Notice on Confidentiality, Intellectual Property Rights and Disclaimers (“Notice”)

Confidentiality. This document and any information, data, representations, materials, recommendations, exhibits, appendices or glossaries contained herein or attached hereto (collectively, the “Material”) is proprietary and confidential to Visa. The Material is furnished to you solely in your capacity as a client and/or potential client of Visa and/or a participant in the Visa payments system. You agree to keep the Material confidential and not to use or disclose the Material for any purpose other than in such capacity. By accepting the Material, you agree that the Material is intended for use by you solely subject to the confidentiality restrictions in (i) the Visa Charter Documents (as applicable), (ii) the Visa Core Rules and Visa Product and Service Rules, the Visa Payment System Operating Regulations – Russia, Visa International Travelers Cheque Operating Regulations, V PAY Core Rules and V PAY Product and Service Rules and Visa Supplemental Requirements (collectively, the “Visa Rules”) (as applicable), (iii) for VisaNet Processors, an executed and valid VisaNet Letter of Agreement on file with Visa, and (iv) for other third parties, a current participation agreement that includes applicable confidentiality provisions, other non-disclosure agreement with Visa that covers disclosure and use of the Material, and/or other confidentiality agreements that limit your use and disclosure of the Material. The Material may only be disseminated within your organization on a need-to-know basis to enable your participation in the product, service and/or program described herein and/or in the Visa payments system.

Please be advised that the Material may constitute material non-public information under U.S. federal securities laws and that purchasing or selling securities of Visa Inc. while being aware of material non-public information would constitute a violation of applicable U.S. federal securities laws.

Intellectual Property Rights. The Material is protected by copyright. The Material and/or any part of the Material must not be duplicated, reproduced, published, distributed or disclosed, in whole or in part, in any form by any means without Visa’s prior written authorization, including to any third party. Visa owns the trademarks, logos, trade names and service marks, whether registered or unregistered, contained in the Material. Third-party trademarks not attributed to Visa are the property of their respective owners, are used for identification purposes only, and do not necessarily imply product endorsement or affiliation with Visa.

Disclaimers. THE MATERIAL HEREIN IS PROVIDED ON AN “AS IS,” “WHERE IS,” BASIS, “WITH ALL FAULTS” KNOWN AND UNKNOWN. THE MATERIAL HEREIN IS INTENDED FOR INFORMATIONAL PURPOSES ONLY AND SHOULD NOT BE RELIED UPON FOR OPERATIONAL, MARKETING, LEGAL, REGULATORY, TECHNICAL, TAX, FINANCIAL OR OTHER ADVICE. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, VISA EXPLICITLY DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, REGARDING THE MATERIAL HEREIN, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT (INCLUDING, BUT NOT LIMITED TO, NON-INFRINGEMENT OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS). VISA DOES NOT MAKE ANY WARRANTIES, REPRESENTATIONS, GUARANTEES OR INDEMNITIES AS TO THE COMPLETENESS, ACCURACY AUTHENTICITY, USEFULNESS, TIMELINESS, RELIABILITY OR APPROPRIATENESS OF THE MATERIAL HEREIN OR OF THE INFORMATION OR MATERIALS REFERENCED HEREIN. VISA IS NOT LIABLE OR RESPONSIBLE FOR YOUR USE OR DISCLOSURE OF OR RELIANCE ON THE MATERIAL HEREIN, INCLUDING ERRORS OF ANY KIND, CONTAINED IN THE MATERIAL. NOTHING IN THIS NOTICE OR THE MATERIAL HEREIN SHALL BE DEEMED TO EXCLUDE OR LIMIT LIABILITY THAT CANNOT BE EXCLUDED OR LIMITED AS A MATTER OF LAW.

USE OF THE MATERIAL HEREIN IS AT YOUR OWN RISK. THE MATERIAL HEREIN SHOULD BE INDEPENDENTLY EVALUATED IN LIGHT OF YOUR SPECIFIC BUSINESS NEEDS AND ANY APPLICABLE LAWS AND REGULATIONS. THE

MATERIAL HEREIN IS NOT INTENDED AS INVESTMENT OR LEGAL ADVICE, AND READERS AND RECIPIENTS OF THE MATERIAL ARE ENCOURAGED TO SEEK THE ADVICE OF A COMPETENT PROFESSIONAL WHERE SUCH ADVICE IS REQUIRED.

THE MATERIAL HEREIN MAY CONTAIN DEPICTIONS AND DESCRIPTIONS OF A PRODUCT, SERVICE AND/OR PROGRAM CURRENTLY IN THE PROCESS OF DEVELOPMENT AND DEPLOYMENT, AND SHOULD BE UNDERSTOOD AS A REPRESENTATION OF THE POTENTIAL FEATURES OF THE FULLY-DEPLOYED PRODUCT, SERVICE AND/OR PROGRAM. ANY FINAL VERSION OF SUCH PRODUCT, SERVICE AND/OR PROGRAM MAY NOT CONTAIN ALL OF THE FEATURES DESCRIBED IN THE MATERIAL. WHERE POTENTIAL FUTURE FUNCTIONALITY IS HIGHLIGHTED, VISA DOES NOT PROVIDE ANY WARRANTY ON WHETHER SUCH FUNCTIONALITY WILL BE AVAILABLE OR IF IT WILL BE DELIVERED IN ANY PARTICULAR MANNER OR MARKET. PARTICIPATION IN PRODUCTS, SERVICES AND/OR PROGRAMS, IF AND WHEN OFFERED, MAY BE SUBJECT TO VISA'S TERMS AND CONDITIONS.

THE MATERIAL HEREIN COULD INCLUDE TECHNICAL INACCURACIES OR TYPOGRAPHICAL ERRORS. CHANGES MAY BE PERIODICALLY MADE TO THE MATERIAL. SUCH CHANGES WILL BE INCORPORATED IN NEW EDITIONS OF THE MATERIAL. VISA MAY MAKE IMPROVEMENTS AND/OR CHANGES IN OR TO THE PRODUCT(S), SERVICE(S) AND/OR PROGRAM(S) DESCRIBED IN THE MATERIAL HEREIN AT ANY TIME AT VISA'S SOLE DISCRETION. VISA MAY MODIFY, REPLACE OR RECALL THE MATERIAL HEREIN AT ANY TIME WITHOUT NOTICE TO ANY PARTY AND AT VISA'S SOLE DISCRETION.

Forward-Looking Statements. The Material contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 that relate to, among other things, Visa's future operations, prospects, developments, strategies, business growth and financial outlook. Forward-looking statements generally are identified by words such as "believes," "estimates," "expects," "intends," "may," "projects," "could," "should," "will," "continue" and other similar expressions. All statements other than statements of historical fact could be forward-looking statements, which speak only as of the date they are made, are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, many of which are beyond our control and are difficult to predict. Visa describes risks and uncertainties that could cause actual results to differ materially from those expressed in, or implied by, any of these forward-looking statements in Visa's filings with the SEC. Except as required by law, Visa does not intend to update or revise any forward-looking statements as a result of new information, future events or otherwise.

Reservation of Rights. Any Visa features, functionality(ies), implementation(s), and/or branding, may be amended, updated or canceled at Visa's discretion. The timing of availability of programs and functionality described herein is subject to a number of factors outside Visa's control, including but not limited to overall levels of anticipated participation and deployment of necessary infrastructure by issuers, acquirers, and other system participants. Participation in programs and services, if and when offered, will be subject to Visa's terms and conditions.

Additional disclaimers and/or notifications may be found in the "Additional Notices" section of this document and/or in the Material herein.

Relationship to the Visa Rules. The Material is a supplement to the Visa Rules. In the event of any conflict between the Material, any document referenced herein or any communications concerning the Material, and any content in the Visa Rules, the Visa Rules shall govern and control.

Definitions. Capitalized terms not otherwise defined herein have the meanings given to them in the Visa Core Rules and Visa Product and Service Rules.

As used in this Notice, the terms "you" or "your" refer to (i) the person using the Material in any way, (ii) your organization and/or (iii) your or your organization's Sponsor.

"Visa" refers to the relevant Visa entity that has entered into an agreement with you governing the subject matter of the Material, being only *one* of the following Visa entities, and any of its current and former affiliates, employees, successors or assigns:

- Visa Canada Corporation;
- Visa do Brasil Empreendimentos Ltda.;
- Visa Europe Limited;
- Visa International Service Association;
- Visa International Servicios de Pagos Espana, S.R.L.U.;
- Visa U.S.A. Inc.;
- Visa Worldwide Pte Limited; OR
- Another Visa entity that is an affiliate of any of the foregoing entities.

VSS Reports-Print-Ready Formats

VSS Reports contain detailed information about specific aspects of the VisaNet Settlement Service.

VSS Report Details

Each report includes a sample with field descriptions.

VSS Report Field Names

Field Name	Description
Report ID	Identifies the report.
Report Title	Contains the title of the report.
Report Description and Highlights	Describes the purpose of the report and a brief description of its contents.
Page Break	Indicates the page break controls.
Totals Provided	Lists categories for which totals are provided on the report.
Reconciliation Process	Indicates the process for reconciling this report to other VSS reports (when applicable).
Frequency	Shows how often the report is produced.

Other Settlement Related Reports

This table lists other settlement-related reports. Some of these are for either specific settlement services (non-international), selected client specific, or Visa internal that are available but are not described in this manual.

Transaction Dispositions

This table contains the specific dispositions for transactions.

Transaction Dispositions (VSS-900-Reconciliation Report)

To (across) From (down)	Settlement	Warehouse	Returned	CRS	Deferred
Client	Yes	Yes	Yes	Yes	Yes
Warehouse	Yes		Yes		
CRS	Yes	Yes	Yes		Yes
Deferred	Yes				
Visa	Yes		Yes		

Order of Delivery

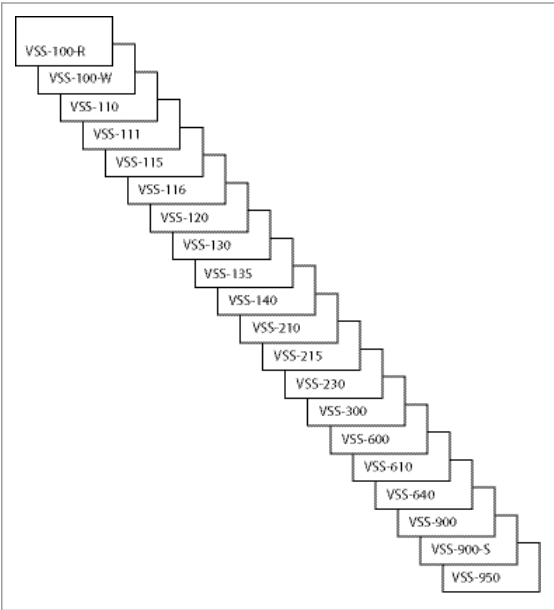

VSS reports are delivered in an order based on several report characteristics.

This table lists the delivery order of VSS reports.

VSS Delivery Order

Characteristic	Description
Destination Identifier (field in report records)	Processors determine what option to use for values placed in the Destination Identifier field in report records. When the acquiring or issuing identifier identification option is selected, the report Destination Identifier is placed in the Destination Identifier field of the machine-readable (TC 46) and print-ready (TC 47) report records. The acquiring or issuing identifier identification option should be selected if the processor wants report records in acquiring or issuing identifier sequence. If this option is not used, the Report Destination processor is placed in the Destination Identifier field. The processor is always in the report records for summary-level SREs.
Daily/Monthly	Daily reports are delivered first. On the first processing day of each month, monthly reports for the previous month are delivered after the daily reports.

VSS Delivery Order

Characteristic	Description
Processor/International Settlement/National Net Settlement	The VSS processor reports are delivered before the International Settlement Service and National Net Settlement Service reports. The daily VSS processor reports are delivered in this order: VSS-900-P VSS-900-PS Clients participating in a National Net Settlement Service receive two sets of reports: one for the National Net Settlement Service and one for the International Settlement service. If the National Net Settlement Service has a customized cutoff time, the reports for this service are delivered separately from the International Settlement Service reports. If the National Net Settlement Service has the same cutoff time as the International Settlement Service, reports for the National Net Settlement Service follow those for the International Settlement Service in the same delivery. The daily International Settlement and National Net Settlement reports are delivered in this order:  Monthly VSS processor reports are delivered in this order: VSS-900-PM VSS-900-XM Monthly International Settlement and National Net Settlement reports are delivered in this order:

VSS Delivery Order

Characteristic	Description
Report ID	
SRE	Note: If a report is being sent for more than one SRE, the reports are sent in SRE sequence.

VSS Reports Common Header

The header for VSS reports contains certain fields that are common to many reports.

REPORT ID: VSS-XXX	VISANET SETTLEMENT SERVICE	PAGE: 1
REPORTING FOR: XXXXXXXXXXXX ANY BANK	INTERNATIONAL SETTLEMENT SERVICE	PROC DATE: 25FEB05
ROLLUP TO: XXXXXXXXXXXX ANY BANK	MONTHLY SETTLEMENT SUMMARY REPORT	REPORT DATE: 25FEB05
FUNDS XFER ENTITY:XXXXXXXXXX ANY BANK	FOR 01JAN05 THROUGH 31JAN05	LAST CHANGE: 25FEB05
SETTLEMENT CURRENCY: FIM		
CLEARING CURRENCY: USD		
This Data is Fictitious and for Illustration Purposes Only.		

This table contains the common header field descriptions for VSS reports.

VSS Reports-Common Header Field Descriptions

Header Field Name	Contents
REPORT ID	VSS report IDs have three parts, separated by dashes. The first part always contains the literal “VSS.” The second part is the alphanumeric report identifier. The third part indicates the type of report: • Processor report (P) • Processor summary report (PS) • Client summary report (S) • Client monthly report (M) • Client weekly report (W) • Client revised report (R) The absence of the third part of the report ID indicates that the report is a client daily report.
REPORTING FOR	Settlement reporting entity (SRE) identifier and name for which the report was generated.
ROLLUP TO	Identifier and name of the summary SRE at the next highest level.
FUNDS XFER ENTITY	Funds transfer SRE identifier and name. This name identifies the SRE that is responsible for handling funds transfer on behalf of the Reporting for SRE.
SETTLEMENT CURRENCY	3-character, alphabetic settlement currency code.
CLEARING CURRENCY	3-character, alphabetic clearing currency code.
REPORT HEADING	VisaNet Settlement Service.
SETTLEMENT SERVICE NAME	Name of the settlement service, for example, the International Settlement Service or one of the National Net Settlement Services.
REPORT TITLE	Title of the VSS report.

VSS Reports-Common Header Field Descriptions

Header Field Name	Contents
FOR	For monthly and month-to-date reports, first day of the month for which data has been accumulated. For a periodic report, such as VSS-111, the date of the beginning of the period for which data is accumulated.
THROUGH	Last day of the reporting period. This is the last day of the month for monthly reports and the processing date for month-to-date reports. For periodic report, such as VSS-111, the date of the ending of the period for which data is accumulated.
PAGE	Page number.
PROC DATE	Date for which settlement was run.
REPORT DATE	Date the report was produced.
LAST CHANGE	Date on which the contents of the report were last modified

VSS Print-Ready Report Layouts

These sample layouts of print-ready VSS reports contain detailed field descriptions to help when migrating to VSS.

VSS-100-W Report Layout

VSS-100-W-Weekly Settlement Reporting Hierarchy List Field Descriptions

Field Name (by column)	Description
SETTLEMENT REPORTING ENTITY (SRE) HIERARCHY	SREs that compose the settlement hierarchy for the Reporting for SRE.
SRE NAME	Name of the corresponding Settlement Reporting Entity (SRE).
FUNDS TRANSFER	Contains YES if the corresponding SRE is a funds transfer SRE. Otherwise, this field contains spaces.
CLEARING ENTITY ID	Contains all the clearing entity identifiers for the corresponding SRE, one per line. SREs at the lowest level in the settlement hierarchy may have one or more clearing entity IDs. SREs that are not at the lowest level in the settlement hierarchy will not have a clearing entity ID associated with them. If the clearing entity is a card range, both the high and low ends of the range are printed.
PROCESSOR ID	Contains the processor ID for the corresponding clearing entity.
NETWORK ID	Contains the network ID for the corresponding clearing entity/processor combination. This field contains ALL when no specific network was identified when the SRE was established.
TXN CURR	Transaction Currency Contains the transaction currency code for the corresponding SRE. This field contains blanks when no specific transaction currency was identified when the SRE was established. The transaction currency option applies exclusively to the International Settlement Service and is currently available in the EU and CEMEA regions only.

VSS-100-R Field Descriptions

Field Name (by column)	Description
SETTLEMENT REPORTING ENTITY (SRE) HIERARCHY	SREs that compose the settlement hierarchy for the Reporting for SRE.
SRE NAME	Name of the corresponding Settlement Reporting Entity Name (SRE).
FUNDS TRANSFER	Contains YES if the corresponding SRE is a funds transfer SRE. Otherwise, this field contains spaces.
CLEARING ENTITY ID	Contains all the clearing entity identifiers for the corresponding SRE, one per line. SREs at the lowest level in the settlement hierarchy may have one or more clearing entity IDs. SREs that are not at the lowest level in the settlement hierarchy will not have a clearing entity ID associated with them. If the clearing entity is a card range, then the high and low ends of the range are printed.
PROCESSOR ID	Contains the processor ID for the corresponding clearing entity.
NETWORK ID	Contains the network ID for the corresponding clearing entity/processor combination. This field contains ALL when no specific network was identified when the SRE was established.
TXN CURR	Transaction Currency Contains the transaction currency code for the corresponding SRE. This field contains blanks when no specific transaction currency was identified when the SRE was established. The transaction currency option applies exclusively to the International Settlement Service and is currently available in the EU and CEMEA regions only.

