemental Data Code 1)

Subfield 3 (Party Supplemental Data Code 1) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0603 (Party Supplemental Data 2)

PDS 0603 (Party Supplemental Data 2) contains information about the invoice party.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...672; TAGLLLLVAR          |
| Tag Field           | 0603                           |
| Data Length         | 3 positions, value = 084–672   |
| Data Field          | Variable length, 672 positions |
| Subfields           | 3                              |
| Occurrences         | 1–8                            |
| Justification       | See “Subfields”                |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Party Information)/1644 | O   | .   | C   |

### Values

PDS 0603 must be a length of 084–672 and must be divisible by minimum occurrence length of 084.

### PDS 0603 subfields

This PDS may contain from one to eight occurrences of party supplemental data.

Each occurrence requires 84 positions; the length of this PDS must be a multiple of 84, with a maximum length of 672 positions. Each occurrence consists of three subfields as defined in this table.

### PDS 0603 subfields

| Number | Positions | Name                                  | Attribute | Justification |
|--------|-----------|---------------------------------------|-----------|---------------|
| 1      | 1–40      | Party Supplemental Data Description 2 | ans-40    | left          |
| 2      | 41–80     | Party Supplemental Data 2             | ans-40    | left          |
| 3      | 81–84     | Party Supplemental Data Code 2        | ans-4     | left          |

#### Subfield 1 (Party Supplemental Data Description 2)

Subfield 1 (Party Supplemental Data Description 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

#### Subfield 2 (Party Supplemental Data 2)

Subfield 2 (Party Supplemental Data 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

#### Subfield 3 (Party Supplemental Data Code 2)

Subfield 3 (Party Supplemental Data Code 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### PDS 0604 (Transaction Supplemental Data 1)

PDS 0604 (Transaction Supplemental Data 1) contains information about the transaction.

#### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...672; TAGLLLVAR           |
| Tag Field           | 0604                           |
| Data Length         | 3 positions, value = 084–672   |
| Data Field          | Variable length, 672 positions |
| Subfields           | 3                              |
| Occurrences         | 1–8                            |

| Attribute     | Description     |
|---------------|-----------------|
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                      | Org | Sys | Dst |
|------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Transaction Information)/1644 | O   | .   | C   |

## Values

PDS 0604 may contain from one to eight occurrences of Transaction Supplemental Data. Each occurrence consists of three subfields. Each occurrence must be a length of 084–672 and must be divisible by minimum occurrence length of 084.

## PDS 0604 subfields

This PDS may contain from one to eight occurrences of transaction supplemental data.

Each occurrence requires 84 positions; the length of this PDS must be a multiple of 84, with a maximum length of 672 positions. Each occurrence consists of three subfields as defined in this table.

## PDS 0604 subfields

| Number | Positions | Name                                        | Attribute | Justification |
|--------|-----------|---------------------------------------------|-----------|---------------|
| 1      | 1–40      | Transaction Supplemental Data Description 1 | ans-40    | left          |
| 2      | 41–80     | Transaction Supplemental Data 1             | ans-40    | left          |
| 3      | 81–84     | Transaction Supplemental Data Code 1        | ans-4     | left          |

### Subfield 1 (Transaction Supplemental Data Description 1)

Subfield 1 (Transaction Supplemental Data Description 1) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Transaction Supplemental Data 1)

Subfield 2 (Transaction Supplemental Data 1) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Transaction Supplemental Data Code 1)

Subfield 3 (Transaction Supplemental Data Code 1) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0605 (Transaction Supplemental Data 2)

PDS 0605 (Transaction Supplemental Data 2) contains information about the transaction.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...672; TAGLLLLVAR          |
| Tag Field           | 0605                           |
| Data Length         | 3 positions, value = 084–672   |
| Data Field          | Variable length, 672 positions |
| Subfields           | 3                              |
| Occurrences         | 1–8                            |
| Justification       | See "Subfields"                |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                      | Org | Sys | Dst |
|------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Electronic Invoice, Transaction Information)/1644 | O   | .   | C   |

## PDS 0605 subfields

PDS 0605 may contain from one to eight occurrences of transaction supplemental data.

Each occurrence must be a length of 084–672 and must be divisible by minimum occurrence length of 084. Each occurrence consists of three subfields as defined in this table.

### PDS 0605 subfields

| Number | Positions | Name                                        | Attribute | Justification |
|--------|-----------|---------------------------------------------|-----------|---------------|
| 1      | 1–40      | Transaction Supplemental Data Description 2 | ans-40    | left          |
| 2      | 41–80     | Transaction Supplemental Data 2             | ans-40    | left          |
| 3      | 81–84     | Transaction Supplemental Data Code 2        | ans-4     | left          |

### Subfield 1 (Transaction Supplemental Data Description 2)

Subfield 1 (Transaction Supplemental Data Description 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Transaction Supplemental Data 2)

Subfield 2 (Transaction Supplemental Data 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Transaction Supplemental Data Code 2)

Subfield 3 (Transaction Supplemental Data Code 2) must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0606 (Freight Amount)

PDS 0606 (Freight Amount) contains the freight charges on total purchases.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0606                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

## PDS 0606 subfields

This PDS consists of three subfields.

### PDS 0606 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1-12      | Freight Amount          | n-12      | right         |
| 2      | 13        | Freight Amount Exponent | n-1       | N/A           |
| 3      | 14        | Freight Amount Sign     | a-1       | N/A           |

### Subfield 1 (Freight Amount)

Subfield 1 (Freight Amount) contains the freight charges on the total purchase. If present, subfield 1 must be numeric and may contain all zeros.

### Subfield 2 (Freight Amount Exponent)

If present, subfield 2 (Freight Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Freight Amount Sign)

If PDS 0606 is present, subfield 3 (Freight Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0606 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                 |
|-------|-----------------------------|
| D     | Freight amount is a debit.  |
| C     | Freight amount is a credit. |

## PDS 0607 (Duty Amount)

PDS 0607 (Duty Amount) is the duty on the total purchase amount.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0607                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

## Values

If present, PDS 0607 must be a fixed length of 014.

## PDS 0607 subfields

This PDS consists of three subfields.

### PDS 0607 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1-12      | Duty Amount          | n-12      | right         |
| 2      | 13        | Duty Amount Exponent | n-1       | N/A           |
| 3      | 14        | Duty Amount Sign     | a-1       | N/A           |

### Subfield 1 (Duty Amount)

Subfield 1 (Duty Amount) contains the duty amount on the total charges. If present, subfield 1 must be numeric and may contain all zeros.

### Subfield 2 (Duty Amount Exponent)

If present, subfield 2 (Duty Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Duty Amount Sign)

If PDS 0607 is present, subfield 3 (Duty Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0607 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description              |
|-------|--------------------------|
| D     | Duty amount is a debit.  |
| C     | Duty amount is a credit. |

## PDS 0608 (Destination Postal Code)

PDS 0608 (Destination Postal Code) contains the ZIP code or other postal code where the purchased goods will be delivered.

This applies to additional domestic arrangements.

For transactions acquired in the U.S. region, PDS 0608, if present, must contain either five numeric characters, left-justified and spaced filled, or the ZIP+four nine numeric characters with a hyphen between the fifth and sixth numeric character.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-10; TAGLLL             |
| Tag Field           | 0608                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

PDS 0608 should be provided by U.S. acceptors for all commercial card transactions in which goods were shipped. All goods in a transaction must be shipped to one location.

### Values

If present, PDS 0608 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0609 (Destination State/Province Code)

PDS 0609 (Destination State/Province Code) indicates the state or province of the country where the purchased goods will be delivered.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0609                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

This PDS should be provided by U.S. acceptors for all commercial card transactions in which goods were shipped. When this PDS is used, all goods in a transaction must be shipped to one location.

### Values

If present, PDS 0609 must contain a valid U.S. state code if PDS 0610 (Destination Country Code) contains USA.

If the destination is a U.S. territory (Guam, Puerto Rico, or Virgin Islands), customers should provide the three-position country code (GUM, PRI, or VIR) in both PDS 0609 and PDS 0610.

If present, PDS 0609 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0610 (Destination Country Code)

PDS 0610 (Destination Country Code) contains the code of the country where the purchased goods will be delivered.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0610                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

This PDS should be provided by U.S. acceptors for all commercial card transactions in which goods were shipped. When this PDS is used, all goods in a transaction must be shipped to one location.

### Values

If present, PDS 0610 must contain a valid alphabetic ISO country code.

When territories have a defined country code in Chapter 2 of the *Quick Reference Booklet*, that country code must be used.

## PDS 0611 (Sequence Number)

PDS 0611 (Sequence Number) a sequence number indicating the sequence that this rail segment falls within the trip.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-3; TAGLLL             |
| Tag Field           | 0611                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |

| Financial Detail Addendum (Corporate Line Item Detail)/1644 | O   | .   | C   |

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0612 must be a valid date in the format YYMMDD. PDS 0612 must be numeric and be a fixed length of 006.

## PDS 0613 (Ship-From Postal Code)

PDS 0613 (Ship-From Postal Code) contains the ZIP code or other postal code from which items were shipped.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-10; TAGLLL             |
| Tag Field           | 0613                       |
| Data Length         | 3 positions, value = 010   |
| Data Field          | Fixed length, 10 positions |
| Subfields           | None                       |
| Justification       | Left                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

For transactions acquired in the U.S. region, PDS 0613, if present, must contain either five numeric characters and be left-justified and spaced filled, or the ZIP+four nine numeric characters with a hyphen between the fifth and sixth numeric character.

This PDS should be provided by U.S. acceptors for all commercial card transactions in which goods were shipped. When this PDS is used, all goods in a transaction must be shipped from one location.

### Values

If present, PDS 0613 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0614 (Order Date)

PDS 0614 (Order Date) contains the date the item was ordered.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0614                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |

## Values

If present, PDS 0614 must contain a valid date in the format YYMMDD.

## PDS 0615 (Medical Services Ship to Health Industry Number)

PDS 0615 (Medical Services Ship to Health Industry Number) contains the health industry number to which the medical services are being shipped.

## Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...40; TAGLLLLVAR          |
| Tag Field           | 0615                          |
| Data Length         | 3 positions, value = 001–040  |
| Data Field          | Variable length, 40 positions |
| Subfields           | None                          |
| Justification       | N/A                           |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

## Values

PDS 0615 must be a length of 001–040. If present, PDS 0615 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0616 (Contract Number)

PDS 0616 (Contract Number) contains the corporate contract number.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...40; TAGLLLLVAR          |

### Values

PDS 0616 must be a length of 001–040. If present, PDS 0616 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0617 (Medical Services Price Adjustment)

PDS 0617 (Medical Services Price Adjustment) contains a code that identifies the type of price adjustment related to the medical services provided.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | a-1; TAGLLL              |
| Tag Field           | 0617                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | Left                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

### Values

If present, PDS 0617 must be a fixed length of 001 and contain one of the values listed in this table.

### Values

| Value | Description      |
|-------|------------------|
| A     | Price Adjustment |
| B     | Original         |
| C     | Credit           |

| Value | Description |
|-------|-------------|
| D     | Rebill      |

## PDS 0618 (Medical Services Product Number Qualifier)

PDS 0618 (Medical Services Product Number Qualifier) contains a code that identifies the product number qualifier of the medical services.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-2; TAGLLL              |
| Tag Field           | 0618                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

### Values

If present, PDS 0618 must be a fixed length of 002 and contain one of the values listed in this table.

### Values

| Value | Description                                            |
|-------|--------------------------------------------------------|
| 01    | HIBCC (Health Industry Business Communication Council) |
| 02    | UCC (Uniform Code Council)                             |
| 03    | Other                                                  |

## PDS 0619 (User Name)

PDS 0619 (User Name) contains the user name related to the telephony billing information.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...40; TAGLLLLVAR          |
| Tag Field           | 0619                          |
| Data Length         | 3 positions, value = 001-040  |
| Data Field          | Variable length, 40 positions |
| Subfields           | None                          |
| Justification       | Left                          |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

### Values

PDS 0619 must be a length of 001-040. If present, PDS 0619 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0620 (Oil Company Brand Name)

PDS 0620 (Oil Company Brand Name) contains a four-digit code that indicates the acceptor oil company brand name.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-4; TAGLLL               |
| Tag Field           | 0620                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I, or one of the following incentive interchange rate programs.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description               |
|-----|---------------------------|
| 16  | Warehouse Tier I          |
| 62  | Commercial Large Ticket I |
| 67  | Commercial Data Rate II   |

| IRD | Description                   |
|-----|-------------------------------|
| 68  | Commercial Data Rate I        |
| 91  | Warehouse Base                |
| 94  | Commercial Large Ticket II    |
| 99  | Commercial Large Ticket III   |
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0620 must contain a valid value.

Oil company brand name codes are added periodically in support of the Mastercard Corporate Fleet Card® program. New oil company brand name codes are announced and listed in a *Global Operations Bulletin*. All oil company brand name codes are documented in the *Fleet Implementation Guide*.

If the AB Code (MCC) is 5552 (Electric Vehicle Charging) then acquirers should populate PDS 0620 with 9999 (Unbranded/Unassigned) unless there is a valid Oil Company Brand Name that can be associated with the transaction.

## PDS 0621 (Purchase Time)

PDS 0621 (Purchase Time) contains the time of day the purchase was made.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-4; TAGLLL               |
| Tag Field           | 0621                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 is a Mastercard Corporate Fleet Card<sup>®</sup> transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I or one of the following incentive interchange rate programs

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                   |
|-----|-------------------------------|
| 16  | Warehouse Tier I              |
| 62  | Commercial Large Ticket I     |
| 67  | Commercial Data Rate II       |
| 68  | Commercial Data Rate I        |
| 91  | Warehouse Base                |
| 94  | Commercial Large Ticket II    |
| 99  | Commercial Large Ticket III   |

| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | .   | C   |

The motor fuel service type must be present and contain a valid value in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message when it is a Mastercard Corporate Fleet Card® (MCF, MNF, MGF) when these transactions are submitted with a fuel MCC (4468, 5541, 5499, 5552 or 5983) for any U.S.-acquired commercial interchange rate program.

### IRDs and descriptions

| IRD | Description               |
|-----|---------------------------|
| 16  | Warehouse Tier I          |
| 62  | Commercial Large Ticket I |
| 67  | Commercial Data Rate II   |

| IRD | Description                   |
|-----|-------------------------------|
| 68  | Commercial Data Rate I        |
| 91  | Warehouse Base                |
| 94  | Commercial Large Ticket II    |
| 99  | Commercial Large Ticket III   |
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

If the Motor Fuel Service (PDS 0622) type equals 3 (only non-fuel items being purchased) on the Fleet Transaction Information Addendum, these PDSs are required on the Financial Detail Addendum (Corporate Line Item Detail)/1644 messages when the purchase is with a Mastercard Corporate Fleet Card® (MCF, MPK, MGF, MNF) at fuel locations (MCC 4468, 5541, 5499, and 5983) and the transaction is submitted with one of the following U.S. region incentive interchange rate programs.

- PDS 0641 (Product Code)
- PDS 0642 (Item Description)
- PDS 0643 (Item Quantity)
- PDS 0645 (Item Unit of Measure)
- PDS 0647 (Extended Item Amount)
- PDS 0654 (Debit or Credit Indicator)

#### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Warehouse Tier I            |
| 62  | Commercial Large Ticket I   |
| 67  | Commercial Data Rate II     |
| 68  | Commercial Data Rate I      |
| 91  | Warehouse Base              |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

If PDS 0622 (Motor Fuel Service Type) equals 3 (only non-fuel items being purchased) on the Fleet Transaction Information Addendum, these PDSs are required on the Financial Detail Addendum (Corporate Line Item Detail)/1644 messages when the purchase is with a

Mastercard Corporate Fleet Card (MCF and MGF) at fuel locations (MCC 4468, 5541, 5499, 5552, and 5983) and the transaction is submitted with one of the following U.S. region incentive interchange rate programs.

- PDS 0783 (Fleet Product Code)
- PDS 0784 (Fleet Item Description)
- PDS 0785 (Fleet Item Quantity)
- PDS 0786 (Fleet Item Unit of Measure)
- PDS 0787 (Fleet Extended Item Amount)

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FI  | Commercial Fleet Large Ticket |

PDS 0622 is required if the associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I. When the value is 3 (only non-fuel products being purchased), these PDSs are required in Financial Detail Addendum (Corporate Line Item Detail)/1644 messages:

- PDS 0641 (Product Code)
- PDS 0642 (Item Description)
- PDS 0643 (Item Quantity)
- PDS 0645 (Item Unit of Measure)
- PDS 0646 (Unit Price)
- PDS 0647 (Extended Item Amount)
- PDS 0654 (Debit or Credit Indicator)

### Values

GCMS does not edit this subfield. If present, this PDS must contain a value listed in this table.

### Values and descriptions

| Value      | Description  |
|------------|--------------|
| 0 or space | Undefined    |
| 1          | Self-service |
| 2          | Full service |

| Value | Description                            |
|-------|----------------------------------------|
| 3     | Only non-fuel products being purchased |

PDS 622 must contain a value of 1 or 2 when submitted with fleet card transactions submitted with an acceptor business code (MCC) equal to 5542.

## PDS 0623 (Motor Fuel Information)

PDS 0623 (Motor Fuel Information) contains the acquirer's motor fuel product code translated from the information the attendant entered.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ns-35; TAGLLL              |
| Tag Field           | 0623                       |
| Data Length         | 3 positions, value = 035   |
| Data Field          | Fixed length, 35 positions |
| Subfield            | 6                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------------------------------------------------------|-----|-----|-----|
| First Presentment/1240 (Allowed for Mastercard Credit [MCC], Maestro [MSI], and Private Label [PVL] transactions only) | O   | .   | C   |
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644                                               | C   | .   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644                                                             | O   | .   | C   |

This PDS is required if these conditions occur:

- PDS 0622 (Motor Fuel Service Type) is present and contains a value other than 3.
- The associated First Presentment/1240 is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Warehouse Tier I            |
| 62  | Commercial Large Ticket I   |
| 67  | Commercial Data Rate II     |
| 68  | Commercial Data Rate I      |
| 91  | Warehouse Base              |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

### Values

If present, PDS 0623 Motor Fuel Information must be a fixed length of 35.

### Requirements

These are the requirements regulating the use of PDS 0623:

- PDS 0623 (Motor Fuel Information) must be present when these conditions are met:
  - DE 2 Primary Account Number in the associated First Presentment/1240 message contains a Fleet account range.
  - DE 26 Acceptor Business Code (MCC) in the associated First Presentment/1240 is 5541 or 5542.
  - PDS 0622 Motor Fuel Service Type is present and contains a value of 1 (Self-service) or 2 (Full service).
  - PDS 0158s4 Interchange Rate Designator is applicable.
- PDS 0623 (Motor Fuel Information) is allowed on First Presentment/1240 messages for Mastercard Credit (MCC), Maestro® (MSI) and Private Label (PVL) transactions only. This field will not be submitted to the transaction receiver if provided on a First Presentment/1240 for transactions other than Mastercard Credit, Maestro® or Private Label.
- For Mastercard Corporate Fleet Card® transactions, PDS 0623, subfield 6 (Motor Fuel Sale Amount) must equal the product of the value of PDS 0623, subfield 2 (Motor Fuel Unit Price) multiplied by the value in PDS 0623, subfield 4 (Motor Fuel Quantity). A tolerance of five percent is permitted to address rounding issues. The tolerance is applied on PDS 0623, subfield 6 (Sale Amount) and not on the calculated value (PDS 0623, subfield 2 multiplied by PDS 0623, subfield 4). Also, this edit does not round the calculated amount and low/high

tolerance amounts to the transaction currency exponent, and keeps six decimal positions on these values.

## PDS 0623 subfields

PDS 0623 contains six subfields.

### PDS 0623 subfields

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 1      | 1–3       | Motor Fuel Product Code      | n-3       | right         |
| 2      | 4–15      | Motor Fuel Unit Price        | n-12      | right         |
| 3      | 16        | Motor Fuel Unit of Measure   | ns-1      | N/A           |
| 4      | 17–22     | Motor Fuel Quantity          | n-6       | right         |
| 5      | 23        | Motor Fuel Quantity Exponent | n-1       | N/A           |
| 6      | 24–35     | Motor Fuel Sale Amount       | n-12      | right         |

### Subfield 1 (Motor Fuel Product Code)

Collection only, First Presentment/1240 transactions are excluded.

If PDS 0623 is present, subfield 1 must be one of the values listed in this table.

### Values and descriptions

| Value | Description                                   |
|-------|-----------------------------------------------|
| 001   | Unleaded Regular (86 or 87 octane)            |
| 002   | Unleaded Mid Grade (88 or 89 octane)          |
| 003   | Unleaded Premium (90 or 91 octane)            |
| 004   | Unleaded Super (92–94 octane)                 |
| 005   | Methanol Unleaded Regular (86 or 87 octane)   |
| 006   | Methanol Unleaded Mid Grade (88 or 89 octane) |
| 007   | Methanol Unleaded Premium (90 or 91 octane)   |
| 008   | Methanol Unleaded Super (92–94 octane)        |
| 009   | Methanol Regular Leaded                       |

Data element and private data subelement definitions and details  
Subfield 1 (Motor Fuel Product Code)

| Value | Description                                       |
|-------|---------------------------------------------------|
| 011   | Regular Leaded Gasoline                           |
| 012   | Diesel                                            |
| 013   | Diesel Premium                                    |
| 014   | Kerosene                                          |
| 015   | LPG                                               |
| 016   | Compressed Natural Gas                            |
| 017   | M85 (Methanol 85 percent)                         |
| 018   | E85 (Ethanol 85 percent)                          |
| 019   | Ethanol Unleaded Regular (86 or 87 octane)        |
| 020   | Ethanol Unleaded Mid Grade (88 or 89 octane)      |
| 021   | Ethanol Unleaded Premium (90 or 91 octane)        |
| 022   | Ethanol Unleaded Super (92–94 octane)             |
| 023   | Ethanol Regular Leaded                            |
| 024   | Unleaded Reformulated (86 or 87 octane)           |
| 025   | Unleaded Mid Grade Reformulated (88 or 89 octane) |
| 026   | Dyed Diesel                                       |
| 027   | Gasohol                                           |
| 028   | Biodiesel                                         |
| 029   | Ultra Low Sulfur Diesel (ULSD)                    |
| 100   | Aviation 100 Octane                               |
| 101   | Jet Fuel                                          |
| 102   | Aviation Fuel                                     |
| 150   | Marine Fuel                                       |
| 200   | Miscellaneous Fuel                                |
| 201   | Liquid Natural Gas                                |
| 202   | White Gas                                         |
| 203   | Racing Fuel                                       |
| 204   | Electric Vehicle Charge Level 1: 110v             |
| 205   | Electric Vehicle Charge Level 2: 240v             |
| 206   | Electric Vehicle Charge Level 3: 480v             |
| 207   | Biodiesel (Non-Taxable)                           |

| Value | Description                     |
|-------|---------------------------------|
| 208   | Diesel (Non-Taxable)            |
| 209   | Diesel Exhaust Fluid: Dispensed |

### Subfield 2 (Motor Fuel Unit Price)

If PDS 0623 is present, subfield 2 must be right-justified and numeric.

The motor fuel unit price must be right-justified with three positions to the right of the decimal.

### Subfield 3 (Motor Fuel Unit of Measure)

If PDS 0623 is present, Motor Fuel Unit of Measure must be a space or in the range 1–5 as in this table.

Collection only, First Presentment/1240 transactions are excluded.

#### Values and descriptions

| Value | Description      |
|-------|------------------|
| 1     | Gallons          |
| 2     | Liters           |
| 3     | Pounds           |
| 4     | Kilos            |
| 5     | Imperial gallons |
| 6     | Kilowatt hour    |
| 7     | Minutes          |
| 8     | Hours            |
| space | Not applicable   |

### Subfield 4 (Motor Fuel Quantity)

If PDS 0623 is present, motor fuel quantity must be numeric and greater than zero.

Collection only, First Presentment/1240 transactions are excluded.

### Subfield 5 (Motor Fuel Quantity Exponent)

If PDS 0623 is present, motor fuel quantity exponent must be in the range 0–5.

Collection only, First Presentment/1240 transactions are excluded.

PDS 0623, subfield 5 (Motor Fuel Quantity Exponent) is assumed to be three positions.

### Subfield 6 (Motor Fuel Sale Amount)

If PDS 0623 is present, motor Fuel Sale Amount must be numeric and greater than zero and in the same currency as the First Presentment/1240.

Collection only, First Presentment/1240 transactions will be excluded.

The currency exponent for PDS 0623, subfield 6 (Motor Fuel Sale Amount) is based on the exponent associated with the DE 49 (Currency Code, Transaction) from the associated First Presentment/1240 message.

## PDS 0624 (User Account Number)

PDS 0624 (User Account Number) contains the user's account number related to the telephony billing information.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...40; TAGLLLLVAR          |
| Tag Field           | 0624                          |
| Data Length         | 3 positions, value = 001–040  |
| Data Field          | Variable length, 40 positions |
| Subfields           | None                          |
| Justification       | Left                          |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

### Values

PDS 0624 must be a length of 001–040. If present, PDS 0624 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0625 (User Telephone Number)

PDS 0625 (User Telephone Number) contains the user's telephone number related to the telephony billing information.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...25; TAGLLLLVAR          |
| Tag Field           | 0625                          |
| Data Length         | 3 positions, value = 001–025  |
| Data Field          | Variable length, 25 positions |
| Subfields           | None                          |
| Justification       | Left                          |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

## Values

PDS 0625 must be a length of 001–025. If present, PDS 0625 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0626 (Billing Statement Period)

PDS 0626 (Billing Statement Period) contains the billing start and end dates.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0626                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

## Values

PDS 0626 must be a fixed length of 012.

## PDS 0626 subfields

This PDS consists of two subfields.

### PDS 0626 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1–6       | Statement Start Date | n-6       | N/A           |
| 2      | 7–12      | Statement End Date   | n-6       | N/A           |

### Subfield 1 (Statement Start Date)

If present, subfield 1 (Statement Start Date) must be numeric and must be a valid date in the format YYMMDD.

### Subfield 2 (Statement End Date)

If present, subfield 2 (Statement End Date) must be numeric and must be a valid date in the format YYMMDD.

## PDS 0627 (Billing Event 1)

PDS 0627 (Billing Event 1) contains information pertaining to the telephony billing event.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...540; TAGLLLVAR           |
| Tag Field           | 0627                           |
| Data Length         | 3 positions, value = 054–540   |
| Data Field          | Variable length, 540 positions |
| Subfields           | 4                              |
| Occurrences         | 1–10                           |
| Justification       | See “Subfields”                |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

## Values

PDS 0627 must be a length of 54–540, and it must be divisible by a minimum occurrence length of 54.

## PDS 0627 subfields

This PDS consists of four subfields.

### PDS 0627 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1–12      | Billing Event Amount 1    | n-12      | right         |
| 2      | 13        | Billing Event Exponent 1  | n-1       | N/A           |
| 3      | 14        | Billing Event Sign 1      | a-1       | N/A           |
| 4      | 15–54     | Billing Event Description | ans-40    | left          |

### Subfield 1 (Billing Event Amount 1)

If PDS 0627 is present, subfield 1 (Billing Event Amount 1) must be numeric and contain the amount of the billing event, and it may be all zeros.

### Subfield 2 (Billing Event Exponent 1)

Subfield 2 (Billing Event Exponent 1) must be numeric and must be a value within the range of 0 to 5.

### Subfield 3 (Billing Event Sign 1)

If PDS 0627 is present, subfield 3 (Billing Event Sign 1) must contain a value of D or C. This subfield identifies whether PDS 0627 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                         |
|-------|-------------------------------------|
| D     | Billing Event amount 2 is a debit.  |
| C     | Billing Event amount 2 is a credit. |

### Subfield 4 (Billing Event Description 1)

If PDS 0627 is present, subfield 4 (Billing Event Description 1) contains the description of the billing event. It must be a fixed length of 40 positions, be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0628 (Billing Event 2)

PDS 0628 (Billing Event 2) contains information pertaining to the telephony billing event.

#### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...540; TAGLLLLVAR          |
| Tag Field           | 0628                           |
| Data Length         | 3 positions, value = 054–540   |
| Data Field          | Variable length, 540 positions |
| Subfields           | 4                              |
| Occurrences         | 1–10                           |
| Justification       | See "Subfields"                |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

### Values

PDS 0628 must be a length of 54–540, and it must be divisible by a minimum occurrence length of 54.

### PDS 0628 subfields

This PDS consists of four subfields.

### PDS 0628 subfields

| Number | Positions | Name                        | Attribute | Justification |
|--------|-----------|-----------------------------|-----------|---------------|
| 1      | 1–12      | Billing Event Amount 2      | n-12      | right         |
| 2      | 13        | Billing Event Exponent 2    | n-1       | N/A           |
| 3      | 14        | Billing Event Sign 2        | a-1       | N/A           |
| 4      | 15–54     | Billing Event Description 2 | ans-40    | left          |

### Subfield 1 (Billing Event Amount 2)

If PDS 0628 is present, subfield 1 (Billing Event Amount 2) must be numeric and contain the amount of the billing event, and it may be all zeros.

### Subfield 2 (Billing Event Exponent 2)

PDS 0628, subfield 2 (Billing Event Exponent 2) must be numeric and must be a value within the range of 0 to 5.

### Subfield 3 (Billing Event Sign 2)

If PDS 0628 is present, subfield 3 (Billing Event Sign 2) must contain a value of D or C. This subfield identifies whether PDS 0628 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                         |
|-------|-------------------------------------|
| D     | Billing event amount 2 is a debit.  |
| C     | Billing event amount 2 is a credit. |

### Subfield 4 (Billing Event Description 2)

If PDS 0628 is present, subfield 4 (Billing Event Description 2) contains the description of the billing event. It must be a fixed length of 40 positions, left-justified, and it cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0629 (Odometer Reading)

PDS 0629 (Odometer Reading) contains the vehicle odometer reading the purchaser entered.

### Attributes

| Attribute           | Description                    |
|---------------------|--------------------------------|
| Data Representation | ans...7; TAGLLLLVAR            |
| Tag Field           | 0629                           |
| Data Length         | 3 positions, value = 001–007   |
| Data Field          | Variable length, 1–7 positions |
| Subfields           | None                           |
| Justification       | Left                           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                              | Org | Sys | Dst |

| Financial Detail Addendum (Private Label Common Data)/1644               | C   | .   | C   |

This PDS is allowed on First Presentment messages for Maestro® (MSI) transactions only. This field will not be submitted to the transaction receiver if provided on a First Presentment/1240 for transactions other than Maestro®.

This PDS is required if these conditions occur:

- PDS 0632 (Product Type Code) contains a value in the range 1–4.
- The associated First Presentment/1240 is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Warehouse Tier I            |
| 62  | Commercial Large Ticket 1   |
| 67  | Commercial Data Rate II     |
| 91  | Warehouse Base              |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

### Values

If present, PDS 0629 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0630 (Vehicle Number)

PDS 0630 (Vehicle Number) is the number assigned to the vehicle by the business using the Mastercard Corporate Fleet Card® and entered by the cardholder at the point of interaction.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...17; TAGLLLLVAR            |
| Tag Field           | 0630                            |
| Data Length         | 3 positions, value = 001-017    |
| Data Field          | Variable length, 1-17 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | .   | C   |

This PDS is required if these conditions occur:

- No data is present in Driver Number/ID Number (PDS 0631).
- PDS 0632 (Product Type Code) contains a value of 2.
- The associated First Presentment/1240 is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description               |
|-----|---------------------------|
| 16  | Warehouse Tier I          |
| 62  | Commercial Large Ticket 1 |

| IRD | Description                 |
|-----|-----------------------------|
| 67  | Commercial Data Rate II     |
| 91  | Warehouse Base              |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

When the transaction is a Mastercard Corporate Fleet Card® (MCF, MPK, MNF, or MGF) transaction at a fuel location MCC (4468, 5541, 5542, 5499, or 5983), and was submitted for one of the above interchange programs (BQ, 16, 62, 67, 91, 94, and 99), PDS 0632 (Product Type Code) is present and contains one of these values:

- 1 (Prompts for ID number and odometer reading)
- 2 (Prompts for vehicle number and odometer reading), or
- 3 (Prompts for driver number and odometer reading).

The data in the Authorization Request/0100 message matches this data in the Corporate Fleet Transaction Information Addendum/1644:

- Driver ID: CIS DE 48 (Additional Data, Private Use), subelement 98 (Mastercard Corporate Fleet Card ID/ Driver Number) and IPM PDS 0631 (Driver Number/ID Number)
- Driver Number: CIS DE 48, subelement 98 (Mastercard Corporate Fleet Card ID/Driver Number) and IPM PDS 0631 (Driver Number/ID Number)
- Vehicle Number: CIS DE 48, subelement 99 (Mastercard Corporate Fleet Card Vehicle Number) and IPM PDS 0630 (Vehicle Number).

When the data requirements are not met, the transaction is downgraded to IRD 68 (Business Core Value Data Rate 1) through Mastercard® Interchange Compliance.

### Values

If present, PDS 0630 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0631 (Driver Number/ID Number)

PDS 0631 (Driver Number/ID Number) contains the number assigned to the driver by the business using the Mastercard Corporate Fleet Card and entered by the cardholder at the point of interaction.

### Attributes

| Attribute            | Description          |
|----------------------|----------------------|
| Data Representation: | ans...17; TAGLLLLVAR |

| Attribute     | Description                     |
|---------------|---------------------------------|
| Tag Field     | 0631                            |
| Data Length   | 3 positions, value = 001–017    |
| Data Field    | Variable length, 1–17 positions |
| Subfields     | None                            |
| Justification | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | •   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644               | O   | •   | C   |

This PDS is required if these conditions occur:

- Product Type Code (PDS 0632) contains a value of 1 or 3.
- The associated First Presentment/1240 is a Mastercard Corporate Fleet Card transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

## U.S. region Incentive Interchange Rate Programs

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Warehouse Tier I            |
| 62  | Commercial Large Ticket 1   |
| 67  | Commercial Data Rate II     |
| 91  | Warehouse Base              |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

When the transaction is a Mastercard Corporate Fleet Card

(MCF, MPK, MNF, or MGF) transaction at a fuel location MCC (4468, 5541, 5542, 5499, or 5983), and was submitted for one of the above interchange programs (BQ, 16, 62, 67, 91, 94, and 99), PDS 0632 (Product Type Code) is present and contains one of these values.

- 1 (Prompts for ID number and odometer reading)
- 2 (Prompts for vehicle number and odometer reading)
- 3 (Prompts for driver number and odometer reading)

The data in the Authorization Request/0100 message matches the data in the Corporate Fleet Transaction Information Addendum/1644 message as follows.

- Driver ID: CIS DE 48 (Additional Data, Private Use), subelement 98 (Mastercard Corporate Fleet Card ID/ Driver Number) and IPM PDS 0631 (Driver Number/ID Number)
- Driver Number: CIS DE 48, subelement 98 (Mastercard Corporate Fleet Card ID/Driver Number) and IPM PDS 0631 (Driver Number/ID Number)
- Vehicle Number: CIS DE 48, subelement 99 (Mastercard Corporate Fleet Card Vehicle Number) and IPM PDS 0630 (Vehicle Number).