VSS-110 Field Descriptions

Field Name	Description
Row	
FUNDS TRANSFER AMOUNT	Shown if the Reporting for SRE is a funds transfer SRE. The amount is the funds transfer amount for that entity.
TOTAL ACQUIRER	Total interchange value for acquirer transactions.
TOTAL ISSUER	Total interchange value for issuer transactions.
TOTAL OTHER	Total interchange value for other transactions.
TOTAL INTERCHANGE VALUE	Total interchange value for all transactions.
TOTAL ACQUIRER	Total reimbursement fees for acquirer transactions.
TOTAL ISSUER	Total reimbursement fees for issuer transactions.
TOTAL OTHER	Total reimbursement fees for other transactions.
TOTAL REIMBURSEMENT FEES	Total reimbursement fees for all transactions.
TOTAL ACQUIRER	Total Visa charges for acquirer transactions.
TOTAL ISSUER	Total Visa charges for issuer transactions.
TOTAL OTHER	Total Visa charges for other transactions.
TOTAL VISA CHARGES	Total Visa charges for all transactions.
TOTAL ACQUIRER	Total interchange value, fees, and charges for acquirer transactions.
TOTAL ISSUER	Total interchange value, fees, and charges for issuer transactions.
TOTAL OTHER	Total interchange value, fees, and charges for other transactions.
NET SETTLEMENT AMOUNT	Total interchange value, fees, and charges for all transactions.
Column	
COUNT	Total number of interchange transactions.

VSS-110 Field Descriptions

Field Name	Description
CREDIT AMOUNT	Total credits for corresponding row.
DEBIT AMOUNT	Total debits for corresponding row.
TOTAL AMOUNT	Net of credits (CREDIT AMOUNT) minus debits (DEBIT AMOUNT).

VSS-116 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS	Acquirer transactions section heading.
BUSINESS TRANSACTION TYPE	All original transactions submitted by the acquirer that are not reversals for the business transaction type listed.
REPRESENTMENT	All representment transactions that are not reversals submitted by the acquirer.
DISPUTE RESP FIN	All dispute response financial transactions that are not reversals submitted by the acquirer.
TOTAL INTERCHANGE	Total interchange value for all acquirer activity.
REIMBURSEMENT FEES	Reimbursement fees assessed on all acquirer transactions.
VISA CHARGES	Visa charges for all acquirer transactions.
TOTAL ACQUIRER	Totals for all acquirer activity for this SRE.
ISSUER TRANSACTIONS	Issuer transactions section heading.
BUSINESS TRANSACTION TYPE	All original transactions received by the issuer that are not reversals for the business transaction type listed.
REPRESENTMENT	All representment transactions that are not reversals received by the issuer.
DISPUTE RESP FIN	All dispute response financial transactions that are not reversals received by the issuer.
TOTAL INTERCHANGE	Total interchange value for all issuer activity.
REIMBURSEMENT FEES	Reimbursement fees assessed on issuer transactions.
VISA CHARGES	Visa charges for all issuer transactions.
TOTAL ISSUER	Totals for all issuer activity for this SRE.
OTHER TRANSACTIONS	Other transactions section heading.
TOTAL INTERCHANGE	Total interchange value for all other activity.

VSS-116 Field Descriptions

Field Name	Description
REIMBURSEMENT FEES	Reimbursement fees assessed on other transactions.
VISA CHARGES	Visa charges for all other transactions.
TOTAL OTHER	Totals for all other activity for this SRE.
TOTAL	Total values for all activity for this SRE.
FINAL SETTLEMENT NET AMOUNT	Net settlement amount for all activity for this SRE.
Column	
CREDITS COUNT	Number of transactions with a credit (CR) value for category listed in left-hand column of report.
CREDITS AMOUNT	Total credit value for transactions in category listed in left-hand column of report.
DEBITS COUNT	Number of transactions with a debit (DB) value for category listed in left-hand column of report.
DEBITS AMOUNT	Total debit value for transactions in category listed in left-hand column of report.
TOTAL COUNT	Number of all transactions for category listed in left-hand column of report.
TOTAL AMOUNT	Net amount (credits less debits) for category listed in left-hand column of report.

VSS-120 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS or ISSUER TRANSACTIONS	Business mode description. Business mode can be acquirer, issuer, or other.
PURCHASE	Business transaction type.
ORIGINAL SALE	Business transaction cycle.
TOTAL PURCHASE	Business transaction totals. Total counts and amounts for the business transaction type.
NET PURCHASE	Business transaction net values. Net value (credits minus debits) for the business transaction type.
TOTAL ACQUIRER INTERCHANGE or TOTAL ISSUER INTERCHANGE or TOTAL OTHER INTERCHANGE	Business mode totals. Total counts and amounts for the business mode.
NET ACQUIRER INTERCHANGE or NET ISSUER INTERCHANGE or NET OTHER INTERCHANGE	Business mode net values. Net value (credits minus debits) for the business mode. Business mode can be acquirer, issuer, or other.
Column	
RATE TABLE ID	The ID of the FX rate table used if transaction undergoes Multicurrency processing.

VSS-120 Field Descriptions

Field Name	Description
COUNT	Number of cleared transactions included in this settlement
CLEARING AMOUNT	The clearing amount for the issuer transactions is the cardholder’s billing amount. The cardholder billing amount includes the transaction amount, currency conversion fees (if applicable), and the Visa Issuer FX Calculator amounts (if applicable). The clearing amount for other transactions is the transaction amount.
INTERCHANGE VALUE CREDITS	Interchange Value (credits).
INTERCHANGE VALUE DEBITS	Interchange Value (debits).

VSS-900 Field Descriptions

Field Name	Description
Row	
BUSINESS MODE	Business mode can be acquirer, issuer, or other.
PURCHASE	Business transaction type.
ORIGINAL SALE	Business transaction cycle.
SENT TO VISA	Cleared transactions sent to Visa.
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa, received from Visa, and sent to settlement.
TO HOLDOVER	Cleared transaction sent to holdover, including transactions sent to the Chargeback Reduction Service (CRS) or warehouse.

VSS-900 Field Descriptions

Field Name	Description
FROM HOLDOVER	Transactions sent from holdover into settlement. This listing includes transactions that were accepted from the CRS or warehouse for settlement. Transactions returned from the CRS or warehouse are also listed here. Returned transactions are also listed under the Received From Visa category as a negative amount.
NONFINANCIAL SENT TO VISA	Nonfinancial transactions sent to Visa.
FROM CRS ACCEPTED	Transactions accepted for settlement from CRS.
TOTAL NONFINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa. The latter field is not shown on this sample report.
TOTAL TRANSACTIONS	Total of all transactions in the category.
RECEIVED FROM VISA	Cleared transactions received from Visa.
Column	
CRS DATE	Date the transaction was originally submitted to Visa.
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial, and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

This table provides the field descriptions for the VSS-900-P report. For information on header fields, refer to the Common Header Data Element Descriptions table.

VSS-900-P Field Descriptions

Field Name	Description
Row	
CLEARING CURRENCY	Clearing currency code.
SETTLEMENT SERVICE	Settlement service under which transactions were settled.
BUSINESS MODE	Business mode can be acquirer, issuer, or other.
PURCHASE	Business Transaction Type

VSS-900-P Field Descriptions

Field Name	Description
ORIGINAL SALE	Business Transaction Cycle
RECEIVED FROM VISA	Cleared transactions received from Visa.
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa, received from Visa, and sent to settlement.
SENT TO VISA	Cleared transactions sent to Visa.
TO HOLDOVER	Cleared transactions sent to holdover. This includes transactions sent to the Chargeback Reduction Service (CRS) or warehouse.
FROM HOLDOVER	Transactions sent from holdover into settlement. This includes transactions accepted from the CRS or warehouse for settlement. Transactions returned from the CRS or warehouse are also listed. Returned transactions are listed under the Received From Visa category as a negative amount.
TOTAL SENT TO VISA [nonfinancial]	Total count for nonfinancial transactions sent to Visa. This is calculated as Nonfinancial Sent to Visa minus To Holdover plus From Holdover.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of transactions for the category.
NON-FINANCIAL TRANSACTIONS SENT TO VISA	Nonfinancial transactions sent to Visa.
NON-FINANCIAL TRANSACTIONS RECEIVED FROM VISA	Nonfinancial transactions received from Visa.
Column	
CRS DATE	Date the transaction was originally submitted to Visa.
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.

VSS-900-P Field Descriptions

Field Name	Description
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa and Sent To Settlement, Received From Visa and Sent To Settlement, Total Sent to Settlement, Total Nonfinancial, and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

This table provides the field descriptions for the VSS-900-PS report. For information on header fields, refer to the Common Header Data Element Descriptions table.

VSS-900-PS Field Descriptions

Field Name	Description
Row	
CLEARING CURRENCY	Clearing currency code.
SETTLEMENT SERVICE	Settlement service under which transactions were settled.
RECEIVED FROM VISA	Cleared transactions received from Visa.

VSS-900-PS Field Descriptions

Field Name	Description
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa, received from Visa, and sent to settlement.
TOTAL	Total ACQ/ISS ID Total counts for the clearing identifier (all clearing currencies).
SENT TO VISA	Cleared transactions sent to Visa.
TO HOLDOVER	Cleared transactions sent to holdover. This includes transactions sent to the Chargeback Reduction Service (CRS) or warehouse.
FROM HOLDOVER	Transactions sent from holdover into settlement. This listing includes transactions accepted from the CRS or warehouse for settlement. Transactions returned from the CRS or warehouse are also listed. Returned transactions are also listed under the Received From Visa category as a negative amount.
TOTAL CLEARING CURRENCY	Total counts and amounts for the clearing currency.
TOTAL ACQUIRER TRANSACTIONS	The total amount of acquirer transactions.
SENT TO VISA	Nonfinancial transactions sent to Visa.
RECEIVED FROM VISA	Nonfinancial transactions received from Visa.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of transactions for the category.
TOTAL SENT TO VISA	Total count for nonfinancial transactions sent to Visa. This is calculated as Nonfinancial Sent To Visa minus To Holdover plus From Holdover.
Column	
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.

VSS-900-PS Field Descriptions

Field Name	Description
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

This table provides the field descriptions for the VSS-900-S report. For information on header fields, refer to the Common Header Data Element Descriptions table.

VSS-900-S Field Descriptions

Field Name	Description
Row	
TOTAL ACQUIRER TRANSACTIONS	Total Business Mode Total counts and amounts for the business mode.
SENT TO VISA	Cleared transactions sent to Visa.

VSS-900-S Field Descriptions

Field Name	Description
SENT TO VISA AND SENT TO SETTLEMENT	Total count and amount for transactions sent to Visa and sent to settlement. This total is calculated as Sent To Visa minus To Holdover plus From Holdover.
TOTAL CLEARING CURRENCY	Total counts and amounts for the clearing currency.
TOTAL	Total counts for the SRE (all clearing currencies).
FROM CRS ACCEPTED	Transactions accepted for settlement from the Chargeback Reduction Service (CRS).
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa, received from Visa, and sent to settlement.
TO HOLDOVER	Cleared transaction sent to holdover, including transactions sent to the Chargeback Reduction Service (CRS) or warehouse.
FROM HOLDOVER	Transactions sent from holdover into settlement. This listing includes transactions accepted from the CRS or warehouse for settlement. Transactions returned from the CRS or warehouse are also listed. Returned transactions are also listed under the Received From Visa category as a negative amount.
RECEIVED FROM VISA	Cleared transactions received from Visa.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of Total Sent To Settlement plus Total Nonfinancial.
Column	
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa and Sent To Settlement, Received From Visa and Sent To Settlement, Total Sent To Settlement, Total Nonfinancial, and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total amount printed for total rows.

Appendix B

VSS Reports-Machine-Readable Formats

Machine-readable (TC 46) records are organized by VisaNet Settlement Service (VSS) report. Each report line of data has one or two records, depending on the transaction format used. Common report information appears in the first record for each report line of data. If a second record is required, the common report information is not included in that record. The transaction format used for the machine-readable record depends on the report.

Each record begins with a “46” (positions 1 and 2), and all reports belong to Report Group V (position 59). There are nine (9) different transaction formats, identified by the Report Subgroup (position 60). All transaction formats consist of one transaction component record (TCR), except for Report Subgroups 4, 6, and 9, which consist of two TCRs. The TCR is identified in Transaction Component Sequence Number (position 4).

Single Message System (SMS)-connected clients using a Direct Access Service (DAS) VisaNet Access Point (VAP) for report delivery receive the machine-readable records in the file type of SETLM.

SMS-connected clients using non-VAP delivery receive the machine-readable records as a separate transmission. There is no header or trailer record.

BASE II-connected clients and SMS-connected clients using a BASE II VAP receive the machine-readable records in their Center Transaction File (CTF)—Incoming Interchange.

VSS Report Subgroups

This table cites the applicable Report Subgroup used for each VSS report and the applicable transaction component records (TCRs) for each Report Subgroup.

VSS Report Subgroups

Report Subgroup	VSS Reports	TCR 0	TCR 1
1	VSS-100-W VSS-100-R	Yes	
2	VSS-110 VSS-110-M VSS-111	Yes	
3	VSS-115 VSS-115-M VSS-116 VSS-116-M	Yes	
4	VSS-120 VSS-120-M VSS-130 VSS-130-M VSS-135 VSS-140 VSS-140-M VSS-210 VSS-210-M VSS-215 VSS-215-M VSS-230 VSS-640	Yes	Yes

Client Settlement Data Record Layouts

Client settlement data record layouts are provided for each TCR 0 and TCR 1 record. The fields are described in detail in the client settlement data edit criteria contained within each table.

TC46, TCR 0 Report Group V, Report Subgroup 1

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 1.

TC 46, TCR 0 (Report Subgroup 1) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field will contain a 46 .
3	1	UN	Transaction Code Qualifier	This field will contain a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edit option is used during an ongoing edit run.
4	1	UN	Transaction Component Sequence Number	This field will contain a 0 (zero) .
5-10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this will be the acquiring or issuing identifier being reported. For processor-level reports, this will be the clearing identifier of the processor.
11-16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This will be the source identifier of the VIC. This field will contain zeros.
17-26	10	AN	Reporting for SRE Identifier	This is the identifier for the SRE being reported on.
27-29	3	AN	Settlement Service Identifier	This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in VSS Codes .

TC 46, TCR 0 (Report Subgroup 1) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
30–36	7	UN	Report Date	This field contains the date on which the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
37	1	AN	SRE Level Number	This field indicates the level of the Subordinate SRE described by this record in relation to the Reporting for SRE. The possible values are 1 through 8. • A value of 1 indicates this SRE is the Reporting for SRE. • A value of 2 indicates this SRE is directly subordinate to the Reporting for SRE. • A value of 3 indicates this SRE is directly subordinate to the previous level 2 Subordinate SRE. • The maximum value is 8. This indicates this SRE is directly subordinate to the previous level 7 subordinate SRE.
38–44	7	UN	Last Change Date	This contains the date on which the contents of the report were last modified. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the field is not applicable, it will contain spaces.
45–58	14	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 1 .
61–63	3	AN	Report Identification Number	This field contains the value 100 .
64–65	2	AN	Report Identification Suffix	This field contains a W or R .

TC 46, TCR 0 (Report Subgroup 1) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
66–75	10	AN	Subordinate SRE Identifier	This contains the identifier of the SRE represented by this record. It can be either the Reporting for SRE itself or one of its subordinates. The SRE-Level Number field indicates the level in the reporting hierarchy for this SRE.
76–90	15	AN	Subordinate SRE Name	This contains the name corresponding to the Subordinate SRE Identifier.
91	1	AN	Funds Transfer Indicator	This contains a Y if the subordinate SRE is a Funds Transfer SRE or an N if the subordinate SRE is not a Funds Transfer SRE.
92	1	AN	Clearing Entity Identifier Type	The possible values for this field are: A = Card Account Range B = Clearing Identifier P = Processor Charges SRE Space when the Processor Specified Indicator contains an N .
93–110	18	UN	Clearing Entity Identifier 1	The possible values for this field are: - Starting value for a card account range if the Clearing Entity Identifier Type contains an A. - Clearing identifier number in the last six (6) digits if the Clearing Entity Identifier Type contains a B. - Space when the Clearing Entity Identifier Type contains a P.
111–128	18	UN	Clearing Entity Identifier 2	The possible values for this field are: - Ending value for a card account range if the Clearing Entity Identifier Type contains an A. - Space if the Clearing Entity Identifier Type contains a B.

TC 46, TCR 0 (Report Subgroup 1) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
129	1	AN	Processor Specified Indicator	This field contains a Y if the Processor Identifier is specified or an N if the Processor Identifier is not specified.
130-139	10	UN	Processor Identifier	When the Processor Specified Indicator field contains a Y , this field contains the processor identifier used to match transactions to this Subordinate SRE; otherwise, this field contains a space.
140	1	AN	Network Specified Indicator	This field contains a Y if the Network Identifier is specified or an N if the Network Identifier is not specified.
141-144	4	UN	Network Identifier	When the Network Specified Indicator field contains a Y , this field contains the network identifier used to match transactions to this Subordinate SRE; otherwise, this field contains a space. When this field contains all 9s , network = ALL is displayed on the report. This condition occurs when no specific network was specified when the SRE was established.
145-147	3	UN	Settlement Currency	This field contains the settlement currency (unpacked numeric).
148-150	3	UN	Transaction Currency Acquirer Perspective	This field contains transaction currency from the acquirer perspective. If no transaction currency has been specified, this field contains spaces.
151-153	3	UN	Transaction Currency Issuer Perspective	This field contains transaction currency from the issuer perspective. If no issuer transaction currency is specified, this field contains spaces.
154-167	14	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup 2

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 2.

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
1–2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .
5–10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11–16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros.
17–26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE being reported on.
27–36	10	AN	Rollup to SRE Identifier	This field contains the identifier for the SRE which is directly superior to the Reporting for SRE in the settlement hierarchy. If the Reporting for SRE is the highest SRE in the settlement hierarchy, this field contains the same value as the Reporting for SRE identifier.

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
37–46	10	AN	Funds Transfer SRE Identifier	When funds transfer entity for the Reporting for SRE is the same as the Reporting for SRE or is at a level in the settlement hierarchy that is superior to the Reporting for SRE, this field contains the SRE identifier for the funds transfer entity; otherwise, this field contains a space.
47–49	3	UN	Settlement Service Identifier	This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in <u>VSS Codes</u> .
50–52	3	AN	Settlement Currency Code	This field contains the ISO numeric currency code in which amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y , this field contains spaces.
53	1	AN	No Data Indicator	The possible values for this field are Y (if there is no data for this report) or space .
54–58	5	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 2 .
61–63	3	AN	Report Identification Number	This field contains 110 or 111 .
64–65	2	AN	Report Identification Suffix	The possible values for this field are space or M .