When the data requirements are not met, the transaction will be downgraded to IRD 68 (Business Core Value Data Rate 1) through Mastercard Corporate Fleet Card Interchange Compliance.

### Values

If present, PDS 0631 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. In addition, the first position of PDS 0631 must contain a numeric value.

## PDS 0632 (Product Type Code)

PDS 0632 (Product Type Code) contains a code read from a card magnetic stripe that indicates prompts that occur at the point of interaction.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | n-1; TAGLLL              |
| Tag Field           | 0632                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | •   | C   |

This PDS is required if the associated First Presentment/1240 is a Mastercard Corporate Fleet Card® transaction at a fuel location and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                     |
|-----|---------------------------------|
| 16  | World Small Ticket Card Present |
| 62  | Commercial Large Ticket I       |
| 67  | Commercial Data Rate II         |
| 91  | Warehouse Base                  |
| 94  | Commercial Large Ticket II      |
| 99  | Commercial Large Ticket III     |

When the transaction is a Mastercard Corporate Fleet Card® (MCF, MPK, MNF, or MGF) transaction at a fuel location MCC (4468, 5541, 5542, 5499, or 5983), and was submitted for one of the above interchange programs (BQ, 16, 62, 67, 91, 94, and 99), PDS 0632 (Product Type Code) is present and contains one of these values:

- 1 (Prompts for ID number and odometer reading)
- 2 (Prompts for vehicle number and odometer reading), or
- 3 (Prompts for driver number and odometer reading).

The data in the Authorization Request/0100 message matches the data in the Corporate Fleet Transaction Information Addendum/1644 message as follows.

- Driver ID: CIS DE 48 (Additional Data, Private Use), subelement 98 (Mastercard Corporate Fleet Card ID/ Driver Number) and IPM PDS 0631 (Driver Number/ID Number)

- Driver Number: CIS DE 48, subelement 98 (Mastercard Corporate Fleet Card ID/Driver Number) and IPM PDS 0631 (Driver Number/ID Number)
- Vehicle Number: CIS DE 48, subelement 99 (Mastercard Corporate Fleet Card Vehicle Number) and IPM PDS 0630 (Vehicle Number).

When the data requirements are not met, the transaction will be downgraded to IRD 68 (Business Core Value Data Rate 1) through Mastercard® Interchange Compliance.

## Values

If present, PDS 0632 must contain a value in the range 1–5 as shown in this table.

### Values

| Value | Description                                     |
|-------|-------------------------------------------------|
| 1     | Prompts for ID number and odometer reading      |
| 2     | Prompts for vehicle number and odometer reading |
| 3     | Prompts for driver number and odometer reading  |
| 4     | Prompts for odometer reading only               |
| 5     | No prompts issued                               |

Values 1–4 are used in the editing process for Mastercard Corporate Fleet Card® transactions conducted at fuel locations that are submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                     |
|-----|---------------------------------|
| 16  | World Small Ticket Card Present |
| 62  | Commercial Large Ticket I       |
| 67  | Commercial Data Rate II         |
| 91  | Warehouse Base                  |
| 94  | Commercial Large Ticket II      |
| 99  | Commercial Large Ticket III     |

## Required related PDSs

These PDSs are required to be present when PDS 0632 is present, depending on the value submitted.

### Related required PDS information

| If PDS 0632 contains a... | Then these PDSs are required                                       |
|---------------------------|--------------------------------------------------------------------|
| 1                         | PDS 0631 (Driver Number/ID Number) and PDS 0629 (Odometer Reading) |

| Tag Field           | 0635                               |
| Data Length         | 3 positions, value = 006-012       |
| Data Field          | Variable length, 006-012 positions |
| Subfields           | None                               |
| Justification       | N/A                                |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| First Presentment/1240                                                   | O   | .   | C   |
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | O   | .   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644               | O   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644          | O   | .   | C   |

### Values

If present, PDS 0635 must be numeric and may contain all zeros.

## PDS 0636 (Call Date)

PDS 0636 (Call Date) contains the date of the call related to the telephony billing detail.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0636                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

PDS 0636 must be a fixed length of 006. If present, PDS 0636 must be numeric and a valid date in the format YYMMDD.

## PDS 0637 (Call Time)

PDS 0637 (Call Time) contains the time of the call related to the telephony billing detail.

### Attributes

| Attribute           | Description |
|---------------------|-------------|
| Data Representation | n-6; TAGLLL |
| Tag Field           | 0637        |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Length   | 3 positions, value = 006  |
| Data Field    | Fixed length, 6 positions |
| Subfields     | None                      |
| Justification | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

PDS 0637 must be a fixed length of 006. If present, PDS 0637 must be numeric and a valid time in the format HHMMSS.

## PDS 0638 (Call To Information)

PDS 0638 (Call To Information) contains the call location information and the phone number called pertaining to the telephony billing event.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-146; TAGLLL             |
| Tag Field           | 0638                        |
| Data Length         | 3 positions, value = 146    |
| Data Field          | Fixed length, 146 positions |
| Subfields           | 5                           |
| Justification       | See "Subfields"             |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Summary)/<br>1644 | O   | .   | C   |

## Values

PDS 0638 must be a fixed length of 146.

## PDS 0638 subfields

This PDS consists of five subfields.

### PDS 0638 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-40      | Call To City           | ans-40    | left          |
| 2      | 41-80     | Call To State/Province | ans-40    | left          |
| 3      | 81-120    | Call To Country        | ans-40    | left          |
| 4      | 121-145   | Call To Number         | ans-25    | left          |
| 5      | 146       | Call To Type           | an-1      | N/A           |

### Subfield 1 (Call To City)

If PDS 0638 is present, subfield 1 (Call To City) must contain the city to which the call was made. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Call To State/Province)

If PDS 0638 is present, subfield 2 (Call To State/Province) must contain the state/province to which the call was made. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Call To Country)

If PDS 0638 is present, subfield 3 (Call To Country) must contain the country to which the call was made. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 4 (Call To Number)

If PDS 0638 is present, subfield 4 (Call To Number) must contain the phone number called. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

For transactions acquired in the U.S. or Canada region, subfield 4 must contain a 10-position phone number, left-justified with trailing spaces. The first three positions must be numeric.

### Subfield 5 (Call To Type)

If PDS 0638 is present, subfield 5 (Call To Type) must contain one of the values listed in this table.

#### Values and descriptions

| Value | Description    |
|-------|----------------|
| C     | Outgoing Call  |
| I     | Incoming Call  |
| V     | Voice Mail     |
| P     | Page           |
| O     | Other          |
| F     | Toll-Free Call |

## PDS 0639 (Call Duration)

PDS 0639 (Call Duration) contains the duration of the call related to the telephony billing detail.

#### Attributes

| Attribute           | Description |
|---------------------|-------------|
| Data Representation | n-6; TAGLLL |

| Attribute     | Description               |
|---------------|---------------------------|
| Tag Field     | 0639                      |
| Data Length   | 3 positions, value = 006  |
| Data Field    | Fixed length, 6 positions |
| Subfields     | None                      |
| Justification | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

PDS 0639 must be a fixed length of 006. If present, PDS 0639 must be numeric and should be in the format HHMMSS.

## PDS 0640 (Call Time Period)

PDS 0640 (Call Time Period) describes the period (such as peak or off-peak) of the call related to the telephony billing detail.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-2; TAGLLL              |
| Tag Field           | 0640                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

## Values

If present, PDS 0640 must contain one of the values listed in this table.

### Values

| Value | Description     |
|-------|-----------------|
| PP    | Peak Period     |
| OP    | Off-Peak Period |
| MP    | Multiple Period |
| OT    | Other           |

PDS 0640 must be a fixed length of 002.

## PDS 0641 (Product Code)

PDS 0641 (Product Code) contains the industry or Acceptor defined product code of the individual item purchased or the Mastercard assigned product code in transactions that meet defined conditions.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...15; TAGLLLVAR             |
| Tag Field           | 0641                            |
| Data Length         | 3 positions, value = 001-015    |
| Data Field          | Variable length, 1-15 positions |

| Attribute     | Description |
|---------------|-------------|
| Subfields     | None        |
| Justification | Left        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

PDS 0641 (Product Code) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when one of these conditions occur:

- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I and PDS0622 contains value 3.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a maintenance location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.
- The associated First Presentment/1240 message is a not Shipping/Courier MCC or Temporary Services MCC and is submitted for IRD BR: Canada Intracountry Commercial Data Rate II or IRD BS: Canada Intracountry Commercial Large Ticket.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### IRD and descriptions

| IRD | Description                       |
|-----|-----------------------------------|
| 16  | Commercial Warehouse Tier I       |
| 62  | Commercial Large Ticket I         |
| 67  | Commercial Data Rate II           |
| 68  | Commercial Data Rate I            |
| 91  | Commercial Warehouse Base         |
| 94  | Commercial Large Ticket II        |
| 99  | Commercial Large Ticket III       |
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

PDS 0641 must be present in a Financial Detail Addendum (Corporate Line Item Detail)/1644 message when PDS 0642 (Item Description) is not present and when all of these conditions exist:

The business service is equal to one of the values listed in this table.

## Business service

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The Product Code should be provided for Mastercard Corporate Fleet Card® transactions occurring at fuel locations, when PDS 0622 (Motor Fuel Service Type) is 3 and the transactions are submitted for any U.S.-acquired Commercial interchange rate program for which Fleet transactions at fuel locations are valid.

PDS 0641 must be present when these conditions exist:

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The associated First Presentment/1240 contains a shipping/courier MCC in DE 26 (Acceptor Business Code [MCC]), and a Financial Detail Addendum (Shipping/Courier Services)/1644 message is not provided
- The associated First Presentment/1240 does not contain a temporary services MCC in DE 26.
- The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

## IRD and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |
| 62  | Commercial Large Ticket I                   |
| 66  | Commercial Data Rate III                    |
| 94  | Commercial Large Ticket II                  |
| 99  | Commercial Large Ticket III                 |

If the transaction submitted:

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)
- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message
- And is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### IRD and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |
| 62  | Commercial Large Ticket I                   |
| 66  | Commercial Data Rate III                    |
| 94  | Commercial Large Ticket II                  |
| 99  | Commercial Large Ticket III                 |
| SC  | Business Level 2 Data Rate III              |
| SE  | Business Level 2 Large Ticket I             |
| SF  | Business Level 2 Large Ticket II            |
| SG  | Business Level 2 Large Ticket III           |
| 3C  | Business Level 3 Data Rate III              |
| 3E  | Business Level 3 Large Ticket I             |
| 3F  | Business Level 3 Large Ticket II            |
| 3G  | Business Level 3 Large Ticket III           |
| 4C  | Business Level 4 Data Rate III              |
| 4E  | Business Level 4 Large Ticket I             |
| 4F  | Business Level 4 Large Ticket II            |
| 4G  | Business Level 4 Large Ticket III           |

Then one of the values in this table must be present.

### Field and descriptions

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

### Values

PDS 0641 (Product Code) must contain a code for the individual item purchased based on one of the following industry standards:

### Data representation per industry standard

| Industry standard                 | Data representation      |
|-----------------------------------|--------------------------|
| European Article Number 13 (EA13) | n-13                     |
| European Article Number 8 (EAN8)  | n-8                      |
| Global Trade Item Number (GTIN)   | n-8, n-12, n-13, or n-14 |
| Price Look Up Codes (PLUP)        | n-4 or n-5               |
| Reduce Space Symbology 14 (RS14)  | n-14                     |
| Uniform Product Code A (UPCA)     | n-12                     |
| Uniform Product Code E (UPCE)     | n-6                      |
| Other                             | an...15                  |

If no standards apply to the product or service, then a merchant defined inventory tracking code should be used.

PDS 0641 (Product Code) must not contain descriptors. For example, the following must not be used:

- Service
- Bill Payment
- Default
- Postage

- Misc
- Tip

PDS 0641 (Product Code) must not contain a Mastercard Product Identifier or Card Program Identifier. For example:

- DMC
- MCF
- MCP
- MCO

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with non-fuel purchases conducted with a Mastercard Corporate Fleet Card® at a fuel location, PDS 0641 should be provided and must contain a three-position non-fuel product code in the range 030–099 or 300–999.

### Values

| Value | Description                        |
|-------|------------------------------------|
| 030   | Motor Oil                          |
| 031   | Oil Change                         |
| 032   | Engine Service                     |
| 033   | Transmission Service               |
| 034   | Brake Service                      |
| 035   | Solvent                            |
| 036   | Brake Fluid                        |
| 037   | Miscellaneous Parts                |
| 038   | Miscellaneous Labor                |
| 039   | Miscellaneous Repairs              |
| 040   | TBA (tire, batteries, accessories) |
| 041   | Tires                              |
| 042   | Batteries                          |
| 043   | Automotive Accessories             |
| 044   | Automotive Glass                   |
| 045   | Car Wash                           |
| 046   | Towing                             |
| 047   | Diesel Exhaust Fluid               |

| <b>Value</b> | <b>Description</b>           |
|--------------|------------------------------|
| 070          | Cigarettes/Tobacco           |
| 078          | Health/Beauty Aid            |
| 079          | Miscellaneous Food/Grocery   |

| L-1114 | Lounge Charges          |
| L-1115 | Bar Charges             |
| L-1116 | Mini-Bar Charges        |
| L-1117 | Audiovisual Charges     |
| L-1118 | Banquet Charges         |
| L-1119 | Conference Room Charges |

| Value  | Description             |
|--------|-------------------------|
| L-1120 | Early Departure Charges |
| L-1121 | Transportation Charges  |
| L-1122 | Internet Access Charges |
| L-9999 | Miscellaneous Charges   |

In all other situations, PDS 0641 must be left-justified and cannot contain all zeros or all spaces.

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0641 (Product Code) and PDS 0641 must contain a valid value, unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0783 (Fleet Product Code).

## PDS 0642 (Item Description)

PDS 0642 (Item Description) contains the description of the individual item purchased.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...35; TAGLLLVAR             |
| Tag Field           | 0642                            |
| Data Length         | 3 positions, value = 001-035    |
| Data Field          | Variable length, 1-35 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Healthcare)/1644                     | M   | .   | M   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

PDS 0642 (Item Description) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when one of these conditions occur:

- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I and PDS0622 contains value 3.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a maintenance location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.
- The associated First Presentment/1240 message is a not Shipping/Courier MCC or Temporary Services MCC and is submitted for IRD BR: Canada Intracountry Commercial Data Rate II or IRD BS: Canada Intracountry Commercial Large Ticket.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Commercial Warehouse Tier I |
| 62  | Commercial Large Ticket I   |
| 67  | Commercial Data Rate II     |
| 68  | Commercial Data Rate I      |
| 91  | Commercial Warehouse Base   |
| 94  | Commercial Large Ticket II  |

| IRD | Description                       |
|-----|-----------------------------------|
| 99  | Commercial Large Ticket III       |
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Temporary Services)/1644 message, PDS 0642 should contain Temporary Services.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Shipping/Courier Services)/1644 message, PDS 0642 should contain Shipping Services.

PDS 0642 must be present in a Financial Detail Addendum (Corporate Line Item Detail)/1644 message when all these conditions exist.

- The product code is MCP or MCF at a non-fuel location.
- When PDS 0641 (Product Code) is not present.
- The Business Service is equal to one of the values listed in this table.

### Business services and descriptions

| Business Service Type<br>Code (PDS 0158,<br>subfield 2) | Business Service ID<br>(PDS 0158, subfield 3) | Description          |
|---------------------------------------------------------|-----------------------------------------------|----------------------|
| 2                                                       | 050001                                        | Europe Intraregional |
| 3                                                       | 050012                                        | Europe Intercountry  |
| 3                                                       | 050021                                        | Europe Intercountry  |

| <b>Business Service Type Code (PDS 0158, subfield 2)</b> | <b>Business Service ID (PDS 0158, subfield 3)</b> | <b>Description</b>  |
|----------------------------------------------------------|---------------------------------------------------|---------------------|
| 3                                                        | 050031                                            | Europe Intercountry |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs and descriptions

| <b>IRD</b> | <b>Description</b>                          |
|------------|---------------------------------------------|
| 26         | Purchasing Large Ticket Level 1 Interchange |
| 27         | Purchasing Large Ticket Level 2 Interchange |

PDS 0642 must be present when these conditions exist.

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The associated First Presentment/1240 contains a shipping/courier MCC in DE 26 (Acceptor Business Code [MCC]), and a Financial Detail Addendum (Shipping/Courier Services)/1644 message is not provided The associated First Presentment/1240 does not contain a temporary services MCC in DE 26.
- The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

### IRDs and descriptions

| <b>IRD</b> | <b>Description</b>          |
|------------|-----------------------------|
| 62         | Commercial Large Ticket I   |
| 66         | Commercial Data Rate III    |
| 94         | Commercial Large Ticket II  |
| 99         | Commercial Large Ticket III |

If the transaction that is submitted:

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)

- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message, and
- Is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

Then one of the fields listed in this table must be present.

### Fields and descriptions

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

### Values

If present, PDS 0642 must be left-justified and cannot contain all spaces, all zeros, all low values, or all high values.

Item Description must contain the description of the individual item purchased exactly as shown on the Transaction Information Document (Transaction receipt) or buyer invoice.

Item Description must not contain repetitive characters, strings of numbers or special characters, or generic descriptors. For example, the following values must not be used:

- Food/Grocery
- General Merchandise/Merchandise
- Government Services
- Insurance

- Invoice/Invoice Charges
- Label
- Miscellaneous/Misc
- Other
- Parts
- Payment On Account
- Product
- Services
- Utility Bill/Bill/Bill Payment

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0642 (Item Description) and PDS 0642 must contain a meaningful description for the good or service purchased, unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0784 (Fleet Item Description).

## PDS 0643 (Item Quantity)

PDS 0643 (Item Quantity) indicates the quantity of the item purchased and the associated decimal point location.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-13; TAGLLL               |
| Tag Field           | 0643                       |
| Data Length         | 3 positions, value = 013   |
| Data Field          | Fixed length, 13 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Healthcare)/1644                     | M   | .   | M   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

PDS 0643 (Item Quantity) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when one of these conditions occur:

- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I and PDS0622 contains value 3.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a maintenance location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.
- The associated First Presentment/1240 message is a not Shipping/Courier MCC or Temporary Services MCC and is submitted for IRD BR: Canada Intracountry Commercial Data Rate II or IRD BS: Canada Intracountry Commercial Large Ticket.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business Code). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Commercial Warehouse Tier I |
| 62  | Commercial Large Ticket I   |
| 67  | Commercial Data Rate II     |
| 68  | Commercial Data Rate I      |
| 91  | Commercial Warehouse Base   |

| IRD | Description                       |
|-----|-----------------------------------|
| 94  | Commercial Large Ticket II        |
| 99  | Commercial Large Ticket III       |
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |

| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

PDS 0643 must be present in a Financial Detail Addendum (Corporate Line Item Detail)/1644 message when all these conditions exist:

- The product code is MCP or MCF at a non-fuel location.
- The business service is equal to one of the values listed in this table.

### Business services and descriptions

| Business Service Type<br>Code (PDS 0158,<br>subfield 2) | Business Service ID<br>(PDS 0158, subfield 3) | Description          |
|---------------------------------------------------------|-----------------------------------------------|----------------------|
| 2                                                       | 050001                                        | Europe Intraregional |
| 3                                                       | 050012                                        | Europe Intercountry  |
| 3                                                       | 050021                                        | Europe Intercountry  |
| 3                                                       | 050031                                        | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

PDS 0643 must be present when these conditions exist:

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The associated First Presentment/1240 contains a shipping/courier MCC in DE 26 (Acceptor Business Code [MCC]), and a Financial Detail Addendum (Shipping/Courier Services)/1644 message is not provided The associated First Presentment/1240 does not contain a temporary services MCC in DE 26.
- The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

If the transaction that is submitted:

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)
- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message
- And is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### IRDs and descriptions

| IRD | Description               |
|-----|---------------------------|
| 62  | Commercial Large Ticket I |
| 66  | Commercial Data Rate III  |

| IRD | Description                 |
|-----|-----------------------------|
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

Then one of the fields listed in this table must be present.

### Fields and descriptions

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Temporary Services)/1644 message, PDS 0643 should contain a value of 1.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Shipping/Courier Services)/1644 message, PDS 0643 should contain a value of 1.

### PDS 0643 subfields

PDS 0643 consists of two subfields.

PDS 0643 subfields are listed in this table.

### PDS 0643 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-12      | Item Quantity          | n-12      | right         |
| 2      | 13        | Item Quantity Exponent | n-1       | N/A           |

### Subfield 1 (Item Quantity)

If present, subfield 1 (Item Quantity) must be numeric and greater than zero.

### Subfield 2 (Item Quantity Exponent)

Subfield 2 (Item Quantity Exponent) indicates the decimal location for the Item Quantity subfield. If PDS 0643 is present, subfield 2 must be numeric and contain a value of 0 to 5.

## PDS 0644 (Call From Information)

PDS 0644 (Call From Information) contains the location description for the originator of the telephone call and the number from which the call was made.

### Attributes

|---------------------|-----------------------------|
| Data Representation | ans-145; TAGLLL             |
| Tag Field           | 0644                        |
| Data Length         | 3 positions, value = 145    |
| Data Field          | Fixed length, 145 positions |
| Subfields           | 4                           |
| Justification       | See "Subfields"             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

PDS 0644 must be a fixed length of 145.

## PDS 0644 subfields

This PDS consists of four subfields.

### PDS 0644 subfields

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 1      | 1–40      | Call From City           | ans-40    | left          |
| 2      | 41–80     | Call From State/Province | ans-40    | left          |
| 3      | 81–120    | Call From Country        | ans-40    | left          |
| 4      | 121–145   | Call From Number         | ans-25    | left          |

### Subfield 1 (Call From City)

If PDS 0644 is present, subfield 1 (Call From City) must contain the city from which the call originated. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Call From State/Province)

Subfield 2 (Call From State/Province) must contain the state/province from which the call originated. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 3 (Call From Country)

Subfield 3 (Call From Country) must contain the country from which the call originated. It must be left-justified with trailing spaces and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 4 (Call From Number)

Subfield 4 (Call From Number) must contain the phone number from which the call was originated. It must be left-justified with trailing spaces, and cannot contain all low values, all high values, all spaces, or all zeros.

For transactions acquired in the U.S. or Canada region, subfield 4 must contain a 10-position phone number, left-justified with trailing spaces. The first three positions must be numeric.

## PDS 0645 (Item Unit of Measure)

PDS 0645 (Item Unit of Measure) contains the unit of measure for the individual item purchased.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...12; TAGLLLLVAR            |
| Tag Field           | 0645                            |
| Data Length         | 3 positions, value = 001-012    |
| Data Field          | Variable length, 1-12 positions |
| Subfields           | None                            |
| Justification       | N/A                             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

PDS 0645 (Item Unit of Measure) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when one of these conditions occur:

- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card<sup>®</sup> transaction at a fuel location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I and PDS0622 contains value 3.

- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a maintenance location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.
- The associated First Presentment/1240 message is a not Shipping/Courier MCC or Temporary Services MCC and is submitted for IRD BR: Canada Intracountry Commercial Data Rate II or IRD BS: Canada Intracountry Commercial Large Ticket.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### IRDs and descriptions

| IRD | Description                       |
|-----|-----------------------------------|
| 16  | Commercial Warehouse Tier I       |
| 62  | Commercial Large Ticket I         |
| 67  | Commercial Data Rate II           |
| 68  | Commercial Data Rate I            |
| 91  | Commercial Warehouse Base         |
| 94  | Commercial Large Ticket II        |
| 99  | Commercial Large Ticket III       |
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Temporary Services)/1644 message, PDS 0645 should contain a value of Unit.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Shipping/Courier Services)/1644 message, PDS 0645 should contain a value of Unit.

PDS 0645 must be present when these conditions exist:

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

If the transaction that is submitted

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)
- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message
- And is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### IRDs and descriptions

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

Then one of the fields in this table must be present.

## Fields and descriptions

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

## Values

If present, PDS 0645 cannot contain all low values, all high values, all zeros, or all spaces.

Item Unit of Measure must contain a valid four character unit of measure code as defined in the Item Unit of Measure Table.

## Item Unit of Measure

| Measure code | Name       | Definition                                                 |
|--------------|------------|------------------------------------------------------------|
| ACRE         | Acre       | Unit of measure equal to 4840 square yards.                |
| ARES         | Are        | Unit of measure equal to 100 square meters.                |
| CELI         | Centiliter | Unit of volume that is equal to one hundredth of a liter.  |
| CMET         | Centimeter | Unit of measure that is equal to one hundredth of a meter. |
| EACH         | Each       | One of two or more distinct items.                         |
| FOOT         | Foot       | Unit of length equal to 1/3 yard.                          |
| GBGA         | GBGallon   | Unit of volume that is equal to 8 pints.                   |
| GBOU         | GBOunce    | Unit of weight equal to one sixteenth of a pound.          |
| GBPI         | GBPint     | Unit of volume that is equal to 568 cubic centimeters.     |

| Measure code | Name             | Definition                                                                         |
|--------------|------------------|------------------------------------------------------------------------------------|
| GBQA         | GBQuart          | Unit of volume that is equal to 2 pints.                                           |
| GRAM         | Gram             | Unit of measure that is equal to one 1,000th of a kilo.                            |
| HECT         | Hectare          | Unit of measure that is equal to 10,000 square meters.                             |
| INCH         | Inch             | Measure of length equal to 2.54 cm.                                                |
| KILO         | Kilogram         | Basic unit of mass in the International System of Units (SI) equal to 1000 grams.  |
| KMET         | Kilometer        | Unit of measure that is equal to 1000 meters.                                      |
| LITR         | Liter            | Unit of volume that is equal to one thousand cubic centimeters.                    |
| METR         | Meter            | Unit of length in the metric system equal to 39.37 inches.                         |
| MILE         | Mile             | Unit of length equal to 1760 yards.                                                |
| MILI         | MilliLiter       | Unit of volume that is equal to one thousandth of a liter.                         |
| MMET         | Millimeter       | Unit of measure that is equal to one thousandth of one meter.                      |
| PIEC         | Piece            | Standard length of cloth, wallpaper, as an item for sale or amount of a substance. |
| PUND         | Pound            | Unit of weight equal to 0.454 kilograms.                                           |
| SCMT         | SquareCentimeter | Measure of a surface one centimeter by one centimeter.                             |
| SMET         | SquareMeter      | Measure of a surface one meter by one meter.                                       |
| SMIL         | SquareMillimeter | Measure of a surface one millimeter by one millimeter.                             |
| SQFO         | SquareFoot       | Measure of a surface one foot by one foot.                                         |
| SQIN         | SquareInch       | Measure of a surface one inch by one inch.                                         |

| Measure code | Name            | Definition                                                                        |
|--------------|-----------------|-----------------------------------------------------------------------------------|
| SQKI         | SquareKilometer | Measure of a surface one kilometer by one kilometer.                              |
| SQMI         | SquareMile      | Measure of a surface one mile by one mile.                                        |
| SQYA         | SquareYard      | Measure of a surface one yard by one yard.                                        |
| TONS         | Ton             | Measure of weight, in Britain 2240lb (long ton) and in the US 2000lb (short ton). |
| USGA         | USGallon        | Unit of volume that is equal to 8 pints.                                          |
| USOU         | USOunce         | Unit of weight equal to one sixteenth of a pound.                                 |
| USPI         | USPint          | Unit of volume that is equal to 473 cubic centimeters.                            |
| USQA         | USQuart         | Unit of volume that is equal to 2 pints.                                          |
| YARD         | Yard            | Unit of length equal to 3 feet or 0.9144 meter.                                   |

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0645 (Item Unit of Measure) and PDS 0645 must contain a valid unit of measurement as defined in the Item Unit of Measure Table, unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0786 (Fleet Item Unit of Measure).

## PDS 0646 (Unit Price)

PDS 0646 (Unit Price) is the price for one unit of the product.

### Attributes

| Attribute           | Description    |

| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Healthcare)/1644                     | M   | .   | M   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

This PDS is part of the line item detail when a Mastercard Corporate Purchasing Card® or Mastercard Corporate Fleet Card® is used in a business-to-business purchase.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Temporary Services)/1644 message, PDS 0646 should contain a value of 1.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Shipping/Courier Services)/1644 message, PDS 0646 should contain a value of 1.

PDS 0646 must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when one of these conditions occur:

- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a fuel location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I and PDS0622 contains value 3.
- The associated First Presentment/1240 message is a Mastercard Corporate Fleet Card® transaction at a maintenance location MCC and is submitted for IRD BQ: Canada Intracountry Commercial Data Rate I.

- The associated First Presentment/1240 message is a not Shipping/Courier MCC or Temporary Services MCC and is submitted for IRD BR: Canada Intracountry Commercial Data Rate II or IRD BS: Canada Intracountry Commercial Large Ticket.
- The product code is MCP or MCF at a non-fuel location.
- The Business Service is equal to one of the values in this table.

### Business services and descriptions

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

### Values

If present, subfield 1 must be numeric. Subfield 2 must contain a value in the range 0–5.

### PDS 0646 subfields

PDS 0646 consists of two subfields.

PDS 0646 subfields are listed in this table.

### PDS 0646 subfields

| Number | Positions | Name                | Attribute | Justification |
|--------|-----------|---------------------|-----------|---------------|
| 1      | 1–12      | Unit Price          | n-12      | right         |
| 2      | 13        | Unit Price Exponent | n-1       | N/A           |

### Subfield 1 (Unit Price)

Subfield 1 (Unit Price) must be numeric.

### Subfield 2 (Unit Price Exponent)

Subfield 2 (Unit Price Exponent) must be between 0 and 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## PDS 0647 (Extended Item Amount)

PDS 0647 (Extended Item Amount) contains the individual item amount that is normally calculated as price multiplied by quantity.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0647                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644     | C   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

PDS 0647 must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate I  |
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                 |
|-----|-----------------------------|
| 16  | Commercial Warehouse Tier I |
| 62  | Commercial Large Ticket I   |
| 67  | Commercial Data Rate II     |
| 68  | Commercial Data Rate I      |
| 91  | Commercial Warehouse Base   |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

| IRD | Description                       |
|-----|-----------------------------------|
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Temporary Services)/1644 message, PDS 0647 should equal the Transaction Amount.

When a Financial Detail Addendum (Corporate Line Item Detail)/1644 is submitted in conjunction with a Financial Detail Addendum (Shipping/Courier Services)/1644 message, PDS 0647 should equal the Transaction Amount.

PDS 0647 must be present when these conditions exist:

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The associated First Presentment/1240 contains a shipping/courier MCC in DE 26 (Acceptor Business Code [MCC]), and a Financial Detail Addendum (Shipping/Courier Services)/1644 message is not provided The associated First Presentment/1240 does not contain a temporary services MCC in DE 26.
- The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

#### IRDs in First Presentment/1240

| IRD | Description               |
|-----|---------------------------|
| 62  | Commercial Large Ticket I |
| 66  | Commercial Data Rate III  |

| IRD | Description                 |
|-----|-----------------------------|
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

If the transaction that is submitted:

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)
- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message
- And is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### U.S. region Corporate Interchange Programs

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

Then one of the fields listed in this table must be present.

### Required fields

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

### Values

If present, PDS 0647 must be a fixed length of 014.

To allow for situations in which the item is zero cost to the customer, PDS 0650 (Zero Cost to Customer) must also be present in the Corporate Card Line Item Detail Addendum message, and equal to Y. PDS 0647, subfield 1 may contain zero in this circumstance.

## PDS 0647 subfields

This PDS consists of three subfields.

### PDS 0647 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1-12      | Extended Item Amount          | n-12      | right         |
| 2      | 13        | Extended Item Amount Exponent | n-1       | N/A           |
| 3      | 14        | Extended Item Amount Sign     | a-1       | N/A           |

### Subfield 1 (Extended Item Amount)

If PDS 0647 is present, subfield 1 (Extended Item Amount) must contain the amount and be numeric and greater than zero, unless PDS 0650 (Zero Cost to Customer) is present and equal to Y.

### Subfield 2 (Extended Item Amount Exponent)

If PDS 0647 is present, subfield 2 (Extended Item Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Extended Item Amount Sign)

If PDS 0647 is present, subfield 3 (Extended Item Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0647 is a debit or credit from the perspective of the cardholder.

### Values and Descriptions

| Value | Description                       |
|-------|-----------------------------------|
| D     | Extended item amount is a debit.  |
| C     | Extended item amount is a credit. |

## PDS 0648 (Item Discount)

PDS 0648 (Item Discount) contains the item discount indicator and amount.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-20; TAGLLL             |
| Tag Field           | 0648                       |
| Data Length         | 3 positions, value = 020   |
| Data Field          | Fixed length, 20 positions |
| Subfields           | 5                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | C   | .   | C   |

This PDS is part of the line item detail when a Mastercard Corporate Purchasing Card<sup>®</sup> or Mastercard Corporate Fleet Card<sup>®</sup> is used in a business-to-business purchase.

If subfields 1 and 2 are provided, the customer must also provide subfields 3, 4, and 5.

PDS 0648 must be present in a Financial Detail Addendum (Corporate Line Item Detail)/1644 message when all these conditions exist:

- The product code is MCP or MCF at a non-fuel location.
- The business service is equal to one of the values in this table.

### Business services and descriptions

| Business Service Type Code (PDS 0158, subfield 2) | Business Service ID (PDS 0158, subfield 3) | Description          |
|---------------------------------------------------|--------------------------------------------|----------------------|
| 2                                                 | 050001                                     | Europe Intraregional |
| 3                                                 | 050012                                     | Europe Intercountry  |
| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

### Values

PDS 0648 must be a fixed length of 20.

### PDS 0648 subfields

This PDS consists of five subfields.

### PDS 0648 subfields

| Number | Positions | Name               | Attribute | Justification |
|--------|-----------|--------------------|-----------|---------------|
| 1      | 1         | Discount Indicator | as-1      | N/A           |

| Number | Positions | Name                        | Attribute | Justification |
|--------|-----------|-----------------------------|-----------|---------------|
| 2      | 2–13      | Discount Amount             | n-12      | right         |
| 3      | 14–18     | Item Discount Rate          | n-5       | right         |
| 4      | 19        | Item Discount Rate Exponent | n-1       | N/A           |
| 5      | 20        | Item Discount Amount Sign   | a-1       | N/A           |

### Subfield 1 (Discount Indicator)

If PDS 0648 is present, subfield 1 (Discount Indicator) must contain one of the values listed in this table.

#### Values and descriptions

| Value | Description               |
|-------|---------------------------|
| Y     | Amount is discounted.     |
| N     | Amount is not discounted. |
| space | Not supported             |

### Subfield 2 (Discount Amount)

If PDS 0648 is present, subfield 2 (Discount Amount) must be numeric and cannot be all zeros if subfield 1 is Y.

### Subfield 3 (Item Discount Rate)

Subfield 3 (Item Discount Rate) is the discount rate applicable to the amount. If PDS 0648 is present, subfield 3 must contain a five-digit numeric value.

### Subfield 4 (Item Discount Rate Exponent)

If PDS 0648 is present, subfield 4 (Item Discount Rate Exponent) must contain a value in the range 0–5.