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
66–72	7	AN	Settlement Date	If the Report Identification Suffix contains a space, this contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the Report Identification Suffix contains an M, this field contains spaces. If the Report Identification field contains 111 and the No Data field contains Y, this field contains zeros.
73–79	7	AN	Report Date	This contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
80–86	7	AN	From Date	This field contains the starting range for information on the report when the Report Identification Suffix contains an M or the Report Identification Number is 111. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the No Data field contains Y, this field contains spaces or 9999000.
87–93	7	AN	To Date	When the Report Identification Suffix contains an M or the Report Identification Number contains 111, this contains the ending range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the Report Identification field contains 111 and the No Data field contains Y, this field contains zeros; otherwise, this field contains a space.

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
94	1	AN	Amount Type	When the Report Identification Number is 110, the possible values for this field are: I = Interchange F = Reimbursement Fees C = Visa Charges T = Total When the Report Identification Number is 111, the possible values for this field are: Space = Daily Settlement Position T = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields. If the No Data Indicator = Y, this field contains a space.
95	1	AN	Business Mode	The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields. If the No Data Indicator = Y, or if the Report Identification Number field contains 111, this field contains spaces.
96–110	15	AN	Count	When the Amount Type contains an I, this field contains the interchange transaction count corresponding to Business Mode. Otherwise, this field contains a space. If the No Data Indicator = Y, or if the Report Identification Number field contains 111, this field contains spaces.

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
111–125	15	AN	Credit Amount	This field contains the Credit Amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , or if the Report Identification Number field contains 111 , this field contains spaces .
126–140	15	AN	Debit Amount	This field contains the Debit Amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , or if the Report Identification Number field contains 111 , this field contains spaces .
141–155	15	AN	Net Amount	This field contains the net of the credit amount minus the debit amount. If the Amount Type = T and the Business Mode = 9 , this field contains the net settlement amount for the Reporting for SRE. If the Report Identification Number is 111 , this field contains the net settlement position. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains spaces .
156–157	2	AN	Net Amount Sign	The Net Amount Sign is DB for debit or CR for credit. If Net Amount contains zeros , or spaces , this field contains spaces . If the No Data Indicator = Y , this field contains spaces .

TC 46, TCR 0 (Report Subgroup 2) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
158-164	7	AN	Funds-Transfer Date	If the Report Identification Number is 111 and the amount type is space and the No Data field is space, this contains the Funds Transfer date. The format of the date is CCYYDDD, where CC = century, YY = year and DDD = Julian day. If the Report Identification Number is 110 or if the Report Identification Number is 111 and amount type is T, this field contains spaces.
165-167	3	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup 3

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 3.

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field will contain a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero). This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
5-10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11-16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros .
17-26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE being reported on.
27-36	10	AN	Rollup to SRE Identifier	This field contains the identifier for the SRE which is directly superior to the Reporting for SRE in the settlement hierarchy. If the Reporting for SRE is the highest SRE in the settlement hierarchy, this field contains the same value as the Reporting for SRE identifier.
37-46	10	AN	Funds Transfer SRE Identifier	When funds transfer entity for the Reporting for SRE is the same as the Reporting for SRE or is at a level in the settlement hierarchy that is superior to the Reporting for SRE, this field contains the SRE identifier for the funds transfer entity; otherwise, this field contains a space .
47-49	10	UN	Settlement Service Identifier	This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in <u>VSS Codes</u> .

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
50-52	3	AN	Settlement Currency Code	This field contains the ISO numeric currency in which amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y, this field contains a space.
53	3	AN	Amount Type	The possible values for this field are: I = Interchange F = Reimbursement Fees C = Visa Charges T = Total This code designates the type of value contained in the Credit Amount, Debit Amount and Net Amount fields. If the No Data Indicator = Y, this field contains a space.
54	1	AN	Business Mode	Description: The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the Credit Amount, Debit Amount and Net Amount fields. If the No Data Indicator = Y, this field contains a space.
55	1	AN	No Data Indicator	The possible values for this field are Y or space, if there is no data for this report.

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
56	1	AN	Summary Level	This field is only applicable when report identification number is 116 , when it is not 116 , the field contains a space . The possible values are: 1 = reimbursement fees by jurisdiction 9 = total reimbursement fees
57-58	2	AN	Jurisdiction	This field is only applicable when report identification number is 116 , when it is not 116 , the field contains a space . The field contains the jurisdiction code of the fees reported. (A list of all possible jurisdiction codes can be found at Table C-6.)
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 3 .
61-63	3	AN	Report Identification Number	This field contains the value 115 or 116 .
64-65	2	AN	Report Identification Suffix	The possible values for this field are space or M .
66-72	7	AN	Settlement Date	If the Report Identification Suffix contains a space , this contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the Report Identification Suffix contains an M , this field contains a space .
73-79	7	AN	Report Date	This field contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
80–86	7	AN	From Date	When the Report Identification Suffix contains an M , this contains the starting range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day; otherwise, this field contains a space .
87–93	7	AN	To Date	When the Report Identification Suffix contains an M , this contains the ending range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day; otherwise, this field contains a space .
94–96	3	AN	Business Transaction Type	This field contains the Business Transaction Type. Possible values for this field are included in VSS Codes . If the No Data Indicator = Y , this field contains a space . If the Amount Type = T , this field contains a space .
97	1	AN	Business Transaction Cycle	This field contains the Business Transaction Cycle. Possible values for this field are included in VSS Codes . If the No Data Indicator = Y , this field contains a space . If the Amount Type = T , this field contains a space .
98	1	AN	Reversal Indicator	Possible values for this field are Y or N . If the No Data Indicator = Y , this field contains a space . If the Amount Type = T , this field contains a space .

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
99–109	11	AN	Credits Count	This field contains the count of Credit Transactions for the corresponding Business Mode when Amount Type = I (Interchange). If the No Data Indicator = Y , this field contains a space .
110–124	15	AN	Credits Amount	This field contains the amount for Credit Transactions for the corresponding Business Mode and Amount Type. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
125–135	11	AN	Debits Count	This field contains the count of Debit Transactions for the corresponding Business Mode when Amount Type = I (Interchange). If the No Data Indicator = Y , this field contains a space .
136–150	15	AN	Debits Amount	This field contains the amount for Debit Transactions for the corresponding Business Mode and Amount Type. The number of decimal places depends on the currency. If the No Data Indicator = Y , this field contains a space .
151–165	15	AN	Total Amount	This field contains the total amount for the corresponding Business Mode and Amount Type. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
166–167	2	AN	Total Amount Sign	The Total Amount Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space .

TC 46, TCR 0 (Report Subgroup 3) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR0 Report Group V, Report Subgroup 4

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 4.

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field will contain a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .
5-10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11-16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros .
17-26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE being reported on.

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
27–36	10	AN	Rollup to SRE Identifier	This field contains the identifier for the SRE which is directly superior to the Reporting for SRE in the settlement hierarchy. If the Reporting for SRE is the highest SRE in the settlement hierarchy, this field contains the same value as the Reporting for SRE identifier.
37–46	10	AN	Funds Transfer SRE Identifier	When funds transfer entity for the Reporting for SRE is the same as the Reporting for SRE, or is at a level in the settlement hierarchy that is superior to the Reporting for SRE, this field contains the SRE identifier for the funds transfer entity; otherwise, this field contains a space .
47–49	10	UN	Settlement Service Identifier	This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in <u>VSS Codes</u> .
50–52	3	AN	Settlement Currency Code	This field contains the ISO numeric currency in which amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y , this field contains a space .
53–55	3	AN	Clearing Currency Code	When the Report Identification Number contains 120 or 210 , this field contains the ISO numeric currency in which clearing amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
56	1	AN	Business Mode	The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the amount fields on the TCR 1. If the No Data Indicator = Y, this field contains a space.
57	1	AN	No Data Indicator	The possible values for this field are Y or space, if there is no data for this report. If the value is Y, no TCR 1 is produced for this report.
58	1	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 4 .
61–63	3	AN	Report Identification Number	The possible values for this field are: 120, 130, 131, 135, 136, 140, 210, 215, 230 , or 640 .
64–65	2	AN	Report Identification Suffix	The possible values for this field are space or M .
66–72	7	AN	Settlement Date	If the Report Identification Suffix contains a space, this contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the Report Identification Suffix contains an M, this field contains zeros.

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
73-79	7	AN	Report Date	This contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
80-86	7	AN	From Date	When the Report Identification Suffix contains an M , this contains the starting range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day; otherwise, this field contains a space .
87-93	7	AN	To Date	When the Report Identification Suffix contains an M , this contains the ending range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day; otherwise, this field contains a space .
94-96	3	AN	Charge Type Code	When the Report Identification Number contains 140 or 230 , and the Summary Level contains 03, 04, 05, 06, 07, 08, 09, 10, or 011 (the new charge type code for ISA) this field contains the Charge Type Code. Possible values for this field are included in <u>VSS Codes</u> ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
97-99	3	AN	Business Transaction Type	When the Report Identification Number contains 120, 130, 140, 210, or 230 and the Summary Level contains 05, 06, 07, 08, 09, or 10 this field contains the Business Transaction Type. Possible values for this field are included in <u>VSS Codes</u> ; otherwise, this field contains a space .

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
100	1	AN	Business Transaction Cycle	When the Report Identification Number contains 120, 130, 140, 210, or 230 and the Summary Level contains 07, 08, 09, or 10 , this field contains the Business Transaction Cycle. Possible values for this field are included in <u>VSS Codes</u> ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
101	1	AN	Reversal Indicator	When the Report Identification Number contains 120, 130, 140, 210, or 230 and the Summary Level contains 07, 08, 09, or 10 , possible values for this field are Y or N ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
102	1	AN	Return Indicator	When the Report Identification Number contains 120 and Summary Level contains 10 , possible values for this field are Y or N ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
103-104	2	AN	Jurisdiction Code	When the Report Identification Number contains 130, 135, 140, 210, or 230 , this field contains the Jurisdiction Code. Possible values for this field are included in <u>VSS Codes</u> ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
105	1	AN	Interregional Routing Indicator	When the Report Identification Number contains 130, 140, or 230 and Summary Level contains 09 or 10 , the possible values for this field are Y or N ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
106–108	3	AN	Source Country Code	When the Report ID Number contains 130, 140, or 230 and the Interregional Routing Indicator is N, this field contains the source country code; otherwise, this field contains a space. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y, this field contains a space.
109–111	3	AN	Destination Country Code	When the Report ID Number contains 130, 140, or 230 and the Interregional Routing Indicator is N, this field contains the destination country code; otherwise, this field contains a space. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y, this field contains a space.
112–113	2	AN	Source Region Code	When the Report ID Number contains 130, 140, or 230 and the Interregional Routing Indicator is Y, this field contains the source region code; otherwise, this field contains a space. Possible values for this field are available in <u>VSS Codes</u>. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
114-115	2	AN	Destination Region Code	When the Report ID Number contains 130, 140, or 230 and the Interregional Routing Indicator is Y, this field contains the destination region code; otherwise, this field contains a space. Possible values for this field are available in VSS Codes. If the No Data Indicator = Y, this field contains a space.
116-131	16	AN	Fee Level Descriptor	When the Report ID Number contains 130 or 135 and Summary Level contains 10, this field contains the Fee Level Descriptor; otherwise, this field contains a space. If the No Data Indicator = Y, this field contains a space.
132	1	AN	CR/DB/NET Indicator	If the Report Identification Number contains 135 and Summary Level contains 10, this field contains one of these values: • C = Credit Line • D = Debit Line • N = Net Line Otherwise, this field contains a space.

TC 46, TCR 0 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
133-134	2	AN	Summary Level	This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Business Mode Total 02 = Business Mode Net 03 = Charge Type Total 04 = Charge Type Net 05 = Business Transaction Total 06 = Business Transaction Net 07 = Business Cycle Total 08 = Jurisdiction Total 09 = Routing Total 10 = Detail Total 11 = Final Total 12 = Final Net If the No Data Indicator = Y, this field contains a space.
135-136	2	AN	Reserved	This field is reserved for future use. EP will always space-fill.
137-167	31	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

One TC 46, TCR 0 record is created for each report line written. In the case of the VSS-115 report, detail report lines are summarized according to the rules described in this table.

VSS-115 Report Summarization Criteria

Report Row Description	TC 46 Fields			Notes
	Business Transaction Type	Business Transaction Cycle	Reversal Indicator	
Business Transaction Description	Business Transaction Code	1	N	Contains all original (cycle 0 or 1) transactions that are not reversals
REVERSAL	Space	Space	Y	Contains all reversal transactions
CHARGEBACK	Space	2	N	Contains all chargeback (cycle = 2) and second chargeback (cycle = 4) transactions that are not reversals
DISPUTE FIN	Space	7	N	Contains all dispute financial (cycle = 7) transactions that are not reversals
REPRESENTMENT	Space	3	N	Contains all representment (cycle = 3) transactions that are not reversals
DISPUTE RESP FIN	Space	8	N	Contains all dispute response financial (cycle = 8) transactions that are not reversals
ADJUSTMENT	Space	5	N	Contains all debit adjustment (cycle = 5) and credit adjustment (cycle = 6) transactions that are not reversals

TC46, TCR 1 Report Group V, Report Subgroup 4

This is the client settlement data record layout for TCR 1, Report Group V, and Report Subgroup 4.

TC 46, TCR 1 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
1–2	2	AN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	AN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	AN	Transaction Component Sequence Number	This field contains a 1 (one) .
5–9	5	AN	Rate Table ID	When the Report ID Number contains 120 , this field contains the Rate Table ID. The Rate Table ID contains alpha and numeric vlaues; otherwise, this field contains spaces . The format of this field is annnn, where: • a = alpha (A–Z) • nnnn = numeric (0000–9999)
10–11	2	AN	Reserved	Spaces filled.
12–26	15	AN	First Count	The contents of this field depends on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 .
27–41	15	AN	Second Count	The contents of this field depends on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 .

TC 46, TCR 1 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
42–56	15	AN	First Amount	The contents of this field depend on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 . The number of decimal places for this field depends on the currency.
57–58	2	AN	First Amount Sign	The First Amount Sign is DB for debit or CR for credit.
59–73	15	AN	Second Amount	The contents of this field depend on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 . The number of decimal places for this field depends on the currency.
74–75	2	AN	Second Amount Sign	The Second Amount Sign is DB for debit or CR for credit.
76–90	15	AN	Third Amount	The contents of this field depend on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 . The number of decimal places for this field depends on the currency.
91–92	2	AN	Third Amount Sign	The Third Amount Sign is DB for debit or CR for credit.
93–107	15	AN	Fourth Amount	The contents of this field depend on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 . The number of decimal places for this field depends on the currency.
108–109	2	AN	Fourth Amount Sign	The Fourth Amount Sign is DB for debit or CR for credit.

TC 46, TCR 1 (Report Subgroup 4) Client Settlement Data Record Layout

Position	Field Length	Format	Field Name	Description
110–124	15	AN	Fifth Amount	The contents of this field depend on the Report ID number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 . The number of decimal places for this field depends on the currency.
125–126	2	AN	Fifth Amount Sign	The Fifth Amount Sign is DB for debit or CR for credit.
127–141	15	AN	Sixth Amount	The contents of this field depend on the Report Identification Number. See VSS 120–135 Report Count/Amount Fields Mapped to TCR 1 and VSS 140–230 Report Count/Amount Fields Mapped to TCR 1 .
142–143	2	AN	Sixth Amount Sign	The Sixth Amount Sign is DB for debit or CR for credit.
144–168	25	AN	Reserved	This field is reserved for future use. EP will always space-fill.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

These tables show the specific fields on the VSS reports to which the counts and amount in the TCR 1 record map. When the No Data Indicator on the TCR 0 = **Y**, no TCR 1 record is created.

VSS 120–135 Report Count/Amount Fields Mapped to TCR 1

Counts/Amounts	VSS-120 VSS-120-M	VSS-130 VSS-130-M	VSS-135

TC46, TCR 0 Report Group V, Report Subgroup 5

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 5.

TC 46, TCR 0 (Report Subgroup 5) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .

TC 46, TCR 0 (Report Subgroup 5) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
5-10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11-16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros (0) .
17-26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE for which this report was requested.
27-36	10	AN	Recap For SRE Identifier	This field contains the identifier of the SRE to which the data in this record corresponds. This field contains a space if reporting SRE totals.
37-39	3	UN	Settlement Service Identifier	This field contains the 3-digit code which identifies the Settlement Service used. Possible values for this are included in <u>VSS Codes</u> .
40-42	3	UN	Settlement Currency Code	This field contains the ISO numeric currency in which amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y , this field contains a space .

TC 46, TCR 0 (Report Subgroup 5) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
43	1	AN	Business Mode	The possible values for this field are: • 1 = Acquirer • 2 = Issuer • 3 = Other • 9 = Total This code designates the type of value contained in the Total Interchange Value, Total Reimbursement Fees, Total Visa Charges, and Net Settlement Amount fields. If the No Data Indicator = Y, this field contains a space.
44	1	AN	No Data Indicator	The possible values for this field are Y or space if there is no data for this report.
45–58	14	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V.
60	1	AN	Report Subgroup	This field contains a 5.
61–63	3	AN	Report Identifier Number	The possible values for this field are: 300 and 320.
64–65	2	AN	Report Identification Suffix	This field contains a space.
66–72	7	UN	Settlement Date	This field contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
73–79	7	UN	Report Date	This field contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.

TC 46, TCR 0 (Report Subgroup 5) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
80-94	15	UN	Total Interchange Count	This field contains the interchange transaction count corresponding to Business Mode. If the No Data Indicator = Y , this field contains a space .
95-109	15	UN	Total Interchange Value	This field contains the interchange amount corresponding to Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
110-111	2	AN	Interchange Value Sign	The Interchange Value Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space . If Total Interchange Value contains zeros , this field contains a space .
112-126	15	UN	Total Reimbursement Fees	This field contains the reimbursement fees corresponding to Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
127-128	2	AN	Reimbursement Fees Sign	The Reimbursement Fees Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space . If Total Reimbursement Fees contains zeros , this field contains a space .
129-143	15	UN	Total Visa Charges	This field contains the Visa charges corresponding to Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .

TC 46, TCR 0 (Report Subgroup 5) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
144-145	2	AN	Visa Charges Sign	The Visa Charges Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space . If Total Visa Charges contains zeros , this field contains a space .
146-160	15	UN	Net Settlement Amount	This field contains the net settlement amount corresponding to Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
161-162	2	AN	Net Settlement Amount Sign	The Net Settlement Amount Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space . If Total Net Settlement Amount contains zeros , this field contains a space .
163-164	2	AN	Summary Level	Description: The possible values of this field are: • 01 = Business Mode Total • 02 = Business Mode Net • 11 = Final Total • 12 = Final Net 01 and 02 are SRE data recap. 11 and 12 are reporting SRE data totals.
165-167	3	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup 6

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 6.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1–2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .
5–10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11–16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros .
17–26	10	AN	Reporting for SRE Identifier	When the Report ID Suffix is space or S , this is the identifier for the SRE for which this report was requested. Otherwise, this field contains a space .
27–36	10	UN	Processor Identifier	When the Report ID Suffix is P or PS , this is the identifier for the processor for which this report was requested. Otherwise, this field contains a space .

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
37–46	10	UN	Clearing Identifier	When the Report Identifier Suffix contains P or PS, this field contains the identification for the clearing identifier. For BASE II, the clearing identifier is the acquiring or issuing identifier that appears on the Edit Package Reports. For SMS, the clearing identifier is the Affiliate ID that appears on the detail reports and raw data; otherwise, this field contains a space. If the No Data Indicator = Y, this field contains a space.
47–49	3	UN	Clearing Currency Code	This field contains the ISO numeric currency in which the amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. This field contains 000 if the transactions are nonfinancial. It contains a space if this is the total for all currency codes. If the No Data Indicator = Y, this field contains a space.
50–52	3	UN	Settlement Service Identifier	This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in <u>VSS Codes</u>. This field contains a space if this is the total for all Settlement Services. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
53	1	AN	Business Mode	Description: When Summary-Level contains 06, 07, or 08, the possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total Otherwise, this field contains a space. This code designates the type of value contained in the amount field. If the No Data Indicator = Y, this field contains a space.
54	1	AN	No Data Indicator	The possible values for this field are Y or space if there is no data for this report.
55–58	4	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 6 .
61–63	3	AN	Report Identification Number	The possible values for this field are: 900 and 910 .
64–65	2	AN	Report Identification Suffix	The possible values for this field are: Space , S , P , PS , M , SM , PM , or XM .
66–72	7	UN	Settlement Date	This field contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
73–79	7	UN	Report Date	This contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
80	1	AN	Financial Indicator	This field contains a Y if the Business Transaction Type is financial; otherwise, this field contains an N. For VSS-900-S, this field contains a 0 if the Business Transaction Type is financial; otherwise, this contains a 1. If the No Data Indicator = Y, this field contains a space. If Report Identification Suffix is Space or P, this field contains a 0 if the transactions are financial. It contains a 1 if the transactions are nonfinancial.
81	1	AN	Clearing Only Indicator	This field contains a Y if the transactions are clearing only; otherwise, this field contains an N. For VSS-900-S, this field contains a 1 if the transactions are clearing only; otherwise, this field contains a 0. If the No Data Indicator = Y, this field contains a space. If Report Identification Suffix is Space or P, this field contains a 0 if the transactions are <i>not</i> clearing-only. It contains a 1 if the transactions are clearing-only.
82-84	3	AN	Business Transaction Type	This field contains the Business Transaction Type. When Summary Level contains 07 or 08, possible values for this field are included in <u>VSS Codes</u>. Otherwise, this field contains a space. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
85	1	AN	Business Transaction Cycle	This field contains the Business Transaction Cycle. When Summary Level contains 08 , possible values for this field are included in VSS Codes ; otherwise, this field contains a space . If the No Data Indicator = Y , this field contains a space .
86	1	AN	Reversal Indicator	Possible values for this field are Y or N . If the No Data Indicator = Y , this field contains a space . If Report Identification Suffix is P , this field contains a 0 if the transactions are Original. It contains a 1 if the transactions are Reversals.
87–88	2	AN	Transaction Disposition	This field indicates the disposition of the transactions. Possible values for this field are included in VSS Codes . If the No Data Indicator = Y , this field contains a space .
89–103	15	UN	Count	This field contains the transaction count.If the No Data Indicator = Y , this field contains a space .
104–118	15	UN	Amount	This field contains the clearing amount corresponding to Business Mode and Transaction Disposition. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y , this field contains a space .
119–120	2	AN	Amount Sign	The Interchange Value Sign is DB for debit or CR for credit. If the No Data Indicator = Y , this field contains a space . If Amount contains zeros , this field contains a space .

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
121-122	2	AN	Summary Level	Description: This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Processor Total 02 = Clearing Identifier Total 03 = Settlement SVC Total 04 = SRE Total 05 = Clearing Currency Total 06 = Business Mode Total 07 = Business Transaction Total 08 = Detail Line 10 = Settlement Type/Payment Mode Total 11 = Financial/Nonfinancial Total Summary levels 10 and 11 are only used when Report Identification Number = 900. If the No Data Indicator = Y, this field contains spaces.
123-129	7	AN	CRS Date	This field contains the date the transaction was sent to CRS. The format of this date is DDMMYY, where DD = day, MMM = alphabetic representation of the month, and YY = year. If the Report Identification Suffix is M, SM, PM, or XM, this field contains a space.
130-144	15	AN	Interchange Reimbursement Fees	This field contains the Reimbursement Fee and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field contains a space. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
145–146	2	AN	Interchange Reimbursement Fees Sign	This field contains the Reimbursement Fee Sign and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field contains a space. The Interchange Reimbursement Fee Sign is DB for debit or CR for credit. If the No Data Indicator = Y, this field contains a space. If the Reimbursement Fee contains zeros, this field contains a space.
147–161	15	AN	Payment Amount	This field contains the Payment Amount and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field contains a space. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y, this field contains a space. If the Payment Amount contains zeros, this field contains a space.
162–163	2	AN	Payment Amount Sign	This field contains the Payment Amount Sign and only applies to Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field contains a space. The Payment Amount Sign is DB for debit or CR for credit. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
164–166	3	AN	Payment Mode/ Settlement Type	This field is only applicable when Report Identification Number = 910 or when the Report Identification Number = 900 and reporting for Brazil NNSS; otherwise, the field contains a space. The field is Payment Mode when the Report Identification Number is 910 The possible values of Payment Mode are: 10, 21, 22, 23, 24, 31, 32, 33, 34, 61, 71, 80, and space. The field is Settlement Type when the number is 910 and reporting for Brazilian NNSS. The possible values of Settlement Type are: 000, 001, 002, 003, 004, 007, 010, 012, 015, 017, 018, 020, 022, 025, 027, 028, and space.
167	1	AN	Installment Payment Indicator	This field is only valid when the payment mode is 61. The possible values for this field are 2, 3, or space. When this field is 2 and payment mode is 61, these are “installment payment” transactions.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 1 Report Group V, Report Subgroup 6

This is the client settlement data record layout for TCR 1, Report Group V, and Report Subgroup 6.

The TCR 1 will only be produced for VSS-900 series monthly reports when the Report Identification Number = **900** and the Report Identification Suffix on the TCR 0 = **M, SM, PM**, or **XM**.

In addition, the TCR 1 will only be attached to the first TCR 0 of the report. The remaining TCR 0s will not have a corresponding TCR 1.

Note: There is only one TCR 1 per one monthly report.

TC 46, TCR 1 (Report Subgroup 6) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains the value of 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 1 (one) .
5-11	7	AN	From Date	This field contains starting date range for information contained in the report when the Report Identification Suffix contains M, SM, PM, or XM ; otherwise, the field contains a space . The format of this date is CCYYDDD, where CC is the century, YY is the year, and DDD is the Julian day.
12-18	7	AN	To Date	This field contains ending date range for information contained in the report when the Report Identification Suffix contains M, SM, PM, or XM ; otherwise, the field contains a space . The format of this date is CCYYDDD, where CC is the century, YY is the year, and DDD is the Julian day.
19-168	150	AN	Reserved	This field is reserved for future use. EP will always space-fill.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup 7

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 7.

TC 46, TCR 0 (Report Subgroup 7) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1–2	2	UN	Transaction Code	Code indicating the type of transaction. This field will contain a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a zero . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .
5–10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11–16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field contains zeros (0s) .
17–19	3	UN	Settlement Service ID	This is the identifier for the settlement service.
20–22	3	UN	Settlement Currency Code	This field contains the settlement currency code.
23–29	7	UN	Settlement Date	This field contains the date for which settlement was performed. The format of the date is CCYYDDD, where CC is the century, YY is the year, and DDD is the Julian day.

TC 46, TCR 0 (Report Subgroup 7) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
30–36	7	UN	Report Date	This field contains the date the report was produced. The format of the date is CCYYDDD, where CC is the century, YY is the year, and DDD is the Julian day.
37–46	10	UN	Funds Transfer SRE	This field contains the SRE identifier for the funds transfer entity.
47	1	AN	No Data Indicator	The possible values for this field are: Y (if there is no data for this report) or space . If the value is Y , there will be no TCR 1 produced for this report.
48–57	10	AN	Report for SRE/ Value date	This field contains the Reporting for SRE identifier when the Report Identification Number is 453 . When the report identifier is 451 , the field contains the “value date” if value date is available for the report. The value date is reported in the CCYYDDD format, followed by 3 spaces.
58	1	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field will contain a 7 .
61–63	3	AN	Report Identification Number	This field contains 451, 452, 453 , or 455 .
64–65	2	AN	Report Identification Suffix	This field contains a space .
66	1	AN	Amount Type	This field contains the amount type.
67–81	15	AN	Credit Amount	This field contains the credit amount. If there is no credit amount, this field contains a space .

TC 46, TCR 0 (Report Subgroup 7) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
82-96	15	AN	Debit Amount	This field contains the debit amount. If there is no debit amount, this field contains a space .
97-111	15	AN	Net Amount	This field contains the net amount.
112-113	2	AN	Net Amount Sign	This field contains the sign for the net amount; DB for debit and CR for credit.
114-128	15	AN	Visa Charges/ Processing Fee	This field contains Visa charges if the report identification number = 451 . This field contains processing fee if the report identification number = 452 or 453 . If the No Data Indicator = Y , this field contains a space .
129-130	2	AN	Visa Charges Sign/Processing Fee Sign	This field contains the sign for Visa Charge/Processing Fee, DB for debit and CR for credit.
131-145	15	AN	Count	This field contains the transaction count and is only be applicable if the Report Identification Number is 452 or 453 ; otherwise, it is space . If the No Data Indicator = Y , this field contains a space .
146-160	15	UN	Net Amount in Settlement Currency	This field is for VSS-455 report only, for all other reports, the field contains a space . For VSS-455 report, this contains the net amount in the settlement currency of the SRE.
161-162	2	AN	Net Amount in Settlement Currency Sign	This field is for VSS-455 report only, for all other reports, the field contains a space . For VSS-455 report, DB for debit and CR for credit.

TC 46, TCR 0 (Report Subgroup 7) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
163-165	3	UN	Settlement Balancing Currency Currency Code	This field is for VSS-455 report only, for all other reports, the field contains a space . For VSS-455 report, this contains the settlement balancing currency currency code.
166-167	2	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup 9

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup 9.

TC 46, TCR 0 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a zero (0) .

TC 46, TCR 0 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
5-10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11-16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field will contain zeros (0s) .
17-26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE for which this report was requested.
27-36	10	AN	Rollup to SRE Identifier	This field contains the identifier for the SRE that is directly superior to the Reporting for SRE in the settlement hierarchy. If the Reporting for SRE is the highest SRE in the settlement hierarchy, this field contains the same value as the Reporting for SRE Identifier.
37-46	10	AN	Funds Transfer SRE Identifier	When the funds transfer entity for the Reporting for SRE is the same as the Reporting for SRE or is at a level in the settlement hierarchy that is superior to the Reporting for SRE, this field contains the SRE identifier for the funds transfer entity. Otherwise, this field contains a space .
47-49	3	UN	Settlement Service Identifier	This is the 3-digit code which identifies the Settlement Service used. Possible values for this field are included in <u>VSS Codes</u> .

TC 46, TCR 0 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
50–52	3	UN	Settlement Currency Code	This is the ISO numeric currency in which the amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>VisaNet Authorization-Only Online Messages Technical Specifications</i> manual. If the No Data Indicator = Y , this field contains a space .
53	1	AN	Business Mode	The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the credit amount, debit amount, and net amount fields. If the No Data Indicator = Y , this field contains a space .
54	1	AN	No Data Indicator	The possible values for this field are Y or space , if there is no data for this report.
55–58	4	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains a 9 .
61–63	3	AN	Report Identification Number	This field contains 310 , 600 , or 610 .
64–65	2	AN	Report Identification Suffix	This field contains a space or M .

TC 46, TCR 0 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
66–72	7	AN	Settlement Date	If the Report Identification Suffix contains a space, this field contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the Report Identification Suffix contains an M, this field contains a space.
73–79	7	AN	Report Date	This field contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
80–86	7	AN	From Date	This field contains a space. When the Report Identification Suffix contains an M, this field contains the starting range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
87–93	7	AN	To Date	This field contains a space. When the Report Identification Suffix contains an M, this field contains the ending range for information contained in the report. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
94–96	3	AN	Payment Mode/ Settlement Type	This field contains the Payment Mode for SRE participating in the Japan NNSS and Settlement Type in Brazil NNSS; otherwise, the field is blank.
97–99	3	AN	Business Transaction Type	The possible values for this field are included in VSS Codes. If the No Data Indicator = Y, this field contains a space.

TC 46, TCR 0 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
100	1	AN	Business Transaction Cycle	This field contains the Business Transaction Cycle. Possible values for this field are included in VSS Codes . If the No Data Indicator = Y , this field contains a space .
101	1	AN	Twice Payment Number	This field is only applicable for SREs participating in the Japan National Net Settlement Service. For SREs not participating in the Japan National Net Settlement Service, this field contains a space . If the No Data Indicator = Y , this field contains a space .
102-108	7	AN	Original Date/ Processing Date	The possible values of this field are space or a date. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
109-110	7	AN	Summary Level	This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Business Mode Total 02 = Payment Mode/Settlement Type Total 03 = Business Transaction Total 04 = Business Cycle Total
111	1	AN	Reversal Indicator	The possible values for this field are Y , N , and space . If the No Data Indicator = Y , this field contains a space .
112	1	AN	Install Payment Indicator	This field is only valid when the payment mode is 61 . The possible values for this field are 2 , 3 , or space . When this field is 2 and payment mode is 61 , these are “twice payment” transactions. When this field is 3 and the payment mode is 61 , these are “installment payment” transactions.

113-167	55	AN	Reserved	This field is reserved for future use. EP will always space-fill.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero-filled.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 1 Report Group V, Report Subgroup 9

This is the client settlement data record layout for TCR 1, Report Group V, and Report Subgroup 9.

TC 46, TCR 1 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains the value 46 .
3	1	UN	Transaction Code Qualifier	This field contains a zero (0) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	AN	Transaction Component Sequence Number	This field contains a one (1) .
5-19	15	AN	First Count	The contents of this field depend on the Report Identification Number.
20-34	15	AN	Second Count	The contents of this field depend on the Report Identification Number.
35-49	15	AN	First Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.

TC 46, TCR 1 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
50-51	2	AN	First Amount Sign	The First Amount Sign is DB (for debit), CR (for credit), or space if there is no First Amount.
52-66	15	AN	Second Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.
67-68	2	AN	Second Amount Sign	The Second Amount Sign is DB (for debit), CR (for credit), or space if there is no Second Amount.
69-83	15	AN	Third Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.
84-85	2	AN	Third Amount Sign	The Third Amount Sign is DB (for debit), CR (for credit), or space if there is no Third Amount.
86-100	15	AN	Fourth Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.
101-102	2	AN	Fourth Amount Sign	The Fourth Amount Sign is DB (for debit), CR (for credit), or space if there is no Fourth Amount.
103-117	15	AN	Fifth Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.
118-119	2	AN	Fifth Amount Sign	The Fourth Amount Sign is DB (for debit), CR (for credit), or space if there is no Fifth Amount.
120-134	15	AN	Sixth Amount	The contents of this field depend on the Report Identification Number. The number of decimal places for this field depends on the currency.

TC 46, TCR 1 (Report Subgroup 9) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
135-136	2	AN	Sixth Amount Sign	The Sixth Amount Sign is DB (for debit), CR (for credit), or space if there is no Sixth Amount.
137-168	32	AN	Reserved	This field is reserved for future use. EP will always space-fill.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

This table shows the specific fields on the VSS-310, 600, and 610 reports to which the counts and amounts in the TCR 1 record map. When the No Data Indicator on the TCR 0 = Y, no TCR1 record will be created.

VSS-310, VSS-600, and VSS-610 Report Count/Amount Fields Mapped to TCR1

Counts/Amounts	VSS-310	VSS-600	VSS-610
First count	Interchange Count	Interchange Count	Interchange Count
Second count	Space	Space	Space
First amount	Interchange Amount	Interchange Amount	Interchange Amount
Second amount	Interchange Fee	Interchange Fee	Interchange Fee
Third amount	Processing Charge	Processing Charge	Space
Fourth amount	Settlement Amount	Settlement Amount	Space
Fifth amount	Space	Space	Space
Sixth amount	Space	Space	Space

TC46, TCR 0 Report Group V, Report Subgroup A

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup A.

TC 46, TCR 0 (Report Subgroup A) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1–2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a zero (0) .
5–10	6	UN	Destination Identifier	The entity to which this BASE II transaction message is sent. For acquiring or issuing identifier-level reports, this is the acquiring or issuing identifier being reported. For processor-level reports, this is the clearing identifier of the processor.
11–16	6	UN	Source Identifier	The entity from which this BASE II transaction message was sent. This is the source identifier of the VIC. This field will contain zeros (0s) .
17–19	3	UN	Settlement Service Identifier	This is the three-digit code that identifies the Settlement Service used. Possible values of this field are included in VSS Codes .