## Subfield 5 (Item Discount Amount Sign)

If PDS 0648 is present, subfield 5 (Item Discount Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0648 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                       |
|-------|-----------------------------------|
| C     | Item discount amount is a credit. |
| D     | Item discount amount is a debit.  |

## PDS 0649 (Call Usage Amount)

PDS 0649 (Call Usage Amount) contains the call usage amount information pertaining to the telephony billing event.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0649                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

PDS 0649 must be a fixed length of 14.

### PDS 0649 subfields

This PDS consists of three subfields as defined in this table.

#### PDS 0649 subfields

| Number | Positions | Name                       | Attribute | Justification |
|--------|-----------|----------------------------|-----------|---------------|
| 1      | 1–12      | Call Usage Amount          | n-12      | right         |
| 2      | 13        | Call Usage Amount Exponent | n-1       | N/A           |
| 3      | 14        | Call Usage Amount Sign     | a-1       | N/A           |

#### Subfield 1 (Call Usage Amount)

If PDS 0649 is present, subfield 1 (Call Usage Amount) must be numeric and contain the usage amount of the call, and it may be all zeros.

#### Subfield 2 (Call Usage Amount Exponent)

If PDS 0649 is present, subfield 2 (Call Usage Amount Exponent) must be numeric and contain a value of 0 to 5.

#### Subfield 3 (Call Usage Amount Sign)

If PDS 0649 is present, subfield 3 (Call Usage Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0649 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| D     | Call Usage Amount is a debit.  |
| C     | Call Usage Amount is a credit. |

## PDS 0650 (Zero Cost to Customer Indicator)

PDS 0650 (Zero Cost to Customer Indicator) if supplied, indicates whether the item is free to the customer.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | a-1; TAGLLL              |
| Tag Field           | 0650                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

### Values

PDS 0650 must contain one of the values listed in this table.

### Values and descriptions

| Value | Description                                                                                                                                    |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Y     | The line item is at zero cost to the customer. PDS 0647 (Extended Item Amount) and PDS 0787 (Fleet Extended Item Amount) may be equal to zero. |
| N     | The line item is not at zero cost to the customer.                                                                                             |

## PDS 0651 (Procedure ID)

PDS 0651 (Procedure ID) contains identification of the rail server procedure or the order in which service was booked or cancellation was done.

The ID is a two-digit abbreviation followed by a dash (example: AN-3N7ZPX or RS-23IVTY). The order number (abbreviation AN-) is always given in an internet application.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-9; TAGLLL             |
| Tag Field           | 0651                      |
| Data Length         | 3 positions, value = 009  |
| Data Field          | Fixed length, 9 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0652 (Service Type)

PDS 0652 (Service Type) contains two subfields with codes defined that indicate the type of service and the nature of the service provided.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-4; TAGLLL             |
| Tag Field           | 0652                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | C   | .   | C   |

## Values

If present, PDS 0652 must not contain all high values or all low values.

## Subfield 1 (Service Type)

This subfield is required if a Passenger Transport Detail, Rail Data Addendum is submitted, and the associated First Presentment/1240 contains a rail or travel agency MCC and is submitted for IRD 89: U.S. Commercial T&E Rate III.

The service type must contain a two-position value to indicate the type of service provided. Examples of possible values are 01 Ticket and 02 Baggage.

If present, subfield 1 must be left-justified and cannot be all zeros, all spaces, all high values, or all low values.

## Subfield 2 (Service Nature)

Service Nature contains a two-position value that indicates the nature of the service provided. Examples of possible values are 01 Seat and 02 Couchette.

If present, subfield 2 must be left-justified and cannot be all zeros or all spaces, all high values, or all low values.

## PDS 0653 (Service Amount)

PDS 0653 (Service Amount) contains three subfields that describe the amount charged for the service.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0653                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## PDS 0653 subfields

This PDS consists of three subfields.

### PDS 0653 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1–12      | Service Amount          | n-12      | right         |
| 2      | 13        | Service Amount Exponent | n-1       | N/A           |
| 3      | 14        | Service Amount Sign     | a-1       | N/A           |

### Subfield 1 (Service Amount)

If PDS 0653 is present, subfield 1 must be numeric.

### Subfield 2 (Service Amount Exponent)

Subfield 2 (Service Amount Exponent) indicates the decimal location for the Service Amount subfield. If PDS 0653 is present, subfield 2 must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Service Amount Sign)

If PDS 0653 is present, subfield 3 (Service Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0653 is a debit or a credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description            |
|-------|------------------------|
| D     | Fee Amount is a debit  |
| C     | Fee Amount is a credit |

## PDS 0654 (Debit or Credit Indicator)

PDS 0654 (Debit or Credit Indicator) indicates whether the net of extended item amount, net of discount, taxes, and price, is a debit or credit.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | as-1; TAGLLL             |
| Tag Field           | 0654                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644 | C   | .   | C   |

If the Financial Detail Addendum (Corporate Line Item Detail)/1644 message is provided, PDS 0654 is mandatory.

PDS 0654 must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

The business service arrangement is U.S.-to-U.S. where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.

Associated First Presentment/1240 messages should contain a fuel MCC in DE 26 (Acceptor Business). The applicable IRDs for the First Presentment/1240 messages are listed in this table.

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate I  |
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                       |
|-----|-----------------------------------|
| 16  | Commercial Warehouse Tier I       |
| 62  | Commercial Large Ticket I         |
| 67  | Commercial Data Rate II           |
| 68  | Commercial Data Rate I            |
| 91  | Commercial Warehouse Base         |
| 94  | Commercial Large Ticket II        |
| 99  | Commercial Large Ticket III       |
| SC  | Business Level 2 Data Rate III    |
| SE  | Business Level 2 Large Ticket I   |
| SF  | Business Level 2 Large Ticket II  |
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |

| IRD | Description                       |
|-----|-----------------------------------|
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

### Values

PDS 0654 must contain one of the values listed in this table.

### Values

| Value | Description                       |
|-------|-----------------------------------|
| D     | Extended item amount is a debit.  |
| C     | Extended item amount is a credit. |

PDS 0654 must be present when these conditions exist:

- The Business Service is U.S.-to-U.S. (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001).
- The associated First Presentment/1240 contains a shipping/courier MCC in DE 26 (Acceptor Business Code [MCC]), and a Financial Detail Addendum (Shipping/Courier Services)/1644 message is not provided. The associated First Presentment/1240 does not contain a temporary services MCC in DE 26.
- The IRD submitted in the associated First Presentment/1240 is one of the values listed in this table.

### IRDs in First Presentment/1240

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

If the transaction that is submitted:

- Is for a U.S. to U.S. Business Service Arrangement (PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001)
- Requires a Financial Detail Addendum (Corporate Line Item Detail)/1644 message, and
- Is not submitted for one of the U.S. region corporate interchange programs listed in this table.

### U.S. region Corporate Interchange Programs

| IRD | Description                 |
|-----|-----------------------------|
| 62  | Commercial Large Ticket I   |
| 66  | Commercial Data Rate III    |
| 94  | Commercial Large Ticket II  |
| 99  | Commercial Large Ticket III |

Then one of the fields in this table must be present.

### Required fields

| Field    | Description               |
|----------|---------------------------|
| PDS 0641 | Product Code              |
| PDS 0642 | Item Description          |
| PDS 0643 | Item Quantity             |
| PDS 0645 | Item Unit of Measure      |
| PDS 0647 | Extended Item Amount      |
| PDS 0654 | Debit or Credit Indicator |

## PDS 0655 (Call Long Distance Amount)

PDS 0655 (Call Long Distance Amount) contains the long distance amount information pertaining to the telephony billing event.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |

| Attribute     | Description                |
|---------------|----------------------------|
| Tag Field     | 0655                       |
| Data Length   | 3 positions, value = 014   |
| Data Field    | Fixed length, 14 positions |
| Subfields     | 3                          |
| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

## Values

PDS 0655 must be a fixed length of 14.

## PDS 0655 subfields

This PDS consists of three subfields.

## PDS 0655 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1-12      | Call Long Distance Amount          | n-12      | right         |
| 2      | 13        | Call Long Distance Amount Exponent | n-1       | N/A           |
| 3      | 14        | Call Long Distance Amount Sign     | a-1       | N/A           |

## Subfield 1 (Call Long Distance Amount)

If PDS 0655 is present, subfield 1 (Call Long Distance Amount) must be numeric and contain the long distance amount of the call and may be all zeros.

## Subfield 2 (Call Long Distance Amount Exponent)

If PDS 0655 is present, subfield 2 (Call Long Distance Amount Exponent) must be numeric and contain a value of 0 to 5.

## Subfield 3 (Call Long Distance Amount Sign)

If PDS 0655 is present, subfield 3 (Call Long Distance Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0655 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| D     | Call long distance amount is a debit.  |
| C     | Call long distance amount is a credit. |

## PDS 0656 (Full VAT Amounts)

PDS 0656 (Full VAT Amounts) contains the gross amount from which the VAT was calculated and a value added tax at the full tax rate.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans-28; TAGLLLVAR                |
| Tag Field           | 0656                             |
| Data Length         | 3 positions, value = 014–028     |
| Data Field          | Variable length, 14–28 positions |
| Subfields           | 6                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## PDS 0656 subfields

This PDS consists of six subfields.

### PDS 0656 subfields

| Number | Positions | Name                           | Attribute | Justification |
|--------|-----------|--------------------------------|-----------|---------------|
| 1      | 1-12      | Full VAT Gross Amount          | n-12      | right         |
| 2      | 13        | Full VAT Gross Amount Exponent | n-1       | N/A           |
| 3      | 14        | Full VAT Gross Amount Sign     | a-1       | N/A           |
| 4      | 15-26     | Full VAT Tax Amount            | n-12      | right         |
| 5      | 27        | Full VAT Tax Amount Exponent   | n-1       | N/A           |
| 6      | 28        | Full VAT Tax Amount Sign       | a-1       | N/A           |

### Subfield 1 (Full VAT Gross Amount)

If PDS 0656 is present, subfield 1 must be numeric and greater than zero.

### Subfield 2 (Full VAT Gross Amount Exponent)

Subfield 2 (Full VAT Gross Amount Exponent) indicates the decimal location for the Full VAT Gross Amount subfield. If PDS 0656 is present, subfield 2 must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Full VAT Gross Amount Sign)

If PDS 0656 is present, subfield 3 (Full VAT Gross Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0605 subfield 1 is a debit or a credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                        |
|-------|------------------------------------|
| D     | Full VAT Gross Amount is a debit.  |
| C     | Full VAT Gross Amount is a credit. |

### Subfield 4 (Full VAT Tax Amount)

If PDS 0656 is present, subfield 4 must be numeric.

### Subfield 5 (Full VAT Tax Amount Exponent)

Subfield 5 (Full VAT Tax Amount Exponent) indicates the decimal location for the Full VAT Tax Amount subfield. If PDS 0656 is present, subfield 5 must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 6 (Full VAT Tax Amount Sign)

If PDS 0656 is present, subfield 6 (Full VAT Tax Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0605 subfield 4 is a debit or a credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Full VAT Tax Amount is a debit.  |
| C     | Full VAT Tax Amount is a credit. |

## PDS 0657 (Half VAT Amounts)

PDS 0657 (Half VAT Amounts) contains the gross amount from which the VAT was calculated and a value-added tax at the half tax rate.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...28; TAGLLLLVAR             |
| Tag Field           | 0657                             |
| Data Length         | 3 positions, value = 014-028     |
| Data Field          | Variable length, 14-28 positions |
| Subfields           | 6                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## PDS 0657 subfields

This PDS consists of six subfields.

### PDS 0657 subfields

| Number | Positions | Name                           | Attribute | Justification |
|--------|-----------|--------------------------------|-----------|---------------|
| 1      | 1-12      | Half VAT Gross Amount          | n-12      | right         |
| 2      | 13        | Half VAT Gross Amount Exponent | n-1       | N/A           |
| 3      | 14        | Half VAT Gross Amount Sign     | a-1       | N/A           |

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 4      | 15–26     | Half VAT Tax Amount          | n-12      | right         |
| 5      | 27        | Half VAT Tax Amount Exponent | n-1       | N/A           |
| 6      | 28        | Half VAT Tax Amount Sign     | a-1       | N/A           |

### Subfield 1 (Half VAT Gross Amount)

If PDS 0657 is present, subfield 1 must be numeric and greater than zero.

### Subfield 2 (Half VAT Gross Amount Exponent)

Subfield 2 (Half VAT Gross Amount Exponent) indicates the decimal location for the Half VAT Gross Amount subfield. If PDS 0657 is present, subfield 2 must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Half VAT Gross Amount Sign)

If PDS 0657 is present, subfield 3 (Half VAT Gross Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0657 subfield 1 is a debit or a credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                        |
|-------|------------------------------------|
| D     | Half VAT Gross Amount is a debit.  |
| C     | Half VAT Gross Amount is a credit. |

### Subfield 4 (Half VAT Tax Amount)

If PDS 0657 is present, subfield 4 must be numeric.

## Subfield 5 (Half VAT Tax Amount Exponent)

Subfield 5 (Half VAT Tax Amount Exponent) indicates the decimal location for the Half VAT Tax Amount subfield. If PDS 0657 is present, subfield 5 must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 6 (Half VAT Tax Amount Sign)

If PDS 0657 is present, subfield 6 must contain a value of D or C. This subfield identifies whether PDS 0657 subfield 4 is a debit or a credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Half VAT Tax Amount is a debit.  |
| C     | Half VAT Tax Amount is a credit. |

## PDS 0658 (Call Connect Amount)

PDS 0658 (Call Connect Amount) contains the call connect amount information pertaining to the telephony billing event.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0658                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

## Values

PDS 0658 must be a fixed length of 14.

## PDS 0658 subfields

This PDS consists of three subfields.

### PDS 0658 subfields

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 1      | 1-12      | Call Connect Amount          | n-12      | right         |
| 2      | 13        | Call Connect Amount Exponent | n-1       | N/A           |
| 3      | 14        | Call Connect Amount Sign     | a-1       | N/A           |

### Subfield 1 (Call Connect Amount)

If PDS 0658 is present, subfield 1 (Call Connect Amount) must be numeric and contain the connect amount of the call, and it may be all zeros.

### Subfield 2 (Call Connect Amount Exponent)

If PDS 0658 is present, subfield 2 (Call Connect Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Call Connect Amount Sign)

If PDS 0658 is present, subfield 3 (Call Connect Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0658 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Call connect amount is a debit.  |
| C     | Call connect amount is a credit. |

## PDS 0659 (Other Description)

PDS 0659 (Other Description) contains additional descriptive information related to the telephony billing information.

### Attributes

| Attribute           | Description                   |
|---------------------|-------------------------------|
| Data Representation | ans...60; TAGLLLVAR           |
| Tag Field           | 0659                          |
| Data Length         | 3 positions, value = 001–060  |
| Data Field          | Variable length, 60 positions |
| Subfields           | None                          |
| Justification       | N/A                           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                   | Org | Sys | Dst |
|-----------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Telephony Billing Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0659 must be a length of 001–060. PDS 0659 must be left-justified, and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0660 (Customer Reference)

PDS 0660 (Customer Reference) contains two subfields that can occur 10 times.

This PDS indicates the customer reference values provided for this transaction and used for various reference processing at the customer site. These values represent information most prevalently provided by travel agencies for transactions booked against a lodged account or central travel account.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | ans-190; TAGLLLVAR                               |
| Tag Field           | 0660                                             |
| Data Length         | 3 positions, value = 019–190 in increments of 19 |
| Data Field          | Variable length, 19–190 positions                |
| Subfields           | 2 fixed-length subfields for each occurrence     |
| Occurrences         | 1–10                                             |
| Justification       | See “Subfields”                                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodged Account Detail)/1644 | O   | .   | C   |

## PDS 0660 subfields

PDS 0660 may contain from one to ten occurrences of customer reference information.

Each occurrence consists of two subfields as defined in this table. Each occurrence requires 19 positions. The length of the PDS must be a multiple of 19, with a maximum length of 190 positions.

### PDS 0660 subfields

| Number | Positions | Name                            | Attribute | Justification |
|--------|-----------|---------------------------------|-----------|---------------|
| 1      | 1–2       | Customer Reference Value ID     | n-2       | N/A           |
| 2      | 3–19      | Customer Reference Value Detail | ans-17    | left          |

### Subfield 1 (Customer Reference Value ID)

This subfield contains the value from 01 to 10 that defines what information is reflected in the Customer Reference Value Detail (subfield 2).

### Subfield 2 (Customer Reference Value Detail)

This subfield is a free-form text field that is used to provide customer reference value information about the transaction. If present, this subfield must be left-justified and cannot be all zeros, all spaces, all high values, or all low values.

## PDS 0661 (Traffic Code)

PDS 0661 (Traffic Code) contains a code of the service provider.

This PDS is provided only when the Service Nature (PDS 0652) contains a value that indicates domestic ticket, Ne/See ticket, or foreign ticket.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-3; TAGLLL               |
| Tag Field           | 0661                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric.

## PDS 0662 (Sample Number)

PDS 0662 (Sample Number) contains a type of service reservation.

This PDS is provided only when PDS 0652 (Service Type) equates to Cancellation Ticket or Cancellation Reservation, and the sample number of the cancelled ticket is provided. This PDS is not provided with external cancellations. However, internet business transactions do not provide for this case.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-4; TAGLLL               |
| Tag Field           | 0662                      |
| Data Length         | 3 positions, value = 004  |
| Data Field          | Fixed length, 4 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and cannot be all zeros.

## PDS 0663 (Free-Form Description)

PDS 0663 (Free-Form Description) is free-form description information Mastercard® assigns as needed.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...992; TAGLLLVAR             |
| Tag Field           | 0663                             |
| Data Length         | 3 positions, value = 001–992     |
| Data Field          | Variable length, 1–992 positions |
| Subfields           | None                             |
| Justification       | Left                             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                         | Org | Sys | Dst |
|-------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Generic Detail)/1644 | M   | .   | M   |

PDS 0663 supports data related to new programs and services the corporation introduces that involve corporate cards and require the presence of data not available in the First Presentment/

1240 message. This PDS can also be used to exchange data for transactions involving consumer cards.

Acquirers of Brazil intracountry transactions must ensure that required installment payment data is provided in PDS 0663 of Financial Detail Addendum/1644 messages for installment transactions. For more information, refer to the *Interchange Manual: Latin America and the Caribbean Region*.

### Values

If present, PDS 0663 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0664 (Start Station)

PDS 0664 (Start Station) contains name of the railway start station.

This PDS is needed only when PDS 0652 (Service Type) contains a value that indicates ticket or reservation.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...30; TAGLLLLVAR            |
| Tag Field           | 0664                            |
| Data Length         | 3 positions, value = 003–030    |
| Data Field          | Variable length, 3–30 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a railway MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD   | Description                           |
|-------|---------------------------------------|
| 10    | Merit III Tier 1                      |

| 3O    | Business Level 3 T&E Rate III         |
| 4O    | Business Level 4 T&E Rate III         |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0664 (Start Station) and cannot contain null values.

### Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0665 (Destination Station)

PDS 0665 (Destination Station) contains the name of the railway destination station.

This PDS is needed only when PDS 0652 (Service Type) contains a value that indicates ticket or reservation.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...30; TAGLLLLVAR            |

When an occurrence of the Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0665 (Destination Station) and cannot contain null values.

### Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0667 (Generic Data)

PDS 0667 (Generic Data) contains four subfields regarding general information about the rail service.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-46; TAGLLL             |
| Tag Field           | 0667                       |
| Data Length         | 3 positions, value = 046   |
| Data Field          | Fixed length, 46 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |

| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## PDS 0667 subfields

This PDS consists of four subfields.

### PDS 0667 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1-3       | Generic Code         | n-3       | right         |
| 2      | 4-23      | Generic Number       | ans-20    | left          |
| 3      | 24-26     | Generic Other Code   | n-3       | right         |
| 4      | 27-46     | Generic Other Number | ans-20    | left          |

### Subfield 1 (Generic Code)

If PDS 0667 is present, subfield 1 must be numeric and greater than zero.

### Subfield 2 (Generic Number)

If PDS 0667 is present, subfield 2 must be left-justified and cannot be all zeros, all spaces, all low values, or all high values.

### Subfield 3 (Generic Other Code)

If PDS 0667 is present, subfield 3 must be numeric and greater than zero.

### Subfield 4 (Generic Other Number)

If PDS 0667 is present, subfield 4 must be left-justified and cannot be all zeros, all spaces, all low values, or all high values.

## PDS 0668 (Reduction Data)

PDS 0668 (Reduction Data) contains four subfields that contain information about the rail service.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-26; TAGLLL |

| Attribute     | Description                |
|---------------|----------------------------|
| Tag Field     | 0668                       |
| Data Length   | 3 positions, value = 026   |
| Data Field    | Fixed length, 26 positions |
| Subfields     | 4                          |
| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## PDS 0668 subfields

This PDS consists of four subfields.

## PDS 0668 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-3       | Reduction Code         | n-3       | right         |
| 2      | 4-13      | Reduction Number       | ans-10    | left          |
| 3      | 14-16     | Reduction Other Code   | n-3       | right         |
| 4      | 17-26     | Reduction Other Number | ans-10    | left          |

## Subfield 1 (Reduction Code)

If PDS 0668 is present, subfield 1 must be numeric and greater than zero.

### Subfield 2 (Reduction Number)

If PDS 0668 is present, subfield 2 must be left-justified and cannot be all zeros, all spaces, all low values, or all high values.

### Subfield 3 (Reduction Other Code)

If PDS 0668 is present, subfield 3 must be numeric and greater than zero.

### Subfield 4 (Reduction Other Number)

If PDS 0668 is present, subfield 4 must be left-justified and cannot be all zeros, all spaces, all low values, or all high values.

## PDS 0669 (Transportation Other Code)

PDS 0669 (Transportation Other Code) contains a code of the service provider.

This PDS is provided only when PDS 0652 (Service Nature) contains a value that indicates Domestic ticket, Ne/See ticket, or Foreign ticket.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-3; TAGLLL               |
| Tag Field           | 0669                      |
| Data Length         | 3 positions, value = 003  |
| Data Field          | Fixed length, 3 positions |
| Subfields           | None                      |
| Justification       | N/A                       |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric.

## PDS 0670 (Payer/User Information)

PDS 0670 (Payer/User Information) provides the full name and address information of the payer associated with a payment transaction.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...104; TAGLLLVAR             |
| Tag Field           | 0670                             |
| Data Length         | 3 positions, value = 001–104     |
| Data Field          | Variable length, 1–104 positions |
| Subfields           | 7                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Payment Transaction Detail)/1644 | C   | .   | C   |

PDS 0670 must be present in a Financial Detail Addendum (Payment Transaction Detail)/1644 message when Payment Transactions (identified by DE 3 [Processing Code], subfield 1 [Cardholder Transaction Type] value of 28) contains PDS 0043 (Transaction Type Identifier) with a value of C04, C06, C07, C52, C53, C54, C55, C56, C57, C58, C59, and C65.

### Values

If present, each PDS 0670 subfield must be left-justified and cannot contain all low values or all high values. Subfields 1, 2, 3, 5, and 6 cannot contain all spaces or all zeros. Subfield 7 is an optional field.

PDS 0670, subfields 1, 2, 3, 4, and 5 must be present when DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type) contains value 28 and PDS 0043 (Transaction Type Identifier) contains value C04, C07, C52, C53, C54, C55, C56, C57, C58, C59, and C65.

## PDS 0670 subfields

This PDS consists of seven subfields.

### PDS 0670 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1–25      | Payer Name/User ID        | ans-25    | left          |
| 2      | 26–55     | Payer Address             | ans-30    | left          |
| 3      | 56–80     | Payer City                | ans-25    | left          |
| 4      | 81–83     | Payer State/Province Code | ans-3     | left          |
| 5      | 84–86     | Payer Country Code        | ans-3     | left          |
| 6      | 87–96     | Payer Postal Code         | ans-10    | left          |
| 7      | 97–104    | Payer Date of Birth       | ans-8     | left          |

### Subfield 1 (Payer Name/User ID)

Subfield 1 (Payer Name/User ID) contains the payer's full name or user ID.

This subfield must be provided in Payment Transactions (identified by DE 3 [Processing Code], subfield 1 [Cardholder Transaction Type], value 28) when the Payment Transaction contains PDS 0043 (Transaction Type Identifier) with a value of C06 (Payment of a credit card balance via cash or check).

### Subfield 2 (Payer Address)

Subfield 2 (Payer Address) contains the payer's street address.

### Subfield 3 (Payer City)

Subfield 3 (Payer City) contains the payer's city.

### Subfield 4 (Payer State/Province Code)

Subfield 4 (Payer State/Province Code) contains the payer's State/Province Code. If subfield 5 (Payer Country Code) is USA, subfield 4 must contain a valid U.S. state code. Otherwise, this subfield may contain all spaces.

### Subfield 5 (Payer Country Code)

Subfield 5 (Payer Country Code) must contain a valid three-character alphabetic code as defined in Chapter 2 of the *Quick Reference Booklet*. When territories have a defined country code in the *Quick Reference Booklet*, that country code must be used.

### Subfield 6 (Payer Postal Code)

Subfield 6 (Payer Postal Code) contains the payer's Postal (ZIP) Code.

### Subfield 7 (Payer Date of Birth)

Subfield 7 (Payer Date of Birth) contains the payer's date of birth, MMDDYYYY.

## PDS 0671 (Date of Funds Requested)

PDS 0671 (Date of Funds Requested) provides the date the recipient (seller of goods) requested receipt of funds.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0671                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |

| Attribute     | Description |
|---------------|-------------|
| Subfields     | None        |
| Justification | N/A         |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Payment Transaction Detail)/1644 | C   | .   | C   |

PDS 0671 must be present in a Financial Detail Addendum (Payment Transaction Detail)/1644 message when Payment Transactions (identified by DE 3 [Processing Code], subfield 1 [Cardholder Transaction Type] value of 28) contains PDS 0043 (Transaction Type Identifier) with a value of C07, C52, C53, C54, C55, C56, C57, C58, C59, or C65.

### NOTE:

**For a Mastercard® MoneySend™ payment transaction, this is the date the sender requested the payment or transfer of funds to the recipient.**

### Values

If present, PDS 0671 must contain a valid date in the format YYMMDD.

## PDS 0673 (Date of Anticipated Receipt of Funds)

PDS 0673 (Date of Anticipated Receipt of Funds) provides the date of the anticipated receipt of funds by the recipient (seller).

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | n-6; TAGLLL              |
| Tag Field           | 0673                     |
| Data Length         | 3 positions, value = 006 |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Field    | Fixed length, 6 positions |
| Subfields     | None                      |
| Justification | N/A                       |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Payment Transaction Detail)/<br>1644 | O   | .   | C   |

## Values

If present, PDS 0673 must contain a valid date in the format YYMMDD.

## PDS 0674 (Additional Trace/Reference Number Used by Acceptor)

PDS 0674 (Additional Trace/Reference Number Used by Acceptor) provides additional trace or reference number information, or both, supplied by the acceptor (merchant).

## Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...19; TAGLLLLVAR            |
| Tag Field           | 0674                            |
| Data Length         | 3 positions, value = 001-019    |
| Data Field          | Variable length, 1-19 positions |
| Subfields           | None                            |
| Justification       | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                               | Org | Sys | Dst |
|-------------------------------------------------------|-----|-----|-----|
| First Presentment/1240                                | C   | .   | C   |
| First Chargeback/1442 and Arbitration Chargeback/1442 | O   | .   | C   |
| Second Presentment/1240                               | O   | .   | C   |

**NOTE: For a Mastercard MoneySend payment transaction and a Mastercard Merchant Presented (MPQR) funding transaction, the acceptor is the originating institution.**

### Merchant Presented QR (MPQR) transaction requirements

Payment transaction usage:

- First Presentment/1240 (Optional). If present, edit must validate. Forward message to destination if edit validates.
- Second Presentment/1240 (Optional). If present, edit must validate. Forward message to destination if edit validates.
- First Chargeback/1442 and Arbitration Chargeback/1442 (Optional). If present, edit must validate. Forward message to destination if edit validates.

Refund transaction usage:

- First Presentment/1240 (Optional). If present, edit must validate. Forward message to destination if edit validates.
- Second Presentment/1240 (Optional). If present, edit must validate. Forward message to destination if edit validates.
- First Chargeback/1442 and Arbitration Chargeback/1442 (Optional). If present, edit must validate. Forward message to destination if edit validates.

Funding transaction usage:

- First Presentment/1240 (Mandatory). Edit must validate. Forward message to destination.
- Second Presentment/1240 (Optional). If present, edit must validate. Forward message to destination if edit validates.
- First Chargeback/1442 and Arbitration Chargeback/1442 (Optional). If present, edit must validate. Forward message to destination if edit validates.

## PDS 0675 (Additional Transaction Description Data)

PDS 0675 (Additional Transaction Description Data) provides additional data that the acceptor might want to provide.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...15; TAGLLLLVAR            |
| Tag Fie             | 0675                            |
| Data Length         | 3 positions, value = 001-015    |
| Data Field          | Variable length, 1-15 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Payment Transaction Detail)/<br>1644 | O   | .   | C   |

### Values

If present, PDS 0675 must be left-justified and cannot contain all spaces.

## PDS 0676 (Acceptor VAT Number)

PDS 0676 (Acceptor VAT Number) provides the value-added tax (VAT) number for the acceptor location used to identify the acceptor when collecting and reporting taxes.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...20; TAGLLLLVAR            |
| Tag Field           | 0676                            |
| Data Length         | 3 positions, value = 001–020    |
| Data Field          | Variable length, 1–20 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

### Values

If present, PDS 0676 must be left-justified and cannot contain all spaces.

## PDS 0677 (Customer VAT Number)

PDS 0677 (Customer VAT Number) provides the value-added tax (VAT) number for the customer used to identify the customer when purchasing goods and services from an acceptor.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...20; TAGLLLLVAR            |
| Tag Field           | 0677                            |
| Data Length         | 3 positions, value = 001–020    |
| Data Field          | Variable length, 1–20 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

### Values

If present, PDS 0677 must be left-justified and cannot contain all spaces.

## PDS 0678 (Unique Invoice Number)

PDS 0678 (Unique Invoice Number) provides the unique number associated with the individual transaction provided by the acceptor.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...17; TAGLLLLVAR            |
| Tag Field           | 0678                            |
| Data Length         | 3 positions, value = 001-017    |
| Data Field          | Variable length, 1-17 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | C   | .   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644               | O   | .   | C   |

This PDS is required in Financial Detail Addendum (Corporate Common Card Data) messages for transactions submitted for the interchange rate programs listed in this table with Brand Product MEF.

### IRDs and descriptions

| IRD | Description             |
|-----|-------------------------|
| 67  | Commercial Data Rate II |

| IRD | Description                |
|-----|----------------------------|
| 82  | Electronic Payment Account |

### Values

If present, PDS 0678 must be left-justified and cannot contain all spaces.

## PDS 0679 (Commodity Code)

PDS 0679 (Commodity Code) provides the identifier assigned by the acceptor that best categorizes the items being purchased in a standardized commodity group.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...15; TAGLLLLVAR            |
| Tag Field           | 0679                            |
| Data Length         | 3 positions, value = 001–015    |
| Data Field          | Variable length, 1–15 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| 3                                                 | 050021                                     | Europe Intercountry  |
| 3                                                 | 050031                                     | Europe Intercountry  |

**NOTE: This applies to additional European domestic arrangements.**

The IRD submitted in the associated First Presentment/1240 is one of the values in this table.

#### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| 26  | Purchasing Large Ticket Level 1 Interchange |
| 27  | Purchasing Large Ticket Level 2 Interchange |

### IRDs and descriptions

| IRD | Description                                                                                                                                                                                                                                                                                                                                                                 |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate IPDS 0682 (including all subfields) must be present in a Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 message, except when PDS 0686 (Tax Exempt Indicator) is present, for transactions with the associated First Presentment/1240 submitted for one of the interchange programs listed in this table. |
| BR  | PDS 0682 (including all subfields) must be present in a Financial Canada Intracountry Commercial Data Rate II                                                                                                                                                                                                                                                               |
| BS  | Canada Intracountry Commercial Large Ticket                                                                                                                                                                                                                                                                                                                                 |

### PDS 0682 subfields

This PDS consists of eight subfields.

#### PDS 0682 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 1 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 1           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 1             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 1    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 1     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 1  | ans-2     | left          |
| 7      | 26–45     | Acceptor Tax ID 1             | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 1      | a-1       | N/A           |

#### Subfield 1 (Detail Tax Amount Indicator 1)

Subfield 1 (Detail Tax Amount Indicator 1) is the indicator used to reflect additional tax capture and reporting. It must be one of the values in this table.

### Values and descriptions

| Value  | Description                               |
|--------|-------------------------------------------|
| Y      | Tax included in total purchase amount     |
| N      | Tax not included in total purchase amount |
| spaces | Not supported                             |

### Subfield 2 (Detail Tax Amount 1)

Subfield 2 (Detail Tax Amount 1) indicates the detailed tax amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 1)

Subfield 3 (Detail Tax Rate 1) indicates the detailed tax rate applied in relationship to a specific tax amount. This subfield must be numeric. This subfield must not contain all zeros for transactions qualifying for the United Kingdom Intracountry Summary VAT Incentive.

### Subfield 4 (Detail Tax Rate Exponent 1)

Subfield 4 (Detail Tax Rate Exponent 1) indicates the decimal location for the Detail Tax Rate 1 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider the example in this table.

### Subfield 4 example

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

## Subfield 5 (Detail Tax Type Applied 1)

Subfield 5 (Detail Tax Type Applied 1) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

This subfield may contain all spaces for transactions submitted for Canada intracountry IRDs BQ, BR, and BS.

## Subfield 6 (Detail Tax Type Identifier 1)

Subfield 6 (Detail Tax Type Identifier 1) indicates the type of tax collected in relationship to a specific tax amount. It must be one of the values listed in this table.

### Values and descriptions

| Value | Description                  |
|-------|------------------------------|
| 00    | Unknown                      |
| 01    | Federal/National Sales Tax   |
| 02    | State Sales Tax              |
| 03    | City Sales Tax               |
| 04    | Local Sales Tax              |
| 05    | Municipal Sales Tax          |
| 06    | Other Tax                    |
| 10    | Value Added Tax (VAT)        |
| 11    | Goods and Services Tax (GST) |
| 12    | Provincial Sales Tax (PST)   |
| 13    | Harmonized Sales Tax (HST)   |
| 14    | Quebec Sales Tax (QST)       |
| 20    | Room Tax                     |
| 21    | Occupancy Tax                |
| 22    | Energy Tax                   |
| space | Not supported                |

## Subfield 7 (Acceptor Tax ID 1)

Subfield 7 (Acceptor Tax ID 1) provides an identification number used by the acceptor with the tax authority in relationship to a specific tax amount.

If present, this subfield must be 20 positions, left-justified, and must not contain all low values, all high values, or all spaces. In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

This subfield cannot contain all zeros for transactions submitted for Canada intracountry IRDs BQ, BR, and BS.