TC 46, TCR 0 (Report Subgroup A) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
20–22	3	AN	Settlement Currency Code	This is the ISO numeric currency in which settlement amounts are reported. Possible values for this field are available in the <i>BASE II Clearing Data Codes</i> and in the <i>V.I.P. System Technical Reference, Volume 2 Fields and Code Descriptions</i> manual. If the No Data Indicator = Y , this field contains a space .
23	1	UN	No Data Indicator	The possible values for this field are Y , if there is no data for this report, or space .
24–30	7	AN	Processing Date	If the Report Identification Suffix contains a space this field contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
31–37	7	AN	Report Date	This contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
38–58	21	AN	Reserved	This field is reserved for future use. EP will always space-fill.
59	1	AN	Report Group	The type of report in the record. This field contains a V .
60	1	AN	Report Subgroup	This field contains an A .
61–63	3	AN	Report Identification Number	This field contains 550 .
64–65	2	AN	Report Identification Suffix	This field contains a space . Reserved for future enhancement.
66	1	AN	Settlement Indicator	Possible values for this field are Y or space . If equals to Y , the exception-deferred INPA is due to be settled on the current report settlement date.

TC 46, TCR 0 (Report Subgroup A) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
67–76	10	AN	SRE ID	The SRE of the exception-deferred INPA.
77–83	7	AN	Clearing Date	This contains the date on which the exception-deferred INPA is cleared. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
84–90	7	AN	Settlement Date	This contains the date on which the exception-deferred INPA is supposed to be settled. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
91–93	3	AN	Business Transaction Code	This contains the business transaction code of the exception-deferred INPA.
94	1	AN	Business Transaction Cycle	This contains the business transaction cycle of the exception-deferred INPA. Possible values for this field are included in VSS Codes .
95	1	AN	Reversal Indicator	Possible values for this field are Y or N .
96–98	3	AN	Payment Mode/ Settlement Type	Possible values for this field are listed in <i>VSS Reference Guide</i> . This is the Payment Mode (for Japan NNSS) and Settlement Type (for Brazil NNSS) of the deferred INPA. For transactions in Japan NNSS or Brazil NNSS, this field is blank.
99–113	15	AN	Count	This field contains the transaction count of exception-deferred INPA.
114–128	15	AN	Amount	This field contains the total transaction amount of the exception-deferred INPA.
129–130	2	AN	Amount Sign	The Amount Sign is DR for debit and CR for credit.
131	1	AN	INPA Type	Possible values for this field are: I = Interchange INPA F = Fee INPA C = Change INPA

TC 46, TCR 0 (Report Subgroup A) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
132-134	3	AN	Charge Type	If INPA Type = C (charge type INPA), this field contains the Charge Type of the exception-deferred INPA; otherwise, it contains a space .
135-150	16	AN	Fee Descriptor	This field contains fee descriptor if the exception-deferred INPA is a fee INPA and is not from the Japan NNSS or Brazil NNSS.
151-168	18	AN	Reserved	This field is reserved for future use. EP will always space-fill.

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup B

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup B.

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a zero (0) .
5-10	6	UN	Destination Identifier	This is the entity to which the report is to be delivered.
11-16	6	UN	Source Identifier	This field contains zeros (0s) .
17-26	10	AN	Reporting for SRE Identifier	This is the identifier for the SRE being reported on.

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
27–36	10	AN	Roll-up to SRE Identifier	This field contains the identifier for the SRE that is directly superior to the reporting for SRE in the settlement hierarchy. If the reporting for SRE is the highest SRE in the settlement hierarchy, this field contains the same value as the reporting for SRE identifier.
37–46	10	AN	Funds transfer SRE Identifier	When funds transfer entity for the reporting for SRE is the same as the reporting for SRE or at a level in the settlement hierarchy that is superior to the reporting for SRE, this field contains the SRE identifier for the funds transfer entity; otherwise, this field contains spaces .
47–49	3	UN	Settlement Service Identifier	This field contains the 3–digit code which identifies the settlement service used. Possible values for this are included in VSS Codes .
50–54	5	AN	Reserved	This field contains spaces .
55	1	AN	No Data Indicator	The possible values for this field are Y (if there is no data for this report) or space .
56–58	3	AN	Reserved	This field contains spaces .
59	1	AN	Report Group	This field contains a V .
60	1	AN	Report Subgroup	This field contains a B .
61–63	3	AN	Report Identification Number	This field contains a 950 .
64–65	2	AN	Report Identification Suffix	The possible values for this field are space or M .

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
66–72	7	AN	Settlement Date	If the report identification suffix contains a space , this field contains the date for which settlement was performed. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. If the report identification suffix is M then this field contains spaces .
73–79	7	AN	Report Date	This field contains the date the report was produced. The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day.
80–86	7	AN	From Date	This field contains the starting range for information on the report when the report identification suffix is M or PM . The format of this date is CCYYDDD where CC is century, YY is the year, and DDD is the Julian day. Otherwise, this field contains spaces .
87–93	7	AN	To Date	This field contains the ending range for information on the report when the report identification suffix is M or PM . The format of this date is CCYYDDD, where CC = century, YY = year, and DDD = Julian day. Otherwise, this field contains spaces .
94–96	3	AN	No Data Report Identification Number 1	This field contains the first No Data Report Identification Number that is listed on the VSS-950, VSS-950-M, VSS-950-P, or VSS-950-PM.
97–98	2	AN	No Data Report Identification Suffix 1	This field contains the first No Data Report Identification suffix.
99–101	3	AN	No Data Report Identification Number 2	This field contains the second No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
102–103	2	AN	No Data Report Identification Suffix 2	This field contains the second No Data Report Identification suffix.

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
104–106	3	AN	No Data Report Identification Number 3	This field contains the third No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
107–108	2	AN	No Data Report Identification Suffix 3	This field contains the third No Data Report Identification suffix.
109–111	3	AN	No Data Report Identification Number 4	This field contains the fourth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
112–113	2	AN	No Data Report Identification Suffix 4	This field contains the fourth No Data Report Identification suffix.
114–116	3	AN	No Data Report Identification Number 5	This field contains the fifth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
117–118	2	AN	No Data Report Identification Suffix 5	This field contains the fifth No Data Report Identification suffix.
119–121	3	AN	No Data Report Identification Number 6	This field contains the sixth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
122–123	2	AN	No Data Report Identification Suffix 6	This field contains the sixth No Data Report Identification suffix.
124–126	3	AN	No Data Report Identification Number 7	This field contains the seventh No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
127–128	2	AN	No Data Report Identification Suffix 7	This field contains the seventh No Data Report Identification suffix.
129–131	3	AN	No Data Report Identification Number 8	This field contains the eighth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
132–133	2	AN	No Data Report Identification Suffix 8	This field contains the eighth No Data Report Identification suffix.

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
134-136	3	AN	No Data Report Identification Number 9	This field contains the ninth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
137-138	2	AN	No Data Report Identification Suffix 9	This field contains the ninth No Data Report Identification suffix.
139-141	3	AN	No Data Report Identification Number 10	This field contains the tenth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
142-143	2	AN	No Data Report Identification Suffix 10	This field contains the tenth No Data Report Identification suffix.
144-146	3	AN	No Data Report Identification Number 11	This field contains the eleventh No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
147-148	2	AN	No Data Report Identification Suffix 11	This field contains the eleventh No Data Report Identification suffix.
149-151	3	AN	No Data Report Identification Number 12	This field contains the twelfth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
152-153	2	AN	No Data Report Identification Suffix 12	This field contains the twelfth No Data Report Identification suffix.
154-156	3	AN	No Data Report Identification Number 13	This field contains the thirteenth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
157-158	2	AN	No Data Report Identification Suffix 13	This field contains the thirteenth No Data Report Identification suffix.
159-161	3	AN	No Data Report Identification Number 14	This field contains the fourteenth No Data Report Identification Number that is listed on the VSS-950 or VSS-950-M.
162-163	2	AN	No Data Report Identification Suffix 14	This field contains the fourteenth No Data Report Identification suffix.

TC 46, TCR 0 (Report Subgroup B) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
164–167	4	AN	Reserved	This field contains spaces .
168	1	AN	Reimbursement Attribute	This field contains a 0 (zero) .

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC46, TCR 0 Report Group V, Report Subgroup E

This is the client settlement data record layout for TCR 0, Report Group V, and Report Subgroup E.

TC 46, TCR 0 (Report Subgroup E) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1–2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) . This edit will continue to be performed by the Edit Package when the Bypass Business Edits option is used during an outgoing edit run.
4	1	UN	Transaction Component Sequence Number	This field contains a 1 .
5–10	6	UN	Destination Identifier	This is the entity to which the report is to be delivered.
11–16	6	UN	Source Identifier	This field contains zeros (0s) .
17–19	3	UN	Settlement Service ID	This is the identifier for the settlement service.
20–22	3	UN	Settlement Currency Code	This field contains the settlement currency code.
23–29	7	AN	Settlement Date	This field contains the date for which settlement is performed; format CCYYDDD (Julian date).

TC 46, TCR 0 (Report Subgroup E) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
30–36	7	UN	Report Date	This field contains the date the report is produced; format CCYYDDD (Julian date).
37–46	10	UN	Funds Transfer SRE	This field contains the SRE identifier for the funds transfer entity.
47	1	AN	No Data Indicator	The possible values for this field are Y (if there is no data for this report) or space .
48–54	7	AN	Value Date	This field contains the value date; format CCYYDDD (Julian date).
55–58	4	AN	Reserved	This field contains a space .
59	1	AN	Report Group	This field contains a V .
60	1	AN	Report Subgroup	This field contains an E .
61–63	3	AN	Report Identification Number	This field contains value 459 .
64–65	2	AN	Report Identification Suffix	This field contains a space .
66	1	AN	Amount Type	This field contains these possible values: 1 = daily amount 3 = combined amount 9 = report total
67–81	15	AN	Credit Amount	This field contains the credit amount; if there is no credit amount, the field contains a space .
82–96	15	AN	Debit Amount	This field contains the debit amount; if there is no debit amount, the field contains a space .
97–111	15	AN	Net Amount	This field contains the net amount.
112–113	2	AN	Net Amount Sign	This field contains the values CR credit or DB debit.

TC 46, TCR 0 (Report Subgroup E) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
114-120	7	AN	Processing Date	This field contains the processing date of daily amount; format CCYYDDD (Julian date); it is only populated when the amount type is 1 ; otherwise, it contains a space .
121-127	7	AN	From Date	This field contains the from date, the beginning date of the combined period; format CCYYDDD (Julian date).
128-134	7	AN	To Date	This field contains the to date, the ending date of the combined period; format CCYYDDD (Julian date).
135-149	15	AN	Net Amount in Settlement Service Balance Currency	This field is currently not used.
150-151	2	AN	Net Amount in Settlement Service Balancing Currency Sign	This field is currently not used.
152-167	16	AN	Reserved	This field contains spaces .
168	1	AN	Reimbursement Attribute	This field contains a zero (0) .

Format: AN = Alphanumeric, UN = Unpacked Numeric, DX = Display Hexadecimal

TC 46, TCR 0 Report Group V, Report Subgroup G

This is the client settlement data record for TCR 0, Report Group V, Report Subgroup G.

TC 46, TCR 0 (Report Subgroup G) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
1-2	2	UN	Transaction Code	Code indicating the type of transaction. This field contains a 46 .
3	1	UN	Transaction Code Qualifier	This field contains a 0 (zero) .
4	1	UN	Transaction Component Sequence Number	This field contains a 0 (zero) .
5-10	6	UN	Destination Identifier	This is the entity to which the report is to be delivered.
11-16	6	UN	Source Identifier	This field contains zeros (0s) .
17-26	10	AN	Reporting for SRE Identifier	This field contains the identifier for the SRE being reported on.
27-46	20	AN	Reserved	This field is reserved for future use and will contain spaces .
47-49	3	UN	Final Settlement Service Identifier	This field contains the 3-digit code that identifies the Final Settlement Service.
50-52	3	AN	Settlement Currency Code	This field contains the ISO numeric currency in which settlement amounts are reported.
53	1	AN	No Data Indicator	Always contain a space .
54-58	5	AN	Reserved	This field is reserved for future use and will contain spaces .
59	1	AN	Report Group	This field contains a V .
60	1	AN	Report Subgroup	This field contains an G .
61-63	3	AN	Report Identification Number	This field contains value 110 .

TC 46, TCR 0 (Report Subgroup G) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
64-65	2	AN	Report Identification Suffix	This field contains C .
66-72	7	UN	Settlement Date	This field contains the date for which settlement is performed; format CCYYDDD (Julian date).
73-79	7	UN	Report Date	This field contains the date the report is produced; format CCYYDDD (Julian date).
80-93	14	UN	Reserved	This field is reserved for future use and will contain spaces .
94	1	AN	Amount Type	This field contains these possible values: I = Interchange F = Reimbursement Fees C = Visa Charges T = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields.
95	1	an	Business Mode	This field contains these possible values: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields.
96-110	15	AN	Count	When the Amount type contains an I , this field contains the interchange transaction count corresponding to Business Mode. Otherwise, this field contains spaces .

TC 46, TCR 0 (Report Subgroup G) Client Settlement Data Record Layout

Position	Length	Format	Field Name	Description
111–125	15	AN	Credit Amount	This field contains the credit amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency.
126–140	15	AN	Debit Amount	This field contains the debit amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency.
141–155	15	AN	Net Amount	This field contains the credit amount minus the debit amount. If the Amount Type = T and the Business Mode = 9 , this field contains the net settlement amount for the Reporting for SRE.
156–157	2	AN	Net Amount Sign	This field contains the values CR credit or DB debit. If Net Amount contains zeros or spaces , this field will contain spaces .
158–164	7	AN	Reserved	This field is reserved for future use and will contain spaces .
165–167	3	UN	Intraday Settlement Service Identifier	This field contains the 3-digit code that identifies the Intra-Day Settlement Service. If the Business Mode = 9 , this field contains spaces . If the Business Mode = 1 , 2 , or 3 and this field contains spaces , it is the net record corresponding to the Amount Type and Business Mode.
168	1	AN	Reimbursement Attribute	Obsolete – must be zero -filled

Format: AN = Alphanumeric, UN = Unpacked Numeric

Appendix C

VSS Codes

The VisaNet Settlement Service (VSS) codes are values used in machine-readable formats.

VSS Codes are divided into these types:

- Business Transaction Types
- Fee Collection/Funds Disbursement Business Transactions
- Business Transaction Cycle
- Business Modes
- Charge Types
- Jurisdictions
- Regions
- Settlement Services
- Transaction Dispositions

Business Transaction Types

This table contains the VSS codes for business transaction types.

Business Transaction Types

Code	Business Transaction Type
100	Purchase
101	Purchase-Clr Only
120	Quasi-cash
140	DDS On-Us
141	DDS Participate
142	DDS Merchant Issuer
150	NYCE purchase
151	PULSE purchase
152	STAR purchase
153	ACCEL PURCHASE
154	AFFN PURCHASE
156	CU24 PURCHASE
157	EBT POS PURCHASE

Fee Collection/Funds Disbursement Business Transactions

This table contains the VSS Codes for fee collection and funds disbursement business transactions.

All fee collection and funds disbursement business transactions have these descriptors on the VSS reports:

- FEE COLLECT RC = 9999
- FUNDS DISBURSE RC = 99999999 is the Reason Code.

See *VisaNet Authorization-Only Online Messages Technical Specifications* or *BASE II Clearing Data Codes*.

Fee Collection/Funds Disbursement

96	From CRS to Deferred
98	From VROL to deferred
99	Disposition Unknown

Appendix D

SMS Reports and Raw Data

Single Message System (SMS) reports and raw data are available for clients connected to SMS.

SMS Reports

SMS-connected clients may elect to receive SMS reports that detail a client's transaction activity. Subscription is optional for all SMS reports.

Report categories are:

- Transaction Detail Reports
- Maintenance Reports
- Error Reports

SMS-connected clients can also choose to receive raw data records that detail client transaction activity for the processing day. Raw data allows the clients to analyze and customize their Single Message System data in the way that best suits their business needs.

See *VisaNet Authorization-Only Online Messages Technical Specifications*, *SMS Interlink Technical Specifications*, and *Full Service POS Online Messages Technical Specifications*.

SMS Report Numbering

SMS reports are identified by a combination of report number and sort criteria.

Report numbering guidelines:

- SMS report numbers begin with a **6** to differentiate them from existing Visa reports.
- The second position of the report number indicates the report category.
 - 60xx Transaction Detail Reports
 - 61xx Exception Detail reports
 - 62xx Maintenance Reports
 - 64xx Error Reports
 - 66xx–68xx Reserved for Future Use
 - 69xx Other Reports
- The third position of the report number indicates whether the report is intended for an issuer, an acquirer, or both.
 - Issuer reports have an even number.
 - Acquirer reports have an odd number.
 - Reports that apply to both issuers and acquirers have an even number.
- The final position of the report identifier indicates the sort criteria.

An Issuer Transaction Detail By Cardholder Number Report is numbered as **SMS600C**, with **C** indicating a cardholder number sort. An Acquirer DISPFIN/DISPFIN Reversal By Retrieval Reference Number Report is identified as **SMS611R**, with **R** indicating a retrieval reference number sort.

The SMS reports are listed in this table.

Note: Clients can subscribe to multiple sorts of the same report number.

Sort Key

A = Acquirer ID
C = Card Number
I = Issuer ID
R = Retrieval Reference Number
T = Transmission Date and Time

SMS Reports

Report Number	Report Title and Report Function	Report Sort
SMS600	Issuer Transaction Detail Lists 01xx, 02xx, and 04xx messages processed by VisaNet for the issuer.	A, C, R, T
SMS601	Acquirer Transaction Detail Lists 01xx, 02xx, and 04xx messages processed by VisaNet for the acquirer.	C, I, R, T
SMS608	Fee Collection & Funds Disbursement Detail Lists TC 10s and TC 20s received from BASE II and applied to the issuer or acquirer.	C
SMS609	Transactions Incurring a Fine Lists late adjustment, late deposit adjustment, and non-represented chargeback transactions.	C, I, R
SMS610	Issuer DISPFIN/DISPFIN Reversal Lists issuer-initiated dispute financials/chargebacks.	A, C, R
SMS611	Acquirer DISPFIN/DISPFIN Reversal Lists acquirer-processed dispute financials/chargebacks.	C, I, R
SMS612	Issuer DISPRESF/DISPRESF Reversal Lists issuer-processed dispute response financials/representments.	A, C, R
SMS613	Acquirer DISPRESF/DISPRESF Reversal Lists acquirer-initiated dispute response financials/representments.	C, I, R

SMS Reports

Report Number	Report Title and Report Function	Report Sort
SMS614	Issuer Adjustment and Merchandise Credit Detail Lists issuer-processed adjustment transactions.	A, C, R
SMS615	Acquirer Adjustment and Merchandise Credit Detail Lists acquirer-processed adjustment transactions.	C, I, R
SMS616	Issuer Cancellation and Reversal Detail Lists issuer-initiated-and received cancellations and reversals.	C, R
SMS617	Acquirer Cancellation and Reversal Detail Lists acquirer-initiated-and received cancellations and reversals.	C, R
SMS620	Issuer File Maintenance Daily Summary Lists accepted and rejected Exception File and PIN Verification File updates sent by the issuer.	T
SMS626	Administrative Message Daily Summary Lists issuer- or acquirer-processed 06xx administrative messages.	R
SMS640	Issuer Error Detail Lists messages rejected by Visa due to edit errors and late responses.	T
SMS641	Acquirer Error Detail Lists messages rejected by Visa due to edit errors and late responses.	T
SMS642	Issuer CRS Returned Exception Detail Lists exception items returned by the Exception Manager due to Chargeback Reduction Service errors.	T

SMS Reports

Report Number	Report Title and Report Function	Report Sort
SMS643	Acquirer CRS Returned Exception Detail Lists exception items returned by the Exception Manager due to Chargeback Reduction Service errors.	T
SMS660	No Activity Lists all reports that the recipient has subscribed to for which there was no activity in the current cycle to trigger generation of the report. For example, an issuer subscribed to SMS610 and SMS660, who has no dispute financials in the current cycle, will see the SMS610 listed on the SMS660 report, indicating no activity.	Not applicable

SMS Report Design

To facilitate ease of use, SMS reports are designed to display the same information in the same location from report to report. The header structure is the same on all SMS reports.

Note: SMS reports generate a total and force a page-break any time a reporting level changes (funds transfer SRE, processor, affiliate ID, or lowest-level SRE).

SMS Reports Common Header

The header for SMS reports contains certain fields that are common to many reports.

```
REPORT ID: SMS6nnx          VISANET INTEGRATED PAYMENT SYSTEM          PAGE NUMBER      :   nnn
FUNDS XFR: nnnnnnnnnnn FTSRE NAME - UP TO 26 LETT SINGLECONNECT / NETWORK NAME ONLINE SETTLMNT DATE: ddmmyy
PROCESSOR: nnnnnnnnnnn PROCESSOR NAME - UP TO 26 LETT NAME OF REPORT - UP TO 38 LETTERS RUN DATE   : ddmmyy
AFFILIATE: nnnnnnnnnnn AFFILIATE NAME- UP TO 26 LETT   BY APPLICABLE SORT CRITERIA RUN TIME      : hh:mm:ss
SRE       : nnnnnnnnnnn SRE NAME - UP TO 26 LETT          NATIONAL NET      VSS PROCESSING DATE : ddmmyy
```

This Data is Fictitious and for Illustration Purposes Only.

SMS Reports Common Header Fields

This table contains the common header field description for SMS reports.

SMS Reports Header Fields

Field Name	Description
REPORT ID	Report Number (for example, SMS600C)
FUNDS XFR	Settlement reporting entity (SRE) and name of funds transfer client
PROCESSOR	Processor ID and name of client's processor
AFFILIATE	Affiliate ID and name of affiliate client
SRE	Settlement Reporting Entity (SRE): lowest-level SRE and client name
SYSTEM/NETWORK IDENTIFIER	SingleConnect/System Name (such as Visa, Interlink, Plus)
REPORT TITLE	Report title. (For example, Issuer Transaction Detail by Transmission Date and Time)
NATIONAL NET	If present, this field indicates that the transactions on this report are settled by National Net
NATIONAL BILATERAL	If present, this field indicates that the transactions on this report are settled by National Bilateral
PAGE NUMBER	Page number of the report
ONLINE SETTLEMENT DATE	Date the funds are settled by SMS. The cutoff time for transactions that affect settlement is 8:00 p.m. Pacific time for Interlink or 10:00 p.m. Pacific time for Visa, Plus, and other SMS networks
RUN DATE	Date the report is produced
RUN TIME	Time the report is produced
VSS PROCESSING DATE	Date the funds are processed by VSS

SMS Reporting Entities

SMS reports have four levels of reporting entities.

The four levels of reporting entities are:

- Funds Transfer settlement reporting entity (SRE)
- Processor
- Affiliate ID
- Lowest-level SRE

SMS Funds Transfer SRE Level

The funds transfer SRE is the level at which funds transfer occurs. The funds transfer SRE can be at any level in the VSS hierarchy.

SMS Processor Level

A processor is a Visa endpoint (or Visa-approved third-party) that provides authorization, clearing, or settlement services for merchants and clients. The processor captures transactions counts and amounts online. A running total of counts and amounts is accumulated every 30 minutes. The system stores these totals as advice messages (0520) for recovery by the processor.

SMS Affiliate ID Level

The affiliate ID can be an issuer, an acquirer, or both. Transactions for all card ranges assigned to an affiliate ID appear on the affiliate IDs report.

Note: SMS reports generate a total and force a page-break any time a reporting level changes. So, if a client has an affiliate ID associated with multiple SREs or processors, it may be necessary to add the subtotals to obtain the total activity for an affiliate.

For SMS reports at the affiliate level, the 10-digit number in the header has:

- The 6-digit identifier of the issuer or acquirer.
- The 4-digit Network ID (0002 for Visa, 0003 for Interlink, 0004 for Plus).

SMS Lowest-Level SRE Level

The lowest-level SRE is the lowest level at which VSS produces settlement reports. The combination of the funds transfer SRE, processor, and affiliate ID identifies the lowest-level SRE displayed on the SMS report.

SMS Transaction Detail Reports

The SMS transaction detail reports (SMS600–SMS617) cumulatively reflect all of a client's interchange transactions for one processing day.

The reports assist the client center to reconcile its position with the V.I.P. System by providing a detailed transaction listing for the issuer or acquirer at the affiliate ID level. Subtotals are provided for each affiliate ID. Reports also generate a subtotal and force a page-break any time a client reporting level changes. For example, if one affiliate ID has activity with two processors, the report will have two affiliate subtotals—one for each processor.

Reports are produced daily for delivery to the subscriber. Subscription is optional for all transaction detail reports.

SMS Exception Detail Reports

The SMS exception detail reports (SMS610–SMS617) are a subset of the transaction detail reports. Exception detail reports display a particular category of the client's exception transactions for one processing day.

These transactions are also displayed on the SMS600 or SMS601 report. Exception detail reports have the same functionality and fields as the SMS600 and SMS601 reports.

SMS Fee Collection and Funds Disbursement Detail

The Fee Collection and Funds Disbursement Detail (SMS608) reports have structures different from the other transaction detail reports. The transactions displayed on these reports do not appear on the SMS600 or SMS601 report because of their unique data content. Layouts for these reports are designed to best display the data elements present in either a manual charge or a fee collection/funds disbursement.

SMS Transaction Detail Reports Customization

SMS transaction detail reports give clients the option to customize the data present on their reports. Transaction detail reports have up to five lines of data that can be displayed for each transaction.

This is how line data is grouped:

- **Line 1** – Primary transaction data (clients must receive this line)
- **Line 2** – Tracing and card acceptor identification data
- **Line 3** – Interlink exception tracing data; also reserved for future Chip Card Payment Service (CCPS) data
- **Line 4** – PS2000 and Plus proprietary data
- **Line 5** – Interchange Reimbursement Fee (IRF) data

These SMS transaction detail reports offer optional customized lines:

- **SMS600** – Issuer Transaction Detail
- **SMS601** – Acquirer Transaction Detail
- **SMS610** – Issuer DISPFIN/DISPFIN Reversal
- **SMS611** – Acquirer DISPFIN/DISPFIN Reversal
- **SMS612** – Issuer DISPRESP/DISPRESP Reversal
- **SMS613** – Acquirer DISPRESP/DISPRESP Reversal
- **SMS614** – Issuer Adjustment and Merchandise Credit Detail
- **SMS615** – Acquirer Adjustment and Merchandise Credit Detail
- **SMS616** – Issuer Cancellation and Reversal Detail
- **SMS617** – Acquirer Cancellation and Reversal Detail

If an SMS report offers optional lines, clients may subscribe to any combination of lines, but must subscribe to Line 1. The default is to receive lines 1 through 4. Note that, if a client subscribes to lines 2, 3, 4, or 5 and a transaction does not contain data normally

displayed on that line, the line does not print. If a client asks to change the optional lines received on an SMS report, the client must contact their Visa Client Services Representative.

Prototypical SMS Transaction Detail Report

This is an example of a prototypical transaction detail report that shows all the fields that can be displayed on a standard transaction detail report. Clients may receive up to five lines of transaction detail per transaction.

Two transactions are displayed on the report. The first transaction displayed is identical to the second transaction, with the exception of Line 4. On the first transaction, Line 4 contains the data elements present for an approved PS2000 transaction, as well as the Plus proprietary data elements. Line 4 on the second transaction contains the data associated with a downgraded PS2000 transaction.

17 October 2025

Visa Confidentialia

293

This table describes all the data elements in the body of the report.

Note: The sample report has bold text to highlight headers versus data. Production SMS reports do not have bold text.

Legend – Field Values

n = Numeric **x** = Alphanumeric **a** = Amount **c** = Count

dd = Day **mmm** = Month **yy** = Year
hh = Hour **mm** = Minute **ss** = Second

SMS Transaction Detail Report Column Headings

This table contains the column headings for the SMS transaction detail reports.

Transaction Detail Report – Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number
XMIT(GMT)/LOCL DATE TIME	Line 1 contains the transaction's GMT transmission date (DDMMM) and time (HH:MM:SS). For merchandise credits and preauthorization completions. Line 2 contains the local date and time of the preauthorized purchase request and merchandise credit. For dispute financials/chargebacks and dispute response financials/representments Line 1 of the transaction is the transaction date and time of the dispute financial/chargeback or dispute response financial/representment. Line 2 is the transaction date and time of the original. For Interlink dispute response financials/representments only. Line 3 indicates the date and time of the original, line 2 the date and time of the chargeback, and line 1 the date and time of the dispute response financial/representment.	Field 48, Usage 11 (Local Date and Time of Interlink Preauth Completion Request and Merchandise Credit) Field 125—Supporting Information <i>Interlink only</i>
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number

Transaction Detail Report – Column Headings

Column Heading	Contents	Field Number and Name
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction. For dispute financials/chargebacks and dispute response financials/representments, line 1 of the transaction is the trace number of the dispute financial/chargeback or dispute response financial/representment and line 2 is the trace number of the original. For Interlink dispute response financials/representments only Line 1 the trace number of the dispute response financial/representment. Line 2 the trace number of the dispute financial/chargeback Line 3 indicates the trace number of the original.	Field 11—Systems Trace Audit Number Field 90—Original Data Elements Field 125—Supporting Information. <i>Interlink only</i>
ACQRER ID or ISSUER ID	The ID of the institution that is acting as acquirer or issuer.	Field 32—Acquiring Institution ID Code <i>Issuer ID is determined by Visa</i>
TERMNL/NAME	TERMNL is the 1-digit terminal type and 1-digit terminal capability. NAME is the Card Acceptor Name/Location. The Card Acceptor field displays the first 25 characters and the last two characters of the field, with the two components separated by a slash symbol (/).	Field 43—Card Acceptor Name/Location
TRAN TYPE	Indicates the 4-digit request message type; for example, an 0200 financial request or an 0400 reversal request.	Not applicable
PROC CODE	The 6-digit processing code.	Field 3—Processing Code
ENT MOD	The 3-digit POS Entry Mode code that indicates the conditions under which the transaction takes place at the point-of-service.	Field 22—Point-of-Service Entry Mode Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending an acquirer-generated message or issuer-generated dispute financial/chargeback.	Field 63.3—Message Reason Code

Transaction Detail Report – Column Headings

Column Heading	Contents	Field Number and Name
CN	The 2-digit point-of-service condition code that indicates the condition under which the transaction takes place at the point-of-service.	Field 25—Point-of-Service Condition Code
STP	The 4-digit STIP/switch reason code. This code indicates the reason that stand-in processing (STIP) responded on behalf of the client.	Field 63.4—STIP/Switch Reason Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
CARDHOLDER BILLING/ TRANSACTION AMT CUR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the cardholder billing/transaction amount. Line 2 displays: Cashback amount (on originals) Preauthorization amount (on preauth completions, when the preauthorized amount is different from the completion amount) Replacement amount (on partial reversals) On a dispute financial/chargeback Line 2 contains the original transaction amount when different than the dispute financial/chargeback amount. (For more information on the use of fields 6 and 4, see Amounts Displayed on Issuer Transaction Detail Reports.)	Field 6—Amount, Cardholder Billing Field 4—Amount, Transaction Field 51—Currency Code, Cardholder Billing Field 49—Currency Code, Transaction Field 61.2—Other Amount, Cardholder Billing Field 61.1—Other Amount, Transaction Field 95—Replacement Amount
SETTLEMENT AMOUNT (XXX)	The transaction amount that affects the settlement account. The alphanumeric code in parentheses in the header indicates the settlement currency (for example, USD = U.S. Dollars). After the amount: CR = Credit DR = Debit	Field 5—Amount, Settlement Field 50—Currency Code, Settlement

SMS Transaction Detail Report Data Line Fields

This table describes data line fields for the SMS transaction detail reports.

See *VisaNet Authorization-Only Online Messages Technical Specifications*.

Transaction Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
CA ID:	The 8-character Card Acceptor Terminal ID and the 15-character Card Acceptor ID. The two fields are separated by two spaces.	Field 41—Card Acceptor Terminal Identification Field 42—Card Acceptor Identification Code
ORIG TRACE NUM:	Original Trace Number 6-character	Field 90—Original Data Elements, Pos. 5-10
POS ENT TERM TYPE:	POS Entry Terminal Type	Field 60.1—Terminal Type
POS ENT TERM CAP:	POS Entry Terminal Capability	Field 60.2—Terminal Entry Capability
MERCH NAME:	25-Character Merchant Name	Field 43—Card Acceptor Name/Location, Pos. 1-25
MERCH CTRY CODE	Alpha Code of Merchant Country Code	Field 43—Card Acceptor Name/Location, Pos. 39-40
STIP/SWITCH RC	STIP/Switch Reason Code	Field 63.4—STIP/Switch Reason Code
ATC:	The 5-digit Application Transaction Counter, used for Chip Card transactions.	Field 137—Application Transaction Counter
CD SQ:	The 3-digit Card Sequence Number, used for Chip Card transactions.	Field 23—Card Sequence Number
TSN:	The 8-character Terminal Serial Number that uniquely identifies the merchant terminal used in Chip Card Payment Service (CCPS) transactions.	Field 133—Terminal Serial Number
CI:	The 3-digit CCPS Indicators—CCPS Transaction Indicator, Card Authentication Reliability Indicator, and CCPS Rate Indicator.	Field 60.6—Chip Transaction Indicator Field 60.7—Chip Card Authentication Reliability Indicator

Transaction Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
M/EC:	The 1-digit Mail/Electronic Commerce Indicator that identifies the level of security present on Mail/Electronic Commerce financial transactions.	Field 63.6—Mail/Telephone or Electronic Commerce Indicator Position 4
AP:	The 2-bytes Authentication Program	TLV Field 34, Data ID01, Tag C0 – Authentication Program.
USAGE:	The 1-digit Usage Code that indicates whether the transaction is a first or second chargeback or representment.	Field 48, Usage 7a, Position 2 (Usage Code)
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number
DG CD:	The 2-character Downgrade Reason Code. If present, appears instead of the Transaction Identifier.	Field 62.3—Validation Code
ACI:	The one letter Authorization Characteristics Indicator (ACI).	Field 62.1—Authorization Characteristics Indicator
VC:	The 4-character Validation Code.	Field 62.3—Validation Code
PTS:	The Plus Time Stamp, comprised of a 9-digit time and transaction tracing number and the 4-digit local date, both assigned by Plus Systems, Inc. A space separates the two components.	Field 48, Usage 10 (Time Stamp for Plus Messages)
PMC:	The 6-digit Plus Proprietary Member Center (PMC) ID. On an issuer report, the acquirer's Plus PMC is displayed. On an acquirer report, the issuer's Plus PMC is displayed.	Field 63.3—Plus Proprietary Member Center ID
SCHG:	An ATM surcharge from the acquirer to the issuer. The amount is included in field 4 or field 6 and so is not added to any subtotals.	Field 28—Amount, Transaction Fee
FEE JURIS:	The jurisdiction of the interchange reimbursement fee (IRF) associated with the transaction.	Provided by Visa
ROUTING:	The transaction routing that helps determine the IRF.	Provided by Visa
FEE LEVEL:	The name of the IRF associated with the transaction.	Provided by Visa

Transaction Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
FPI:	The 3-digit alphanumeric interchange Fee Program Indicator.	Provided by Visa
FEE AMOUNT:	The IRF amount and indication if it is a CR (Credit) or DB (Debit)	Provided by Visa

Note: If a data line field is not present in the message, the accompanying line header does not print.

SMS Transaction Detail Report Amounts on Multicurrency Transactions

SMS transaction detail reports provide clients with transaction amounts that include any currency conversion fees. Amount columns on the reports come from different online fields depending on whether the recipient participates in the Visa Multicurrency Service.

This table describes the amount fields displayed on issuer transaction detail reports.

Amounts Displayed on Issuer Transaction Detail Reports

Multicurrency Participant?	Online Field Displayed in Cardholder Billing Amount Column	Online Field Displayed in Settlement Amount Column
Yes	Field 6—Amount, Cardholder Billing	Field 5—Amount, Settlement
No	Field 4—Amount, Transaction	Field 4—Amount Transaction, minus any currency conversion fees

This table explains the amounts displayed on acquirer transaction detail reports.

Amounts Displayed on Acquirer Transaction Detail Reports

Multicurrency Participant?	Online Field Displayed in Cardholder Billing Amount Column	Online Field Displayed in Settlement Amount Column
Yes	Field 4—Amount, Transaction	Field 5—Amount, Settlement
No	Field 4—Amount, Transaction	Field 4—Amount, Transaction

SMS Transaction Detail Report Layouts

These sample layouts show how the SMS600 and SMS601 series reports look if FPI number is present.

SMS600 – Issuer Transaction Detail Report

This report provides a list of 01xx, 02xx, and 04xx messages processed by Visa for the client when the client is acting as an issuer.

This report lists the individual 01xx, 02xx, and 04xx transactions processed during the processing day.