## Subfield 8 (Detail Tax Amount Sign 1)

If PDS 0682 is present, subfield 8 (Detail Tax Amount Sign 1) must contain a value of D or C. This subfield identifies whether PDS 0682 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| D     | Detail tax amount is a debit.  |
| C     | Detail tax amount is a credit. |

## PDS 0683 (Detail Tax Amount 2)

PDS 0683 (Detail Tax Amount 2) provides additional tax information such as tax rate, tax amounts, and tax type.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...46; TAGLLLVAR             |
| Tag Field           | 0683                            |
| Data Length         | 3 positions, value = 001-046    |
| Data Field          | Variable length, 1-46 positions |
| Subfields           | 8                               |

| Attribute     | Description     |
|---------------|-----------------|
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                                 | Org | Sys | Dst |

| Financial Detail Addendum (Private Label Line Item Detail)/1644                         | O   | .   | C   |

When a second Canada provincial tax is applicable, PDS 0683 (including all subfields) must be present in a Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 message, except when PDS 0686 (Tax Exempt Indicator) is present, for transactions with the

associated First Presentment/1240 submitted for one the interchange programs listed in this table.

### IRDs and descriptions

| IRD | Description                                 |
|-----|---------------------------------------------|
| BQ  | Canada Intracountry Commercial Data Rate I  |
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

## PDS 0683 subfields

PDS 0683 consists of eight subfields.

### PDS 0683 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 2 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 2           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 2             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 2    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 2     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 2  | ans-2     | left          |
| 7      | 26–45     | Acceptor Tax ID 2             | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 2      | a-1       | N/A           |

### Subfield 1 (Detail Tax Amount Indicator 2)

Subfield 1 (Detail Tax Amount Indicator 2) is the indicator used to reflect additional tax capture and reporting. This subfield must be one of the values listed in this table.

### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| Y     | Tax included in total purchase amount     |
| N     | Tax not included in total purchase amount |
| space | Not supported                             |

### Subfield 2 (Detail Tax Amount 2)

Subfield 2 (Detail Tax Amount 2) indicates the detailed tax amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 2)

Subfield 3 (Detail Tax Rate 2) indicates the tax rate applied in relationship to a specific tax amount. This subfield must be numeric and may contain all zeros.

### Subfield 4 (Detail Tax Rate Exponent 2)

Subfield 4 (Detail Tax Rate Exponent 2) indicates the decimal location for the Detail Tax Rate 2 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider this example.

### Subfields and interpretations

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

## Subfield 5 (Detail Tax Type Applied 2)

Subfield 5 (Detail Tax Type Applied 2) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

This subfield may contain all spaces for transactions submitted for Canada intracountry IRDs BQ, BR, and BS.

## Subfield 6 (Detail Tax Type Identifier 2)

Subfield 6 (Detail Tax Type Identifier 2) indicates the type of tax collected in relationship to a specific tax amount. It must be one of the values listed in this table.

### Values and descriptions

| Value | Description                  |
|-------|------------------------------|
| 00    | Unknown                      |
| 01    | Federal/National Sales Tax   |
| 02    | State Sales Tax              |
| 03    | City Sales Tax               |
| 04    | Local Sales Tax              |
| 05    | Municipal Sales Tax          |
| 06    | Other Tax                    |
| 10    | Value Added Tax (VAT)        |
| 11    | Goods and Services Tax (GST) |
| 12    | Provincial Sales Tax (PST)   |
| 13    | Harmonized Sales Tax (HST)   |
| 14    | Quebec Sales Tax (QST)       |
| 20    | Room Tax                     |
| 21    | Occupancy Tax                |
| 22    | Energy Tax                   |
| space | Not supported                |

## Subfield 7 (Acceptor Tax ID 2)

Subfield 7 (Acceptor Tax ID 2) provides an identification number used by the acceptor with the tax authority in relationship to a specific tax amount.

If present, subfield 7 must be 20 positions, left-justified, and it cannot contain all low values, all high values, or all spaces.

This subfield cannot contain all zeros for transactions submitted for Canada intracountry IRDs BQ, BR, and BS.

In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

## Subfield 8 (Detail Tax Amount Sign 2)

If PDS 0683 is present, subfield 8 (Detail Tax Amount Sign 2) must contain a value of D or C. This subfield identifies whether PDS 0683 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                         |
|-------|-------------------------------------|
| D     | Detail tax amount sign is a debit.  |
| C     | Detail tax amount sign is a credit. |

## PDS 0684 (Detail Tax Amount 3)

PDS 0684 (Detail Tax Amount 3) provides additional tax information such as tax rate, tax amounts, and tax type.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...46; TAGLLLVAR             |
| Tag Field           | 0684                            |
| Data Length         | 3 positions, value = 001–046    |
| Data Field          | Variable length, 1–46 positions |
| Subfields           | 8                               |

| Attribute     | Description     |
|---------------|-----------------|
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                                 | Org | Sys | Dst |

## PDS 0684 subfields

This PDS consists of eight subfields.

### PDS 0684 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 3 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 3           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 3             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 3    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 3     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 3  | ans-2     | left          |
| 7      | 26–45     | Acceptor Tax ID 3             | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 3      | a-1       | N/A           |

### Subfield 1 (Detail Tax Amount Indicator 3)

Subfield 1 (Detail Tax Amount Indicator 3) is the indicator used to reflect additional tax capture and reporting. It must be one of the values listed in this table.

### Values and descriptions

| Value  | Description                               |
|--------|-------------------------------------------|
| Y      | Tax included in total purchase amount     |
| N      | Tax not included in total purchase amount |
| spaces | Not supported                             |

### Subfield 2 (Detail Tax Amount 3)

Subfield 2 (Detail Tax Amount 3) indicates the tax amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 3)

Subfield 3 (Detail Tax Rate 3) indicates the tax rate applied in relationship to a specific tax amount. This subfield must be numeric and may contain all zeros.

### Subfield 4 (Detail Tax Rate Exponent 3)

Subfield 4 (Detail Tax Rate Exponent 3) indicates the decimal location for the Detail Tax Rate 3 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider this example.

#### Subfields and Interpretations

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

### Subfield 5 (Detail Tax Type Applied 3)

Subfield 5 (Detail Tax Type Applied 3) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

### Subfield 6 (Detail Tax Type Identifier 3)

Subfield 6 (Detail Tax Type Identifier 3) indicates the type of tax collected in relationship to a specific tax amount. It must be one of the values listed in this table.

#### Values and descriptions

| Value | Description                |
|-------|----------------------------|
| 00    | Unknown                    |
| 01    | Federal/National Sales Tax |

| Value | Description                  |
|-------|------------------------------|
| 02    | State Sales Tax              |
| 03    | City Sales Tax               |
| 04    | Local Sales Tax              |
| 05    | Municipal Sales Tax          |
| 06    | Other Tax                    |
| 10    | Value Added Tax (VAT)        |
| 11    | Goods and Services Tax (GST) |
| 12    | Provincial Sales Tax (PST)   |
| 13    | Harmonized Sales Tax (HST)   |
| 14    | Quebec Sales Tax (QST)       |
| 20    | Room Tax                     |
| 21    | Occupancy Tax                |
| 22    | Energy Tax                   |
| space | Not supported                |

### Subfield 7 (Acceptor Tax ID 3)

Subfield 7 (Acceptor Tax ID 3) provides an identification number used by the acceptor with the tax authority in relationship to a specific tax amount.

If present, subfield 7 must be 20 positions, left-justified, and it cannot contain all low values, all high values, or all spaces.

In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

### Subfield 8 (Detail Tax Amount Sign 3)

If PDS 0684 is present, subfield 8 (Detail Tax Amount Sign 3) must contain a value of D or C. This subfield identifies whether PDS 0684 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                          |
|-------|--------------------------------------|
| D     | Detail tax amount sign 3 is a debit. |

| Value | Description                           |
|-------|---------------------------------------|
| C     | Detail tax amount sign 3 is a credit. |

## PDS 0685 (Type of Supply)

PDS 0685 (Type of Supply) provides the indicator noting whether the purchase is categorized as goods or services.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | an-2; TAGLLL              |
| Tag Field           | 0685                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

If present, this PDS must be one of the values listed in this table.

### Values

| Value | Description |
|-------|-------------|
| 00    | Goods       |

| Value | Description |
|-------|-------------|
| 01    | Services    |

## PDS 0686 (Tax Exempt Indicator)

PDS 0686 (Tax Exempt Indicator) provides the indicator noting whether the goods or services were tax-exempt or tax was not collected.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | an-1; TAGLLL             |
| Tag Field           | 0686                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | None                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |
| Financial Detail Addendum (Vehicle Rental Detail)/1644                                  | C   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644                                        | O   | .   | C   |
| Financial Detail Addendum (Temporary Services)/1644                                     | O   | .   | C   |
| Financial Detail Addendum (Shipping/Courier Services)/1644                              | O   | .   | C   |
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644                | O   | .   | C   |

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | O   | .   | C   |
| Financial Detail Addendum (Corporate Line Item Detail)/1644              | O   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

If present, this PDS must be one of the values listed in this table.

### Values

| Value | Description      |
|-------|------------------|
| 0     | No Tax Collected |
| 1     | Tax Exempt       |

## PDS 0687 (Unique VAT Invoice Reference Number)

PDS 0687 (Unique VAT Invoice Reference Number) provides an additional subelement that is used to identify the value-added tax (VAT) invoice or tax receipt.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...17; TAGLLLLVAR            |
| Tag Field           | 0687                            |
| Data Length         | 3 positions, value = 001-017    |
| Data Field          | Variable length, 1-17 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all spaces.

## PDS 0688 (Acceptor Contact E-mail Address)

PDS 0688 (Acceptor Contact E-mail Address) provides the acceptor's official headquarters e-mail address contact information for electronic correspondence with the acceptor.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...60; TAGLLLVAR             |
| Tag Field           | 0688                            |
| Data Length         | 3 positions, value = 006-060    |
| Data Field          | Variable length, 6-60 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages:

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | .   | C   |

## Values

If present, PDS 0688 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros. It must be a length of 006–060.

## PDS 0689 (Corporate Identifier)

PDS 0689 (Corporate Identifier) provides the unique identifier of the corporation or entity renting the vehicle.

## Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...12; TAGLLLVAR             |
| Tag Field           | 0689                            |
| Data Length         | 3 positions, value = 001–012    |
| Data Field          | Variable length, 1–12 positions |
| Subfields           | None                            |
| Justification       | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## PDS 0690 (No Show Indicator)

PDS 0690 (No Show Indicator) provides an indicator noting that the individual did not show up after making a reservation for a vehicle or lodging.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | an-1; TAGLLL             |
| Tag Field           | 0690                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | None                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644       | O   | .   | C   |

If present, this PDS must contain one of the values listed in this table.

### Values

| Value | Description                    |
|-------|--------------------------------|
| 0     | Not applicable                 |
| 1     | No-Show transaction amount due |

## PDS 0691 (Days Rented)

PDS 0691 (Days Rented) provides the number of days that the vehicle was rented.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | n-4; TAGLLL              |
| Tag Field           | 0691                     |
| Data Length         | 3 positions, value = 004 |
| Data Field          | Fixed length, 4 position |
| Subfields           | None                     |
| Justification       | Right                    |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a vehicle rental acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

When an occurrence of the Financial Detail Addendum (Vehicle Rental Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0691 (Days Rented) and cannot contain null values.

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0692 (Weekly Rental Amount)

PDS 0692 (Weekly Rental Amount) provides the amount charged for a seven-day rental period.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0692                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0693 (Total Authorized Amount)

PDS 0693 (Total Authorized Amount) provides the amount reserved on a credit card to cover the anticipated charges associated with the rental of a vehicle or lodging stay.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |
| Tag Field           | 0693           |

| Attribute     | Description                |
|---------------|----------------------------|
| Data Length   | 3 positions, value = 014   |
| Data Field    | Fixed length, 14 positions |
| Subfields     | 3                          |
| Justification | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |
| Financial Detail Addendum (Lodging Summary)/1644       | O   | .   | C   |

## Values

If present, PDS 0693 must be a fixed length of 014.

## PDS 0693 subfields

This PDS consists of three subfields.

## PDS 0693 subfields

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 1      | 1-12      | Total Authorized Amount          | n-12      | right         |
| 2      | 13        | Total Authorized Amount Exponent | n-1       | N/A           |
| 3      | 14        | Total Authorized Amount Sign     | a-1       | N/A           |

## Subfield 1 (Total Authorized Amount)

If PDS 0693 is present, subfield 1 (Total Authorized Amount) must be numeric and contain the total authorized amount reserved on the card. It may contain all zeros.

## Subfield 2 (Total Authorized Amount Exponent)

If PDS 0693 is present, subfield 2 (Total Authorized Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Total Authorized Amount Sign)

If PDS 0693 is present, subfield 3 (Total Authorized Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0693 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| D     | Total authorized amount is a debit.       |
| C     | Total authorized amount sign is a credit. |

## PDS 0694 (One Way Drop Off Charge)

PDS 0694 (One Way Drop Off Charge) provides a charge associated with not returning a vehicle to the original rental location.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0694                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0695 (Regular Mileage Charge)

PDS 0695 (Regular Mileage Charge) provides the amount charged for regular miles traveled during vehicle rental.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0695                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0696 (Extra Mileage Charge)

PDS 0696 (Extra Mileage Charge) provides the amount charged for miles exceeding maximum allowed miles traveled during vehicle rental.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0696                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0697 (Late Charge)

PDS 0697 (Late Charge) provides the amount charged for returning a vehicle after its anticipated date of return.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0697                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0698 (Fuel Charge)

PDS 0698 (Fuel Charge) provides the amount charged for fuel used during vehicle rental.

### Attributes

| Attribute           | Description  |
|---------------------|--------------|
| Data Representation | n-12; TAGLLL |
| Tag Field           | 0698         |

| Attribute     | Description                |
|---------------|----------------------------|
| Data Length   | 3 positions, value = 012   |
| Data Field    | Fixed length, 12 positions |
| Subfields     | None                       |
| Justification | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0699 (Lodging Total Tax Amount)

PDS 0699 (Lodging Total Tax Amount) provides the total taxes paid during a lodging stay.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0699                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

If present, PDS 0699 must be a fixed length of 014.

## PDS 0699 subfields

This PDS consists of three subfields.

### PDS 0699 subfields

| Number | Positions | Name                              | Attribute | Justification |
|--------|-----------|-----------------------------------|-----------|---------------|
| 1      | 1-12      | Lodging Total Tax Amount          | n-12      | right         |
| 2      | 13        | Lodging Total Tax Amount Exponent | n-1       | N/A           |
| 3      | 14        | Lodging Total Tax Amount Sign     | a-1       | N/A           |

### Subfield 1 (Lodging Total Tax Amount)

If PDS 0699 is present, subfield 1 (Lodging Total Tax Amount) must be numeric and contain the total amount of taxes related to the lodging stay. It may contain all zeros.

### Subfield 2 (Lodging Total Tax Amount Exponent)

If PDS 0699 is present, subfield 2 (Lodging Total Tax Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Lodging Total Tax Amount Sign)

If PDS 0699 is present, subfield 3 (Lodging Total Tax Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0699 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                           |
|-------|---------------------------------------|
| D     | Lodging total tax amount is a debit.  |
| C     | Lodging total tax amount is a credit. |

### PDS 0700 (Towing Charges)

PDS 0700 (Towing Charges) provides the amount charged to tow the rental vehicle.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0700                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

#### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0701 (Extra Charges)

PDS 0701 (Extra Charges) provides the extra charges associated with the vehicle rental.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0701                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

## Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0702 (Other Charges)

PDS 0702 (Other Charges) provides the other charges associated with the vehicle rental.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0702                       |
| Data Length         | 3 positions, value = 012   |
| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Vehicle Rental Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0703 (Total Room Nights)

PDS 0703 (Total Room Nights) provides the total number of nights for which a room was contracted during a lodging stay.

### Attributes

| Attribute           | Description |
|---------------------|-------------|
| Data Representation | n-4; TAGLLL |
| Tag Field           | 0703        |

| Attribute     | Description               |
|---------------|---------------------------|
| Data Length   | 3 positions, value = 004  |
| Data Field    | Fixed length, 4 positions |
| Subfields     | None                      |
| Justification | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

When an occurrence of the Financial Detail Addendum (Lodging Summary)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0703 (Total Room Nights) and cannot contain null values.

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0704 (Prepaid Expenses)

PDS 0704 (Prepaid Expenses) provides the amount of deposit or other prepaid amounts for the lodging stay.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0704                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |

| Attribute     | Description     |
|---------------|-----------------|
| Subfields     | 3               |
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

If present, PDS 0704 must be a fixed length of 014.

## PDS 0704 subfields

This PDS consists of three subfields.

### PDS 0704 subfields

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 1      | 1–12      | Prepaid Expenses Amount          | n-12      | right         |
| 2      | 13        | Prepaid Expenses Amount Exponent | n-1       | N/A           |
| 3      | 14        | Prepaid Expenses Amount Sign     | a-1       | N/A           |

### Subfield 1 (Prepaid Expenses Amount)

If PDS 0704 is present, subfield 1 (Prepaid Expenses Amount) must be numeric and contain the total amount of the deposit or other prepaid expenses. It may contain all zeros.

## Subfield 2 (Prepaid Expenses Amount Exponent)

If PDS 0704 is present, subfield 2 (Prepaid Expenses Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Prepaid Expenses Amount Sign)

If PDS 0704 is present, subfield 3 (Prepaid Expenses Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0704 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                          |
|-------|--------------------------------------|
| D     | Prepaid expenses amount is a debit.  |
| C     | Prepaid expenses amount is a credit. |

## PDS 0705 (Total Non-Room Tax Amount)

PDS 0705 (Total Non-Room Tax Amount) provides the total amount of taxes for all items not specifically associated with the room rental during the lodging stay.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0705                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

## Values

If present, PDS 0705 must be a fixed length of 014.

## PDS 0705 subfields

This PDS consists of three subfields.

### PDS 0705 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1-12      | Total Non-Room Tax Amount          | n-12      | right         |
| 2      | 13        | Total Non-Room Tax Amount Exponent | n-1       | N/A           |
| 3      | 14        | Total Non-Room Tax Amount Sign     | a-1       | N/A           |

### Subfield 1 (Total Non-Room Tax Amount)

If PDS 0705 is present, subfield 1 (Total Non-Room Tax Amount) must be numeric and contain the total charges for total non-room tax. This subfield may contain all zeros.

### Subfield 2 (Total Non-Room Tax Amount Exponent)

If PDS 0705 is present, subfield 2 (Total Non-Room Tax Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Total Non-Room Tax Amount Sign)

If PDS 0705 is present, subfield 3 (Total Non-Room Tax Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0705 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| D     | Total non-room tax amount is a debit.  |
| C     | Total non-room tax amount is a credit. |

## PDS 0706 (Cash Advances)

PDS 0706 (Cash Advances) provides the amount of cash received during the lodging stay.

**NOTE: Mastercard® merchants are prohibited from performing cash advances. For transactions in which the Cardholder Transaction Type (DE 3, subfield 1) is purchase with cash back (value 09), the acquirer must provide the amount of cash back in DE 54.**

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0706                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0706 must be a fixed length of 014.

Mastercard® merchants are prohibited from performing cash advances. For transactions in which the Cardholder Transaction Type (DE 3, subfield 1) is purchase with cash back (value 09), the acquirer must provide the amount of cash back in DE 54. For more information on cash advances, refer to the Mastercard Manual Cash Disbursement Transactions section of the *Transaction Processing Rules* manual.

### PDS 0706 subfields

This PDS consists of three subfields.

#### PDS 0706 subfields

| Number | Positions | Name                  | Attribute | Justification |
|--------|-----------|-----------------------|-----------|---------------|
| 1      | 1–12      | Cash Advance Amount   | n-12      | right         |
| 2      | 13        | Cash Advance Exponent | n-1       | N/A           |
| 3      | 14        | Cash Advance Sign     | a-1       | N/A           |

#### Subfield 1 (Cash Advance Amount)

If PDS 0706 is present, subfield 1 (Cash Advance Amount) must be numeric and contain the total amount of the cash advance. This subfield may contain all zeros.

#### Subfield 2 (Cash Advance Exponent)

If PDS 0706 is present, subfield 2 (Cash Advance Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Cash Advance Sign)

If PDS 0706 is present, subfield 3 (Cash Advance Sign) must contain a value of D or C. This subfield identifies whether PDS 0706 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Cash advance amount is a debit.  |
| C     | Cash advance amount is a credit. |

## PDS 0707 (Valet Charges)

PDS 0707 (Valet Charges) provides the charges associated with the use of valet services.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0707                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | •   | C   |

## Values

If present, PDS 0707 must be a fixed length of 014.

## PDS 0707 subfields

This PDS consists of three subfields.

### PDS 0707 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1-12      | Valet Charges Amount   | n-12      | right         |
| 2      | 13        | Valet Charges Exponent | n-1       | N/A           |
| 3      | 14        | Valet Charges Sign     | a-1       | N/A           |

### Subfield 1 (Valet Charges Amount)

If PDS 0707 is present, subfield 1 (Valet Charges Amount) must be numeric and contain the total amount of the valet charges. This subfield may contain all zeros.

### Subfield 2 (Valet Charges Exponent)

If PDS 0707 is present, subfield 2 (Valet Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Valet Charges Sign)

If PDS 0707 is present, subfield 3 (Valet Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0707 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Valet charges amount is a debit. |

| Value | Description                       |
|-------|-----------------------------------|
| C     | Valet charges amount is a credit. |

## PDS 0708 (Movie Charges)

PDS 0708 (Movie Charges) provides the amount charged for in-room movies.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0708                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Usage

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0708 must be a fixed length of 014.

## PDS 0708 subfields

This PDS consists of three subfields.

### PDS 0708 subfields

| Number | Positions | Name                   | Attribute | Justification |
|--------|-----------|------------------------|-----------|---------------|
| 1      | 1–12      | Movie Charges Amount   | n-12      | right         |
| 2      | 13        | Movie Charges Exponent | n-1       | N/A           |
| 3      | 14        | Movie Charges Sign     | a-1       | N/A           |

### Subfield 1 (Movie Charges Amount)

If PDS 0708 is present, subfield 1 (Movie Charges Amount) must be numeric and contain the total amount of the movie charges. This subfield may contain all zeros.

### Subfield 2 (Movie Charges Exponent)

If PDS 0708 is present, subfield 2 (Movie Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Movie Charges Sign)

If PDS 0708 is present, subfield 3 (Movie Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0708 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                       |
|-------|-----------------------------------|
| D     | Movie charges amount is a debit.  |
| C     | Movie charges amount is a credit. |

## PDS 0709 (Business Center Charges)

PDS 0709 (Business Center Charges) provides the amount charged for business center use and supplies.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0709                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0709 must be a fixed length of 014.

## PDS 0709 subfields

This PDS consists of three subfields.

### PDS 0709 subfields

| Number | Positions | Name                           | Attribute | Justification |
|--------|-----------|--------------------------------|-----------|---------------|
| 1      | 1-12      | Business Center Charges Amount | n-12      | right         |

| Number | Positions | Name                             | Attribute | Justification |
|--------|-----------|----------------------------------|-----------|---------------|
| 2      | 13        | Business Center Charges Exponent | n-1       | N/A           |
| 3      | 14        | Business Center Charges Sign     | a-1       | N/A           |

### Subfield 1 (Business Center Charges Amount)

If PDS 0709 is present, subfield 1 (Business Center Charges Amount) must be numeric and contain the total amount of the business center charges. This subfield may contain all zeros.

### Subfield 2 (Business Center Charges Exponent)

If PDS 0709 is present, subfield 2 (Business Center Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Business Center Charges Sign)

If PDS 0709 is present, subfield 3 (Business Center Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0709 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                                 |
|-------|---------------------------------------------|
| D     | Business center charges amount is a debit.  |
| C     | Business center charges amount is a credit. |

## PDS 0710 (Health Club Charges)

PDS 0710 (Health Club Charges) provides the amount charged for health club use and supplies.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0710                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | O   | .   | C   |

### Values

If present, PDS 0710 must be a fixed length of 014.

## PDS 0710 subfields

This PDS consists of three subfields.

### PDS 0710 subfields

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 1      | 1-12      | Health Club Charges Amount   | n-12      | right         |
| 2      | 13        | Health Club Charges Exponent | n-1       | N/A           |

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 3      | 14        | Health Club Charges Sign | a-1       | N/A           |

### Subfield 1 (Health Club Charges Amount)

If PDS 0710 is present, subfield 1 (Health Club Charges Amount) must be numeric and contain the total amount of the health club charges. This subfield may contain all zeros.

### Subfield 2 (Health Club Charges Exponent)

If PDS 0710 is present, subfield 2 (Health Club Charges Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Health Club Charges Sign)

If PDS 0710 is present, subfield 3 (Health Club Charges Sign) must contain a value of D or C. This subfield identifies whether PDS 0710 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                             |
|-------|-----------------------------------------|
| D     | Health club charges amount is a debit.  |
| C     | Health club charges amount is a credit. |

## PDS 0711 (Fire Safety Act Indicator)

PDS 0711 (Fire Safety Act Indicator) identifies that the facility complies with the Hotel and Motel Fire Safety Act of 1990 (PL101-391) or similar legislation.

### Attributes

| Attribute           | Description  |
|---------------------|--------------|
| Data Representation | an-1; TAGLLL |

| Attribute     | Description              |
|---------------|--------------------------|
| Tag Field     | 0711                     |
| Data Length   | 3 positions, value = 001 |
| Data Field    | Fixed length, 1 position |
| Subfields     | None                     |
| Justification | None                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                          | Org | Sys | Dst |
|--------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodging Summary)/1644 | C   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains a lodging acceptor business code (MCC) and is submitted for the U.S. region Commercial T&E Rate III (IRD 89) incentive interchange rate program.

### Values

If present, this PDS must contain one of the values listed in this table.

### Values and descriptions

| Value | Description                            |
|-------|----------------------------------------|
| Y     | In compliance with Fire Safety Act     |
| N     | Not in compliance with Fire Safety Act |

## PDS 0712 (Net Fuel Price)

PDS 0712 (Net Fuel Price) indicates the price of fuel net of any taxes.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-13; TAGLLL               |
| Tag Field           | 0712                       |
| Data Length         | 3 positions, value = 013   |
| Data Field          | Fixed length, 13 positions |
| Subfields           | 2                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | O   | .   | C   |

## PDS 0712 subfields

This PDS consists of two subfields.

### PDS 0712 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1-12      | Net Fuel Price          | n-12      | right         |
| 2      | 13        | Net Fuel Price Exponent | n-1       | N/A           |

### Subfield 1 (Net Fuel Price)

Subfield 1 (Net Fuel Price) provides the price of fuel net of any taxes. This subfield may contain all zeros.

If PDS 0712 is present, the net fuel price must be numeric.

### Subfield 2 (Net Fuel Price Exponent)

Subfield 2 (Net Fuel Price Exponent) indicates the decimal location for the net fuel price subfield. The net fuel price exponent must be a value in the range of 0 to 5.

## PDS 0713 (Restricted Ticket Indicator)

PDS 0713 (Restricted Ticket Indicator) provides the identifier noting that the ticket purchased has some restriction associated with its use.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | an-1; TAGLLL             |
| Tag Field           | 0713                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | None                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |

If present, this PDS must contain one of the values listed in this table.

### Values and descriptions

| Value | Description                        |
|-------|------------------------------------|
| 0     | No restriction                     |
| 1     | Restricted ticket (non-refundable) |

## PDS 0714 (Exchange Ticket Amount)

PDS 0714 (Exchange Ticket Amount) provides the amount of the new ticket purchase on an exchanged ticket.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-12; TAGLLL               |
| Tag Field           | 0714                       |

| Data Field          | Fixed length, 12 positions |
| Subfields           | None                       |
| Justification       | Right                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |

### Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0715 (Ancillary Service Charges)

PDS 0715 (Ancillary Service Charges) contains the ancillary fee code and fee amount of the non-ticket related service charges applicable in the passenger transport industry.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | an...084; TAGLLLLVAR                             |
| Tag Field           | 0715                                             |
| Data Length         | 3 positions, value = 014-084 in increments of 14 |
| Data Field          | Variable length, 014-084 positions               |
| Subfields           | 2 fixed-length subfields for each occurrence     |
| Occurrences         | 1-6                                              |
| Justification       | See Subfields                                    |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | C   | .   | C   |

PDS 0715 must be present in a Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 message when the ancillary service charge data is provided by the acceptor with an MCC of Airline, Railway, or Travel Agency.

When the ancillary service charge data is present for transactions with an MCC of Airline, Railway, or Travel Agency then the issuer must disclose the description of the ancillary service charges by making it visible in cardholder billing statements, online account tools, mobile apps, or other methods designed to inform cardholders of their purchases.

### Values

If present, PDS 0715 must be a length of 14-84, and divisible by a minimum occurrence length of 14.

## PDS 0715 subfields

This PDS may contain 1 to 6 occurrences of ancillary service charge information.

Each Ancillary Service Charge consists of two subfields as defined in this table. Each occurrence requires 14 positions; the length of this PDS must be a multiple of 14, with a maximum length of 84 positions.

### PDS 0715 subfields

| Number | Positions | Name                 | Attribute | Justification |
|--------|-----------|----------------------|-----------|---------------|
| 1      | 1-2       | Ancillary Fee Code   | a-2       | N/A           |
| 2      | 3-14      | Ancillary Fee Amount | n-12      | Right         |

### Subfield 1 (Ancillary Fee Code)

Subfield 1 (Ancillary Fee Code) contains the ancillary fee code of the non-ticket related service charge. The valid values for subfield 1 are listed in this table.

### Values and descriptions

| Value | Description             |
|-------|-------------------------|
| BF    | Bundled Service         |
| BG    | Baggage Fee             |
| CF    | Change Fee              |
| CG    | Cargo                   |
| CO    | Carbon Offset           |
| FF    | Frequent Flyer          |
| GF    | Gift Card               |
| GT    | Ground Transport        |
| IE    | In-Flight Entertainment |
| LG    | Lounge                  |
| MD    | Medical                 |
| ML    | Meal/Beverage           |
| OT    | Other                   |

| Value | Description          |
|-------|----------------------|
| PA    | Passenger Assist Fee |
| PT    | Pets                 |
| SA    | Seat Fees            |
| SB    | Standby              |
| SF    | Service Fee          |
| ST    | Store                |
| TS    | Travel Service       |
| UN    | Unaccompanied Travel |
| UP    | Upgrades             |
| WI    | Wi-Fi                |

## Subfield 2 (Ancillary Fee Amount)

Subfield 2 (Ancillary Fee Amount) contains the amount associated with the value provided in subfield 1.

If present, subfield 2 must be numeric and contain the same transaction currency information as in DE 49 (Currency Code, Transaction) within the First Presentment/1240 message.

All currency amounts are expressed in the minor unit of currency without a decimal separator, in accordance with ISO standards for currency notation. For example, an ancillary fee amount of USD 212.50 is expressed as 000000021250.

## PDS 0716 (Travel Authorization Code)

PDS 0716 (Travel Authorization Code) indicates the code provided by the company to a travel agent authorizing ticket issuance.

This code is identified as Customer File Reference Number in Airline Reporting Corporation (ARC) specifications.

### Attributes

| Attribute           | Description                  |
|---------------------|------------------------------|
| Data Representation | ans...64; TAGLLLVAR          |
| Tag Field           | 0716                         |
| Data Length         | 3 positions, value = 001-064 |

| Attribute     | Description                     |
|---------------|---------------------------------|
| Data Field    | Variable length, 1–64 positions |
| Subfields     | None                            |
| Justification | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | .   | C   |

## Values

If present, this PDS must be left-justified and cannot contain all spaces.

## PDS 0717 (IATA Client Code)

PDS 0717 (IATA Client Code) provides the International Air Transport Association (IATA) code identifying the company that purchased the ticket.

## Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...17; TAGLLLLVAR            |
| Tag Field           | 0717                            |
| Data Length         | 3 positions, value = 001–017    |
| Data Field          | Variable length, 1–17 positions |
| Subfields           | None                            |
| Justification       | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |
|-----------------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, General Ticket Information)/1644 | O   | •   | C   |

## Values

If present, this PDS must be left-justified and cannot contain all spaces.

## PDS 0718 (Employee/Temp Name/ID)

PDS 0718 (Employee/Temp Name/ID) provides the name or ID associated with the individual working in a temporary capacity.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...40; TAGLLLLVAR            |
| Tag Field           | 0718                            |
| Data Length         | 3 positions, value = 001-040    |
| Data Field          | Variable length, 1-40 positions |
| Subfields           | None                            |
| Justification       | Left                            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

PDS 0718 is required for the Financial Detail Addendum (Temporary Services)/1644 message when both of these conditions apply:

- DE 26 (Acceptor Business Code [MCC]) contains a value of 7361 (Employment Agencies, Temporary Services)
- The associated First Presentment/1240 message is submitted for one of the interchange programs listed in this table.

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                     |
|-----|---------------------------------|
| 62  | Commercial Large Ticket 1       |
| 66  | Commercial Data Rate III        |
| 94  | Commercial Large Ticket II      |
| 99  | Commercial Large Ticket III     |
| SC  | Business Level 2 Data Rate III  |
| SE  | Business Level 2 Large Ticket I |
| 3C  | Business Level 3 Data Rate III  |
| 4C  | Business Level 4 Data Rate III  |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0719 (Employee Social Security Number or ID)

PDS 0719 (Employee Social Security Number or ID) contains the identifier associated with the individual working in a temporary capacity.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...30; TAGLLLLVAR            |

| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0720 (Job Description)

PDS 0720 (Job Description) contains the description of the job or task of the individual working in a temporary capacity.

### Attributes

| Attribute           | Description          |
|---------------------|----------------------|
| Data Representation | ans...40; TAGLLLLVAR |

| Attribute     | Description                     |
|---------------|---------------------------------|
| Tag Field     | 0720                            |
| Data Length   | 3 positions, value = 001–040    |
| Data Field    | Variable length, 1–40 positions |
| Subfields     | None                            |
| Justification | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                    | Org | Sys | Dst |
|------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644        | C   | .   | C   |
| Financial Detail Addendum (Private Label Common Data)/1644 | O   | .   | C   |

PDS 0720 is required for the Financial Detail Addendum (Temporary Services)/1644 message when both of these conditions apply:

- DE 26 (Acceptor Business Code [MCC]) contains a value of 7361 (Employment Agencies, Temporary Services).
- The associated First Presentment/1240 message is submitted for one of the interchange programs listed in this table.

### Canada Region Incentive Interchange Rate Programs

| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0721 (Job Code)

PDS 0721 (Job Code) contains an indicator identifying the job or task of the individual working in a temporary capacity.

### Attributes

| Attribute           | Description         |
|---------------------|---------------------|
| Data Representation | ans...20; TAGLLLVAR |
| Tag Field           | 0721                |

| Attribute     | Description                     |
|---------------|---------------------------------|
| Data Length   | 3 positions, value = 001-020    |
| Data Field    | Variable length, 1-20 positions |
| Subfields     | None                            |
| Justification | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0722 (Flat Rate Indicator)

PDS 0722 (Flat Rate Indicator) contains an indicator noting that the fee for the individual working in a temporary capacity is a flat rate.

### Attributes

| Attribute           | Description              |
|---------------------|--------------------------|
| Data Representation | ans-1; TAGLLL            |
| Tag Field           | 0722                     |
| Data Length         | 3 positions, value = 001 |
| Data Field          | Fixed length, 1 position |
| Subfields           | None                     |
| Justification       | N/A                      |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | O   | .   | C   |

## Values

If present, this PDS shows whether the flat rate is applied. The valid value is Y or N.