Subsets of transactions displayed on this report also appear on these reports:

- SMS610 – Issuer Chargeback Detail
- SMS612 – Issuer Representment Detail
- SMS614 – Issuer Adjustment and Merchandise Credit Detail
- SMS616 – Issuer Cancellation and Reversal Detail

This report is delivered daily and on demand. When there is no applicable activity, this report is not produced.

This report sorts data by:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

SMS600 Report Layouts

These are SMS600 report sample layouts for each sort criteria.

Note: The use of different networks in the four report sort options are for illustration purposes only. The examples should not be interpreted to mean that an issuer who participates in Visa POS must subscribe to the SMS600C. Clients are free to choose the sort options that best suit their business needs. Also, note that all of the Issuer Transaction Detail samples display the same currency in both the cardholder billing amount and settlement amount columns. If an issuer settles in a different currency than the currency in which it bills its cardholders, report amounts will display the appropriate currencies.

SMS601 – Acquirer Transaction Detail Report

This report provides a list of 01xx, 02xx, and 04xx messages processed by Visa for the client when the client is acting as an acquirer.

This report lists the individual 01xx, 02xx, and 04xx transactions processed during the processing day. Subsets of transactions displayed on this report also appear on these reports:

- SMS611 – Acquirer Chargeback Detail
- SMS613 – Acquirer Representment Detail
- SMS615 – Acquirer Adjustment and Merchandise Credit Detail
- SMS617 – Acquirer Cancellation and Reversal Detail

This report is delivered daily and on demand. When there is no applicable activity, this report is not produced.

This report sorts data by:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.
I	Issuer ID, cardholder number, trace number, and transmission date and time.

SMS601 Report Layouts

These are SMS601 report layout samples for each sort criteria.

Note: The use of different networks in the four report sort options are for illustration purposes only. The examples should not be interpreted to mean that an acquirer who participates in Interlink POS must subscribe to the SMS601T. Clients are free to choose the sort options that best suit their business needs. Also, note that all of the Acquirer Transaction Detail examples display the same currency in both the transaction amount and settlement amount columns. If an acquirer settles in a different currency than its transaction currency, report amounts will display the appropriate currencies.

SMS610 – Issuer DISPFIN/DISPFIN Reversal Report

This report provides a list of dispute financial and dispute financial reversal messages processed by Visa for the client when the client is acting as an issuer. The issuer uses this report to verify that all dispute financial and dispute financial reversals were processed during the processing day. Transactions displayed on this report also appear on the Issuer Transaction Detail report (SMS600).

This report is delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report sorts data by:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

These are SMS610 report layout samples for each sort criteria.

SMS614 – Issuer Adjustment and Merchandise Credit Detail Report

This report provides a list of adjustment and merchandise credit messages (with the accompanying reason code) processed by Visa during the processing day for the client when the client is acting as an issuer. It lists adjustments for transactions that did not process correctly when originally submitted and merchandise returns. The issuer uses this report to verify adjustments to cardholder's accounts submitted because the original transaction did not process correctly or because of merchandise returns.

These types of adjustments are reported:

- Debit and credit adjustments initiated for ATM dispensation errors
- Back-office (acquirer) adjustments for ATM and POS processing errors
- POS merchandise returns (Interlink merchandise credits)
- Transactions displayed on this report also appear on the Issuer Transaction Detail Report (SMS600)

This report can be delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report sorts data by:

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

SMS615 – Acquirer Adjustment and Merchandise Credit Detail Report

This report provides a list of adjustment and merchandise credit messages processed by Visa for the client when the client is acting as an acquirer. The acquirer uses this report to verify adjustments submitted because the original transaction did not process correctly.

This report lists the adjustment and merchandise credit transactions submitted by the acquirer during the processing day. It lists adjustments for transactions that did not process correctly when originally submitted. It also lists merchandise returns from SingleConnect POS acquirers. These types of adjustments are reported:

- Debit and credit adjustments initiated by the system for ATM dispensation errors.
- Back room (acquirer) adjustments for ATM and POS processing errors.
- POS merchandise returns (Interlink merchandise credits).
- Transactions displayed on this report also appear on the Acquirer Transaction Detail Report (SMS601).

This report can be delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report uses this sort criteria:

- Cardholder Number (C)
- Retrieval Reference Number (R)
- Issuer ID (I)

Each report criteria is sorted in this order:

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
I	Issuer ID, cardholder number, and trace number.

These are SMS615 report layout samples for each sort criteria.

SMS616 – Issuer Cancellation and Reversal Detail Report

This report provides a list of POS and ATM cancellation and reversal messages processed by Visa for the client when the client is acting as an issuer. The issuer uses this report to verify cancellations and reversals submitted by the acquirer because of processing errors.

This report lists the POS and ATM cancellation and reversal transactions received by the issuer during the processing day, with the accompanying reason code. Transactions displayed on this report also appear on the Issuer Transaction Detail Report (SMS600).

These types of cancellations and reversals are reported:

- Cancellations at the point of sale (Interlink only)
- Point-of-service reversals for ATM and POS processing errors
- Acquirer center-initiated reversals
- Switch reversal processing

Chargeback reversals and dispute financial reversals are not included on this report. They are included on the SMS600 and SMS610 issuer reports.

This report can be delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report uses this sort criteria:

- Cardholder Number (C)
- Retrieval Reference Number (R)

Each report criteria is sorted in this order:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).

SMS617 – Acquirer Cancellation and Reversal Detail Report

This report provides a list of POS and ATM cancellation and reversal messages processed by Visa for the client when the client is acting as an acquirer. The acquirer uses this report to verify cancellations and reversals submitted because of processing errors.

This report lists the POS and ATM cancellation and reversal transactions initiated by the acquirer during the processing day, with the accompanying reason code. Transactions displayed on this report also appear on the Acquirer Transaction Detail Report (SMS601).

These types of cancellations and reversals are reported:

- Cancellations at the point of sale (Interlink only)
- Point-of-service reversals for ATM and POS processing errors
- Acquirer center-initiated reversals
- Switch reversal processing

Chargeback reversals and dispute financial reversals are not included on this report. They are included on the SMS601 and SMS611 acquirer reports.

This report can be delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report uses this sort criteria:

- Cardholder Number (C)
- Retrieval Reference Number (R)

Each report criteria is sorted in this order:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).

SMS608 Field Descriptions

This table contains descriptions for the unique fields displayed on the SMS608 report.

Fee Collection and Funds Disbursement Detail Column Headings

Column Heading	Contents	Field Number and Name
SOURCE ID	For the source of the Fee Collection/Funds Disbursement, the Affiliate ID for the destination will be populated; for the destination of the Fee Collection/Funds Disbursement, the Affiliate ID for the source will be populated.	Field F32—Acquiring Institution Identification Code or Field 33—Forwarding Institution ID
DESC	Up to two-line (255 characters) description that explains the purpose of the message and expands on the reason code.	Field 48—Usage 5 (Fee Collections /Funds Disbursements)

SMS Maintenance Reports

The SMS maintenance reports help clients to track the maintenance transactions initiated and received during the processing day, calendar week, and the calendar month.

SMS maintenance reports include:

- **SMS620** – Issuer File Maintenance Daily Summary
- **SMS626** – Administrative Message Daily Summary
- **SMS628** – Request for Copy Daily Summary

SMS620 – Issuer File Maintenance Daily Summary Report

This report provides the issuer confirmation whether submitted file update transactions were applied to the Address Verification, Exception, and PIN Verification files. It lists all Address Verification, Exception, and PIN Verification file updates sent by the issuer. The report includes any updates not applied to the files due to an error. Errors are identified by a nonzero value in the Response Code column. The four-digit error code in this column is the same as that returned in Field 48—Additional Data—Private in an online 0312 response.

Both online 0302 updates and batch updates processed by magnetic tape are displayed. Transactions displayed on this report do not appear on any other SMS report.

This report can be delivered daily and on demand. When there is no applicable activity, this report is not produced.

This report sorts data by :

C	Cardholder number, batch number, transmission date and time (GMT), and trace number.
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.

These are SMS620 report layout samples for each sort criteria.

SMS620 Field Descriptions

This table contains descriptions of the column and data line fields for the SMS620 report.

Issuer File Maintenance Daily Summary Report Column Headings (for SMS620T)

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number <i>In Message Header</i>
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
BAT / ONL	Indicates whether the update was submitted via SMS Online or batch.	Not applicable
FILE NAME	The 3-digit file name to which the update is to be applied. • AVS = Address Verification File • PIN = PVV • EXP = SMS Exception File • BTH = BASE I Exception File and SMS • Exception File	Field 101—(File Name)
TRAN TYPE	The 4-digit message type.	Not applicable
ACTV TYPE	Indicates whether the file update is a change, an add, a delete, or an inquiry.	Field 127—(File Records – Action and Data)
PURG DATE	The date on which the account is to be purged from the file, in MMY format (for format 1 updates) or YYMMDD (for format 2 updates).	Field 73—Date, Action Field 127—(File Records – Action and Data)

Issuer File Maintenance Daily Summary Report Column Headings (for SMS620T)

Column Heading	Contents	Field Number and Name
ACT CD	The 2-digit Action Code that indicates the issuer-designated response code to be used by stand-in processing (STIP) when authorizing on the issuer's behalf.	Field 127—(File Records – Action and Data)
RSP CD	The 2-digit response code that indicates the response given for the transaction. Or, the 4-digit error code that describes why the request was not posted.	Field 39—Response Code Field 48—Usage 1a, 1b (Error Codes)
PIN ALG	The 2-digit code that identifies the algorithm used by the issuer to verify PINs.	Field 127—(File Records – Action and Data)
SPENDING LIMIT AMOUNT	The up to 6-digit U.S. dollar amount that can be approved by STIP for this cardholder in any one day. No decimal places are present.	Field 127—(File Records – Action and Data)
SPENDING LIMIT CUR	CUR is the alphanumeric currency code of the spending limit. Currently, the U.S. Dollar is the only currency available for inclusion on the Exception File.	Field 127—(File Records – Action and Data)
SPENDING LIMIT CNT	Up to 2-digit count of approved cardholder transactions allowed in one day.	Field 127—(File Records – Action and Data)
CRB RGN CODE	The 9-digit code that contains the Card Recovery Bulletin (CRB) Region Code.	Field 127E.2—Region Coding
FILE TYPE	The first two digit of the Target File name. Expected Target File name values are: • E3 - BASE I and SMS CDB • E4 - SMS CDB	Field 101—File Name (first two digits)

SMS626 – Administrative Message Daily Summary Report

This report provides the client confirmation of administrative messages submitted and received during the processing day. It lists 06xx administrative messages initiated and received by the client center when acting as an issuer or acquirer. Transactions displayed on this report do not appear on any other SMS report.

This report can be delivered daily or on demand. When there is no applicable activity, this report is not produced.

This report sorts data by Retrieval Reference Number (R) only.

SMS626 Report Layout

SMS626 Field Descriptions

This table contains descriptions of the column and data line fields for the SMS626 report.

Administrative Message Daily Summary Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number <i>In Message Header</i>
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
FORWARDING INST ID	The identifier of the institution forwarding the administrative message.	Field 33—Forwarding Institution ID
TRAN TYPE	The 4-digit message type.	Not applicable
RECEIVING INST ID	The identifier of the institution that is to receive the administrative message.	Field 100—Receiving Institution ID
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
DESC:	The text message. The presence of STOPRP after the field identifier indicates the text message is a Stop Recurring Payment advice. This field wraps around to a second line if enough data is present.	Field 48—Usage 9 (Text Messages) Usage 9a (Stop Recurring Payment)

SMS628 – Request For Copy Original Daily Summary Report

This report provides the client confirmation of request for copy and request (RFC) for original messages submitted and received during the processing day. It lists all 06xx request for copy, request for original, and copy confirmation messages initiated and received by the client center when acting as an issuer or an acquirer. Transactions displayed on this report do not appear on any other SMS report.

For VisaNet Copy Request and Fulfillment Service (VCRFS) participants who do not have a Visa Exceptions workstation, the SMS628 report also displays VCRFS advices that are delivered online.

This report is delivered daily and on demand. When there is no applicable activity, this report is not produced.

This report sorts data by:

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, transmission date, and time (GMT).

SMS628 Report Layouts

These are samples of the SMS628 report layout for each sort criteria.

SMS628 Field Descriptions

These tables contain the descriptions for the column and data line fields in the SMS628 reports.

Request for Copy/Original Daily Summary Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number <i>In Message Header</i>
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time

Request for Copy/Original Daily Summary Report Column Headings

Column Heading	Contents	Field Number and Name
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
SOURCE ID	ID of the institution that originate the message.	Field 32—Acquiring Institution ID Code
ACPTR NAME	The Card Acceptor Name/Location. This field displays the first 25 characters and the last 2 characters of the Card Acceptor Name/Location with the 2 components separated by a slash symbol (/).	Field 43—Card Acceptor Name/Location
TRAN TYPE	The 4-digit message type.	Not applicable
PROCSS CODE	The 6-digit processing code.	Field 3—Processing Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending the request for copy/original. This field is not present on copy confirmations.	Field 63.3—Message Reason Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
TRANSACTION AMT CUR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the transaction amount.	Field 4—Amount, Transaction Field 9—Currency Code, Transaction
SETTLEMENT AMOUNT (XXX)	The amount of the transaction that affects the settlement account. Because Copy Requests do not impact settlement totals, this field is present only to differentiate transactions sent to the Chargeback Reduction Service (CRS). If settlement amount has two asterisks (**) after the zero (0) amount, it means the transaction was sent to CRS.	Not applicable

Request for Copy/Original Daily Summary Report Data Line Fields

Data Line Fields	Contents	Field Number and Name
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number
ACI:	The one-letter Authorization Characteristics Indicator (ACI).	Field 62.1—Authorization Characteristics Indicator
DESC:	Up to 255-characters of information about the message. This field wraps around to a second line if enough data is present.	Field 48—Usage 8a (Visa Copy Request) Field 125—Supporting Information

SMS Error Reports

SMS error reports assist the client center to reconcile its position with the VisaNet Integrated Payment (V.I.P.) System by providing a detailed listing for the issuer or acquirer of transactions rejected by VisaNet or returned by the Chargeback Reduction Service.

Reports are produced daily for delivery to the subscriber. Subscription is optional for all error reports.

SMS Error Report Field Descriptions

These tables contain column headings and data line descriptions for SMS error reports.

Error Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number In Message Header
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
CARD NUMBER	The primary account number.	Field 2—Primary Account Number

Error Report Column Headings

Column Heading	Contents	Field Number and Name
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
ACQRER/ISSUER ID	The ID of the institution that is acting as acquirer or issuer.	Field 32—Acquiring Institution ID Code
TRAN TYPE	The 4-digit message type.	Not applicable
PROCSS CODE	The 6-digit processing code.	Field 3—Processing Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending the request for copy/original. This field is not present on copy confirmations.	Field 63.3—Message Reason Code
POS CON	The 2-digit point-of-service condition code. This code indicates the condition under which the transaction takes place at the point-of-service.	Field 25—Point-of-Service Condition Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
TRANSACTION AMT CURR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the transaction amount.	Field 4—Amount, Transaction Field 9—Currency Code, Transaction
REJECT CODE	The 4-digit reject code and a brief explanation of the error.	Field 14—(In Reject Message Header)
RETURN REASON CODE	Up to five, 3-digit, Chargeback Reduction Service (CRS) return reason codes that indicate the CRS validation criteria that were violated.	Field 48, Usage 7b, positions 60–74 (Return Reason Codes)

Returned Exception Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number

SMS640 – Issuer Error Detail Report

This report lists all messages initiated by the issuer that were rejected by the Single Message System (SMS) because they did not pass system edits. The Reject Code column contains the reject code and a brief description of the reject reason. Transactions displayed on this report *do not* appear on any other SMS report.

This report is delivered daily and on demand. When there is no applicable activity, this report is not produced.

This report sorts data by **T** – Batch number, transmission date and time (GMT), cardholder number, and trace number.

Raw Data

Visa provides the option of receiving transaction details as raw (unformatted) data. Raw data is distinguished from report data in that it is suited for automated processing. Raw data is available to all SMS issuers and acquirers. Users of this service can create and reconcile their own customized reports. The raw data records are produced from the same sources as SMS transaction detail reports.

Release 2.2 V.I.P. Integrated Format for SMS-Connected Clients

Raw data records are sent to issuers and acquirers when requested by the user and always include a header and trailer record for control. Release 2.2 is only available to clients who have migrated to VSS. These types of records are available:

- Header (V22000)
- Settlement information (V22120)
- Financial transaction (V22200–V22287)

- File maintenance (V22300–V22310)
- Administrative message (V22400–V22461)
- Advice notification transaction (V22600–V22610)
- Trailer (V22900)

After the header, the detail raw data records specified by the user are sent in record type sequence; therefore, all financial transaction records are sent before file maintenance records. Visa provides settlement information in a V22120 record prior to sending each set of financial records.

For clients receiving raw data files through their VisaNet Access Point (VAP), raw data records are delivered to clients in TC 33 records, which includes an embedded raw data record.

Release 2.2 Transmission Options

Raw Data Release 2.2 can transmit raw data using non-concatenated and concatenated methods.

Clients can choose which method to use:

- **Non-concatenated** – A single transmission for Interlink; a single transmission for other SMS activity
- **Concatenated** – One raw data transmission with both Interlink transactions and other SMS transactions with the files concatenated (Interlink first, other SMS second)

Release 2.2 Record Formats

These tables list the Release 2.2 format record types sent to both SMS and Interlink raw data recipients. All records are 130 bytes in length.

Note: The last three digits on these record numbers do not correspond to V.I.P System message numbers. (For example, V22400 does not correspond to V.I.P. message 0400.)