## PDS 0723 (Regular Hours Worked)

PDS 0723 (Regular Hours Worked) contains the amount of time worked during a normal operation for the task or job.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-7; TAGLLL               |
| Tag Field           | 0723                      |
| Data Length         | 3 positions, value = 007  |
| Data Field          | Fixed length, 7 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

At least one of these fields is required for the Financial Detail Addendum (Temporary Services)/1644 message when the transaction is submitted for any of the interchange programs listed in this table and the MCC in DE 26 (Acceptor Business Code [MCC]) contains MCC 7361:

Employment Agencies, Temporary Services:

- PDS 0723 (Regular Hours Worked)
- PDS 0725 (Overtime Hours Worked)
- PDS 0734 (Miscellaneous Expenses)

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                       |

| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

### Values

If present, this PDS must be numeric and may contain all zeros.

### PDS 0723 subfields

This PDS consists of two subfields.

#### PDS 0723 subfields

| Number | Positions | Name                          | Attribute | Justification           |
|--------|-----------|-------------------------------|-----------|-------------------------|
| 1      | 1-6       | Regular Hours Worked          | n-6       | right                   |
| 2      | 7         | Regular Hours Worked Exponent | n-1       | right, valid values 0-5 |

### Subfield 1 (Regular Hours Worked)

Subfield 1 (Regular Hours Worked) provides the number of regular hours worked.

### Subfield 2 (Regular Hours Worked Exponent)

Subfield 2 (Regular Hours Worked Exponent) indicates the decimal location for the regular hours worked subfield. The regular hours worked exponent must be a value in the range of 0 to 5.

## PDS 0724 (Regular Hours Rate)

PDS 0724 (Regular Hours Rate) contains the amount paid per regular hours worked.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-7; TAGLLL               |
| Tag Field           | 0724                      |
| Data Length         | 3 positions, value = 007  |
| Data Field          | Fixed length, 7 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

PDS 0724 is mandatory for the Financial Detail Addendum (Temporary Services)/1644 message when all of these conditions apply:

- MCC is 7361: Employment Agencies and Temporary Services is in DE 26 (Acceptor Business Code [MCC]).

- PDS 0723 (Regular Hours Worked) is present.
- The associated First Presentment/1240 message is submitted for any of the interchange programs listed in these tables.

#### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

## Values

If present, this PDS must be numeric and may contain all zeros.

## PDS 0724 subfields

This PDS consists of two subfields.

### PDS 0724 subfields

| Number | Positions | Name                        | Attribute | Justification           |
|--------|-----------|-----------------------------|-----------|-------------------------|
| 1      | 1–6       | Regular Hours Rate          | n-6       | right                   |
| 2      | 7         | Regular Hours Rate Exponent | n-1       | right, valid values 0–5 |

### Subfield 1 (Regular Hours Rate)

Subfield 1 (Regular Hours Rate) provides the rate for the regular hours worked.

### Subfield 2 (Regular Hours Rate Exponent)

Subfield 2 (Regular Hours Rate Exponent) indicates the decimal location for the Regular Hours Rate subfield. The Regular Hours Rate Exponent must be a value in the range of 0 to 5.

## PDS 0725 (Overtime Hours Worked)

PDS 0725 (Overtime Hours Worked) contains the number of hours worked in excess of regular hours.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-7; TAGLLL               |
| Tag Field           | 0725                      |
| Data Length         | 3 positions, value = 007  |
| Data Field          | Fixed length, 7 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |

| 1      | 1-6       | Overtime Hours Worked             | n-6       | right                      |
| 2      | 7         | Overtime Hours Worked<br>Exponent | n-1       | right, valid<br>values 0-5 |

### Subfield 1 (Overtime Hours Worked)

Subfield 1 (Overtime Hours Worked) provides the number of overtime hours worked.

### Subfield 2 (Overtime Hours Worked Exponent)

Subfield 2 (Overtime Hours Worked Exponent) indicates the decimal location for the Overtime Hours Worked subfield. The Overtime Hours Worked Exponent must be a value in the range of 0 to 5.

## PDS 0726 (Overtime Hours Rate)

PDS 0726 (Overtime Hours Rate) contains the amount paid per overtime hour worked.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-7; TAGLLL               |
| Tag Field           | 0726                      |
| Data Length         | 3 positions, value = 007  |
| Data Field          | Fixed length, 7 positions |
| Subfields           | 2                         |
| Justification       | See "Subfields"           |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

This PDS is mandatory for the Financial Detail Addendum (Temporary Services)/1644 message when all of these conditions apply:

- The associated First Presentment/1240 message is submitted for any of the interchange programs listed in these tables.

- MCC is 7361: Employment Agencies and Temporary Services in DE 26 (Acceptor Business Code [MCC]).
- PDS 0725 (Overtime Hours Worked) is present.

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                     |
|-----|---------------------------------|
| 62  | Commercial Large Ticket 1       |
| 66  | Commercial Data Rate III        |
| 94  | Commercial Large Ticket II      |
| 99  | Commercial Large Ticket III     |
| SC  | Business Level 2 Data Rate III  |
| SE  | Business Level 2 Large Ticket I |
| 3C  | Business Level 3 Data Rate III  |
| 4C  | Business Level 4 Data Rate III  |

### Values

If present, this PDS must be numeric and may contain all zeros.

### PDS 0726 subfields

This PDS consists of two subfields.

### PDS 0726 subfields

| Number | Positions | Name                | Attribute | Justification |
|--------|-----------|---------------------|-----------|---------------|
| 1      | 1–6       | Overtime Hours Rate | n-6       | right         |

| Number | Positions | Name                         | Attribute | Justification           |
|--------|-----------|------------------------------|-----------|-------------------------|
| 2      | 7         | Overtime Hours Rate Exponent | n-1       | right, valid values 0–5 |

### Subfield 1 (Overtime Hours Rate)

Subfield 1 (Overtime Hours Rate) provides the rate for the overtime hours worked.

### Subfield 2 (Overtime Hours Rate Exponent)

Subfield 2 (Overtime Hours Rate Exponent) indicates the decimal location for the Overtime Hours Rate subfield. The Overtime Hours Rate Exponent must be a value in the range of 0 to 5.

## PDS 0727 (Temp Start Date)

PDS 0727 (Temp Start Date) contains the date for the beginning of the pay period.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0727                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | Right                     |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

PDS 0727 is required for the Financial Detail Addendum (Temporary Services)/1644 message when both of these conditions apply:

- DE 26 (Acceptor Business Code [MCC]) contains a value of 7361 (Employment Agencies, Temporary Services).
- The associated First Presentment/1240 message is submitted for one of the interchange programs in these tables.

| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

## Values

If present, this PDS must be a valid date in the format YYMMDD.

## PDS 0728 (Temp Week Ending)

PDS 0728 (Temp Week Ending) contains the date of the end of the billing cycle.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0728                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | Right                     |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | C   | .   | C   |

PDS 0728 is required for the Financial Detail Addendum (Temporary Services)/1644 message when both of these conditions apply:

- DE 26 (Acceptor Business Code [MCC]) contains a value of 7361 (Employment Agencies, Temporary Services).
- The associated First Presentment/1240 message is submitted for one of the interchange programs listed in these tables.

| Financial Detail Addendum (Temporary Services)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0732 (Discount Amount)

PDS 0732 (Discount Amount) contains the amount and type of discount.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-18; TAGLLL             |
| Tag Field           | 0732                       |
| Data Length         | 3 positions, value = 018   |
| Data Field          | Fixed length, 18 positions |
| Subfields           | 4                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Card Common Data Requirements)/1644 | O   | •   | C   |
| Financial Detail Addendum (Temporary Services)/1644                      | O   | •   | C   |

### Values

If present, PDS 0732 must be a fixed length of 018.

## PDS 0732 subfields

This PDS consists of four subfields.

### PDS 0732 subfields

| Number | Positions | Name            | Attribute | Justification |
|--------|-----------|-----------------|-----------|---------------|
| 1      | 1-12      | Discount Amount | n-12      | right         |

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 2      | 13        | Discount Amount Exponent | n-1       | N/A           |
| 3      | 14        | Discount Amount Sign     | a-1       | N/A           |
| 4      | 15-18     | Discount Type            | ans-4     | left          |

### Subfield 1 (Discount Amount)

If PDS 0732 is present, subfield 1 (Discount Amount) must be numeric and contain the discount amount. This subfield may contain all zeros.

### Subfield 2 (Discount Amount Exponent)

If PDS 0732 is present, subfield 2 (Discount Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Discount Amount Sign)

If PDS 0732 is present, subfield 3 (Discount Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0732 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                  |
|-------|------------------------------|
| D     | Discount amount is a debit.  |
| C     | Discount amount is a credit. |

### Subfield 4 (Discount Type)

If PDS 0732 is present, subfield 4 (Discount Type) contains the type of discount. If present, it must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0733 (Subtotal Amount)

PDS 0733 (Subtotal Amount) provides a subtotal of amounts associated with the services.

### Attributes

| Attribute           | Description    |
|---------------------|----------------|
| Data Representation | ans-14; TAGLLL |

| Attribute     | Description                |
|---------------|----------------------------|
| Tag Field     | 0733                       |
| Data Length   | 3 positions, value = 014   |
| Data Field    | Fixed length, 14 positions |
| Subfields     | 3                          |
| Justification | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                             | Org | Sys | Dst |
|-----------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644 | O   | .   | C   |

### Values

If present, PDS 0733 must be a fixed length of 014.

### PDS 0733 subfields

This PDS consists of three subfields.

### PDS 0733 subfields

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 1      | 1-12      | Subtotal Amount          | n-12      | right         |
| 2      | 13        | Subtotal Amount Exponent | n-1       | N/A           |
| 3      | 14        | Subtotal Amount Sign     | a-1       | N/A           |

### Subfield 1 (Subtotal Amount)

If PDS 0733 is present, subfield 1 (Subtotal Amount) must be numeric and may contain all zeros.

### Subfield 2 (Subtotal Amount Exponent)

If PDS 0733 is present, subfield 2 (Subtotal Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Subtotal Amount Sign)

If PDS 0733 is present, subfield 3 (Subtotal Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0733 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                  |
|-------|------------------------------|
| D     | Subtotal amount is a debit.  |
| C     | Subtotal amount is a credit. |

## PDS 0734 (Miscellaneous Expenses)

PDS 0734 (Miscellaneous Expenses) provides a description and an amount for miscellaneous expenses.

#### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | ans...216; TAGLLLVAR                             |
| Tag Field           | 0734                                             |
| Length Field        | 3 positions, value = 054–216 in increments of 54 |
| Data Field          | Variable length, 54–216 positions                |
| Subfields           | 4 subfields for each Miscellaneous Expenses      |
| Occurrences         | 1–4                                              |
| Justification       | See "Subfields"                                  |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                    | Org | Sys | Dst |
|------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Temporary Services)/1644        | C   | •   | C   |
| Financial Detail Addendum (Shipping/Courier Services)/1644 | O   | •   | C   |
| Financial Detail Addendum (Telephony Billing, Detail)/1644 | O   | •   | C   |

This PDS enables the sender to provide 1–4 different miscellaneous expenses. For each different miscellaneous expense provided, subfields 1 and 2 must be present. These subfields provide the description and amount of each miscellaneous expense.

At least one of these fields is required for the Financial Detail Addendum (Temporary Services)/1644 message when the transaction is submitted for any of the interchange programs listed in these tables and the MCC in DE 26 (Acceptor Business Code [MCC]) is 7361: Employment Agencies, Temporary Services:

- PDS 0723 (Regular Hours Worked)
- PDS 0725 (Overtime Hours Worked)
- PDS 0734 (Miscellaneous Expenses)

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                |
|-----|----------------------------|
| 62  | Commercial Large Ticket 1  |
| 66  | Commercial Data Rate III   |
| 94  | Commercial Large Ticket II |

| IRD | Description                 |
|-----|-----------------------------|
| 99  | Commercial Large Ticket III |

### Values

If present, PDS 0734 must be within a minimum length of 054–216 and must be divisible by a minimum occurrence length of 054.

### PDS 0734 subfields

This PDS may contain from one to four occurrences of miscellaneous expense data.

Each occurrence consists of four subfields as defined in this table. Each occurrence requires 54 positions; the length of this PDS must be a multiple of 54, with a maximum length of 216 positions.

#### PDS 0734 subfields

| Number | Positions | Name                                   | Attribute | Justification |
|--------|-----------|----------------------------------------|-----------|---------------|
| 1      | 1–40      | Miscellaneous Expense Description      | ans-40    | left          |
| 2      | 41–52     | Miscellaneous Expense Amount           | n-12      | right         |
| 3      | 53        | Miscellaneous Expenses Amount Exponent | n-1       | N/A           |
| 4      | 54        | Miscellaneous Expenses Amount Sign     | a-1       | N/A           |

### Subfield 1 (Miscellaneous Expense Description)

Subfield 1 (Miscellaneous Expense Description) provides the description for any miscellaneous expenses. If present, this PDS must be 40 positions, left-justified with trailing spaces, and it cannot contain all spaces or all zeros.

### Subfield 2 (Miscellaneous Expense Amount)

Subfield 2 (Miscellaneous Expense Amount) indicates the amount of any miscellaneous expenses. If present, it must contain numeric data. This subfield may contain all zeros.

### Subfield 3 (Miscellaneous Expense Amount Exponent)

If present, subfield 3 (Miscellaneous Expense Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 4 (Miscellaneous Expense Amount Sign)

If PDS 0734 is present, subfield 4 (Miscellaneous Expense Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0734 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| D     | Miscellaneous expense amount is a debit.  |
| C     | Miscellaneous expense amount is a credit. |

## PDS 0735 (Service Descriptor Codes)

PDS 0735 (Service Descriptor Codes) contains an acceptor designated code for the shipping service provided.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...40; TAGLLLVAR             |
| Tag Field           | 0735                            |
| Data Length         | 3 positions, value = 001–040    |
| Data Field          | Variable length, 1–40 positions |

| Attribute     | Description |
|---------------|-------------|
| Subfields     | None        |
| Justification | Left        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                    | Org | Sys | Dst |
|------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Shipping/Courier Services)/1644 | C   | .   | C   |

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 message when these conditions apply:

- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]):
  - 4214: Motor Freight Carriers, Trucking; Local/Long Distance, Moving and Storage Companies, Local Delivery
  - 4215: Courier Services; Air and Ground, Freight Forwards
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.
- The transaction is submitted for the any of the interchange programs listed in these tables.

### Values

If present, PDS 0737 must be a fixed length of 014.

### PDS 0737 subfields

This PDS consists of three subfields.

#### PDS 0737 subfields

| Number | Positions | Name                         | Attribute | Justification |
|--------|-----------|------------------------------|-----------|---------------|
| 1      | 1-12      | Shipping Net Amount          | n-12      | right         |
| 2      | 13        | Shipping Net Amount Exponent | n-1       | N/A           |
| 3      | 14        | Shipping Net Amount Sign     | a-1       | N/A           |

### Subfield 1 (Shipping Net Amount)

If PDS 0737 is present, subfield 1 (Shipping Net Amount) must be numeric and contains the total shipping net amount. This subfield may contain all zeros.

### Subfield 2 (Shipping Net Amount Exponent)

If PDS 0737 is present, subfield 2 (Shipping Net Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Shipping Net Amount Sign)

If PDS 0737 is present, subfield 3 (Shipping Net Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0737 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                      |
|-------|----------------------------------|
| D     | Shipping net amount is a debit.  |
| C     | Shipping net amount is a credit. |

## PDS 0738 (Incentive Amount)

PDS 0738 (Incentive Amount) provides the amount of the incentive.

#### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0738                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                    | Org | Sys | Dst |
|------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Shipping/Courier Services)/1644 | O   | .   | C   |

## Values

If present, PDS 0738 must be a fixed length of 014.

## PDS 0738 subfields

This PDS consists of three subfields.

### PDS 0738 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1-12      | Incentive Amount          | n-12      | right         |
| 2      | 13        | Incentive Amount Exponent | n-1       | N/A           |
| 3      | 14        | Incentive Amount Sign     | a-1       | N/A           |

### Subfield 1 (Incentive Amount)

If PDS 0738 is present, subfield 1 (Incentive Amount) must be numeric and contains the total incentive amount. This subfield may contain all zeros.

### Subfield 2 (Incentive Amount Exponent)

If PDS 0738 is present, subfield 2 (Incentive Amount Exponent) must be numeric and contain a value of 0 to 5.

### Subfield 3 (Incentive Amount Sign)

If PDS 0738 is present, subfield 3 (Incentive Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0738 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                   |
|-------|-------------------------------|
| D     | Incentive amount is a debit.  |
| C     | Incentive amount is a credit. |

### PDS 0739 (Pickup Date)

PDS 0739 (Pickup Date) contains the date the package being shipped or sent by courier is picked up.

#### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | n-6; TAGLLL               |
| Tag Field           | 0739                      |
| Data Length         | 3 positions, value = 006  |
| Data Field          | Fixed length, 6 positions |
| Subfields           | None                      |
| Justification       | Right                     |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

#### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Shipping/Courier Services)/<br>1644 | C   | •   | C   |

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 message when these conditions apply:

- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]):
  - 4214: Motor Freight Carriers, Trucking; Local/Long Distance, Moving and Storage Companies, Local Delivery
  - 4215: Courier Services; Air and Ground, Freight Forwards
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.
- The transaction is submitted for the interchange programs listed in these tables.

| 4G  | Business Level 4 Large Ticket III |

## Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

## PDS 0746 subfields

This PDS consists of four subfields.

### PDS 0746 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1–25      | Shipping Party City                | ans-25    | left          |
| 2      | 26–28     | Shipping Party State/Province Code | ans-3     | left          |
| 3      | 29–31     | Shipping Party Country Code        | ans-3     | left          |
| 4      | 32–41     | Shipping Party Postal Code         | ans-10    | left          |

### Subfield 1 (Shipping Party City)

Subfield 1 (Shipping Party City) identifies the city from which the package is shipped or sent by courier. If present, this subfield must be left-justified and cannot contain all spaces or all zeros.

### Subfield 2 (Shipping Party State/Province Code)

Subfield 2 (Shipping Party State/Province Code) identifies the state or province from which the package is shipped or sent by courier. If present, this subfield must be left-justified and cannot contain all spaces or all zeros.

### Subfield 3 (Shipping Party Country Code)

Subfield 3 (Shipping Party Country Code) identifies the country from which the package is shipped or sent by courier. If present, this subfield must be left-justified and cannot contain all spaces or all zeros.

### Subfield 4 (Shipping Party Postal Code)

Subfield 4 (Shipping Party Postal Code) contains the postal code from which the package is shipped or sent by courier. If present, this subfield must be left-justified and cannot contain all spaces or all zeros.

For transactions acquired in the U.S. region, subfield 4 must contain either five numeric characters, left-justified and space filled, or the ZIP+four nine numeric characters with a hyphen between the fifth and sixth numeric characters.

## PDS 0747 (Shipping Party Contact)

PDS 0747 (Shipping Party Contact) provides information about the individual (or individuals) identified as the shipping party and typically does not contain address information.

### Attributes

| Attribute           | Description                                            |
|---------------------|--------------------------------------------------------|
| Data Representation | ans...305; TAGLLLLVAR                                  |
| Tag Field           | 0747                                                   |
| Data Length         | 3 positions, value = 061–305 in increments of 61       |
| Data Field          | Variable length, 61–305 positions                      |
| Subfields           | 2 subfields for each shipping party contact occurrence |

| Attribute     | Description     |
|---------------|-----------------|
| Occurrence    | 1–5             |
| Justification | See “Subfields” |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                         | Org | Sys | Dst |

| Financial Detail Addendum (Shipping/Courier Services)/1644      | C   | •   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | •   | C   |

This PDS enables the sender to provide 1–5 different pieces of information related to the shipping party contact. For each different piece of shipping contact information provided, subfields 1 and 2 must be present. These subfields describe the type of information and the actual data.

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 message when these conditions apply:

- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]):
  - 4214: Motor Freight Carriers, Trucking; Local/Long Distance, Moving and Storage Companies, Local Delivery
  - 4215: Courier Services; Air and Ground, Freight Forwards
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.
- The transaction is submitted for any of the interchange programs listed in these tables.

| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

### Values

If present, PDS 0747 must be a minimum length of 061 (one occurrence) or a maximum length of 305 (five occurrences) and be divisible by the minimum occurrence length of 61.

### PDS 0747 subfields

This PDS consists of two subfields.

#### PDS 0747 subfields

| Number | Positions | Name                      | Attribute | Justification |
|--------|-----------|---------------------------|-----------|---------------|
| 1      | 1         | Shipping Party Descriptor | ans-1     | N/A           |

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 2      | 2–61      | Shipping Party Contact Information | ans-60    | left          |

### Subfield 1 (Shipping Party Descriptor)

Subfield 1 (Shipping Party Descriptor) can occur 1–5 times and contains the valid values listed in this table.

#### Values and descriptions

| Value | Description    |
|-------|----------------|
| 1     | Name           |
| 2     | Title          |
| 3     | Telephone      |
| 4     | E-mail address |
| 5     | Function       |

### Subfield 2 (Shipping Party Contact Information)

Subfield 2 (Shipping Party Contact Information) can occur 1–5 times and contains the contact information about the party shipping or sending a package by courier. It must be left-justified and cannot contain all spaces or all zeros.

## PDS 0748 (Delivery Party Information)

PDS 0748 (Delivery Party Information) provides information about the party receiving the package.

#### Attributes

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Shipping/Courier Services)/1644      | C   | •   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | •   | C   |

This PDS allows the sender to provide 1–3 different delivery party names.

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 message when these conditions apply:

- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]):
  - 4214: Motor Freight Carriers, Trucking; Local/Long Distance, Moving and Storage Companies, Local Delivery
  - 4215: Courier Services; Air and Ground, Freight Forwards
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.
- The transaction is submitted for any of the interchange programs listed in these tables.

| 4G  | Business Level 4 Large Ticket III |

### Values

If present, this PDS must be left-justified and cannot contain all spaces or all zeros.

### PDS 0748 subfields

This PDS consists of one subfield.

### PDS 0748 subfields

| Number | Positions | Name                | Attribute | Justification |
|--------|-----------|---------------------|-----------|---------------|
| 1      | 1–50      | Delivery Party Name | ans-50    | left          |

## Subfield 1 (Delivery Party Name)

Subfield 1 (Delivery Party Name) can occur 1–3 times. If subfield 1 is present, it must be left-justified and cannot contain all spaces or all zeros.

## PDS 0749 (Delivery Party Address Information)

PDS 0749 (Delivery Party Address Information) contains the address of the location to which the package is being shipped or sent by courier.

### Attributes

| Attribute           | Description                                           |

### Values

If present, this PDS and each of its four subfields must be left-justified and cannot contain all spaces or all zeros.

### PDS 0750 subfields

This PDS consists of four subfields.

#### PDS 0750 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1–25      | Delivery Party City                | ans-25    | left          |
| 2      | 26–28     | Delivery Party State/Province Code | ans-3     | left          |
| 3      | 29–31     | Delivery Party Country Code        | ans-3     | Left          |
| 4      | 32–41     | Delivery Party Postal Code         | ans-10    | left          |

#### Subfield 1 (Delivery Party City)

Subfield 1 (Delivery Party City) identifies the city where the package is to be delivered.

#### Subfield 2 (Delivery Party State/Province Code)

Subfield 2 (Delivery Party State/Province Code) identifies the state or province where the package is being delivered.

### Subfield 3 (Delivery Party Country Code)

Subfield 3 (Delivery Party Country Code) must contain a valid three-character alphabetic code as defined in Chapter 2 of the *Quick Reference Booklet*. When territories have a defined country code in the *Quick Reference Booklet*, that country code must be used.

### Subfield 4 (Delivery Party Postal Code)

Subfield 4 (Delivery Party Postal Code) contains the postal code where the package is being delivered.

For transactions acquired in the U.S. region, subfield 4 must contain either five numeric characters, left-justified and space filled, or the ZIP+four 9 numeric characters with a hyphen between the fifth and sixth numeric characters.

## PDS 0751 (Detail Tax Amount 4)

PDS 0751 (Detail Tax Amount 4) contains the tax amount, tax rate, tax type applied, and acceptor tax ID.

### Attributes

## PDS 0751 subfields

PDS 0751 consists of eight subfields.

### PDS 0751 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 4 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 4           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 4             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 4    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 4     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 4  | ans-2     | left          |

| Number | Positions | Name                     | Attribute | Justification |
|--------|-----------|--------------------------|-----------|---------------|
| 7      | 26-45     | Acceptor Tax ID 4        | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 4 | a-1       | N/A           |

### Subfield 1 (Detail Tax Amount Indicator 4)

Subfield 1 (Detail Tax Amount Indicator 4) must contain one of the values listed in this table.

#### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| Y     | Tax included in total purchase amount     |
| N     | Tax not included in total purchase amount |
| Space | Not supported                             |

### Subfield 2 (Detail Tax Amount 4)

Subfield 2 (Detail Tax Amount 4) indicates the detailed amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 4)

Subfield 3 (Detail Tax Rate 4) indicates the detailed tax rate applied in relationship to a specific tax amount. This subfield must be numeric and may contain all zeros.

### Subfield 4 (Detail Tax Rate Exponent 4)

Subfield 4 (Detail Tax Rate Exponent 4) indicates the decimal location for the Detail Tax Rate 4 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider the example in this table.

#### Subfields and interpretations

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

### Subfield 5 (Detail Tax Type Applied 4)

Subfield 5 (Detail Tax Type Applied 4) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

### Subfield 6 (Detail Tax Type Identifier 4)

Subfield 6 (Detail Tax Type Identifier 4) indicates the type of tax collected in relationship to a specific tax amount. It must be one of the values listed in this table.

#### Values and descriptions

| Value | Description                |
|-------|----------------------------|
| 00    | Unknown                    |
| 01    | Federal/National Sales Tax |
| 02    | State Sales Tax            |
| 03    | City Sales Tax             |
| 04    | Local Sales Tax            |
| 05    | Municipal Sales Tax        |
| 06    | Other Tax                  |
| 10    | Value Added Tax (VAT)      |
| 11    | Goods and Services (GST)   |
| 12    | Provincial Sales Tax (PST) |
| 13    | Harmonized Sales Tax (HST) |
| 14    | Quebec Sales Tax (QST)     |
| 20    | Room Tax                   |
| 21    | Occupancy Tax              |
| 22    | Energy Tax                 |

| Value | Description   |
|-------|---------------|
| Space | Not supported |

### Subfield 7 (Acceptor Tax ID 4)

Subfield 7 (Acceptor Tax ID 4) provides an identification number used by the with the tax authority in relationship to a specific tax amount.

If present, subfield 7 must be a fixed length of 20. It must be left-justified and cannot contain all low values, all high values, or all spaces.

In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

### Subfield 8 (Detail Tax Amount Sign 4)

If PDS 0751 is present, subfield 8 (Detail Tax Amount Sign 4) must contain a value of D or C. This subfield identifies whether PDS 0751 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| D     | Detail tax amount is a debit.  |
| C     | Detail tax amount is a credit. |

## PDS 0752 (Detail Tax Amount 5)

PDS 0752 (Detail Tax Amount 5) contains the tax amount, tax rate, tax type applied, and acceptor tax ID.

#### Attributes

| Attribute           | Description                     |

## PDS 0752 subfields

This PDS consists of eight subfields.

### PDS 0752 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 5 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 5           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 5             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 5    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 5     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 5  | ans-2     | left          |
| 7      | 26–45     | Acceptor Tax ID 5             | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 5      | a-1       | N/A           |

### Subfield 1 (Detail Tax Amount Indicator 5)

Subfield 1 (Detail Tax Amount Indicator 5) is the indicator used to reflect additional tax capture and reporting. This subfield must be one of the values listed in this table.

### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| Y     | Tax included in total purchase amount     |
| N     | Tax not included in total purchase amount |
| Space | Not supported                             |

### Subfield 2 (Detail Tax Amount 5)

Subfield 2 (Detail Tax Amount 5) indicates the detailed tax amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 5)

Subfield 3 (Detail Tax Rate 5) indicates the tax rate applied in relationship to a specific tax amount. This subfield must be numeric and may contain all zeros.

#### Subfield 4 (Detail Tax Rate Exponent 5)

Subfield 5 (Detail Tax Rate Exponent 5) indicates the decimal location for the Detail Tax Rate 5 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider the example in this table.

#### Subfields and interpretations

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

#### Subfield 5 (Detail Tax Type Applied 5)

Subfield 5 (Detail Tax Type Applied 5) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

#### Subfield 6 (Detail Tax Type Identifier 5)

Subfield 6 (Detail Tax Type Identifier 5) indicates the type of tax collected in relationship to a specific tax amount. It must be one of the values listed in this table.

#### Values and descriptions

| Value | Description                |
|-------|----------------------------|
| 00    | Unknown                    |
| 01    | Federal/National Sales Tax |
| 02    | State Sales Tax            |
| 03    | City Sales Tax             |
| 04    | Local Sales Tax            |
| 05    | Municipal Sales Tax        |
| 06    | Other Tax                  |
| 10    | Value Added Tax (VAT)      |

| Value | Description                |
|-------|----------------------------|
| 11    | Goods and Services (GST)   |
| 12    | Provincial Sales Tax (PST) |
| 13    | Harmonized Sales Tax (HST) |
| 14    | Quebec Sales Tax (QST)     |
| 20    | Room Tax                   |
| 21    | Occupancy Tax              |
| 22    | Energy Tax                 |
| Space | Not supported              |

### Subfield 7 (Acceptor Tax ID 5)

Subfield 7 (Acceptor Tax ID 5) provides an identification number used by the with the tax authority in relationship to a specific tax amount.

If present, subfield 7 must be a fixed length of 20. It must be left-justified and cannot contain all low values, all high values, or all spaces.

In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

### Subfield 8 (Detail Tax Amount Sign 5)

If PDS 0752 is present, subfield 8 (Detail Tax Amount Sign 5) must contain a valid value of D or C. This subfield identifies whether PDS 0752 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| D     | Detail tax amount is a debit.  |
| C     | Detail tax amount is a credit. |

## PDS 0753 (Detail Tax Amount 6)

PDS 0753 (Detail Tax Amount 6) contains the tax amount, tax rate, tax type applied, and acceptor tax ID.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...46; TAGLLLLVAR            |
| Tag Field           | 0753                            |
| Data Length         | 3 positions, value = 001–046    |
| Data Field          | Variable length, 1–46 positions |
| Subfields           | 8                               |
| Justification       | See "Subfields"                 |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                                 | Org | Sys | Dst |

## PDS 0753 subfields

This PDS consists of eight subfields.

### PDS 0753 subfields

| Number | Positions | Name                          | Attribute | Justification |
|--------|-----------|-------------------------------|-----------|---------------|
| 1      | 1         | Detail Tax Amount Indicator 6 | ans-1     | N/A           |
| 2      | 2–13      | Detail Tax Amount 6           | n-12      | right         |
| 3      | 14–18     | Detail Tax Rate 6             | n-5       | right         |
| 4      | 19        | Detail Tax Rate Exponent 6    | n-1       | N/A           |
| 5      | 20–23     | Detail Tax Type Applied 6     | ans-4     | left          |
| 6      | 24–25     | Detail Tax Type Identifier 6  | ans-2     | left          |
| 7      | 26–45     | Acceptor Tax ID 6             | ans-20    | left          |
| 8      | 46        | Detail Tax Amount Sign 6      | a-1       | N/A           |

### Subfield 1 (Detail Tax Amount Indicator 6)

Subfield 1 (Detail Tax Amount Indicator 6) is the indicator used to reflect additional tax capture and reporting. This subfield must be one of the values listed in this table.

### Values and descriptions

| Value | Description                               |
|-------|-------------------------------------------|
| Y     | Tax included in total purchase amount     |
| N     | Tax not included in total purchase amount |
| Space | Not supported                             |

### Subfield 2 (Detail Tax Amount 6)

Subfield 2 (Detail Tax Amount 6) indicates the tax amount on the purchased goods or services. This subfield must be numeric and may contain all zeros.

### Subfield 3 (Detail Tax Rate 6)

Subfield 3 (Detail Tax Rate 6) indicates the tax rate applied in relationship to a specific tax amount. This subfield must be numeric and may contain all zeros.

### Subfield 4 (Detail Tax Rate Exponent 6)

Subfield 4 (Detail Tax Rate Exponent 6) indicates the decimal location for the Detail Tax Rate 6 subfield. It must contain a value in the range of 0 to 5.

For a tax rate less than 100 percent, the exponent must indicate that the value is less than 1. Consider the example in this table.

### Subfields and interpretations

| Subfield 3 Tax Rate | Subfield 4 Tax Rate Exponent | Interpretation               |
|---------------------|------------------------------|------------------------------|
| 09000               | 5                            | 0.09000 (9 percent tax rate) |
| 00009               | 2                            | 0.09 (9 percent tax rate)    |
| 09000               | 3                            | 9.000 (900 percent tax rate) |
| 00009               | 1                            | 0.9 (90 percent tax rate)    |
| 00009               | 3                            | 0.009 (0.9 percent tax rate) |

### Subfield 5 (Detail Tax Type Applied 6)

Subfield 5 (Detail Tax Type Applied 6) provides an indicator that is used to further define tax categories applicable to specific domestic processing arrangements in certain locations.

### Subfield 6 (Detail Tax Type Identifier 6)

Subfield 6 (Detail Tax Type Identifier 6) indicates the type of tax collected in relationship to a specific tax amount. This subfield must be one of the values listed in this table.

#### Values and descriptions

| Value | Description                |
|-------|----------------------------|
| 00    | Unknown                    |
| 01    | Federal/National Sales Tax |
| 02    | State Sales Tax            |
| 03    | City Sales Tax             |
| 04    | Local Sales Tax            |
| 05    | Municipal Sales Tax        |
| 06    | Other Tax                  |
| 10    | Value Added Tax (VAT)      |
| 11    | Goods and Services (GST)   |
| 12    | Provincial Sales Tax (PST) |
| 13    | Harmonized Sales Tax (HST) |
| 14    | Quebec Sales Tax (QST)     |
| 20    | Room Tax                   |
| 21    | Occupancy Tax              |
| 22    | Energy Tax                 |
| Space | Not supported              |

### Subfield 7 (Acceptor Tax ID 6)

Subfield 7 (Acceptor Tax ID 6) provides an identification number used by the acceptor with the tax authority in relationship to a specific tax amount.

If present, this subfield must be 20 positions, left-justified, and it cannot contain all low values, all high values, or all spaces. In addition, if this subfield is present and the related First Presentment is a U.S. acquired transaction, this subfield must consist of 9 numeric characters followed by 11 spaces.

### Subfield 8 (Detail Tax Amount Sign 6)

If PDS 0753 is present, subfield 8 (Detail Tax Amount Sign 6) must contain a value of D or C. This subfield identifies whether PDS 0753 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                    |
|-------|--------------------------------|
| D     | Detail tax amount is a debit.  |
| C     | Detail tax amount is a credit. |

## PDS 0754 (Delivery Party Contact)

PDS 0754 (Delivery Party Contact) contains information about the individual (or individuals) identified as the delivery party. This information is typically not address information.

#### Attributes

| Attribute           | Description                                            |
|---------------------|--------------------------------------------------------|
| Data Representation | ans...305; TAGLLLLVAR                                  |
| Tag Field           | 0754                                                   |
| Data Length         | 3 positions, value = 061–305 in increments of 61       |
| Data Field          | Variable length, 61–305 positions                      |
| Subfields           | 2 subfields for each Delivery Party Contact occurrence |
| Occurrences         | 1–5                                                    |
| Justification       | See "Subfields"                                        |

#### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                    | Org | Sys | Dst |
|------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Shipping/Courier Services)/1644 | C   | .   | C   |

This PDS enables the sender to provide 1–5 different pieces of information related to the delivery party contact. For each different piece of delivery information provided, subfields 1 and 2 must be present. These subfields describe the type of information and the actual data.

This PDS is required for the Financial Detail Addendum (Shipping/Courier Services)/1644 message when the conditions apply:

- One of these MCCs is present in DE 26 (Acceptor Business Code [MCC]):
  - 4214: Motor Freight Carriers, Trucking; Local/Long Distance, Moving and Storage Companies, Local Delivery
  - 4215: Courier Services; Air and Ground, Freight Forwards
- The Financial Detail Addendum (Corporate Line Item Detail)/1644 message is not present.
- The transaction is submitted for any of the interchange programs listed in these tables.

### Canada Region Incentive Interchange Rate Programs

| IRD | Description                                 |
|-----|---------------------------------------------|
| BR  | Canada Intracountry Commercial Data Rate II |
| BS  | Canada Intracountry Commercial Large Ticket |

### U.S. region Incentive Interchange Rate Programs

| IRD | Description                      |
|-----|----------------------------------|
| 62  | Commercial Large Ticket 1        |
| 66  | Commercial Data Rate III         |
| 94  | Commercial Large Ticket II       |
| 99  | Commercial Large Ticket III      |
| SC  | Business Level 2 Data Rate III   |
| SE  | Business Level 2 Large Ticket I  |
| SF  | Business Level 2 Large Ticket II |

| IRD | Description                       |
|-----|-----------------------------------|
| SG  | Business Level 2 Large Ticket III |
| 3C  | Business Level 3 Data Rate III    |
| 3E  | Business Level 3 Large Ticket I   |
| 3F  | Business Level 3 Large Ticket II  |
| 3G  | Business Level 3 Large Ticket III |
| 4C  | Business Level 4 Data Rate III    |
| 4E  | Business Level 4 Large Ticket I   |
| 4F  | Business Level 4 Large Ticket II  |
| 4G  | Business Level 4 Large Ticket III |

### Values

If present, PDS 0754 must be a minimum length of 061 (one occurrence) or a maximum length of 305 (five occurrences) and be divisible by the minimum occurrence length of 61.

### PDS 0754 subfields

This PDS consists of two subfields.

#### PDS 0754 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1         | Delivery Party Descriptor          | ans-1     | N/A           |
| 2      | 2-61      | Delivery Party Contact Information | ans-60    | left          |

#### Subfield 1 (Delivery Party Descriptor)

Subfield 1 (Delivery Party Descriptor) can occur 1–5 times and contains the valid values listed in this table.

#### Values and descriptions

| Value | Description |
|-------|-------------|
| 1     | Name        |
| 2     | Title       |

| Value | Description    |
|-------|----------------|
| 3     | Telephone      |
| 4     | E-mail address |
| 5     | Function       |

### Subfield 2 (Delivery Party Contact Information)

Subfield 2 (Delivery Party Descriptor) can occur 1–5 times and contains the contact information about the party delivering the package. It must be left-justified and cannot contain all spaces or all zeros.

## PDS 0755 (Line Item Total Amount)

PDS 0755 (Line Item Total Amount) provides the total amount presented in the line item detail message.

### Attributes

| Attribute           | Description                 |
|---------------------|-----------------------------|
| Data Representation | ans-14; TAGLLL              |

| Financial Detail Addendum (Telephony Billing, Detail)/<br>1644  | O   | •   | C   |

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | O   | .   | C   |

## Values

When used in a Corporate Line Item Detail addendum message, PDS 0755 represents the sum of PDS 0647 (Extended Item Amount) and PDS 0597 (Total Tax Amount).

When used in a Telephony Billing Summary message, PDS 0755 represents the sum of these subfields:

- PDS 0627 (Billing Event 1), subfield 1 (Billing Event Amount) (occurs 1 to 10 times)
- PDS 0628 (Billing Event 2), subfield 1 (Billing Event Amount 2) (occurs 1 to 10 times), and
- PDS 0597 (Total Tax Amount), subfield 1 (Total Tax Amount) (which is the sum of all six of the tax-related PDSs).

When used in a Telephony Billing Detail addendum message, PDS 0755 represents the sum of these subfields:

- PDS 0649 (Call Usage Amount), subfield 1 (Call Usage Amount)
- PDS 0655 (Call Long Distance Amount), subfield 1 (Call Long Distance Amount)
- PDS 0658 (Call Connect Amount), subfield 1 (Call Collect Amount)
- PDS 0734 (Miscellaneous Expenses), subfield 2 (Miscellaneous Expense Amount), and
- PDS 0597 (Total Tax Amount), subfield 1 (Total Tax Amount) (which is the sum of all six of the tax-related PDSs).

## PDS 0755 subfields

This PDS consists of three subfields.

### PDS 0755 subfields

| Number | Positions | Name                            | Attribute | Justification |
|--------|-----------|---------------------------------|-----------|---------------|
| 1      | 1-12      | Line Item Total Amount          | n-12      | right         |
| 2      | 13        | Line Item Total Amount Exponent | n-1       | N/A           |
| 3      | 14        | Line Item Total Amount Sign     | a-1       | N/A           |

### Subfield 1 (Line Item Total Amount)

If PDS 0755 is present, subfield 1 (Line Item Total Amount) must be numeric, cannot contain all zeros, and contains the line item total amount.

### Subfield 2 (Line Item Total Amount Exponent)

If PDS 0755 is present, subfield 2 (Line Item Total Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amount exponents should utilize the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

### Subfield 3 (Line Item Total Amount Sign)

If PDS 0755 is present, subfield 3 (Line Item Total Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0755 is a debit or credit from the perspective of the cardholder.

#### Values and descriptions

| Value | Description                         |
|-------|-------------------------------------|
| D     | Line item total amount is a debit.  |
| C     | Line item total amount is a credit. |

## PDS 0756 (Passenger Description)

PDS 0756 (Passenger Description) contains three subfields to indicate the number of adults, the number of children, and the class of the ticket.

This PDS is used only when PDS 0652 (Service Type), subfield 1 (Service Type) equates to Ticket and PDS 0652, subfield 2 (Service Nature) equates to Domestic Tickets, Ne/See Ticket, Foreign Ticket, or TCV Series, or when PDS 0652 equates to Reservation and Service Nature equates to Seat, Couchette, or Bed.

#### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-5; TAGLLL             |
| Tag Field           | 0756                      |
| Data Length         | 3 positions, value = 005  |
| Data Field          | Fixed length, 5 positions |
| Subfields           | 3                         |

| Attribute     | Description     |
|---------------|-----------------|
| Justification | See "Subfields" |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | C   | .   | C   |
| s1 Number of Adults                                                    | O   | .   | C   |
| s2 Number of Children                                                  | O   | .   | C   |

This PDS is required if the associated First Presentment/1240 contains an airline acceptor business code (MCC) or railway MCC and is submitted for the U.S. region incentive interchange rate programs listed in this table.

## IRDs and descriptions

| IRD | Description                           |
|-----|---------------------------------------|
| 22  | Public Sector                         |
| 29  | Emerging Markets, Consumer Core Value |
| 56  | World Public Sector                   |
| HP  | World High Value Public Sector        |
| RK  | Enhanced Public Sector                |
| WP  | World Elite Public Sector             |

## PDS 0756 subfields

This PDS consists of three subfields.

### PDS 0756 subfields

| Number | Positions | Name               | Attribute | Justification |
|--------|-----------|--------------------|-----------|---------------|
| 1      | 1–2       | Number of Adults   | n-2       | right         |
| 2      | 3–4       | Number of Children | n-2       | right         |
| 3      | 5         | Class              | ans-1     | N/A           |

### Subfield 1 (Number of Adults)

If PDS 0756 is present, subfield 1 must be numeric.

### Subfield 2 (Number of Children)

If PDS 0756 is present, subfield 2 must be numeric.

### Subfield 3 (Class)

If PDS 0756 is present, subfield 3 must be provided. This PDS is required if the associated First Presentment/1240 contains a railway MCC and is submitted for one of the U.S. region incentive interchange rate programs listed in this table.

### IRDs and descriptions

| IRD   | Description             |
|-------|-------------------------|
| 10    | Merit III Tier 1        |
| 11    | Merit III Tier 2        |
| 12    | Merit III Tier 3        |
| 24    | Merchant UCAF           |
| 69    | Commercial T&E Rate II  |
| 70/80 | Merit III Base          |
| 79    | Full UCAF               |
| 89    | Commercial T&E Rate III |
| 93    | Passenger Transport     |

| IRD | Description                   |
|-----|-------------------------------|
| 96  | World T&E                     |
| RA  | Enhanced Merit III Base       |
| RB  | Enhanced Merit III Tier 1     |
| RC  | Enhanced Merit III Tier 2     |
| RD  | Enhanced Merit III Tier 3     |
| RN  | Enhanced Merchant UCAF        |
| RO  | Enhanced Full UCAF            |
| RR  | Enhanced Passenger Transport  |
| SO  | Business Level 2 T&E Rate III |
| 3O  | Business Level 3 T&E Rate III |
| 4O  | Business Level 4 T&E Rate III |

If present, this PDS cannot contain all high values or all low values.

## PDS 0757 (Transportation Service Provider)

PDS 0757 (Transportation Service Provider) contains the name of the service provider.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...40; TAGLLLLVAR            |
| Tag Field           | 0757                            |
| Data Length         | 3 positions, value = 001–040    |
| Data Field          | Variable length, 1–40 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0758 (Transportation Services Offered)

PDS 0758 (Transportation Services Offered) contains the services that were offered by the transportation company.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...40; TAGLLLLVAR            |
| Tag Field           | 0758                            |
| Data Length         | 3 positions, value = 001–040    |
| Data Field          | Variable length, 1–40 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                | Org | Sys | Dst |
|------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Passenger Transport Detail, Rail Data)/1644 | O   | .   | C   |

## Values

If present, this PDS must be left-justified and cannot contain all zeros, all spaces, all high values, or all low values.

## PDS 0759 (Delivery Order Number)

PDS 0759 (Delivery Order Number) contains a customer invoice number for a rail sale to a corporate account.

## Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...15; TAGLLLVAR             |

## PDS 0763 (VAT Suppression Indicator)

PDS 0763 (VAT Suppression Indicator) contains a code indicating that the Value Added Tax was suppressed.

### Attributes

| Attribute           | Description               |
|---------------------|---------------------------|
| Data Representation | ans-2; TAGLLL             |
| Tag Field           | 0763                      |
| Data Length         | 3 positions, value = 002  |
| Data Field          | Fixed length, 2 positions |
| Subfields           | None                      |
| Justification       | Left                      |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                | Org | Sys | Dst |
|--------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Lodged Account Detail)/1644 | O   | .   | C   |

### Values

If present, this PDS must be left-justified, cannot contain all zeros, all spaces, all high values, or all low values. The common values are DR (Deutsches Reisebüro) or ST (ST Art Amadeus).

## PDS 0764 (Healthcare Eligible Status Indicator)

PDS 0764 (Healthcare Eligible Status Indicator) identifies whether the specific item described in this addendum message represents a qualified healthcare items (qualified in accordance with the IIAS Industry Standard list).

This flag indicates which transmitted items are qualified healthcare items and which transmitted items are not.

## Attributes

| Attribute           | Description              |

## Values

This PDS must contain a valid value listed in this table.

## Values

| Value | Description                   |
|-------|-------------------------------|
| 0     | Non-qualified healthcare item |
| 1     | Qualified healthcare item     |

## PDS 0765 (MoneySend Receiver Data)

PDS 0765 (MoneySend Receiver Data) provides the full name and address information of the payee associated with a payment transaction.

### Attributes

| Attribute           | Description                  |
|---------------------|------------------------------|
| Data Representation | ans...169; TAGLLLLVAR        |
| Tag Field           | 0765                         |
| Data Length         | 3 positions, value = 070–169 |
| Data Field          | Variable length, 1–169       |
| Subfields           | 9                            |
| Justification       | See "Subfields"              |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Payment Transaction Detail)/1644 | C   | .   | C   |

PDS 0765 subfields 01 and 02 must be present in a Financial Detail Addendum (Payment Transaction Detail)/1644 message when Payment Transactions (identified by DE 3 [Processing Code], subfield 01 [Cardholder Transaction Type] value of 28) contains PDS 0043 (Program Registration ID) with a value of C04, C07, C52, C53, C54, C55, C56, C57 C58, C59, or C65 and the transaction qualifies as a cross-border MoneySend payment transaction.

### Values

If present, each PDS 0765 subfield must be left-justified and cannot contain all low values or all high values. Subfields 01 and 02 cannot contain all spaces or all zeros. Subfield 3, 4, 5, 6, 7, 8, and 9 are optional fields.

## Subfield 1 (Payee First Name)

PDS 0765 (MoneySend Receiver Data), subfield 1 (Payee First Name) contains the first name of the payee.

This subfield must be provided in payment transactions (identified by DE 3 [Processing Code], subfield 1 [Cardholder Transaction Type], value 28) when the payment transaction contains PDS 0043 (Transaction Type Identifier) with a value of C04, C07, C52, C53, C54, C55, C56, C57, C58, C59, or C65 and the transaction qualifies as a cross-border MoneySend payment transaction.

### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 01    |
| Subfield Length     | n-2       | 35    |
| Data Representation | ans-35    |       |
| Justification       | Left      |       |

## Subfield 2 (Payee Last Name)

PDS 0765 (MoneySend Receiver Data), subfield 2 (Payee Last Name) contains the last name of the payee.

This subfield must be provided in payment transactions (identified by DE 3 [Processing Code], subfield 1 [Cardholder Transaction Type], value 28) when the Payment Transaction contains PDS 0043 (Transaction Type Identifier) with a value of C04, C07, C52, C53, C54, C55, C56, C57, C58, C59, or C65 and the transaction qualifies as a cross-border MoneySend payment transaction.

### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 02    |
| Subfield Length     | n-2       | 35    |
| Data Representation | ans-35    |       |
| Justification       | Left      |       |

### Subfield 3 (Payee Address)

PDS 0765 (MoneySend Receiver Data), subfield 3 (Payee Address) contains the street address of the payee.

#### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 03    |
| Subfield Length     | n-2       | 30    |
| Data Representation | ans-30    |       |
| Justification       | Left      |       |

### Subfield 4 (Payee City)

PDS 0765 (MoneySend Receiver Data), subfield 4 (Payee City) contains the city of the payee.

#### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 04    |
| Subfield Length     | n-2       | 25    |
| Data Representation | ans-25    |       |
| Justification       | Left      |       |

### Subfield 5 (Payee State/Province Code)

PDS 0765 (MoneySend Receiver Data), subfield 5 (Payee State/Province Code) contains the state/province code of the payee.

#### Attributes

|                 | Attribute | Value |
|-----------------|-----------|-------|
| Subfield ID     | n-2       | 05    |
| Subfield Length | n-2       | 03    |

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Data Representation | ans-3     |       |
| Justification       | Left      |       |

## Subfield 6 (Payee Country Code)

PDS 0765 (MoneySend Receiver Data), subfield 6 (Payee Country Code) must contain a valid three-character alphabetic code as defined in Chapter 2 of the *Quick Reference Booklet*. When territories have a defined country code in the *Quick Reference Booklet*, that country code must be used.

### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 06    |
| Subfield Length     | n-2       | 03    |
| Data Representation | ans-3     |       |
| Justification       | Left      |       |

## Subfield 7 (Payee Postal Code)

PDS 0765 (MoneySend Receiver Data), subfield 7 (Payee Postal Code) contains the postal code of the payee.

### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 07    |
| Subfield Length     | n-2       | 10    |
| Data Representation | ans-10    |       |
| Justification       | Left      |       |

## Subfield 8 (Payee Date of Birth)

PDS 0765 (MoneySend Receiver Data), subfield 8 (Payee Date of Birth) contains the date of birth of the payee in the format: MMDDYYYY.

### Attributes

|                     | Attribute | Value |
|---------------------|-----------|-------|
| Subfield ID         | n-2       | 08    |
| Subfield Length     | n-2       | 08    |
| Data Representation | n-8       |       |
| Justification       | Left      |       |

## Subfield 9 (Payee Phone Number)

PDS 0765 (MoneySend Receiver Data), subfield 9 (Payee Phone Number) contains the phone number of the payee.

### Attributes

|                      | Attribute | Value |
|----------------------|-----------|-------|
| Subfield ID:         | n-2       | 09    |
| Subfield Length:     | n-2       | 20    |
| Data Representation: | ans-20    |       |
| Justification:       | Left      |       |

## PDS 0770 (Additional Acceptor Inquiry Information)

PDS 0770 (Additional Acceptor Inquiry Information) provides additional acceptor contact data for cardholder, acquirer, or issuer use if there are questions or disputes concerning a transaction.

### Attributes

| Attribute           | Description          |
|---------------------|----------------------|
| Data Representation | ans...73; TAGLLLLVAR |
| Tag Field           | 0770                 |

| Attribute     | Description                      |
|---------------|----------------------------------|
| Data Length   | 3 positions, value = 025-073     |
| Data Field    | Variable length, 25-73 positions |
| Subfields     | 4                                |
| Justification | See "Subfields"                  |

## Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data)/<br>1644 | O   | .   | C   |

## Values

If present, PDS 0770 cannot contain all low values, all high values, all spaces, or all zeros and must be a length of 025-073.

## PDS 0770 subfields

This PDS consists of four subfields.

## PDS 0770 subfields

| Number | Positions | Name                           | Attribute | Justification |
|--------|-----------|--------------------------------|-----------|---------------|
| 1      | 1-25      | Sales Rep Name                 | ans-25    | left          |
| 2      | 26-41     | Sales Rep Phone Number         | ans-16    | left          |
| 3      | 42-57     | Sales Rep Fax Number           | ans-16    | left          |
| 4      | 58-73     | Technical Support Phone Number | ans-16    | left          |

### **Subfield 1 (Sales Rep Name)**

Subfield 1 (Sales Rep Name) contains the name of the acceptor sales representative. If present, subfield 1 must be left-justified and cannot contain all spaces.

### **Subfield 2 (Sales Rep Phone Number)**

Subfield 2 (Sales Rep Phone Number) contains the primary phone number that the cardholder may use to contact the acceptor sales representative.

If present, this subfield cannot contain all zeros or any of these values:

- 000-000-0000
- (000) 000-0000, or
- 000 000 0000.

For transactions from U.S. or Canadian acceptors (identified by DE 43 [Acceptor Name Location], subfield 6 [Acceptor Country Code] containing a value of USA or CAN), subfield 2 (Sales Rep Phone Number), if present, must contain a 10-position phone number and must be left-justified with trailing spaces, and the first three positions must be numeric.

### **Subfield 3 (Sales Rep Fax Number)**

Subfield 3 (Sales Rep Fax Number) contains the fax number that the cardholder may use to contact the acceptor sales representative.

For transactions from U.S. or Canadian acceptors (identified by DE 43 [Acceptor Name Location], subfield 6 [Acceptor Country Code] containing a value of USA or CAN), subfield 3 (Sales Rep Fax Number), if present, must contain a 10-position phone number and must be left-justified with trailing spaces, and the first three positions must be numeric.

### **Subfield 4 (Technical Support Phone Number)**

Subfield 4 (Technical Support Phone Number) contains the phone number that the cardholder may use to contact the acceptor for technical assistance.

For transactions from U.S. or Canadian acceptors (identified by DE 43 [Acceptor Name Location], subfield 6 [Acceptor Country Code] containing a value of USA or CAN), subfield 4 (Technical Support Phone Number), if present, must contain a 10-position phone number and must be left-justified with trailing spaces and the first three positions must be numeric.

## PDS 0771 (Cost Center Information)

PDS 0771 (Cost Center Information) provides information to identify the acceptor business unit that is financially affected by the transaction.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...36; TAGLLLLVAR             |
| Tag Field           | 0771                             |
| Data Length         | 3 positions, value = 018-036     |
| Data Field          | Variable length, 18-36 positions |
| Subfields           | 2                                |
| Justification       | See "Subfields"                  |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data)/1644      | O   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0771 must be a length of 18-36.

### PDS 0771 subfields

This PDS consists of two subfields as defined in this table.

### PDS 0771 subfields

| Number | Positions | Name                    | Attribute | Justification |
|--------|-----------|-------------------------|-----------|---------------|
| 1      | 1-18      | Cost Center Number      | ans-18    | left          |
| 2      | 19-36     | Cost Center Description | ans-18    | left          |

#### Subfield 1 (Cost Center Number)

Subfield 1 (Cost Center Number) is used to identify the acceptor business unit which is financially impacted by the transaction.

If present, subfield 1 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

#### Subfield 2 (Cost Center Description)

Subfield 2 (Cost Center Description) contains a free-form text description of the information provided in subfield 1.

If present, subfield 2 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### PDS 0772 (Driver License/State Issued ID Information)

PDS 0772 (Driver License/State Issued ID Information) contains the cardholder's driver license or state-issued ID number and the state, province, or region code by which it was issued, and is used for cardholder identity validation.

#### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...18; TAGLLLLVAR            |
| Tag Field           | 0772                            |
| Data Length         | 3 positions, value = 015-018    |
| Data Field          | Variable length, 15-18 position |
| Subfields           | 2                               |
| Justification       | See "Subfields"                 |

## Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                        | Org | Sys | Dst |
|----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data)/<br>1644 | O   | •   | C   |

## Values

If present, PDS 0772 must be a length of 15–18.

## PDS 0772 subfields

This PDS consists of two subfields.

### PDS 0772 subfields

| Number | Positions | Name                                                              | Attribute | Justification |
|--------|-----------|-------------------------------------------------------------------|-----------|---------------|
| 1      | 1–15      | Driver License/State Issued ID<br>Number                          | ans-15    | left          |
| 2      | 16–18     | Driver License/State Issued ID<br>State, Province, or Region Code | ans-3     | left          |

### Subfield 1 (Driver License/State Issued ID Number)

Subfield 1 (Driver License/State Issued ID Number) contains the driver license or state-issued ID number of the cardholder.

If present, subfield 1 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### Subfield 2 (Driver License/State Issued ID State, Province, or Region Code)

Subfield 2 (Driver License/State Issued ID State, Province, or Region Code) contains the state, province, or region code by which the cardholder's driver license or state issued ID is issued.

If present, subfield 2 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0773 (Payment Method Information)

PDS 0773 (Payment Method Information) provides a means to identify one or multiple payment methods and associated amounts for the transaction.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | an...140; TAGLLLLVAR                             |
| Tag Field           | 0773                                             |
| Data Length         | 3 positions, value = 014–140 in increments of 14 |
| Data Field          | Variable length, 014–140 positions               |
| Subfields           | 2 fixed-length subfields for each occurrence     |
| Occurrences         | 1–10                                             |
| Justification       | See “Subfields”                                  |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                               | Org | Sys | Dst |
|-------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data) | O   | .   | C   |

### Values

If present, PDS 0772 must be a length of 14–140, and divisible by a minimum occurrence length of 14.

### PDS 0773 subfields

This PDS may contain 1 to 10 occurrences of payment method information.

Each payment method consists of two subfields as defined in this table. Each occurrence requires 14 positions; the length of this PDS must be a multiple of 14, with a maximum length of 140 positions.

### PDS 0773 subfields

| Number | Positions | Name            | Attribute | Justification |
|--------|-----------|-----------------|-----------|---------------|
| 1      | 1-2       | Payment Method  | an-2      | n/a           |
| 2      | 3-14      | Amount, Payment | n-12      | right         |

### Subfield 1 (Payment Method)

Subfield 1 (Payment Method) contains the payment method used by the cardholder. The valid values for subfield 1 are listed in this table.

### Values and descriptions

| Value | Description |
|-------|-------------|
| 01    | Credit Card |
| 02    | Debit Card  |
| 03    | Gift Card   |
| 04    | Cash        |
| 05    | Check       |
| 06    | Coupon      |
| 07    | Other       |

### Subfield 2 (Amount, Payment)

Subfield 2 (Amount, Payment) contains the amount associated with the value provided in subfield 1.

If present, subfield 2 must be numeric and greater than zero and in the same currency as the First Presentment/1240 Transaction Currency.

All currency amounts are expressed in the minor unit of currency without a decimal separator, in accordance with ISO standards for currency notation. For example, a payment amount of USD 212.50 is expressed as 000000021250.

## PDS 0774 (Stock Keeping Unit (SKU) Description)

PDS 0774 (Stock Keeping Unit [SKU] Description) provides the item description for the associated SKU number.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...200; TAGLLLLVAR              |
| Tag Field           | 0774                               |
| Data Length         | 3 positions, value = 001–200       |
| Data Field          | Variable length, 001–200 positions |
| Subfields           | None                               |
| Justification       | Left                               |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0774 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros and must be a length of 1–200.

## PDS 0775 (Department Code)

PDS 0775 (Department Code) provides a means to identify the acceptor department from which the goods or services were obtained.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...8; TAGLLLLVAR                |
| Tag Field           | 0775                               |
| Data Length         | 3 positions, value = 001–008       |
| Data Field          | Variable length, 001–008 positions |
| Subfields           | None                               |
| Justification       | Left                               |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data)/1644      | O   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

### Values

If present, PDS 0775 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros and must be a length of 1–8.

## PDS 0776 (Alternate Custom Identifier)

PDS 0776 (Alternate Custom Identifier) enables customers to provide custom information pertinent to the transaction.

### Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | ans...410; TAGLLLLVAR                            |
| Tag Field           | 0776                                             |
| Data Length         | 3 positions, value = 082–410 in increments of 82 |
| Data Field          | Variable length, 082–410 positions               |
| Subfields           | 2 fixed-length subfields for each occurrence     |
| Occurrences         | 1-5                                              |
| Justification       | See "Subfields"                                  |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Common Data)/1644      | O   | .   | C   |
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

### Values

If PDS 0776 is present, both subfield 1 and subfield 2 must be present in each occurrence of Alternate Custom Identifier, and the PDS must be a length of 82–410 and divisible by a minimum occurrence length of 82.

## PDS 0776 subfields

This PDS may contain 1 to 5 occurrences of alternate custom identifier information.

Each occurrence requires 82 positions; the length of this PDS must be a multiple of 82, with a maximum length of 410 positions. Each alternate custom identifier consists of two subfields as defined in this table.

### PDS 0776 subfields

| Number | Positions | Name                               | Attribute | Justification |
|--------|-----------|------------------------------------|-----------|---------------|
| 1      | 1-6       | Alternate Custom Identifier Type   | ans-06    | n/a           |
| 2      | 7-82      | Alternate Custom Identifier Detail | ans-76    | left          |

### Subfield 1 (Alternate Custom Identifier Type)

Subfield 1 (Alternate Custom Identifier Type) identifies the type of custom information that is contained in subfield 2 as free-form text. The valid values for subfield 1 are listed in this table.

### Values and descriptions

| Value  | Description                |
|--------|----------------------------|
| CUSORD | Customer Order             |
| CUSTPO | Customer Purchase Order    |
| FOLNUM | Folio Number               |
| INVACT | Invoice or Account Number  |
| OTHER1 | Other                      |
| OTHER2 | Other                      |
| PRCHID | Purchase Identification    |
| RECLOC | Record Locator             |
| RESNUM | Reservation Number         |
| RNTAGR | Rental Agreement           |
| SUPINV | Supplier Invoice           |
| SUPORD | Supplier Order             |
| TKTNUM | Ticket Number              |
| TRANID | Transaction Identification |

| Value  | Description     |
|--------|-----------------|
| TRKNUM | Tracking Number |

## Subfield 2 (Alternate Custom Identifier Detail)

Subfield 2 (Alternate Custom Identifier Detail) is a free-form text field for certain information pertinent to the transaction. The information provided should relate to the value provided in subfield 1.

If present, subfield 2 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

## PDS 0777 (Promotion Code)

PDS 0777 provides a means to identify the promotion code associated with the goods or services being purchased.

### Attributes

| Attribute           | Description                        |
|---------------------|------------------------------------|
| Data Representation | ans...6; TAGLLLVAR                 |
| Tag Field           | 0777                               |
| Data Length         | 3 positions, value = 001–006       |
| Data Field          | Variable length, 001–006 positions |
| Subfields           | None                               |
| Justification       | Left                               |

### Usage

This table shows the usage of this data element (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Private Label Line Item Detail)/1644 | O   | .   | C   |

## Values

If present, PDS 0777 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros and must be a length of 1–6.

## Values

| Values | Description                                                                                                                     |
|--------|---------------------------------------------------------------------------------------------------------------------------------|
| ARGCTA | Installment payment transaction within Argentina                                                                                |

| MCINST | Mastercard Installment Payment                                                                                                  |
| MEXCTA | Installment payment transaction within Mexico                                                                                   |
| PARCEL | Installment payment transaction within Brazil                                                                                   |
| PERCTA | Installment payment transaction within Peru                                                                                     |
| PHINST | Installment payment transaction within Philippines                                                                              |
| PRYCTA | Installment payment transaction within Paraguay                                                                                 |
| URYCTA | Installment payment transaction within Uruguay                                                                                  |

## PDS 0781 (Fleet Spend Control Enforced)

PDS 0781 (Fleet Spend Control Enforced) contains the information, on a transaction basis, that merchants use to determine what products or group of products may be purchased using EMV compliant technology.

## Attributes

| Attribute           | Description   |
|---------------------|---------------|
| Data Representation | an-16; TAGLLL |
| Tag Field           | 0781          |

| Attribute     | Description                |
|---------------|----------------------------|
| Data Length   | 3 positions, value = 016   |
| Data Field    | Fixed length, 16 positions |
| Subfields     | None                       |
| Justification | N/A                        |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                           | Org | Sys | Dst |
|-----------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail<br>Addendum (Corporate<br>Fleet Transaction<br>Information)/1644 | O   | .   | C   |

PDS 0781 is used to inform issuers of the purchase restrictions enforced by the merchant point of sale. PDS 0781 should contain the Connexus Purchase Restriction Tag information value found in tag DF32 read from the EMV chip.

Usage of PDS 0781 is required only for EMV chip cards personalized using the IFSF/Connexus specification for retrieving supplemental data from acceptors and cardholders.

### Alternate flow

In scenarios where the merchant supports the Dual Message Authorization field DE 106, subelement 02 Merchant Fleet Spend Control Override Capability and the issuer provides a response value in Dual Message Authorization field DE 106, subelement 3 (Fleet Spend Control Override Items) in the Authorization Request Response/0110 message, which is enforced by the merchant at the point of sale, then that spend control data will be populated in PDS 0781.

PDS 0781 should be formatted as read from the EMV chip or provided in authorization in DE 106, subelement 03 (Fleet Spend Control Override Items) which is formatted according to Connexus standards.

### Values

If present, PDS 0781 must be a fixed length of 16 and cannot contain all zeros or all spaces.

## PDS 0782 (Fleet Fuel Information)

PDS 0782 (Fleet Fuel Information) contains the acquirer's Fleet fuel product code translated from the information the attendant entered.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | n-35; TAGLLL               |
| Tag Field           | 0782                       |
| Data Length         | 3 positions, value = 035   |
| Data Field          | Fixed length, 35 positions |
| Subfields           | 6                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                  | Org | Sys | Dst |
|--------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 | C   | .   | C   |

Usage of PDS 0782 is required only for EMV chip cards personalized using the IFSF/Conexxus specification for retrieving supplemental data from acceptors and cardholders.

This PDS must be present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message when PDS 0622 (Motor Fuel Service Type) is present and contains a value other than 3 for the following U.S.-acquired commercial interchange rate programs.

### IRDs and descriptions

| IRD | Description                  |
|-----|------------------------------|
| F1  | Commercial Fleet Data Rate I |

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

## Values

If present, PDS 0782 Fleet Fuel Information must be a fixed length of 35.

## Requirements

These are the requirements regulating the use of PDS 0782.

For Mastercard Corporate Fleet Card or Mastercard Government Commercial Card transactions, PDS 0782, subfield 6 (Fleet Fuel Sale Amount) must equal the product of the value of PDS 0782, subfield 2 (Fleet Fuel Unit Price) multiplied by the value in PDS 0782, subfield 4 (Fleet Fuel Quantity). A tolerance of five percent is permitted to address rounding issues. The tolerance is applied on PDS 0782, subfield 6 (Sale Amount) and not on the calculated value (PDS 0782, subfield 2 multiplied by PDS 0782, subfield 4). Also, this edit does not round the calculated amount and low/high tolerance amounts to the transaction currency exponent, and keeps six decimal positions on these values.

## Subfields

PDS 0782 contains six subfields.

### Subfield attributes and values

| Number | Position | Name                         | Attribute | Justification |
|--------|----------|------------------------------|-----------|---------------|
| 1      | 1-3      | Fleet Fuel Product Code      | n-3       | right         |
| 2      | 4-15     | Fleet Fuel Unit Price        | n-12      | right         |
| 3      | 16       | Fleet Fuel Unit of Measure   | ns-1      | N/A           |
| 4      | 17-22    | Fleet Fuel Quantity          | n-6       | right         |
| 5      | 23       | Fleet Fuel Quantity Exponent | n-1       | N/A           |
| 6      | 24-35    | Fleet Fuel Sale Amount       | n-12      | right         |

## Subfield 1 (Fleet Fuel Product Code)

If PDS 0782 is present, subfield 1 must be one of the values listed in this table.

The following list of product code values is based on the Conexus Payment System Product Codes version 4.1.

### Values and descriptions

| Value | Description                                                    |
|-------|----------------------------------------------------------------|
| 001   | Regular                                                        |
| 002   | Mid/Plus                                                       |
| 003   | Premium/Super                                                  |
| 004   | Mid/Plus 2                                                     |
| 005   | Premium/Super 2                                                |
| 011   | <Deprecated> Ethanol (5.7% blend)                              |
| 012   | <Deprecated> Mid/Plus Ethanol (5.7% blend)                     |
| 013   | <Deprecated> Premium/Super Ethanol (5.7% blend)                |
| 014   | <Deprecated> Ethanol (7.7% blend)                              |
| 015   | <Deprecated> Mid/Plus Ethanol (7.7% blend)                     |
| 016   | Green Gasoline Regular (Plant based not petroleum based)       |
| 017   | Green Gasoline Mid/Plus (Plant based not petroleum based)      |
| 018   | Green Gasoline Premium/Super (Plant based not petroleum based) |
| 019   | Regular Diesel #2                                              |
| 020   | Premium Diesel #2                                              |
| 021   | Regular Diesel #1                                              |
| 022   | Compressed Natural Gas                                         |
| 023   | Liquid Propane Gas                                             |
| 024   | Liquid Natural Gas                                             |
| 026   | E-85                                                           |
| 027   | Reformulated 1                                                 |
| 028   | Reformulated 2                                                 |

| 399   | Miscellaneous Other Fuel                                                            |

### Subfield 2 (Fleet Fuel Unit Price)

If PDS 0782 is present, subfield 2 must be right-justified and numeric.