V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
A header record precedes the detail raw data records produced for the raw data subscriber.			
Header Record	V22000	<u>Header Record – V22000</u>	Contains the online settlement date and VSS processing date and identifies the raw data subscriber.
After the header, the detail raw data records specified by the raw data subscriber are sent in sets by affiliate ID, processor, and funds transfer SRE. There is one settlement information record for each set of affiliate ID/processor/funds transfer SRE records.			
Settlement Information	V22120	<u>VSS-Specific – V22120</u>	Contains the interchange total of all settled transactions at the Affiliate ID level and identifies the Funds Transfer SRE, Processor ID, Affiliate ID, and lowest-level SRE associated with the amounts.
Financial Transaction Records V22200–V22282 are generated from a single financial authorization, or preauthorization transaction. Transactions are sorted by transmission date and time. Records V22200, V22210, and V22220 apply to all card programs and types of transactions.			
Financial Transaction	V22200	<u>Financial Transaction Record 1 – V22200</u>	Record 1: Contains standard financial transaction information.
Financial Transaction	V22201	<u>Financial Transaction Record 1.1 – V22201</u>	Record 1.1: Contains standard financial transaction information.
Financial Transaction	V22210	<u>Financial Transaction Record 2 – V22210</u>	Record 2: Contains standard financial transaction information.
Financial Transaction	V22220	<u>Financial Transaction Record 3 – V22220</u>	Record 3: Contains standard financial transaction information.
Financial Transaction	V22225	<u>Financial Transaction Record 4 – V22225</u>	Record 4: Contains data for dispute financials, chargebacks, adjustments, reversals, preauthorized purchases, dispute response financials, representments, cancellations, copy requests and confirmations. Record appears only when these message types occur.

V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
Financial Transaction	V22226	<u>Financial Transaction Record 5 – V22226</u>	Record 5: Contains standard financial transaction information.
Financial Transaction	V22227	<u>E-Commerce 3-D Secure Record – V22227</u>	Record 6: Contains standard financial transaction information.
Financial Transaction	V22228	<u>Financial Transaction Record/ mVisa Record – V22228</u>	Record 7: Contains standard financial transaction information.
Financial Transaction	V22230	<u>Financial Transaction Record/Visa Payment Service-Specific – V22230</u>	Contains Visa-only financial payment service transaction data.
Financial Transaction	V22231	<u>Financial Transaction Record/ Loan-Specific – V22231</u>	Contains additional transaction data when transactions require supporting information.
Financial Transaction	V22235	<u>Financial Transaction Record/ Recurring Payments – V22235</u>	Contains additional transaction data for transactions that are recurring payments.
Financial Transaction	V22240	<u>Financial Transaction Record/ Interlink-Specific – V22240</u>	Contains Interlink-specific transaction data, as well as additional data when transactions require supporting information.
Financial Transaction	V22250	<u>Financial Transaction Record/ ATM-Specific – V22250</u>	Contains ATM-specific data applicable for Visa ATM and Plus ATM transactions only.
Financial Transaction	V22251	<u>Financial Transaction Record/ DE22-Specific – V22251</u>	Contains DE22-specific data.
Financial Transaction	V22255	<u>Financial Transaction Record/Fee Collections/Funds Disbursement Text Message Record – V22255</u>	Contains Fee Collections/Funds Disbursement message text.
Financial Transaction	V22260	<u>Financial Transaction Record/ Multicurrency-Specific – V22260</u>	Contains Multicurrency data (for Multicurrency Service participants only).
Financial Transaction	V22261	<u>Financial Transaction Fee Record – V22261</u>	Contains Financial Transaction Fee Record information.

V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
Financial Transaction	V22270	<u>Financial Transaction Record/ VisaNet POS Acquirer Services – V22270</u>	Contains VisaNet POS Acquirer Services data.
Financial Transaction	V22275	<u>Financial Transaction Record/ National Net Data – V22275</u>	Contains additional transaction data when national net transactions require supporting information.
Financial Transaction	V22276	<u>Financial Transaction Record/ Money Transfer and Personal Payments-Specific – V22276</u>	Contains Money Transfer and Personal Payments data.
Financial Transaction	V22280	<u>Financial Transaction Record/ VSDC-Specific – V22280</u>	Contains Visa Smart Debit/Visa Smart Credit (VSDC) data.
Financial Transaction	V22281	<u>Financial Transaction Record/ VSDC-Specific, Continuation Record – V22281</u>	Contains VSDC data; continuation of V22280 record.
Financial Transaction	V22282	<u>Financial Transaction Record/ VSDC-Specific, Continuation Record – V22282</u>	Contains VSDC issuer-only data; continuation of V22280 and V22281 records.
Financial Transaction	V22285	<u>Financial Transaction Record/Visa Cash Field 55-Specific – V22285</u>	Contains Visa Cash Field 55 data, Record 1.
Financial Transaction	V22286	<u>Financial Transaction Record/Visa Cash Field 55-Specific – V22286</u>	Contains Visa Cash Field 55 data, Record 2.
Financial Transaction	V22287	<u>Financial Transaction Record/Visa Cash Field 55-Specific – V22287</u>	Contains Visa Cash Field 55 data, Record 3.
Records V22300 and V22310 are generated from file maintenance transactions and are issuer-only records. The V22300 record is used for exception and PIN verification data. The V22310 is used for address verification data.			
File Maintenance	V22300	<u>Financial Maintenance Transaction Record – V22300</u>	Contains exception or PIN verification data. A 1-character field indicates whether it is an online (O) or batch (B) transaction.

V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
File Maintenance	V22310	<u>File Maintenance–Address Verification File Update – V22310</u>	Contains address verification file update data. A 1-character field indicates whether it is an online (O) or batch (B) transaction. Applies to U.S. non-Interlink issuers only.
Records V22400–V22461 are generated from an administrative message.			
Administrative Message	V22400	<u>Administrative Message 1 Transaction Record – V22400</u>	Record 1: Contains information from the standard administrative message.
Administrative Message	V22401	<u>Administrative Message 2 Transaction Record – V22401</u>	Record 2: Contains information from the standard administrative message; continuation of V22400 record.
Administrative Message	V22405	<u>Administrative Message 3 Transaction Record – V22405</u>	Record 3: Contains information from the standard administrative message; continuation of V22400 and V22401.
Administrative Message	V22410	<u>Administrative Message Transaction Record/Visa-Specific – V22410</u>	Contains Visa-specific data.
Administrative Message	V22420	<u>Administrative Message Transaction Record/Interlink-Specific – V22420</u>	Contains Interlink-specific data.
Administrative Message	V22430	<u>Administrative Message Transaction Record/VSDC-Specific, Continuation Record – V22430</u>	Contains VSDC-specific data.
Administrative Message	V22461	<u>Administrative Message Transaction Fee Record – (V22461)</u>	Contains message transaction fee information.
Records V22600 and V22610 are generated from advices and are Interlink-specific.			
Advice Notification	V22600	<u>Advice Notification Transaction Record/Interlink-Specific – V22600</u>	Generated for Interlink advices only.

V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
Advice Notification	V22610	<u>Advice Notification Transaction Record/Interlink-Specific – V22610</u>	Generated for Interlink advices only; continuation of V22600 record.
A trailer record completes the data set for the raw data recipient.			
Trailer Record	V22900	<u>Trailer Record – V22900</u>	Contains the detail record count for the file; one per V22000.

Release 2.2 File Header Record

This table shows the Release 2.2 header record for raw data transmissions.

A header record (V22000) precedes each set of raw data records. The header contains the settlement date and identifies the raw data recipient.

Header Record – V22000

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22000: Raw Data Header
Online Settlement Date	7–12	6 N	Not applicable	YYMMDD
Raw Data Recipient	13–22	10 N	Not applicable	First six digits are Visa-assigned identifier. Last four digits are the network ID.
Filler	23–32	10 AN	Not applicable	Space
Settlement System	33–41	9 AN	Not applicable	VSS (left-justified with trailing space)
VSS Processing Date	42–47	6 N	Not applicable	YYMMDD
Filler	48–130	83 AN	Not applicable	Space

Release 2.2 VSS Settlement Information

This table shows the VSS-specific information contained in the V22120 record, including funds transfer SRE, processor lowest-level SRE, and total interchange amounts.

VSS-Specific – V22120

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22120: Settlement Information
Funds Transfer SRE	7–16	10 N	Not applicable	Not applicable
Processor ID	17–26	10 N	Not applicable	Not applicable
Affiliate ID	27–36	10 N	Not applicable	Not applicable
SRE	37–46	10 N	Not applicable	Not applicable
Settlement Service Indicator	47–49	3 N	Not applicable	For a list of valid codes, see .
Issuer Interchange Amount	50–65	16 N	Calculated by Visa	Not applicable
Acquirer Interchange Amount	66–81	16 N ¹	Calculated by Visa	Not applicable
Other Interchange Amount	82–97	16 N ¹	Calculated by Visa	Not applicable
Gross Interchange Amount	98–113	16 N ¹	Calculated by Visa	Not applicable
Filler	114–130	17 AN	Not applicable	Space

¹Amount fields are signed and are expressed in settlement currency. Decimal places are assumed based on the currency.

Release 2.2 Financial Transaction Records (V22200-V22287)

These tables contain descriptions for each of the Release 2.2 financial transactions records (V2220–V22287).

Financial transaction records (V22200–V22287) are generated from a single financial transaction.

- V22200, V22201, V22210, and V22220 contain standard financial transaction information.
- V22225, V22226, V22227, V22228, V22230, V22231, V22235, V22240, V22250, V22251, V22255, V22260, V22261, V22270, V22275, V22276, V22280, V22281, V22282, V22285, V22256, and V22287 contain information for specific transactions or processing.

Financial Transaction Record 1 (V22200)

This table shows the key transaction detail information contained in the V22200 record, including key fields used to identify a transaction type.

Financial Transaction Record 1 – V22200

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22200: Financial Record 1
Issuer-Acquirer Indicator	7	1 AN	Not applicable	I = Issuer A = Acquirer
MVV Code	8–17	10 AN	Field 62.20	
Remote Terminal Indicator	18	1 AN	Field 126.12	
Charge Indicator	19	1 AN		
Product ID	20–21	2 AN		Left-justified, space-filled to the right
Business Application Identifier	22–23	2 AN	Field 104, Usage 2	
Source of Funds	24	1 AN	Field 104	
Product Subtype	25–26	2 AN	Not applicable	Tag ID – 401

Financial Transaction Record 1 – V22200

Field Name	Position	Attribute	Field Sources	Comments
Account Funding Source	27	1 AN	Not applicable	Tag ID – 3387
Affiliate ID	28–37	10 N	Not applicable	If I, the identifier is for the acquirer If A, the identifier is for the issuer
Settlement Date	38–43	6 N	Not applicable	MMDDYY
Transaction Identifier	44–58	15 N	Field 62.2	Not applicable
Validation Code	59–62	4 AN	Field 62.3	Not applicable
Retrieval Reference Number	63–74	12 AN	Field 37	Not applicable
Trace Number	75–80	6 N	Field 11	Not applicable
Batch Number	81–84	4 N	Header Field 10	Not applicable
Request Message Type	85–88	4 AN	Not applicable	Not applicable
Response Code	89–90	2 AN	Field 39	Not applicable
Processing Code	91–96	6 N	Field 3	Not applicable
Card Number	97–115	19 AN	Field 2	Not applicable
Transaction Amount	116–127	12 N ¹	For transaction originator: Field 4	Amount in the currency code in positions 128–130 For destination, calculated by Clearing and Settlement
Currency Code, Transaction Amount	128–130	3 N	For transaction originator: Field 49	Not applicable

¹Amount fields are signed with two implied decimal positions.

Financial Transaction Record 1.1 (V22201)

This table shows the additional detail financial transaction information contained in the V22201 record.

Financial Transaction Record 1.1 – V22201

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22201: Financial Record 1.1
PAN Token	7–25	19 AN	Not applicable	
Token Assurance Method	26–27	2 AN	Not applicable	This field will contain these values: • 00 (ID&V not performed) • 10 (Card issuer account verification) • 11 (Card issuer interactive cardholder authentication - 1 factor) • 12 (Card issuer interactive cardholder authentication - 2 factor) • 13 (Card issuer risk oriented non-interactive cardholder authentication) • 14 (Card issuer asserted authentication)
Token Requester ID	28–38	11 UN	Not applicable	
Visa Merchant Identifier	39–46	8 AN	Field 126.5	This field will contain a unique identifier value assigned by Visa for each merchant included in the program.
PAN Reference Identifier	47–78	32 AN	Not applicable	Populated only in Issuer record.
Secondary Credential	79–97	19 AN		Populated only in Issuer record. Acquirer record will have spaces.
Filler	98–130	33 AN	Not applicable	

Financial Transaction Record 2 (V22210)

This table shows the additional detail financial transaction information contained in the V22210 record.

Financial Transaction Record 2 – V22210

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22210: Financial Record 2
Local Transaction Date	7–10	4 N	Field 13	MMDD
Local Transaction Time	11–16	6 N	Field 12	HHMMSS
GIV Flag	17	1 AN	Header Field 9	Not applicable
GIV Flag Previous	18	1 AN	Header Field 9	Not applicable

Filler	121–130	10 AN	Not applicable	Space

¹Amount fields are signed with two implied decimal positions.

This table describes the advice notification transaction record for Interlink.

Advice Notification Transaction Record/Interlink-Specific – V22610

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22610: Interlink Advice Notification
Acquirer Institution ID	7–17	11 N	Field 32	Not applicable
Filler	18–130	113 AN	Not applicable	Space

Release 2.2 Trailer Record (V22900)

This table contains the field descriptions for the V22900 record.

Trailer Record – V22900

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22900: Trailer
Subscriber ID	7–16	10 N	Not applicable	Not applicable
Filler	17–26	10 AN	Not applicable	Space

Trailer Record – V22900

Field Name	Position	Attribute	Field Sources	Comments
Total Record Count	27–37	11 N	Not applicable	Equals detail record count only
Filler	38–130	93 AN	Not applicable	Space

Release 2.3 Version

In addition to Version 2.2, Visa offers SMS Raw Data Version 2.3 that can be used for reconciliation purposes. (Version 2.3 Raw Data is a subset of Version 2.2 and is not intended to be a complete record of a transaction.)

As with Version 2.2, SMS Raw Data Version 2.3 records are 130 bytes in length and contain Header, Trailer and V23120 VSS-specific records.

Unlike Version 2.2, the V23120 VSS-Specific Record is not optional. If Version 2.3 Raw Data is selected, the V23120 record is produced automatically.

SMS Raw Data Version 2.3 cannot be subscribed to if there is an existing subscription to the V222xx Raw Data series of records.

Release 2.3 Header Record (V23000)

This table describes the V23000 header record.

Header Record – V23000

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V23000
Central Processing Date	7–12	6 N	Not applicable	YYMMDD
Raw Data Recipient	13–22	10 N	Not applicable	First six digits are Visa-assigned identifier. Last four digits are network ID.
Filler	23–130	108 AN	Not applicable	Space

Release 2.3 VSS-Specific Record (V23120)

The V23120 record contains VSS-specific information, including funds transfer SRE and total interchange amounts.

VSS-Specific Record – V23120

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V23120
Funds Transfer SRE	7–16	10 N	Not applicable	Not applicable
Processor ID	17–26	10 N	Not applicable	Not applicable
Affiliate ID	27–36	10 N	Not applicable	Not applicable
SRE	37–46	10 N	Not applicable	Not applicable
Settlement Service Indicator	47–49	3 N	Not applicable	For a list of valid codes, see Appendix C, VSS Codes.
Issuer Interchange Amount	50–65	16 N ¹	Calculated by Visa	Not applicable

Merchant Program Identifier	88–93	6 AN	Field 104 Dataset ID 6E Tag 05	
Loan Type	94–113	20 AN	Field 104 Dataset ID 6E Tag 04	
Service Processing Type	114–115	2 AN	TLV Field 104, Usage 2, Dataset ID 57, Tag 80	This field contains a value that identifies the deferred OCT request type. Valid Values are: • 00 (Not a deferred OCT) • 01 (Originator hold) • 02 (Visa deferred OCT hold, default interval) • 09 (Cancel pending deferred OCT request) • 0Q (Query the status of the deferred OCT) • 0R (Recycling Payout) Note: The values of 09, 0Q, and 0R are logged only for the originating acquirer.
Filler	116–131	15 AN	Not applicable	

¹Amount fields are two implied decimal points.

Release 2.3 Financial Transaction Record 4 (V23203)

This table shows the additional information contained in the V23203 record, such as merchant and record information.

Financial Transaction Record 4 – V23203

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN		V23203
PAN Reference Identifier	7–38	32 N	Not applicable	Populated only in Issuer record.
Secondary Credential	39–57	19 AN		Populate only Issuer record. Acquirer record will have spaces.
Filler	58–130	73 AN	Not applicable	Space filled.

Release 2.3 Financial Transaction Fee Record (V23210)

This table shows the transaction fee information contained in the V23210 record.

Financial Transaction Fee Record – V23210

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V23210
Reimbursement Fee	7–21	15 N	Calculated by Visa	Six (6) implied decimal positions.
Reimbursement Fee Debit/ Credit Indicator	22	1 AN	Not applicable	C for Credit and zero amount, D for Debit
Transaction Integrity Fee	23–33	11 N	Calculated by Visa	Six (6) implied decimal positions. Populated only for A (Acquirer) record.
Transaction Integrity Fee Debit/Credit Indicator	34	1 AN	Not applicable	C for Credit and zero amount, D for Debit

Financial Transaction Fee Record – V23210

Field Name	Position	Attribute	Field Sources	Comments
Additional Token Response Information	35	1 AN	Field 44.3	This field contains a value that identifies if the transaction is eligible for token programs. Valid values are: • 1 (Token program) • Spaces (Not applicable)
B2B Program ID	36–37	2 AN	Not applicable	This field will contain the B2B program identifier.
Enabler Verification Value (EVV)	38–42	5 AN	Not applicable	5-alphanumeric character (A-Z, 0-9) – no special characters allowed.
Applied Special Service	43	1 AN	F111.56.89	Values : 1 = VDCAP Space = Default
Filler	44–130	81 AN	Not applicable	Spaces

Release 2.3 Trailer Record (V23900)

This table contains the field descriptions for the V23900 record.

Trailer Record – V23900

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V23900
Subscriber ID	7–16	10 N	Not applicable	Not applicable
Total Record Count	17–27	11 N	Not applicable	Equals detail record count only
Filler	28–130	103 AN	Not applicable	Space

Signed Amount Fields

The code used in the last digit of a signed numeric field stores the sign of a number (either + or -). Its purpose is to save space since the sign will only occupy a half-byte. The other half-byte gives the last or right-most digit of the amount. Possible values are “{”, “}” or the letters **A** to **R**. (See the following table for the character translations.)

Examples:

1. If the signed amount field has two implied decimal positions, 00000001234E is equivalent to +123.45.
2. If the signed amount field has no decimal position, 00000001234N is equivalent to -12345.

Character Translation

Character	Last digit	Sign