The fleet fuel unit price must be right justified with three positions to the right of the decimal.

### Subfield 3 (Fleet Fuel Unit of Measure)

If PDS 0782 is present, Fleet Fuel Unit of Measure must be a space or in the range 1–8 as in this table.

#### Values and descriptions

| Value | Description      |
|-------|------------------|
| 1     | Gallons          |
| 2     | Liters           |
| 3     | Pounds           |
| 4     | Kilos            |
| 5     | Imperial gallons |
| 6     | Kilowatt hour    |
| 7     | Minutes          |
| 8     | Hours            |
| Space | Not Applicable   |

### Subfield 4 (Fleet Fuel Quantity)

If PDS 0782 is present, fleet fuel quantity must be numeric and greater than zero.

## Subfield 5 (Fleet Fuel Quantity Exponent)

If PDS 0782 is present, fleet fuel quantity exponent must be in the range 0–5. PDS 0782, subfield 5 (Fleet Fuel Quantity Exponent) is assumed to be three positions.

## Subfield 6 (Fleet Fuel Sale Amount)

If PDS 0782 is present, Fleet Fuel Sale Amount must be numeric and greater than zero and in the same currency as the First Presentment/1240.

The currency exponent for PDS 0782, subfield 6 (Fleet Fuel Sale Amount) is based on the exponent associated with the DE 49 (Currency Code, Transaction) from the associated First Presentment/1240 message.

## PDS 0783 (Fleet Product Code)

PDS 0783 (Fleet Product Code) contains the non-fuel related product code of the individual item purchased.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | n-3; TAGLLLLVAR                 |
| Tag Field           | 0783                            |
| Data Length         | 3 positions, value = 001–015    |
| Data Field          | Variable length, 1–15 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                         | Org | Sys | Dst |
|-----------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/<br>1644 | C   | •   | C   |

The Fleet Product Code should be provided for Fleet card transactions occurring at fuel locations, when PDS 0622 (Motor Fuel Service Type) is a value of 3.

Usage of PDS 0783 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0783 (Fleet Product Code) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet non-fuel maintenance location MCCs: 5013, 5511, 5531, 5532, 5533, 5599, 7531, 7534, 7535, 7538, 7542, 7549, 7692, or 7699
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                    |
|-----|--------------------------------|
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

PDS 0783 (Fleet Product Code) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur:

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5552, or 5983
- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

## Values

When a Financial Detail Addendum (Corporate Line-Item Detail)/1644 is submitted in conjunction with non-fuel purchases conducted with a Mastercard Corporate Fleet Card or Mastercard Government Commercial Card at a non-fuel location, PDS 0783 should be provided and must contain a three-position non-fuel product code listed in this table.

The following list of product code values is based on the Conexus Payment System Product Codes version 4.1.

## Values

| Value | Description                    |
|-------|--------------------------------|
| 100   | General Automotive Merchandise |
| 101   | Motor Oil                      |
| 102   | Car Wash                       |
| 103   | Oil Change                     |
| 104   | Oil Filter                     |
| 105   | Work Order                     |
| 106   | Anti-Freeze                    |
| 107   | Washer Fluid                   |
| 108   | Brake Fluid                    |
| 109   | Tires                          |
| 110   | Federal Excise Tax (Tires)     |

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0641 (Product Code), unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0783 (Fleet Product Code) and PDS 0783 must contain a valid value.

## PDS 0784 (Fleet Item Description)

PDS 0784 (Fleet Item Description) contains the description of the non-fuel item being purchased.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...35; TAGLLLLVAR            |
| Tag Field           | 0784                            |
| Data Length         | 3 positions, value = 001–035    |
| Data Field          | Variable length, 1–35 positions |
| Subfields           | None                            |
| Justification       | Left                            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                            | Org | Sys | Dst |
|--------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Line Item Detail)/<br>1644 | C   | .   | C   |

PDS 0784 (Fleet Item Description) should be present in the Financial Detail Addendum (Corporate Line-Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

Usage of PDS 0784 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0784 (Fleet Item Description) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet non-fuel maintenance location MCCs: 5013, 5511, 5531, 5532, 5533, 5599, 7531, 7534, 7535, 7538, 7542, 7549, 7692, or 7699
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                    |
|-----|--------------------------------|
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

PDS 0784 (Fleet Item Description) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5552, or 5983.
- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

#### Values

PDS 0784 must be left justified, cannot contain all spaces, and a minimum length of 1 and a maximum length of 35.

Fleet Item Description must contain the description of the individual item purchased exactly as shown on the Transaction Information Document (Transaction receipt) or buyer invoice.

Fleet Item Description must not contain repetitive characters, strings of numbers or special characters, or generic descriptors. For example, the following values must not be used:

- Food/Grocery
- General Merchandise/Merchandise
- Government Services
- Insurance
- Invoice/Invoice Charges
- Label
- Miscellaneous/Misc
- Other
- Parts
- Payment On Account
- Product
- Services
- Utility Bill/Bill/Bill Payment

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0642 (Item Description), unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0784 (Fleet Item Description) and PDS 0784 must contain a meaningful description for the good or service purchased.

## PDS 0785 (Fleet Item Quantity)

PDS 0785 (Fleet Item Quantity) indicates the quantity of the item purchased and the associated decimal point location.

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644 | C   | .   | C   |

PDS 0785 (Fleet Item Quantity) should be present in the Financial Detail Addendum (Corporate Line-Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

Usage of PDS 0785 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0785 (Fleet Item Quantity) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet non-fuel maintenance location MCCs: 5013, 5511, 5531, 5532, 5533, 5599, 7531, 7534, 7535, 7538, 7542, 7549, 7692, or 7699.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                    |
|-----|--------------------------------|
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

PDS 0785 (Fleet Item Quantity) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5552, or 5983.

- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

PDS 0785 must be a fixed length of 13.

### Subfields

PDS 0785 consists of two subfields. PDS 0785 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name                         | Attribute | Justification |
|--------|----------|------------------------------|-----------|---------------|
| 1      | 1-12     | Fleet Item Quantity          | n-12      | right         |
| 2      | 13       | Fleet Item Quantity Exponent | n-1       | N/A           |

### Subfield 1 (Fleet Item Quantity)

If present, subfield 1 (Fleet Item Quantity) must be numeric and greater than zero.

### Subfield 2 (Fleet Item Quantity Exponent)

Subfield 2 (Fleet Item Quantity Exponent) indicates the decimal location for the Item Quantity subfield.

If PDS 0785 is present, subfield 2 must be numeric and contain a value of 0 to 5.

## PDS 0786 (Fleet Item Unit of Measure)

PDS 0786 (Fleet Item Unit of Measure) contains the line-item unit of measurement code.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...12; TAGLLLLVAR            |
| Tag Field           | 0786                            |
| Data Length         | 3 positions, value = 001–012    |
| Data Field          | Variable length, 1–12 positions |
| Subfields           | None                            |
| Justification       | N/A                             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                     | Org | Sys | Dst |
|-------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum (Corporate Line Item Detail)/1644 | C   | .   | C   |

PDS 0786 (Fleet Item Unit of Measure) should be present in the Financial Detail Addendum (Corporate Line-Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

Usage of PDS 0786 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0786 (Fleet Item Unit of Measure) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet non-fuel maintenance location MCCs: 5013, 5511, 5531, 5532, 5533, 5599, 7531, 7534, 7535, 7538, 7542, 7549, 7692, or 7699.

- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                    |
|-----|--------------------------------|
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

PDS 0786 (Fleet Item Unit of Measure) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5552, or 5983.
- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

#### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

#### Values

If present, PDS 0786 cannot contain all zeros or all spaces.

Fleet Item Unit of Measure must contain a valid four character unit of measure code as defined in the Fleet Item Unit of Measure Table.

### Fleet Item Unit of Measure

| Measure Code | Name       | Definition                                                                        |
|--------------|------------|-----------------------------------------------------------------------------------|
| ACRE         | Acre       | Unit of measure equal to 4840 square yards.                                       |
| ARES         | Are        | Unit of measure equal to 100 square meters                                        |
| CELI         | Centiliter | Unit of volume that is equal to one hundredth of a liter.                         |
| CMET         | Centimeter | Unit of measure that is equal to one hundredth of a meter.                        |
| EACH         | Each       | One of two or more distinct items.                                                |
| FOOT         | Foot       | Unit of length equal to 1/3 yard.                                                 |
| GBGA         | GBGallon   | Unit of volume that is equal to 8 pints.                                          |
| GBOU         | GBOunce    | Unit of weight equal to one sixteenth of a pound.                                 |
| GBPI         | GBPint     | Unit of volume that is equal to 568 cubic centimeters.                            |
| GBQA         | GBQuart    | Unit of volume that is equal to 2 pints.                                          |
| GRAM         | Gram       | Unit of measure that is equal to one 1,000th of a kilo.                           |
| HECT         | Hectare    | Unit of measure that is equal to 10,000 square meters.                            |
| INCH         | Inch       | Measure of length equal to 2.54 cm.                                               |
| KILO         | Kilogram   | Basic unit of mass in the International System of Units (SI) equal to 1000 grams. |
| KMET         | Kilometer  | Unit of measure that is equal to 1000 meters.                                     |
| LITR         | Liter      | Unit of volume that is equal to one thousand cubic centimeters.                   |
| METR         | Meter      | Unit of length in the metric system equal to 39.37 inches.                        |

| Measure Code | Name             | Definition                                                                         |
|--------------|------------------|------------------------------------------------------------------------------------|
| MILE         | Mile             | Unit of length equal to 1760 yards.                                                |
| MILI         | MilliLiter       | Unit of volume that is equal to one thousandth of a liter.                         |
| MMET         | Millimeter       | Unit of measure that is equal to one thousandth of one meter.                      |
| PIEC         | Piece            | Standard length of cloth, wallpaper, as an item for sale or amount of a substance. |
| PUND         | Pound            | Unit of weight equal to 0.454 kilograms.                                           |
| SCMT         | SquareCentimeter | Measure of a surface one centimeter by one centimeter.                             |
| SMET         | SquareMeter      | Measure of a surface one meter by one meter.                                       |
| SMIL         | SquareMillimeter | Measure of a surface one millimeter by one millimeter.                             |
| SQFO         | SquareFoot       | Measure of a surface one foot by one foot.                                         |
| SQIN         | SquareInch       | Measure of a surface one inch by one inch.                                         |
| SQKI         | SquareKilometer  | Measure of a surface one kilometer by one kilometer.                               |
| SQMI         | SquareMile       | Measure of a surface one mile by one mile.                                         |
| SQYA         | SquareYard       | Measure of a surface one yard by one yard.                                         |
| TONS         | Ton              | Measure of weight, in Britain 2240lb (long ton) and in the US 2000lb (short ton).  |
| USGA         | USGallon         | Unit of volume that is equal to 8 pints.                                           |
| USOU         | USOunce          | Unit of weight equal to one sixteenth of a pound.                                  |
| USPI         | USPint           | Unit of volume that is equal to 473 cubic centimeters.                             |
| USQA         | USQuart          | Unit of volume that is equal to 2 pints.                                           |

| Measure Code | Name | Definition                                      |
|--------------|------|-------------------------------------------------|
| YARD         | Yard | Unit of length equal to 3 feet or 0.9144 meter. |

### Processing rules

When an occurrence of the Financial Detail Addendum (Corporate Line Item Detail)/1644 addendum message is submitted in association with a First Presentment/1240 message, it must include PDS 0645 (Item Unit of Measure), unless it is a qualifying Mastercard Fleet Card transaction with a fleet card product code of MCF or MGF that requires the presence of PDS 0786 (Fleet Item Unit of Measure) and PDS 0786 must contain a valid unit of measurement as defined in the Fleet Item Unit of Measure Table.

## PDS 0787 (Fleet Extended Item Amount)

PDS 0787(Fleet Extended Item Amount) contains the individual item amount that is normally calculated as price multiplied by quantity.

### Attributes

| Attribute           | Description                |
|---------------------|----------------------------|
| Data Representation | ans-14; TAGLLL             |
| Tag Field           | 0787                       |
| Data Length         | 3 positions, value = 014   |
| Data Field          | Fixed length, 14 positions |
| Subfields           | 3                          |
| Justification       | See "Subfields"            |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                            | Org | Sys | Dst |
|--------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Line Item Detail)/<br>1644 | C   | .   | C   |

PDS 0787 (Fleet Item Quantity) should be present in the Financial Detail Addendum (Corporate Line-Item Detail)/1644 message when PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

Usage of PDS 0787 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0787 (Fleet Extended Item Amount) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet non-fuel maintenance location MCCs: 5013, 5511, 5531, 5532, 5533, 5599, 7531, 7534, 7535, 7538, 7542, 7549, 7692, or 7699.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                    |
|-----|--------------------------------|
| F3  | Commercial Fleet Data Rate III |
| FL  | Commercial Fleet Large Ticket  |

PDS 0787 (Fleet Extended Item Amount) must be present in the Financial Detail Addendum (Corporate Line Item Detail)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5552, or 5983.
- PDS 0622 (Motor Fuel Service Type) is present with a value of 3 (Only non-fuel items being purchased) in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message.

- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F1  | Commercial Fleet Data Rate I  |
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0787 must be a fixed length of 014.

To allow for situations in which the item is zero cost to the customer, PDS 0650 (Zero Cost to Customer) must also be present in the Corporate Line Item Detail Addendum message, and equal to Y. PDS 0787 subfield 1 may contain zero in this circumstance.

### Subfields

PDS 0787 consists of three subfields. PDS 0787 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name                                | Attribute | Justification |
|--------|----------|-------------------------------------|-----------|---------------|
| 1      | 1-12     | Fleet Extended Item Amount          | n-12      | right         |
| 2      | 13       | Fleet Extended Item Amount Exponent | n-1       | N/A           |
| 3      | 14       | Fleet Extended Item Amount Sign     | a-1       | N/A           |

### Subfield 1 (Fleet Extended Item Amount)

If PDS 0787 is present, subfield 1 (Fleet Extended Item Amount) must contain the amount and be numeric and greater than zero, unless PDS 0650 (Zero Cost to Customer) is present and equal to Y.

## Subfield 2 (Fleet Extended Item Amount Exponent)

If PDS 0787 is present, subfield 2 (Fleet Extended Item Amount Exponent) must be numeric and contain a value of 0 to 5.

**NOTE: Financial Detail Addendum/1644 messages that contain amounts and amounts exponents should use the same currency and exponent of the Amount, Transaction in the associated First Presentment/1240 message.**

## Subfield 3 (Fleet Extended Item Amount Sign)

If PDS 0787 is present, subfield 3 (Fleet Extended Item Amount Sign) must contain a value of D or C. This subfield identifies whether PDS 0787 is a debit or credit from the perspective of the cardholder.

### Values and descriptions

| Value | Description                       |
|-------|-----------------------------------|
| D     | Extended item amount is a debit.  |
| C     | Extended item amount is a credit. |

## PDS 0790 (Fleet Prompted Data 1)

PDS 0790 (Fleet Prompted Data 1) contains the Prompt Code read from a card chip that indicates prompts that occur at the point of interaction and the data entered in response by the cardholder into the point-of-sale device.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...38; TAGLLLLVAR            |
| Tag Field           | 0790                            |
| Data Length         | 3 positions, value = 004-038    |
| Data Field          | Variable length, 4-38 positions |
| Subfields           | 2                               |
| Justification       | See Subfields                   |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                        | Org | Sys | Dst |
|--------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Fleet Transaction<br>Information)/1644 | C   | .   | C   |

Usage of PDS 0790 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

PDS 0790 (Fleet Prompted Data 1) must be present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5542, or 5983.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

## Values

If present, PDS 0790 must be variable length of 4-38 positions.

## Subfields

PDS 0790 consists of two subfields. PDS 0790 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name                  | Attribute | Justification |
|--------|----------|-----------------------|-----------|---------------|
| 1      | 1-3      | Prompt Code 1         | n-3       | Right         |
| 2      | 4-38     | Driver Related Data 1 | ans-1     | Left          |

### Subfield 1 (Prompt Code 1)

Prompt Code contains a code that specifies the information requested to be provided by the cardholder at the POI.

### Values and descriptions

If present, PDS 0790 subfield 1 (Prompt Code 1) must contain one of the values listed in this table.

### Values

| Value | Description              |
|-------|--------------------------|
| 001   | User ID                  |
| 002   | Vehicle Number           |
| 003   | Vehicle Tag              |
| 004   | Driver ID                |
| 005   | Odometer                 |
| 009   | Work Order / P.O. Number |
| 010   | Invoice Number           |
| 011   | Trip Number              |
| 012   | Unit Number              |
| 013   | Reefer Hours             |
| 015   | ZIP Code / Postal Code   |
| 016   | Replacement Car          |
| 017   | Entered Data Num         |
| 018   | Web Portal Data          |
| 019   | Entered Data Alpha       |

Data element and private data subelement definitions and details  
Subfield 1 (Prompt Code 1)

| Value | Description             |
|-------|-------------------------|
| 021   | Job Number              |
| 022   | Maintenance ID          |
| 023   | Department Number       |
| 024   | Trailer Number          |
| 025   | Delivery Ticket Number  |
| 026   | Hubometer               |
| 033   | Sub Fleet Number        |
| 035   | Transaction Number      |
| 036   | Control Number          |
| 038   | Reefer Temperature      |
| 040   | Driver or Vehicle Card  |
| 041   | Customer Number         |
| 042   | Additional Card Data    |
| 043   | Additional Vehicle Data |
| 044   | Engine Hours            |
| 045   | Tank Level Start        |
| 046   | Fuel Gauge Level        |
| 047   | Battery Voltage         |
| 048   | Coolant Temperature     |
| 049   | Check Engine Status     |
| 050   | Fuel Economy            |
| 051   | Engine RPM              |
| 052   | Engine Load             |
| 053   | Engine Oil Temperature  |
| 054   | Engine Time Total       |
| 055   | Hard Breaking           |
| 056   | Hard Acceleration       |
| 058   | Idle Time               |
| 065   | Total Idle Time         |
| 067   | Engine Oil Pressure     |
| 068   | Engine Oil Life         |

| Value | Description       |
|-------|-------------------|
| 069   | Billing ID        |
| 999   | No prompts issued |

## Subfield 2 (Driver Related Data 1)

Driver Related Data contains the data entered in response to the Prompt Code obtained at the POS.

If present, PDS 0790, subfield 2 (Driver Related Data 1) must be left justified and cannot contain all spaces.

Acquirers must populate the Driver Related Data 1 field with the value of 999 when the Prompt Code 1 field contains the value of 999.

## PDS 0791 (Fleet Prompted Data 2)

PDS 0791 (Fleet Prompted Data 2) contains the Prompt Code read from a card chip that indicates prompts that occur at the point of interaction and the data entered in response by the cardholder into the point-of-sale device.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...38; TAGLLLVAR             |
| Tag Field           | 0791                            |
| Data Length         | 3 positions, value = 004-038    |
| Data Field          | Variable length, 4-38 positions |
| Subfields           | 2                               |
| Justification       | See Subfields                   |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                        | Org | Sys | Dst |
|--------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Fleet Transaction<br>Information)/1644 | C   | .   | C   |

Usage of PDS 0791 is required only for EMV chip cards personalized using the IFSF/Conexus specification for retrieving supplemental data from acceptors and cardholders.

If PDS 0791 (Fleet Prompted Data 2) is present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur, then PDS 0790 (Fleet Prompted Data 1) must also be present.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5542, or 5983.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0791 must be variable length of 4-38 positions.

### Subfields

PDS 0791 consists of two subfields. PDS 0791 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name          | Attribute | Justification |
|--------|----------|---------------|-----------|---------------|
| 1      | 1-3      | Prompt Code 2 | n-3       | Right         |

| Number | Position | Name                  | Attribute | Justification |
|--------|----------|-----------------------|-----------|---------------|
| 2      | 4-38     | Driver Related Data 2 | ans-1     | Left          |

## Subfield 1 (Prompt Code 2)

Prompt Code contains a code that specifies the information requested to be provided by the cardholder at the POI.

### Values and descriptions

If present, PDS 0791 subfield 1 (Prompt Code 2) must contain one of the values listed in this table.

#### Values

| Value | Description              |
|-------|--------------------------|
| 001   | User ID                  |
| 002   | Vehicle Number           |
| 003   | Vehicle Tag              |
| 004   | Driver ID                |
| 005   | Odometer                 |
| 009   | Work Order / P.O. Number |
| 010   | Invoice Number           |
| 011   | Trip Number              |
| 012   | Unit Number              |
| 013   | Reefer Hours             |
| 015   | ZIP Code / Postal Code   |
| 016   | Replacement Car          |
| 017   | Entered Data Num         |
| 018   | Web Portal Data          |
| 019   | Entered Data Alpha       |
| 021   | Job Number               |
| 022   | Maintenance ID           |
| 023   | Department Number        |

Data element and private data subelement definitions and details  
Subfield 1 (Prompt Code 2)

| Value | Description             |
|-------|-------------------------|
| 024   | Trailer Number          |
| 025   | Delivery Ticket Number  |
| 026   | Hubometer               |
| 033   | Sub Fleet Number        |
| 035   | Transaction Number      |
| 036   | Control Number          |
| 038   | Reefer Temperature      |
| 040   | Driver or Vehicle Card  |
| 041   | Customer Number         |
| 042   | Additional Card Data    |
| 043   | Additional Vehicle Data |
| 044   | Engine Hours            |
| 045   | Tank Level Start        |
| 046   | Fuel Gauge Level        |
| 047   | Battery Voltage         |
| 048   | Coolant Temperature     |
| 049   | Check Engine Status     |
| 050   | Fuel Economy            |
| 051   | Engine RPM              |
| 052   | Engine Load             |
| 053   | Engine Oil Temperature  |
| 054   | Engine Time Total       |
| 055   | Hard Breaking           |
| 056   | Hard Acceleration       |
| 058   | Idle Time               |
| 065   | Total Idle Time         |
| 067   | Engine Oil Pressure     |
| 068   | Engine Oil Life         |
| 069   | Billing ID              |
| 999   | No prompts issued       |

## Subfield 2 (Driver Related Data 2)

Driver Related Data contains the data entered in response to the Prompt Code obtained at the POS.

If present, PDS 0791, subfield 2 (Driver Related Data 2) must be left justified and cannot contain all spaces.

Acquirers must populate the Driver Related Data 2 field with the value of 999 when the Prompt Code 2 field contains the value of 999.

## PDS 0792 (Fleet Prompted Data 3)

PDS 0792 (Fleet Prompted Data 3) contains the Prompt Code read from a card chip that indicates prompts that occur at the point of interaction and the data entered in response by the cardholder into the point-of-sale device.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...38; TAGLLLVAR             |
| Tag Field           | 0792                            |
| Data Length         | 3 positions, value = 004-038    |
| Data Field          | Variable length, 4-38 positions |
| Subfields           | 2                               |
| Justification       | See Subfields                   |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                        | Org | Sys | Dst |
|--------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Fleet Transaction<br>Information)/1644 | C   | .   | C   |

Usage of PDS 0792 is required only for EMV chip cards personalized using the IFSF/Conexxus specification for retrieving supplemental data from acceptors and cardholders.

If PDS 0792 (Fleet Prompted Data 3) is present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur, then PDS 0790 (Fleet Prompted Data 1) and PDS 0791 (Fleet Prompted Data 2) must also be present.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5542, or 5983.
- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0792 must be variable length of 4-38 positions.

### Subfields

PDS 0792 consists of two subfields. PDS 0792 subfields are listed in this table.

| Number | Position | Name                  | Attribute | Justification |
|--------|----------|-----------------------|-----------|---------------|
| 1      | 1-3      | Prompt Code 3         | n-3       | Right         |
| 2      | 4-38     | Driver Related Data 3 | ans-1     | Left          |

### Subfield 1 (Prompt Code 3)

Prompt Code contains a code that specifies the information requested to be provided by the cardholder at the POI.

### Values and descriptions

If present, PDS 0792 subfield 1 (Prompt Code 3) must contain one of the values listed in this table.

### Value descriptions

| Values | Description              |
|--------|--------------------------|
| 001    | User ID                  |
| 002    | Vehicle Number           |
| 003    | Vehicle Tag              |
| 004    | Driver ID                |
| 005    | Odometer                 |
| 009    | Work Order / P.O. Number |
| 010    | Invoice Number           |
| 011    | Trip Number              |
| 012    | Unit Number              |
| 013    | Reefer Hours             |
| 015    | ZIP Code / Postal Code   |
| 016    | Replacement Car          |
| 017    | Entered Data Num         |
| 018    | Web Portal Data          |
| 019    | Entered Data Alpha       |
| 021    | Job Number               |
| 022    | Maintenance ID           |
| 023    | Department Number        |
| 024    | Trailer Number           |
| 025    | Delivery Ticket Number   |
| 026    | Hubometer                |
| 033    | Sub Fleet Number         |
| 035    | Transaction Number       |
| 036    | Control Number           |
| 038    | Reefer Temperature       |
| 040    | Driver or Vehicle Card   |
| 041    | Customer Number          |
| 042    | Additional Card Data     |

| Values | Description             |
|--------|-------------------------|
| 043    | Additional Vehicle Data |
| 044    | Engine Hours            |
| 045    | Tank Level Start        |
| 046    | Fuel Gauge Level        |
| 047    | Battery Voltage         |
| 048    | Coolant Temperature     |
| 049    | Check Engine Status     |
| 050    | Fuel Economy            |
| 051    | Engine RPM              |
| 052    | Engine Load             |
| 053    | Engine Oil Temperature  |
| 054    | Engine Time Total       |
| 055    | Hard Breaking           |
| 056    | Hard Acceleration       |
| 058    | Idle Time               |
| 065    | Total Idle Time         |
| 067    | Engine Oil Pressure     |
| 068    | Engine Oil Life         |
| 069    | Billing ID              |
| 999    | No prompts issued       |

## Subfield 2 (Driver Related Data 3)

Driver Related Data contains the data entered in response to the Prompt Code obtained at the POS.

If present, PDS 0792, subfield 2 (Driver Related Data 3) must be left justified and cannot contain all spaces.

Acquirers must populate the Driver Related Data 3 field with the value of 999 when the Prompt Code 2 field contains the value of 999.

## PDS 0793 (Fleet Prompted Data 4)

PDS 0793 (Fleet Prompted Data 4) contains the Prompt Code read from a card chip that indicates prompts that occur at the point of interaction and the data entered in response by the cardholder into the point-of-sale device.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...38; TAGLLLLVAR            |
| Tag Field           | 0793                            |
| Data Length         | 3 positions, value = 004-038    |
| Data Field          | Variable length, 4-38 positions |
| Subfields           | 2                               |
| Justification       | See Subfields                   |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                        | Org | Sys | Dst |
|--------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Fleet Transaction<br>Information)/1644 | C   | .   | C   |

Usage of PDS 0793 is required only for EMV chip cards personalized using the IFSF/Conexxus specification for retrieving supplemental data from acceptors and cardholders.

If PDS 0793 (Fleet Prompted Data 4) is present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur, then PDS 0790 (Fleet Prompted Data 1), PDS 0791 (Fleet Prompted Data 2), and PDS 0792 (Fleet Prompted Data 3) must also be present.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5542, or 5983.

- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRDs and descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0793 must be variable length of 4-38 positions.

### Subfields

PDS 0793 consists of two subfields. PDS 0793 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name                  | Attribute | Justification |
|--------|----------|-----------------------|-----------|---------------|
| 1      | 1-3      | Prompt Code 4         | n-3       | Right         |
| 2      | 4-38     | Driver Related Data 4 | ans-1     | Left          |

## Subfield 1 (Prompt Code 4)

Prompt Code contains a code that specifies the information requested to be provided by the cardholder at the POI.

### Values and descriptions

If present, PDS 0793 subfield 1 (Prompt Code 4) must contain one of the values listed in this table.

### Values

| Value | Description |
|-------|-------------|
| 001   | User ID     |

Data element and private data subelement definitions and details  
Subfield 1 (Prompt Code 4)

| Value | Description              |
|-------|--------------------------|
| 002   | Vehicle Number           |
| 003   | Vehicle Tag              |
| 004   | Driver ID                |
| 005   | Odometer                 |
| 009   | Work Order / P.O. Number |

| 999   | No prompts issued      |

## Subfield 2 (Driver Related Data 4)

Driver Related Data contains the data entered in response to the Prompt Code obtained at the POS

If present, PDS 0793, subfield 2 (Driver Related Data 4) must be left justified and cannot contain all spaces.

Acquirers must populate the Driver Related Data 4 field with the value of 999 when the Prompt Code 4 field contains the value of 999.

## PDS 0794 (Fleet Prompted Data 5)

PDS 0794 (Fleet Prompted Data 5) contains the Prompt Code read from a card chip that indicates prompts that occur at the point of interaction and the data entered in response by the cardholder into the point-of-sale device.

### Attributes

| Attribute           | Description                     |
|---------------------|---------------------------------|
| Data Representation | ans...38; TAGLLLLVAR            |
| Tag Field           | 0794                            |
| Data Length         | 3 positions, value = 004-038    |
| Data Field          | Variable length, 4-38 positions |
| Subfields           | 2                               |
| Justification       | See "Subfields"                 |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

| Message                                                                        | Org | Sys | Dst |
|--------------------------------------------------------------------------------|-----|-----|-----|
| Financial Detail Addendum<br>(Corporate Fleet Transaction<br>Information)/1644 | C   | .   | C   |

Usage of PDS 0794 is required only for EMV chip cards personalized using the IFSF/Conexxus specification for retrieving supplemental data from acceptors and cardholders.

If PDS 0794 (Fleet Prompted Data 5) is present in the Financial Detail Addendum (Corporate Fleet Transaction Information)/1644 message for Fleet Card product MCF and MGF transactions when all these conditions occur, then PDS 0790 (Fleet Prompted Data 1), PDS 0791 (Fleet Prompted Data 2), PDS 0792 (Fleet Prompted Data 3), and PDS 0793 (Fleet Prompted Data 4) must also be present.

- DE 26 (Acceptor Business Code [MCC]) contains one of the following Fleet fuel location MCCs: 4468, 5499, 5541, 5542, or 5983.

- Transaction qualifies for the U.S. Region business service arrangement 2/010001 where PDS 0158, subfield 2 is equal to 2 and PDS 0158, subfield 3 is equal to 010001.
- First Presentment/1240 is submitted with one of the IRDs listed in this table.

### IRD descriptions

| IRD | Description                   |
|-----|-------------------------------|
| F2  | Commercial Fleet Data Rate II |
| FL  | Commercial Fleet Large Ticket |

### Values

If present, PDS 0794 must be variable length of 4-38 positions.

### Subfields

PDS 0794 consists of two subfields. PDS 0794 subfields are listed in this table.

### Subfield attributes and values

| Number | Position | Name                  | Attribute | Justification |
|--------|----------|-----------------------|-----------|---------------|
| 1      | 1-3      | Prompt Code 5         | n-3       | Right         |
| 2      | 4-38     | Driver Related Data 5 | ans-1     | Left          |

## Subfield 1 (Prompt Code 5)

Prompt Code contains a code that specifies the information requested to be provided by the cardholder at the POI.

### Values and descriptions

If present, PDS 0794 subfield 1 (Prompt Code 5) must contain one of the values listed in this table.

### Values

| Value | Description |
|-------|-------------|
| 001   | User ID     |

Data element and private data subelement definitions and details  
Subfield 1 (Prompt Code 5)

| Value | Description              |
|-------|--------------------------|
| 002   | Vehicle Number           |
| 003   | Vehicle Tag              |
| 004   | Driver ID                |
| 005   | Odometer                 |
| 009   | Work Order / P.O. Number |

| 023   | Department Number        |
| 024   | Trailer Number           |
| 025   | Delivery Ticket Number   |
| 026   | Hubometer                |
| 033   | Sub Fleet Number         |
| 035   | Transaction Number       |
| 036   | Control Number           |
| 038   | Reefer Temperature       |
| 040   | Driver or Vehicle Card   |
| 041   | Customer Number          |
| 042   | Additional Card Data     |
| 043   | Additional Vehicle Data  |
| 044   | Engine Hours             |
| 045   | Tank Level Start         |
| 046   | Fuel Gauge Level         |

| Value | Description            |
|-------|------------------------|
| 047   | Battery Voltage        |
| 048   | Coolant Temperature    |
| 049   | Check Engine Status    |
| 050   | Fuel Economy           |
| 051   | Engine RPM             |
| 052   | Engine Load            |
| 053   | Engine Oil Temperature |
| 054   | Engine Time Total      |
| 055   | Hard Breaking          |
| 056   | Hard Acceleration      |
| 058   | Idle Time              |
| 065   | Total Idle Time        |
| 067   | Engine Oil Pressure    |
| 068   | Engine Oil Life        |
| 069   | Billing ID             |
| 999   | No prompts issued      |

## Subfield 2 (Driver Related Data 5)

Driver Related Data contains the data entered in response to the Prompt Code obtained at the POS.

If present, PDS 0794, subfield 2 (Driver Related Data 5) must be left justified and cannot contain all spaces.

Acquirers must populate the Driver Related Data 5 field with the value of 999 when the Prompt Code 5 field contains the value of 999.

## PDS 0799 (Test Case Traceability Identifiers)

PDS 0799 (Test Case Traceability Identifiers) provides an audit trail for various messages within a specified test transaction.

This PDS is used for Mastercard internal testing and customer testing.

## Attributes

| Attribute           | Description                                      |
|---------------------|--------------------------------------------------|
| Data Representation | ans...165; TAGLLLVAR                             |
| Tag Field           | 0799                                             |
| Data Length         | 3 positions, value = 033–165 in increments of 33 |
| Data Field          | Variable length, 33–165 positions                |
| Subfields           | 2 subfields for each Test Case occurrence        |
| Occurrences         | 1–5                                              |

## Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

## Applicable messages

This PDS contains 1–5 test case numbers. The transaction originator optionally may provide it. Its purpose is to trace the associated message to 1 to 5 internal Mastercard® or customer test cases. This may assist the transaction originator in evaluating test results. The IPM Pre-edit application retains this PDS throughout its processing. GCMS removes this PDS from the message before sending the message to the receiving customer.

### Values

The transaction originator assigns PDS 0799 values.

If present, PDS 0799 must be left-justified and cannot contain all low values, all high values, all spaces, or all zeros.

### PDS 0799 subfields

This PDS may contain one to five test case traceability identifiers.

Each traceability identifier requires 33 positions; the maximum length of this PDS is 165 positions. None of these subfields is optional; that is, all 33 positions must be provided for each occurrence. Each traceability identifier consists of two subfields as defined in this table.

### PDS 0799 subfields

| Number | Positions | Name                                                                                   | Attribute | Justification |

| 1      | 1–8       | Auxiliary Field 1 - An identifier for internal Mastercard® testing or customer testing | ans-8     | left          |
| 2      | 9–33      | Auxiliary Field 2 - An identifier for internal Mastercard® testing or customer testing | ans-25    | left          |

## PDS 1000–1099 (Member-to-Member Proprietary Data)

PDS 10XX (Member-to-Member Proprietary Data) contains 100 private data subelements (1000–1099) used exclusively for reporting member-to-member proprietary data.

Customers can use these PDSs to exchange with other participating customers information that is not defined and captured in other elements.

These PDSs are reserved for member-to-member proprietary data. Customers that want to exchange data that is not defined in another data element or PDS may agree to define the data between themselves and present it in one or multiple PDSs in the 1000–1099 range.

### Attributes

| Attribute           | Description                      |
|---------------------|----------------------------------|
| Data Representation | ans...992; TAGLLLVAR             |
| Tag Field           | 10XX (1000-1099)                 |
| Data Length         | 3 positions, value = 001–992     |
| Data Field          | Variable length, 1–992 positions |
| Subfields           | None                             |
| Justification       | None                             |

### Usage

This table shows the usage of this PDS (whether it is mandatory, conditional, optional, system-provided, or not required) in applicable messages.

### Applicable messages

## Values

Customers may choose one of two options in presenting member-to-member proprietary data in their messages.

- Customers that want to send or receive proprietary data, but would rather use their own parsing routines to parse their data, may opt to use a single PDS within the range of 1000 to 1099 and provide one string of up to 992 characters of data. With this option, customers would provide a single PDS tag (ID) and one length definition, followed by the data string. The clearing system parsers will leave this customer data intact.
- Customers that want to send or receive proprietary data, but would like Mastercard to parse the data, may opt to use up to 100 individual PDSs within the range of 1000 to 1099 to define their data. Under this option, customers will need to use the normal tag-length-data PDS encoding structure to define as many PDSs as they choose to use. This will provide the clearing system parsers with the appropriate information to parse the data for inbound and outbound messages. Customers may provide up to an overall total of 999 positions (including tags, lengths, and data for all PDSs assigned within the range) per message.

Member-to-Member data in PDSs 1000 through 1099 may be presented in all messages originated by customers and may be included in any of the Additional Data data elements (DE 48, DE 62, DE 123, DE 124, and DE 125).

The contents of a single or of multiple PDSs in the 1000–1099 range must be in display format. The clearing system does not accommodate binary data in these subelements.

PDS 1000–1099 Member-to-Member Proprietary Data cannot be all low values or all high values.

PDS 1000 (Member-to-Member Proprietary Data) designates new commercial product type MLF issued in Brazil only. The values listed in this table are used with the Brazil Agro Program.

## Values

| Field Name/Positions                 | Type    | Size | Comments                                                                                                            |
|--------------------------------------|---------|------|---------------------------------------------------------------------------------------------------------------------|
| Financing Type (Positions 1–20)      | Alpha   | 20   | Type of loan operation, agreed between Merchant and issuer. Examples: AGRO-CUSTEIO, AGRO-INVEST, FINAME, CBN.       |
| Buyer ID Type (Position 21)          | Alpha   | 1    | Possible values: F or J.                                                                                            |
| Buyer ID (Positions 22–35)           | Numeric | 14   | Merchant to fill in with cardholder's CPF or company's CNPJ number or issuers to supply with company's CNPJ number. |
| Buyer Phone Number (Positions 36–46) | Numeric | 11   | Merchant to fill in with buyer phone number.                                                                        |

| Field Name/Positions                          | Type         | Size                     | Comments                                                                                                                                        |
|-----------------------------------------------|--------------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Purchase Identification (Positions 47–66)     | Alphanumeric | 20                       | Invoice Data or Purchase Request Data, depending on the agreement between the merchant and issuer.                                              |
| Installments Cycle (Positions 67–68)          | Numeric      | 2                        | Different amortization types than monthly. For future use, it does not affect transaction clearing and settlement.                              |
| Interest Rate (Positions 69–86)               | Numeric      | 18 (12.6 <sup>18</sup> ) | Interest rate on loan. For future use.                                                                                                          |
| Grace Period (Positions 87–89)                | Numeric      | 3                        | Number of amortization cycles to wait before charging the installments. For future use, it does not affect transaction clearing and settlement. |
| Grace Period Cycle (Positions 90–92)          | Numeric      | 3                        | Allow different grace period types than monthly. For future use, it does not affect transaction clearing and settlement.                        |
| Grace Period Interest Rate (Positions 93–110) | Numeric      | 18 (12.6 <sup>19</sup> ) | Interest rate on grace period. For future use, it does not affect transaction clearing and settlement.                                          |
| Reference Field 1 (Positions 111–130)         | Alpha        | 20                       | Acquirer to populate with merchant's CNPJ number.                                                                                               |
| Reference Field 2 (Positions 131–150)         | Alpha        | 20                       | Data exchange between merchant and issuer, to identify the transaction.                                                                         |
| Reference Field 3 (Positions 151–170)         | Alpha        | 20                       | Data exchange between merchant and issuer, to identify the transaction.                                                                         |
| Filler Data (Positions 171–227)               | Alphanumeric | 56                       | Reserved for future Brazil domestic enhancements.                                                                                               |

<sup>18</sup> For 12.6, the 12 represents numeric values in front of the decimal point and the 6 represents values behind the decimal point.

<sup>19</sup> For 12.6, the 12 represents numeric values in front of the decimal point and the 6 represents values behind the decimal point.

## Chapter 6 Transaction Message Validation

*System edits, or validation checks, ensure data accuracy, completeness, and consistency by flagging errors or invalid data.*

## Overview of system validation or editing

Mastercard performs data editing on submitted messages to enhance accuracy and data quality. An edit focuses on specific transaction components, authentication of messages, or program requirements.

Examples of data conditions edited by the system are:

- Presence of mandatory data in a message (such as PAN)
- Proper formatting of a data element or value (such as ensuring the data is alphabetic or numeric)
- Inclusion of data required for a specific product or program, which may be a validation on a single element or across multiple elements

To enforce compliance, additional validation processes occur outside of system message validations. The Data Integrity Program is one example of these processes. Refer to the *Data Integrity Monitoring Program* guide for more details.

## Error notification

The Clearing Optimizer software and Dual Message Clearing System generate error numbers and messages during the editing process. Validation may be performed by the Clearing Optimizer software alone, the Dual Message Clearing System alone, or both systems together.

Rejects of clearing data can occur at the message or file level.

If the Dual Message Clearing System rejects an entire Integrated Product Message (IPM) file, the system discontinues processing the file and does not forward any of the messages within the file to the intended receivers. The Dual Message Clearing System generates a file reject message to indicate that it has rejected the entire file.

The Dual Message Clearing System generates a File Reject/1644-699 message when the full IPM file has been rejected.

The full file reject message provides the following:

- Up to 10 error codes describing the errors that caused the file to reject
- The file ID of the rejected file, if present and if the system can parse it
- Up to 200 positions of the rejected file's first message

**NOTE: The Dual Message Clearing System does not return the IPM file reject message if the header message of the rejected file is unparseable, or if PDS 0105 (File ID), subfield 3 (Processor ID) is invalid. In these cases, the Dual Message Clearing System cannot determine the receiver of the file reject message and therefore cannot notify the appropriate customer of the file reject.**

The Dual Message Clearing System generates IPM message exception messages when the system encounters an exception condition as it processes individual messages. The Dual Message Clearing System provides the entire original message, including:

- Up to 10 codes identifying the errors within the message being rejected and the associated data elements, private data subelements, or both, that caused the exception conditions

- The file ID of the file containing the rejected message, if present and if the Dual Message Clearing System can parse the data
- The Acceptance Brand and Business Service ID being evaluated at the time of the reject

If all detail messages in a logical file are rejected, the Dual Message Clearing System generates a Message Exception/1644-691 message for each rejected detail message. Additionally, the Dual Message Clearing System generates a File Reject/1644-699 message because none of the individual messages were accepted.

## Edit errors best practices

These best practices help minimize edit errors and provide guidance for addressing them when they occur.

### Preventing errors

To prevent errors:

- Review and analyze all release announcements for new or updated data formatting and value requirements.
- Perform as much advance data validation and correction as possible before sending messages to Mastercard. This could include verifying the BIN or account range for the PAN, country codes, currency codes, or other data.
- Customers using parameter data obtained from Mastercard-supplied tables (such as those found in the Mastercard Parameter Extract file) as part of their own transaction data validations must use the most recent versions of the tables.
- Follow any field encoding schemes as documented in the Mastercard system specifications. This includes:
  - Populating fields in supported message types, as specified by the Message Type Indicator (MTI)
  - Complying with field length and format specifications, such as numeric or alphabetic
  - Constructing subelement ID, subelement length, subfield ID, and subfield length fields in accordance with the data element-specific encoding schemes found in the Data element definitions and details chapter
  - Using the Mastercard-defined field values
- Mastercard strongly recommends using Mastercard simulators to validate new or modified processing logic.

### Reacting to errors received

If you receive an edit error:

- Refer to PDS 0005 (Message Error Indicator), provided in either the Message Exception/1644-691 or File Reject/1644-699 messages. This PDS provides the error conditions encountered and will also provide the error severity code.

### Message Exception/1644 messages

| Condition                               | Originator receives                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Unparseable or unrecognizable message   | Message Exception/1644 only (The rejected message is not returned.)                                                                                                                                                                                                                                                                            |
| Error in one or more supported elements | Message Exception/1644 and the rejected message itself. If generated by the IPM Pre-edit utility, Data Element (DE) 71 (Message Number) in the rejected message is modified to contain a value that is greater than the DE 71 value of the preceding message in the file. If generated by GCMS, DE 71 in the rejected message is not modified. |

- Using the error message provided, verify the attributes of the data submitted in the erroneous data element or private data subelement.
- The error message will also advise if there was a cross edit that failed. In this case, research all the data elements or private data subelements indicated in the error message.

## Common errors and best practices

Mastercard has determined the error codes that customers most often seek assistance with are as follows.

### Error code 0011

#### Error code 0011

##### IPM error message:

DE2 PRIMARY ACCOUNT NUMBER (PAN) ACCOUNT RANGE INVALID

##### Customer guidance:

When a reject for error code 0011 is received, the Issuer account range (first 6-8 positions of the PAN) is not set up as an active Clearing Issuer Account Range.

The acquirer will need to verify the PAN is correct and active, and if appropriate, the issuer will need to activate or re-activate the BIN by following the normal BIN setup process within My Company Manager to continue processing.

To confirm that the issuer account range is showing in active status in the latest MPE, refer to IP0040T1: Issuer Account Range.

## Error code 0021

---

### Error code 0021

---

#### IPM error message:

PAYMENT CANCELLATION SERVICE

---

#### Customer guidance:

When a reject for error code 0021 is received, it is because the issuer enrolled the PAN in the Payment Cancellation Service (PCS), which prevents the acquirer from submitting a recurring payment transaction involving the given PAN.

The acquirer must review the clearing message data to ensure DE 22, subfield 5 is being properly populated.

If the issuer has the card number on the PCS list, a request can be made to the issuer to remove the PAN from the list.

**NOTE: Acquirers should reference the *Payment Cancellation Program Guide* for explanation of the PCS or criteria.**

---

## Error code 0022

---

### Error code 0022

---

#### IPM error message:

<FLDNAME>/PDS0158S4 INTERCHANGE RATE DESIGNATOR CONFLICT

---

#### Customer guidance:

There are multiple edits that can trigger this reject code. If you have any questions, please contact customer support or use Support Case Management on Mastercard Connect to raise a case.

---

## Error code 0025

---

### Error code 0025

---

#### IPM error message:

DE5 AMOUNT, RECONCILIATION MUST BE NUMERIC

---

#### Customer guidance:

When a reject for error code 0025 is received, it means value of DE5 in 1240 message is not valid. Acquirer needs to verify the data in the field and resubmit message to GCMS.

---

## Error code 0053

---

### Error code 0053

---

#### IPM error message:

DE22S1 TERMINAL DATA: CARD DATA INPUT CAPABILITY INVALID. MUST BE <VALLIST>

---

#### Customer guidance:

When a reject for error code 0053 is received, the customer must determine which DE 22, subfield 1 (Terminal Data, Card Data Input Capability) value is appropriate for the IRD they included in the First Presentment/1240 message, and ensure that subfield 1 is being populated with the correct value and that it matches the authorization value. Refer to the applicable interchange manual for the relevant interchange program requirements.

---

## Error code 0631

---

### Error code 0631

---

#### IPM error message:

PDS0158S4 INTERCHANGE RATE DESIGNATOR AND PROCESSING CODE/REVERSAL INDICATOR COMBINATION INVALID FOR BUSINESS SERVICE ARRANGEMENT <BUSINESS SERVICE ID AND TYPE> AND ACCEPTANCE BRAND ID CODE <AB>

---

#### Customer guidance:

When a reject for error code 0631 is received, Mastercard recommends that customers evaluate the IRD used to determine incompatibility or invalidity.

This incompatibility may be due to the combination of Business Service Arrangement, Acceptance Brand, and DE 3 (Processing Code), subfield 1 (Cardholder Transaction Type).

Customers need to look at the combination of PDS 0158 (Business Activity), subfield 1 (Card Program Identifier), subfield 2 (Business Service Arrangement Type Code), and subfield 3 (Business Service ID Code), as well as DE 3, subfield 1 in order to check this combination against multiple MPE tables.

To validate transactions prior to submitting to GCMS, customers can use the Clearing Optimizer software before submitting to production.

---

## Error code 0649

---

### Error code 0649

---

#### IPM error message:

DUPLICATE DE95 CARD ISSUER REFERENCE DATA

---

---

**Error code 0649**

---

**Customer guidance:**

When a reject for error code 0649 is received, there is already a lifecycle record on file in Claims Manager containing the same DE 95 (Card Issuer Reference Data) value as they submitted in the rejected chargeback message. It has been submitted with a duplicated DE 95.

Customers must determine whether the chargeback is required and if so must populate DE 95 with a value not already on file in Claims Manager.

---

**Error code 0726**

---

**Error code 0726**

---

**IPM error message:**

PREVIOUS CYCLE NOT ON FILE

---

**Customer guidance:**

When a reject for error code 0726 is received, the customer can refer to Claims Manager to identify what cycles have been submitted on the transaction and confirm they attempted the correct cycle.

Customers receiving this error have a lifecycle transaction on file with the respective DE 95 (Card Issuer Reference Data) value being submitted and will need to change the DE 95 value or confirm they are still needing to submit the transaction as one already exists on file.

---

**Error code 1023**

---

**Error code 1023**

---

**IPM error message:**

<FLDNAME> MUST BE PRESENT

---

**Customer guidance:** There are multiple edits that can trigger this reject code. If you have any questions, please contact customer support or use Support Case Management on Mastercard Connect to raise a case.

---

**Error code 1086**

---

**Error code 1086**

---

**IPM error message:**

<FLDNAME> FOR <MSGTYPE> MUST CONTAIN A VALUE OF 840 OR THE INTRA-CURRENCY AGREEMENT SETTLEMENT CURRENCY CODE

---

---

**Error code 1086**

---

**Customer guidance:**

When a reject for error code 1086 is received, the customer will need to ensure they are using DE49 equal to 840.

---

**Error code 1155**

---

**Error code 1155**

---

**IPM error message:**

DE93 TRANSACTION DESTINATION INSTITUTION ID CODE CANNOT BE FLAGGED FOR INTERNAL USE ONLY

---

**Customer guidance:**

When a reject for error code 1155 is received, the customer should contact customer support.

---

**Error code 1174**

---

**Error code 1174**

---

**IPM error message:**

TRANSACTION AMOUNT EXCEEDS RESTRICTED THRESHOLD

---

**Customer guidance:**

This error code applies to lifecycle transactions. When a reject for error code 1174 is received and if the lifecycle transaction clearing is being submitted within 381 days of the previous lifecycle, the customer can submit the lifecycle transaction with DE 30 (Amounts, Original) matching DE 4 (Amount, Transaction) of the previous transaction and PDS 0149 (Currency Codes, Amounts, Original) matching DE 49 (Currency Code, Transaction) of the previous transaction. If this does not work, the customer should contact customer support.

If the lifecycle transaction is being attempted beyond the 381 days and the transaction exceeds USD 20,000, the customer will be unable to attempt.

---

**Error code 2009**

---

**Error code 2009**

---

**IPM error message:**

NO BUSINESS SERVICE ARRANGEMENT EXISTS FOR THE MEMBER PAIR

---

---

**Error code 2009**

---

**Customer guidance:**

When a reject for error code 2009 is received, Mastercard recommends that the customer review Table IP0090T1: Issuer Account Range Card Program Identifier and Business Service Arrangement Participation for the issuer account range. This will identify the BSAs for which the issuer is qualified. The customer can then match this against the Table IP0091T1: Acquiring BIN Card Program Identifier and Business Service Arrangement Participation entries for DE 31, subfield 2 (Acquirer Reference ID).

If there is no matching entry on Table IP0090T1: Issuer Account Range Card Program Identifier and Business Service Arrangement Participation and Table IP0091T1: Acquiring BIN Card Program Identifier and Business Service Arrangement Participation for both customers, there is no BSA for the member pair and the transaction cannot be processed.

If the error occurred in Clearing Optimizer, Mastercard recommends ensuring that the most recent version of the MPE is being used. If the error occurred outside of Clearing Optimizer, Mastercard recommends contacting customer support for further research.

---

**Error code 2010**

---

**Error code 2010**

---

**IPM error message:**

BUSINESS SERVICE ID CODE SUBMITTED IS NOT VALID FOR THE MEMBER PAIR

---

**Customer guidance:**

If the Business Service Agreement (BSA) is submitted by the member in PDS 0158 (Business Activity) then it is validated against Table IP0090T1: Issuer Account Range Card Program Identifier and Business Service Arrangement Participation and Table IP0091T1: Acquiring BIN Card Program Identifier and Business Service Arrangement Participation. With this type of transaction the submitted BSA is present in both Table IP0090T1 and IP0091T1 and so the transaction is not expected to get rejected with 2010 for the BSA Combination MCC/8/8000900.

---

**Error code 2219**

---

**Error code 2219**

---

**IPM error message:**

DE25 MESSAGE REASON CODE MUST BE VALID FOR THE ACCEPTANCE BRAND, BUSINESS SERVICE TYPE AND BUSINESS SERVICE ID COMBINATION

---

---

**Error code 2219**

---

**Customer guidance:**

When a reject for error code 2219 is received, Mastercard recommends that customers evaluate the IRD used to determine incompatibility or invalidity.

Customer can review IP0011T1: Expanded MTI/Function/Reason Code for a list of potential Message Reason Codes for DE 25 (Message Reason Code) and IP0097T1: Message Reason Code Restrictions for Card Program Identifier and Business Service Arrangement for list of valid Message Reason Codes (MRC) given a specific combination of Card Program Identifiers and Business Service Arrangements.

The customer should consider a different MRC in DE 25, or consider a different IRD.

---

**Error code 2224**

---

**Error code 2224**

---

**IPM error message:**

DE26 ACCEPTOR BUSINESS CODE (MCC) INVALID FOR BUSINESS SERVICE ARRANGEMENT  
<BUSINESS SERVICE ID & TYPE> AND ACCEPTANCE BRAND ID CODE <AB> FOR INTERCHANGE  
PROGRAM

**Customer guidance:**

When a reject for error code 2224 is received, Mastercard recommends that customers evaluate the IRD used to determine incompatibility or invalidity.

Customer can review IP0095T1: Card Acceptor Business Program Restrictions for a list of AB codes that coincide with a specific Card Program Identifier, Business Service Arrangement, and IRD. IP0075T1: Acceptor Business Codes (MCCs) provides the customer with a list of AB Codes.

---

**Error code 2226**

---

**Error code 2226**

---

**IPM error message:**

GCMS PRODUCT ID <DERIVED FROM DE2> INVALID FOR BUSINESS SERVICE ARRANGEMENT  
<BUSINESS SERVICE ID AND TYPE> AND ACCEPTANCE BRAND ID CODE <AB> FOR INTERCHANGE  
PROGRAM

---

---

**Error code 2226**

---

**Customer guidance:**

When a reject for error code 2226 is received, customers must analyze the data in the clearing message and determine which IRD is most appropriate for the transaction use case for the combination of Business Service Arrangement, Acceptance Brand, and Brand Product.

When customers receive this error, one of the following issues is occurring:

- IRD was never valid for the combination of Business Service Arrangement, Acceptance Brand, and Brand Product. The customer should consult their respective interchange manual and select a different IRD if necessary.
  - IRD is no longer valid because it has been lifecycled for the combination of Business Service Arrangement, Acceptance Brand, and Brand Product. Customer will need to select a different IRD.
  - A change in the production environment is listing the IRD as no longer valid for the combination of Business Service Arrangement, Acceptance Brand, and Brand Product. Customers should reach out to customer support.
- 

**Error code 2267**

---

**Error code 2267**

---

**IPM error message:**

DE25 MESSAGE REASON CODE INVALID FOR THIS CHARGEBACK

---

**Customer guidance:**

Reject error code 2267 may occur when a chargeback message contains a fraud-related message reason code and a transaction is ineligible for such chargeback rights.

Customers should contact customer support for additional assistance.

---

**Error code 2332**

---

**Error code 2332**

---

**IPM error message:**

DE4 AMOUNT, TRANSACTION INVALID. MUST BE WITHIN THE ACCEPTED AMOUNT RANGE FOR THE INTERCHANGE PROGRAM

---

---

**Error code 2332**

---

**Customer guidance:**

When a reject for error code 2332 is received, the customer should identify which combination of BSA, Acceptance Brand, and IRD the transaction is attempting to qualify under, and check this combination against the IP0030T1: Interchange Amount Restriction table in the MPE.

Table IP0090T1: Issuer Account Range Card Program Identifier and Business Service Arrangement Participation and Table IP0091T1: Acquiring BIN Card Program Identifier and Business Service Arrangement Participation will provide customers with potential combinations of Business Service Arrangement and Acceptance Brand. This should be used with the IRD to determine minimum and maximum amounts listed for the combination on IP0030T1.

This may also require currency conversion, as the IP0030T1: Interchange Amount Restriction table is determined by a specific currency for every entry.

---

**Error code 2358**

---

**Error code 2358**

---

**IPM error message:**

DE2 PRIMARY ACCOUNT NUMBER (PAN) INVALID. THE MAPPING SERVICE CANNOT MAP DE2 TO ANOTHER ACCOUNT NUMBER

---

**Customer guidance:**

A message will be rejected for error code 2358 when a virtual PAN or token cannot be matched to an actual PAN.

No corresponding authorization request message can be found in the Mastercard PAN mapping table. If there is a valid authorization, the customer should ensure the clearing message contains the correct DE 63 (Banknet Reference Number) value. If this has been confirmed, then the customer should contact customer support.

---

**Error code 2422**

---

**Error code 2422**

---

**IPM error message:**

APPROVAL CODE NOT COMPATIBLE WITH SUBMITTED IRD

---

**Customer guidance:**

When a reject for error code 2422 is received, check if the appropriate value in DE 38 position 6 is being used to qualify for the ALM program.

---

## Error code 2425

---

### Error code 2425

---

#### IPM error message:

PDS0158S4 INTERCHANGE RATE DESIGNATOR IS NOT VALID FOR ENFORCED BUSINESS SERVICE ARRANGEMENT <BUSINESS SERVICE ID AND TYPE> AND ACCEPTANCE BRAND ID CODE <AB>

---

#### Customer guidance:

When a reject for error code 2425 is received, if the transaction involves an acquirer and issuer pair that require the enforcement of a specific business service arrangement, the customer must submit the message with this BSA or leave PDS 0158 (Business Activity), subfield 2 (Business Service Arrangement Type Code) and subfield 3 (Business Service ID Code) blank. The Dual Message Clearing System will input the enforced BSA.

The customer should review tables IP0090T1: Issuer Account Range Card Program Identifier and Business Service Arrangement Participation and IP0091T1: Acquiring BIN Card Program Identifier and Business Service Arrangement Participation to determine what BSA combinations the transaction qualifies for, and verify IP0036T1: Default Business Service, field 28 (Business Service Arrangement Type) to confirm if that BSA is being enforced. If the BSA is being enforced, it must be used in the transaction and customer will need to select an IRD in PDS 0158 (Business Activity), subfield 4 (IRD) that is compatible given that enforced BSA.

---

## Error code 2546

---

### Error code 2546

---

#### IPM error message:

<FLDNAME> INVALID. AMOUNT IS LESS THAN OR EQUAL TO THE CHARGEBACK PROTECTION AMOUNT

---

#### Customer guidance:

When a reject for error code 2546 is received, the transaction amount is less than or equal to the chargeback protection amount, so it is not eligible for a chargeback.

---

## Error code 2666

---

### Error code 2666

---

#### IPM error message:

CUSTOMER RISK MANAGEMENT TRANSACTION BLOCKED FOR SENDER

---

---

**Error code 2666**

---

**Customer guidance:**

When a reject for error code 2666 is received, the customer should contact customer support for further assistance.

---

**Error code 2801**

---

**Error code 2801**

---

**IPM error message:**

INELIGIBLE CHARGEBACK REJECT REASON CODES 'FNS DATE EXCEEDED'

---

**Customer guidance:**

The Mastercard Global Clearing Management System checks DE 12 (Date and Time, Local Transaction) or DE 63 (Transaction Life Cycle ID) for the date of the transaction. If the transaction date is past the FNS date, the transaction will reject.

No chargebacks can be processed.

---

**Error code 2802**

---

**Error code 2802**

---

**IPM error message:**

INELIGIBLE CHARGEBACK REJECT REASON CODES 'FNS COUNTER EXCEEDED'

---

**Customer guidance:**

Reject error code 2802 occurs when the Fraud Notification Service (FNS) detects that 35 or more chargeback messages containing fraud-related MRCs such as 4837, 4840/4849, 4870, or 4871 have been sent by the issuer. The issuer should reissue a new card.

If the issuer has not reissued a new card and the issuer has authorized transactions after the FNS activation, the issuer will not have chargeback rights.

When a reject for error code 2802 is received, the customer may be provided PDS 0200 (Fraud Notification Date), subfield 2 (Fraud Notification Service Chargeback Counter), indicating the number of chargeback attempts made on the PAN. If this exceeds 35, no additional chargeback messages can be submitted.

**NOTE: Even rejected attempts go against the FNS counter. Customer can reverse chargebacks to reduce the count below 35, but any attempt to process, even if rejected, counts against the FNS counter.**

---

## Error code 2821

---

### Error code 2821

---

#### IPM error message:

<FLDNAME> IRD MUST BE EQUAL TO 'EB' OR 'EG' WHEN THE TRANSACTION QUALIFIES FOR THE CARD PRESENT EEA RESTRICTED RATES

---

#### Customer guidance:

When a reject for error code 2821 is received, Mastercard advises the use of IRD EB and EG and verify the criteria provided with the edit.

---

## Error code 2891

---

### Error code 2891

---

#### IPM error message:

<FLDNAME> IRD MUST BE EQUAL TO 'EV' OR 'EW' WHEN THE TRANSACTION QUALIFIES FOR CARD NOT PRESENT EEA RESTRICTED RATES

---

#### Customer guidance:

Error code 2891 indicates that the use of IRDs EV and EW is required.

When this error code is received, the customer must determine the most appropriate IRD for the rejected message. Refer to the applicable interchange manual for the relevant interchange program requirement.

---

**Requirement:** IRD EV or EW must be submitted for card not present transactions (when any of the following is true: DE 22 SF 5 with a value other than 0; DE 22 SF 6 with a value other than 1; DE 22 SF 7 with a value other than 2, or A, or B, or C, or F, or M), when the merchant country is an EEA country including UK and GIB and the issuer country is not an EEA country

---

## Error code 2892

---

### Error code 2892

---

#### IPM error message:

<FLDNAME> IRD MUST NOT BE EQUAL TO 'EV' OR 'EW' WHEN THE TRANSACTION DOES NOT QUALIFY FOR THE CARD NOT PRESENT EEA RESTRICTED RATES

---

#### Customer guidance:

Error code 2892 requires the use of IRDs other than EV and EW.

When this error code is received, the customer must determine the most appropriate IRD for the rejected message. Refer to the applicable interchange manual for the relevant interchange program requirement.

---

---

**Error code 2892**

---

**Requirement:**PDS0158S4 must not be equal to 'EV' or 'EW' when the transaction does not qualify for the EEA restricted rates and DE 22 SF 6 has a value of 1. IRD EV or EW must not be submitted when the merchant country is not an EEA country or the merchant country is an EEA country including UK and GIB and the issuer country is an EEA country, or when it does not qualify for card not present (when all of the following is true: DE 22 SF 5 with a value of 0, DE 22 SF 6 with a value of 1, DE 22 SF 7 with a value of 2, or A, or B, or C, or F, or M)

---

**Error code 2969**

---

**Error code 2969**

---

**IPM error message:**

THE MESSAGE HAS BEEN FLAGGED AS A POTENTIAL DUPLICATE FIRST PRESENTMENT

---

**Customer guidance:**

When a reject for error code 2969 is received, it means the acquirer submitted a possible duplicate of the clearing first presentment message.

The acquirer must determine whether the message still needs to be cleared. If so, they must obtain the PDS 0444 (Resubmission Code) value from the reject report IP857010 or 1644 message exception received in T112/T113 file and place it in PDS 0444 of First Presentment/1240 message being resubmitted.

---

## Error numbers and messages

Certain error messages include a variable field. When the Clearing Optimizer software or the Dual Message Clearing System generates an error message, it substitutes the variable field with the specific element, a list of values, the message type, or the occurrence number relevant to the error. The actual value provided in this substitution is reflected in both the Clearing Optimizer and Dual Message Clearing System Error Detail reports.

## Edits and error messaging

### Error message overview

The Dual Message Clearing System generates error numbers and messages during the edit process.

This document presents these error numbers and messages in two ways:

- By IPM error number
- By field and subfield and Message Type Identifier (MTI/Function Code).

Some error messages contain a variable field. Clearing Optimizer software or Dual Message Clearing System replaces the variable field with the specific element, list of values, message type, or occurrence number of the field in error when it generates the error message. The replacement with the actual value appears in the Clearing Optimizer and GCMS Error Detail reports.

The table of error numbers and messages contains a column titled "Edit Performed By..." This column indicates whether the edit is performed by:

- The Clearing Optimizer software only
- Dual Message Clearing System only
- Both the IPM Clearing Optimizer software and Dual Message Clearing System

Error message overview

The GCMS generate error numbers and messages during the edit process.

This document presents these error numbers and messages in two ways:

- By IPM error number
- By field and subfield and Message Type Identifier (MTI/Function Code).

Some error messages contain a variable field. Clearing Optimizer software or GCMS replaces the variable field with the specific element, list of values, message type, or occurrence number of the field in error when it generates the error message. The replacement with the actual value appears in the Clearing Optimizer and GCMS Error Detail reports.

The table of error numbers and messages contains a column titled "Edit Performed By..." This column indicates whether the edit is performed by:

- The Clearing Optimizer software only
- GCMS only
- Both the IPM Clearing Optimizer software and GCMS

Error numbers 0000–9600

These tables contain all of the error numbers and error messages. The edit process that presents the message is performed by the Clearing Optimizer software, the Global Clearing Management System (GCMS), or both.

Error numbers 0000–0499

| Error number | Error message                                                                                                               | Edit performed by... |

### Error numbers 2100–2179

Each error number from 2100 to 2179 is associated with a specific message. The edit process that presents the message is performed by the IPM Clearing Optimizer software, the Global Clearing Management System (GCMS), or both.

## Error numbers 2100–2179

| Error number | Error message                                                                                                                                        | Edit performed by... |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| 2100         | PDS0703 TOTAL ROOM NIGHTS MUST BE A FIXED LENGTH OF 004.                                                                                             | Both                 |
| 2101         | PDS0703 TOTAL ROOM NIGHTS MUST BE NUMERIC.                                                                                                           | Both                 |
| 2103         | PDS0704 PREPAID EXPENSES MUST BE NUMERIC.                                                                                                            | Both                 |
| 2116         | PDS0711 FIRE SAFETY ACT INDICATOR MUST BE A FIXED LENGTH OF 001.                                                                                     | Both                 |
| 2117         | PDS0711 FIRE SAFETY ACT INDICATOR MUST BE Y OR N.                                                                                                    | Both                 |
| 2118         | PDS0712 NET FUEL PRICE MUST BE A FIXED LENGTH OF 013.                                                                                                | Both                 |
| 2119         | PDS0712S1 NET FUEL PRICE MUST BE NUMERIC.                                                                                                            | Both                 |
| 2120         | PDS0712S2 NET FUEL PRICE EXPONENT MUST BE 0–5.                                                                                                       | Both                 |
| 2121         | PDS0713 RESTRICTED TICKET INDICATOR MUST BE A FIXED LENGTH OF 001.                                                                                   | Both                 |
| 2122         | PDS0713 RESTRICTED TICKET INDICATOR MUST BE 0 OR 1.                                                                                                  | Both                 |
| 2123         | PDS0714 EXCHANGE TICKET AMOUNT MUST BE A FIXED LENGTH OF 012.                                                                                        | Both                 |
| 2124         | PDS0714 EXCHANGE TICKET AMOUNT MUST BE NUMERIC.                                                                                                      | Both                 |
| 2125         | PDS0715 LENGTH MUST BE <MIN-MAX> AND MUST BE DIVISIBLE BY MINIMUM OCCURENCE LENGTH OF 14.                                                            | Both                 |
| 2126         | PDS0715 MUST BE NUMERIC.                                                                                                                             | Both                 |
| 2127         | PDS0716 TRAVEL AUTHORIZATION CODE LENGTH MUST BE 1–64.                                                                                               | Both                 |
| 2128         | PDS0716 TRAVEL AUTHORIZATION CODE MUST BE LEFT JUSTIFIED AND CANNOT CONTAIN ALL SPACES.                                                              | Both                 |
| 2129         | PDS0717 IATA CLIENT CODE LENGTH MUST BE 1–17.                                                                                                        | Both                 |
| 2130         | PDS0717 IATA CLIENT CODE MUST BE LEFT JUSTIFIED AND CANNOT CONTAIN ALL SPACES.                                                                       | Both                 |
| 2134         | DE22S4 TERMINAL OPERATING ENVIRONMENT MUST BE 4 OR 8. <b>(Applies only to U.K. Domestic Maestro or Europe region member-to-member transactions.)</b> | Both                 |
| 2151         | DE124 ADDITIONAL DATA 4 CANNOT BE ALL LOW-VALUES OR ALL HIGH-VALUES.                                                                                 | Both                 |
| 2152         | DE124 ADDITIONAL DATA 4 LENGTH MUST BE 008–999.                                                                                                      | Both                 |
| 2154         | INCORRECT PDS ENCODING SCHEME WITHIN DE124 ADDITIONAL DATA 4. PDS TAG PLUS LENGTH PLUS DATA MUST FIT ENTIRELY INTO DE124 OR BE MOVED TO DE125.       | Both                 |

## File Header/1644-697 messages

This section contains the error numbers and message texts (those generated by members and those generated by Mastercard) by field and subfield for File Header 1644-697 messages.

### File Header/1644-697

Error numbers and message texts are organized by field and subfield for File Header 1644-697 messages. The edit process that presents the message is performed by the Clearing Optimizer software, the Global Clearing Management System (GCMS), or both.

## First Presentment/1240–200 messages

This section contains the error numbers and message texts by field and subfield for First Presentment/1240–1200 messages.

### First Presentment/1240–200

Error numbers and message texts are organized by field and subfield for First Presentment/1240–200 messages. The edit process that presents the message is performed by the Clearing Optimizer software, the Global Clearing Management System (GCMS), or both.

#### MTI/Function Code: First Presentment/1240–200
